Lord Mayor Introduction

Shaping the future of a city requires bold thinking and long-term planning.

The capital city council is custodian of the heart of our state and it's up to us to be both aspirational and audacious in our vision for Adelaide's CBD.

But we also need to deliver on the core business of council – roads, rates, and rubbish – if we want to be bold in other areas and live in a city of which we can be proud.

The City of Adelaide's Strategic Plan 2024–2028 charts a course for our Council to achieve its long-term goals across the economy, the environment and throughout our community.

This Strategic Plan aspires to improve our streetscapes, deliver economic viability for businesses, help property owners to better utilise and profit from their investment and boost residential access, affordability and amenity.

The Plan also maps out how Council can maintain its assets, reduce kerbside waste, achieve zero functional homelessness, and sensibly increase our population to 50,000 people by 2036.

It's also about providing certainty for business owners, potential investors, and residents – matched by a commitment to deliver on our promises.

Our residents, workers, and visitors are also an important part of our Strategic Plan, and we value your feedback during this consultation period.

The Strategic Plan gives us an opportunity to choose a different trajectory for Adelaide, and its future over the next four years.

But importantly, it will be our promise to deliver on our commitments.

Dr Jane Lomax-Smith AM
Lord Mayor City of Adelaide

Our City

The City of Adelaide is the capital of South Australia and the heart of the state's civic, cultural and commercial life. This Strategic Plan acknowledges that as a capital city council we need to manage our responsibilities to our 26,000 residents and to all 1.7 million South Australians.

We are bold, aspirational and innovative.

Built on the traditional lands of the Kaurna people with a rich and deep Aboriginal heritage, Colonel Light planned Adelaide in 1837 with an inspired idea: an active city centre and an abundance of open space with the River Torrens at its heart. Colonel Light laid out the streets surrounded by Park Lands with squares and gardens to create balance in our built and natural form. The Park Lands are now nationally heritage-listed and are cherished for their beautiful amenity, array of uses and unique role as a gateway to the city.

Our iconic Adelaide Central Market, Rundle Mall and Park Lands provide commercial, social and green spaces for people to meet, play and relax. Adelaide is an attractive, contemporary city which embraces quality design innovation while recognising and valuing the city's cultural and built form heritage and the unique features of Colonel Light's plan.

Adelaide is known for being progressive, resilient, bold, trailblazing and enterprising. This strong Adelaide spirit has seen us withstand the times of global social and economic disruption, and emerge with a reputation for being a leading commercial, knowledge sharing and ideas exchange city.

We aspire to strengthen what we know makes Adelaide one of the world's most liveable cities. We are leveraging our past and looking to the future to grow an exceptional Capital City that all South Australians can be proud of.

Our Opportunities

This Plan has been developed in a time of change and uncertainty for our city and community – the post pandemic environment, inflation forecasts, housing crisis and climate change are at the top of Council’s agenda. These challenges bring new opportunities.

Over the next decade our population will grow and become more diverse. Health, wellbeing, equity and inclusion will continue to play important roles in supporting a changing population. We will need new developments to provide quality housing for a projected 50,000 residents in the near future. Our City Plan will guide where this growth should occur, complemented by revitalisation of our streets and precincts where year-round events and quality amenities will create vibrancy and celebrate our rich culture.

Our city in the future will be an interconnected collection of unique neighbourhoods and precincts which offer diverse local experiences. We will promote social connectivity by making sure our streets are lively and accessible and putting people and nature first when we design our public spaces.

Action on climate change has become more urgent and we will support our city to adapt and be climate resilient. We will ensure that our residents and visitors are prepared, and where possible protected, from

hazards such as heatwaves. Adelaide can be a nation leading Green City in a Park with new ways to re-use old buildings and a greener built form, supporting a circular economy and low-carbon city.

Uncertain global economic conditions generated from COVID-19 recovery, resource and labour shortages, disrupted supply chains, interest rate rises, international conflicts and geo-political tensions, are likely to continue impacting national and local economies. These challenges have encouraged us to re-consider how we procure, how we develop our local workforce, how we can be financially sustainable and how we partner across all levels of government and with private enterprises.

We will focus on our economy and how people are choosing to work, emerging industries and the ongoing digital transformation through artificial intelligence and cashless transactions. We will support an inclusive, equitable and thriving economy, enabling current and emerging businesses to be innovative and globally competitive.

