# Asset Management Plan - Public Lighting & Electrical - Approval for Consultation

Strategic Alignment - Our Places

**Public** 

Tuesday, 19 March 2024
Infrastructure and Public Works
Committee

#### **Program Contact:**

Mark Goudge, Associate Director Infrastructure

#### **Approving Officer:**

Tom McCready, Director City Services

# **EXECUTIVE SUMMARY**

Asset Management is a key business function undertaken by Councils to ensure their infrastructure portfolio is managed responsibly and effectively. Under the *Local Government Act 1999 (SA)*, Councils are legislatively required to establish a suite of Strategic Management Plans, which guide future planning, asset management and financial sustainability. Included in this suite are six Asset Management Plans (AM Plans), which are currently in the process of being reviewed and updated. Each AM Plan will require Council adoption prior to 30 June 2024 to enable review by the Essential Services Commission of South Australia (ESCOSA).

The draft Public Lighting and Electrical Infrastructure AM Plan has been informed by a community engagement process to understand current levels of community satisfaction and has been developed consistently with the Recommended Levels of Service report approved by Council in October 2023. The AM Plan has been prepared on the basis of documenting the asset management activities and funding requirements (operations, maintenance and renewal) recommended for inclusion into the Long-Term Financial Plan (LTFP) to achieve our asset performance targets (levels of service).

Work is currently underway to significantly improve the spatial data, asset condition information and asset attribute information utilised within this Public Lighting and Electrical Infrastructure Asset Management Plan. These activities align with good asset management practices and will provide more granular information to enable robust analysis to inform future decision making. The outcome of this work, which is due for completion by June 2025, will enable a more mature Public Lighting and Electrical Infrastructure Asset Management Plan with a higher degree of confidence for the future requirements of the asset class. Therefore, due to the current maturity level of the asset data, this Public Lighting and Electrical Infrastructure Asset Management Plan will be considered an interim document, which will be updated following the completion of the spatial data improvements, condition audit, and subsequent modelling and analysis.

The draft AM Plan's renewal strategy aims to minimise the number of assets that deteriorate into a poor condition and prohibit assets reaching a very poor condition, as well as ensuring heritage assets are managed in accordance with relevant conservation management plans. This ensures we continue to provide services in line with the community's expectations, appropriately manage risk and optimise whole-of-life costs. The forecast renewal costs are approximately \$4.88 million on average each year across the ten-year planning period. The current LTFP accommodates renewal funding of \$1.76 million on average each year (36% of the forecast costs). This means that additional funding of \$3.12 million on average each year will need to be considered to deliver the recommendations of the AM Plan.

While this AM Plan does not identify forecast costs associated with new and upgrade projects, ongoing integrated planning will ensure asset renewals are aligned (where practical) with key new and upgrade projects required to deliver our Strategic Plan objectives, identified within the Resource Plan and Business Plan and Budget.

The purpose of this report is to seek Council endorsement to undertake community consultation for a six-week period, ahead of the future adoption of the Public Lighting and Electrical Infrastructure AM Plan scheduled for June 2024. The consultation will include a YourSay engagement page in conjunction with a drop-in session proposed for the City and North Adelaide, with physical and electronical promotion through City of Adelaide (CoA) platforms (e.g. community centres, social media).

# RECOMMENDATION

The following recommendation will be presented to Council on 26 March 2024 for consideration

# THAT THE INFRASTRUCTURE AND PUBLIC WORKS COMMITTEE RECOMMENDS TO COUNCIL THAT COUNCIL

- 1. Notes the draft Public Lighting and Electrical Infrastructure Asset Management Plan as per Attachments A and B to Item 7.7 on the Agenda for the meeting of the Infrastructure and Public Works Committee held on 19 March 2024.
- 2. Endorses the draft Public Lighting and Electrical Infrastructure Asset Management Plan as per Attachments A and B to Item 7.7 on the Agenda for the meeting of the Infrastructure and Public Works Committee held on 19 March, for the purposes of public consultation.

# **IMPLICATIONS AND FINANCIALS**

| City of Adelaide<br>2024-2028<br>Strategic Plan                        | Strategic Alignment – Our Places   |
|--|--|
| Policy   | Asset Management Policy Strategic Asset Management Plan Public Communication and Consultation Policy   |
| Consultation   | Consultation on the draft Public Lighting and Electrical Infrastructure AM Plan will be open for a six-week period from Tuesday 2 April 2024 to Friday 10 May 2024. The results of the consultation feedback and analysis will be reported to Council in June 2024.                        |
| Resource   | Consultation will be conducted using existing resources. There are no additional resources required as a result of this report.  |
| Risk / Legal /<br>Legislative  | The review and update of Asset Management Plans, including levels of service, is required every four years or within two years of a general Council election pursuant to Section 122 of the <i>Local Government Act 1999 (SA)</i> .  |
| Opportunities  | Not as a result of this report   |
| 23/24 Budget<br>Allocation   | Not as a result of this report   |
| Proposed 24/25<br>Budget Allocation                                    | 2024/25 budgets will be set by Council through the Annual Business Plan and Budget process (noting Asset Renewal Funding Ratio targets of between 90-110%). Asset renewal is generally funded through operational revenue, which includes rates, commercial revenue and grant allocations. |
| Life of Project,<br>Service, Initiative<br>or (Expectancy of)<br>Asset | Not as a result of this report   |

| Ongoing Costs<br>(eg maintenance<br>cost)                              | As documented within AM Plan (no change)   |
| Other Funding<br>Sources   | External funding opportunities will continually be pursued to offset costs, bring forward works, or provide for additional enhancements.   |