By being bold in how we respond to the challenges that will unfold over the coming years, we will create new opportunities that will have a transformative impact on our city, community and businesses.

Our Role

The City of Adelaide has developed this Strategic Plan (the Plan) as guided by the *Local Government Act (SA) 1999*, which requires councils to develop and adopt plans for the management of its area, informed by the provisions of the *City of Adelaide Act 1998*. This Plan is supported by a Resource Plan which guides the finance, infrastructure and resources that underpin delivery over the next four years, as well as a suite of longer-term interconnected vision and economic plans.

This Plan is not only for Council, it is a Plan for our ratepayers, residents, visitors, workers and all key stakeholders. As the Capital City Council for all South Australians, we need to be outward looking, to work collaboratively with Federal, State and Local Governments and to demonstrate excellence, innovation and exceptional service provision.

This Plan reflects our commitment to working with others to shape the future of our City for the benefit of the whole State. We will continue to build strong partnerships to advocate for the benefit of the city and leverage our relationships to seek co-investment, grants and contributions to the benefit of our community. Key partnerships include those with the Federal, State and Local Government sectors, and strategic non-government (private sector, community groups and not-for-profit) organisations.

In developing this Plan we have considered our diverse and complex roles and the levers we can use to implement and influence change.

The City of Adelaide is a:

- **Leader:** Developing strategies, policies, programs and services that chart a clear course for Adelaide.
- **Owner/Custodian:** Managing community assets that are entrusted to Council.
- **Regulator:** Undertaking our role under State legislation to keep the city safe, clean and orderly.
- **Information Provider:** Providing information about Council and the city to the general community and stakeholders.
- **Advocate:** Representing the interests of our community to influence issues/opportunities that impact our city.
- **Facilitator/Initiator:** Bringing together and engaging with individuals, community groups, industry, government agencies and other stakeholders to address issues impacting the city.
- **Agent:** Providing of services to the community on behalf a third party (e.g. State or Federal Government) where there is demonstrated need and significant benefit to the community.
- **Direct Provider:** Delivering our core services, projects or programs.
- **Partner:** Working with others to deliver services, programs or projects outcomes.

Our Response

Over the past decade, we have heard from our community that our city must grow if we want to thrive, but this growth should not come at the expense of what has made our city one of the most liveable in the world.

To ensure we maintain our liveability and to support growth, these principles will underpin everything we do:

- Exceptional Amenity – Be bold and courageous in our pursuit of excellence for our city.
- Quality Housing – Strive for liveability and affordability to attract and retain residents.
- Community Connection – Strengthen connection, accessibility, diversity and inclusivity by putting people first.
- Unique Experiences – Create interesting experiences for our residents, workers and visitors.
- Climate Resilience – Embed climate resilience in all that we do.
- Economic Growth – Encourage innovation, investment and development in current and emerging sectors.
- Budget Repair – Provide quality services and ensure long-term financial sustainability.

Resource Plan 2024–2028

Council has developed a Resource Plan which underpins this Plan. It outlines the financial and non-financial resources required to achieve our strategic objectives over the next four years. The Strategic Plan and the Resource Plan will work in concert with the Long-Term Financial Plan, Asset Management Plans and City Plan to inform the Annual Business Plan and Budget. Council's decision making is informed by strategies, plans and policies that articulate the provision of services, programs and projects. Program Plans ensure all work is planned and delivered in a coordinated way.

The role of a Capital City Council is diverse and complex, which impacts the way we deliver services. We are a leader, a service provider, a regulator, an owner, a facilitator and an advocate. By measuring the delivery of our objectives and key actions, our community will know what we have achieved. Targets provide further direction to ensure we are delivering on our vision for the future, while allowing Council to measure and track progress through quarterly reports and an Annual Report each year.

Financial

Financial Principles

To deliver on our priorities and ensure financial sustainability for current and future generations, the below Financial Principles have been applied:

Council will:

- Continue to deliver current services and assets, indexed in line with Consumer Price Index (CPI)
- Apply fees and charges that are equitable and responsive to changing community needs
- Ensure an effective rating system
- Maintain an operating surplus
- Capitalise on external funding opportunities through retiming projects to align to stakeholder objectives, recognising the potential need for increased borrowings in order to respond to opportunities
- Consider new and different revenue streams to reduce reliance on existing revenue sources
- Adjust rate revenue after consideration of all other budget components and use growth in rate revenue to partly fund servicing new rateable properties and to service new borrowings
- Fund new or enhanced services, assets or maintenance requiring an increase in operating costs from the adjustment of priorities, rate revenue or other revenue increases and/or through savings
- Base all capital renewal expenditure on our asset management plans
- Consider the disposal, purchase and/or repurposing of property assets to support community outcomes, without incurring a financial loss
- Use borrowings to fund new and upgrade projects where appropriate (which include major projects)
- Ideally, fund operations, expenses or renewal projects from within the budget.

When considering these principles, Council considers the service or project in the context of Council's:

- Roles and responsibilities;
- Statutory obligations;
- Ability to give effect to an adopted strategy, policy or plan;
- Levers and discretion to intervene to address market challenges, opportunities or failure; or
- Ability to gain value, efficiency or effectiveness in relation to dollars spent.

Council's Financial Principles ensure that Council's measures and targets can be met over the longer term.

Financial Sustainability

The Council's financial resources have the capacity to absorb cyclical economic factors, social trends and financial shocks. Funding decisions are an important method of providing the capacity to meet financial sustainability in the medium and long term, along with planning, stability of revenue and costs, proportionality of revenues with benefits over time and a 'balanced' operating result.

Financial sustainability is also central to supporting intergenerational equity (or fairness), which ensures that the costs associated with expenditure are spread over time relevant to the communities that will draw benefit. Council's Long Term Financial Plan has assumed that existing service levels will be maintained, while seeking efficiency improvements in line with appropriate planning, measures and benchmarks.

Long Term Financial Plan

A high level 10-year Long Term Financial Plan has been developed as part of Council's ongoing financial planning to assist Council to plan within a longer term strategic framework. The key components of the plan are:

- Assessment of Council's current financial position and achieving longer term financial sustainability.
- Ensuring Financial Principles are met.
- Consideration of Council's appropriate role and responsibilities.
- Ensuring alignment with the Strategic Plan and maintenance of high priority expenditure programs.
- Ensuring alignment with agreed service provision and delivery standards.
- Ensuring alignment with Revenue and Financing guidelines, including Rating and Treasury Policies.
- Ensuring alignment with Asset Management Plans.
- Ensuring alignment with other plans and strategies.
- Costing proposed strategies before they are agreed.

- The specific assumptions and outcomes underpinning the Long Term Financial Plan are:
- Rates Revenue in line with forecast inflation (in addition to growth from new developments).
- Fees and charges in line with forecast inflation.
- Salaries and wages forecasts based on enterprise agreements; once expired, Wage Price Index (WPI) applied.
- Other revenue and expenditure growth, in general, in line with forecast inflation.
- Interest rates relative to market expectations.
- Capital renewal expenditure in line with Asset Management Plans (AMPs).
- Capital enhancements (new and upgrade) in line with Council Decision to fund \$15 million per annum over current term of council and assumed continuation.

The Long Term Financial Plan will be periodically adjusted to reflect the recent decisions of Council to ensure sustainability is maintained.

Four Year (Long Term) Financial Plan

Council’s four year financial view, taken from the Long Term Financial Plan, provides the funding for Council’s Strategic Plan. This period sees significant investment in Council priorities including upgrades to several streets, partnerships with the State Government on major projects such as the former Adelaide Aquatic Centre site, Strategic Property developments including the Franklin Street Bus Station redevelopment, Market Square and 88 O’Connell Street and ongoing delivery of core services. Significant renewal projects including Torrens Weir and King William Street Bridge influence future year.

Rate revenue

Rates are an important source of revenue, accounting for approximately 60% of the total annual revenue. Council assumes a 3% growth in future rate income, primarily from valuation reviews and new properties.

Other revenue

The Council operates a number of fee based facilities including the Adelaide Aquatic Centre, Adelaide Golf Links, UPark, Adelaide Town Hall and the Property Portfolio (including Adelaide Central Market). Each fee based facility provides valued services for ratepayers and visitors and is an important source of revenue. Council generates income from statutory charges, set by State Government legislation, in addition to the charging of fees for Council services including on-street parking-machine tickets and hire income for Council properties.