# DISCUSSION

1. The purpose of this report is to present the draft Public Lighting and Electrical Infrastructure AM Plan and seek Council endorsement to release the summary and comprehensive versions of the Plan (as presented in **Attachments A and B**) to community consultation for a six-week period, ahead of the future adoption of the Public Lighting and Electrical Infrastructure AM Plan currently scheduled for June 2024.

#### **Background**

- 2. Under the *Local Government Act 1999 (SA)*, we are required to develop AM Plans for a period of at least 10 years, which includes information about the operation, maintenance, renewal, acquisition, expansion, upgrade and disposal for each infrastructure asset class under our care and control.
- 3. The City of Adelaide has six AM Plans, which include Transportation, Park Lands & Open Space, Buildings, Water Infrastructure, Public Lighting & Electrical Infrastructure and Urban Elements.
- 4. The City of Adelaide's Public Lighting and Electrical Infrastructure portfolio is valued at approximately \$145.6 million. It is made up of 7829 streetlighting columns, 9986 streetlights, 993 switchboards, 153 CCTV cameras and 41 electric vehicle charging stations. These assets provide services that facilitate safe access and enjoyment of the City and it's amenities at night, in conjunction with supporting pedestrians, cyclists, motorists move into and around the City and Park Lands.
- 5. The Public Lighting and Electrical Infrastructure AM Plan has been developed with alignment to the City of Adelaide Strategic Plan 2024-2028.
- 6. The Public Lighting and Electrical Infrastructure AM Plan has been informed by a community engagement process to understand current levels of community satisfaction and has been developed consistently with the Recommended Levels of Service report approved by Council in October 2023.
- 7. AM Plans are technical documents, which are prepared in accordance with industry standard templates developed by the Institute of Public Works and Engineering Australasia (IPWEA) to ensure alignment with best practice and ISO 55000.
- 8. Due to the length of the Public Lighting and Electrical Infrastructure AM Plan, a concise standalone summary document has also been prepared (Public Lighting and Electrical Infrastructure Asset Management Plan Summary) to improve community engagement and understanding.
- 9. Work is currently underway to significantly improve the spatial data, asset condition information and asset attribute information utilised within this Public Lighting and Electrical Infrastructure Asset Management Plan. These activities align with good asset management practices and will provide more granular information to enable robust analysis to inform future decision making. The outcome of this work, which is due for completion by June 2025, will enable a more mature Public Lighting and Electrical Infrastructure Asset Management Plan with a higher degree of confidence for the future requirements of the asset class.
- 10. Therefore, due to the current maturity level of the asset data, this Public Lighting and Electrical Infrastructure Asset Management Plan will be considered an interim document, which will be updated following the completion of the spatial data improvements, condition audit, and subsequent modelling and analysis.

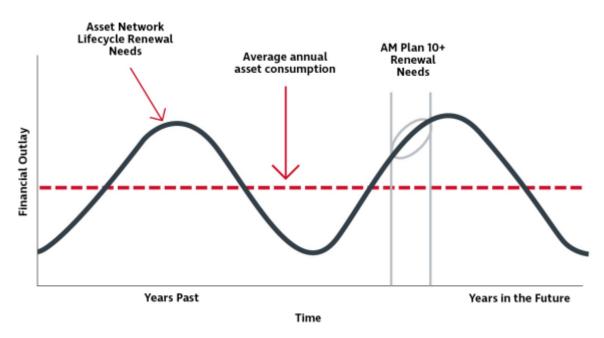

#### **Lifecycle Management Summary**

- 11. The Public Lighting and Electrical Infrastructure AM Plan defines the current state / condition of our \$145.6 million asset portfolio, as well as the asset management activities and associated funding requirements recommended for inclusion into the LTFP to achieve our asset performance targets (levels of service).
- 12. This AM Plan's renewal strategy aims to minimise the number of assets that deteriorate into a poor condition and prohibit assets reaching a very poor condition. This strategy ensures we can continue to provide services in line with the community's expectations, appropriately manage risk and optimise whole-of-life costs. Renewal forecasts within the Public Lighting and Electrical Infrastructure AM Plan are presented in 2024/25 dollars.
- 13. Asset renewal forecasts have been derived based on the average annual asset consumption of the Public Lighting and Electrical Infrastructure asset class. It is supported by a detailed 4-year renewal plan, which has been developed utilising existing asset data captured within our Asset Management System, validated through on-site inspections, in conjunction with workshops with key operational staff to identify and discuss known performance deficiencies and risks.
- 14. Asset renewal forecasts include a luminaire renewal program, which aims to convert all existing High Intensity Discharge Lamps to LED technology. LED technology enables better outcomes with respect to lighting levels, while also being more energy efficient with lower operating costs.