The Long Term Financial Plan identifies borrowing as an important funding source particularly for strategic expenditure relating to new and upgraded projects and strategic property activities. Borrowing

is undertaken in accordance with Council's Treasury Policy which underpins decision making for the funding of Council's operations in the context of cash flow, budgeting, borrowings and investments.

Total Capital	100,734	80,119	73,352	68,979	71,062

The Council owns, and is responsible for the management, operation and maintenance of a diverse asset portfolio that provides services and facilities for city users. Asset Management Plans have been developed to provide effective and comprehensive management of Council's asset portfolio, with a three year view to deliver the required levels of service for the community and meet strategic and legislative requirements. Rolling condition audits provide information on the ongoing improvement of assets to ensure they inform the Annual Business Plan and Budget.

Renewal and replacement capital expenditure is based on Asset Management Plans which consider the optimal timeframe for asset replacement based on whole of life costing. Total capital expenditure shall be managed in a way which avoids disruptive adjustments to activities, programs and revenue raising efforts.

Property and New and Upgraded Assets

Council's property portfolio seeks to address strategic objectives for growth in the city and provides additional net revenue to Council, assisting to manage expenditure commitments. Consequently, it is important that both the value of the portfolio, and its returns (both net of borrowings), are protected to avoid adverse impacts with regard to intergenerational equity, rates and expenditure programs in the future.

The Property Strategy aims to optimise the performance of the property portfolio. It promotes a partnership approach to acquire or repurpose property assets with the private sector and other tiers of government to leverage their value, to meet strategic objectives or to sell under-performing assets with sale proceeds reinvested into new income generating opportunities.

Resources

Service Delivery Influences

Influences which may impact on the scope and level of services to be provided over the next four years include:

- Local Government Price Index increases on relevant goods and services, which has historically tracked at approximately 1% above the CPI.
- Current Enterprise Agreements for most staff provide for wages and salary increases of 3% and 4% from 2024.
- Increase in utility charges with indications that sustainability premiums will continue into the future.
- A stronger focus on renewals and maintenance of assets, specifically to mainstreets.
- Service and infrastructure needs for a growing and changing population in the city.
- Commitments to major projects and partnership initiatives.
- Council revenue from commercial operations and other fees and charges expected to be impacted due to fewer people working in the city post-COVID-19.
- Impact of increasing interest rates on Council's borrowings.

Information Technology

Council recognises the strategic importance of technology investment to deliver integrated technology solutions that improve access to information, streamline processes, safeguard information and systems and encourage collaboration across the organisation, to enable the delivery of customer focused services to our community. The Business Systems Roadmap sets out the program of works over the next four years in Council's ongoing journey to be a digitally enabled, integrated, innovative, secure and inclusive Council.

Council has an ongoing program of works that focusses on four key areas:

- Customers at the centre: We understand our customers and provide services to meet their diverse needs.
- Secure and reliable: We train our staff and use technology to increase safety and security for our customers and their information.
- Data Driven: We use data and insights to improve our engagement and experiences with our customers and communities to make better and faster decisions.
- Seamless: Our services are simple, intuitive, with purpose and seamless for a better experience for our customers and communities.

Appropriate resourcing capacity and capability is critical to deliver on the Strategic Plan responsibilities and be responsive to new and emerging challenges. Workforce planning enables the Corporation to attract, develop and retain the skills, knowledge and experience required to deliver across the duration of the Strategic Plan, and creating a performance culture in which individuals are aligned to delivering organisational priorities.

The Corporation, in the way it supports customers, conducts business, delivers services, develops its people and supports good governance must reflect the Council's vision and enable its achievement. The Corporation's commitment to be genuinely responsive to the changing needs of people, business and communities is paramount to the delivery of the Strategic Plan, requiring effective delivery now, and clear plans for the future.

A focus on efficiencies and continuous improvement will enable FTE numbers to be maintained at current levels over the four-year period. At times, consultancy services or additional contract or temporary staff will be required to ensure our service delivery and people resources are scalable.

Employee Values and Behaviours

At City of Adelaide our values provide the context for how we work together and with others. They are the standard against which we hold ourselves and others accountable. We are committed to building a high performing, inclusive and sustainable workplace for the future that is based on and fosters these values and recognises alignment to them is integral to our culture.