- 15. This AM Plan does not identify forecast costs associated with new and upgrade projects, however ongoing integrated planning will ensure asset renewals are aligned (where practical) with key new and upgrade projects required to deliver our Strategic Plan objectives, identified within the Resource Plan and Business Plan and Budget.
- 16. This AM Plan does not identify financial forecasts associated with asset disposal, however where recommended, significant assets will be identified for decommissioning and disposal through Council Reports, to then be considered within the LTFP and Business Plan and Budget.
- 17. This AM Plan does not propose any forecast increases for operational and maintenance activities. Following the completion of this Asset Management Plan, operations and maintenance standards will be reviewed for Public Lighting and Electrical Infrastructure assets, to formalise intervention levels and response times for general maintenance and establish an acceptable balance between cost, risk, and customer expectations. The associated financial impacts will need to be further considered in future revisions of this Asset Management Plan and the Long-Term Financial Plan.
- 18. Current operations and maintenance budgets accommodate maintenance inspections for critical assets and which inform legislative maintenance and general maintenance programs. Currently, not all general maintenance activities can be accommodated within existing budget allocations, resulting in works being prioritised with respect to budget provisions within the Long-Term Financial Plan and Annual Business Plan and Budget. Where there are any critical maintenance requirements that cannot be accommodated within exiting budgets, these are assessed through regular budget reviews to ensure resources are appropriately re-allocated.

#### **Financial Summary and Implications**

- 19. The development of the draft Public Lighting and Electrical Infrastructure AM Plan has identified additional funding requirements, when compared against the adopted LTFP to enable the optimal renewal of our assets and continue providing current levels of service, which aim to provide services in line with community expectations, whilst optimising whole-of-life costs and appropriately managing asset risk.
- 20. The draft Public Lighting and Electrical Infrastructure AM Plan forecasts renewal costs of approximately \$4.88 million (un-escalated) on average each year across the ten-year planning period, which sets the base for measuring the ARFR. That is, if \$4.88 million is fully expended, this would reflect an Asset Renewal Funding Ratio (ARFR) of 100%.
- 21. Currently, the renewal funding allocation for Public Lighting and Electrical Infrastructure within the LTFP is \$1.76 million (un-escalated) on average each year, which represents 36% of the funding required to deliver the recommended asset renewals outlined in the draft AM Plan.
- 22. Contributing factors for the gap between the forecast renewal costs and current budgets within the LTFP include:
  - 22.1. Not achieving our ARFR targets over the past 4 financial years as a result of COVID-19 resourcing impacts and project delays associated with post-pandemic market saturation.
  - 22.2. Undertaking a comprehensive review of existing funding allocations and appropriately re-forecasting asset renewal requirements within this Asset Management Plan (noting the last comprehensive update was undertaken in 2015, with a desktop update made to financial forecasts and LTFP in 2021).
  - 22.3. Ensuring we accurately recognise asset replacement costs, utilising current construction costs and unit rates that take into consideration increasing costs associated with inflation and industry escalations. (We have experienced significant increases in project unit rates, noting that the Local Government Association (LGA) have indicated that costs and materials have increased up to 25% post pandemic).
- 23. It is important to understand that infrastructure networks are comprised of assets with varying age profiles and different useful lives and replacement costs. This results in AM Plans often identifying the need to replace more assets in some periods when compared with others and means that it is very unlikely that asset renewal needs will be consistent over time. The figure below highlights a typical scenario of varying asset renewal expenditure requirements over the asset lifecycle.

- 24. The financial strategy associated with funding the AM Plans is proposed to be consistent with the 2023/24 to 2032/33 LTFP, ensuring we continue to deliver upon our current suite of services and asset maintenance requirements, where asset renewals are prioritised based on audit condition and risk.
- 25. Funding requirements will need to be considered in the development of the 2024/25 Business Plan and Budget. Council will need to consider financial levers available in order to ensure sufficient funding of both operational and renewal funding requirements.

#### **Improvement Plan**

26. Through the development of this AM Plan, a number of improvement actions and next steps have been identified to promote continuous improvement and improved overall asset management maturity. These are identified in Section 9 of the Public Lighting and Electrical Infrastructure Asset Management Plan Summary (Attachment A).

#### **Community Consultation**

- 27. In accordance with section 122(6) of the *Local Government Act 1999 (SA)*, Council will follow the relevant steps in our public consultation policy to facilitate community feedback on the draft Public Lighting and Electrical Infrastructure AM Plan.
- 28. The consultation process will seek feedback from the community including our residents, ratepayers, businesses, and other key stakeholders.
- 29. Consultation will open on Tuesday 2 April 2024 and close on Friday 10 May 2024 (6-week duration in line with our Public Consultation Policy, noting the minimum legislative requirement is 21 days).
- 30. Notification of public consultation will be provided through the following avenues:
  - 30.1 A Public Notice in the Government Gazette and an advertisement in The Advertiser.
  - 30.2. Information published on the City of Adelaide website.
  - 30.3. Promotional advertisements on all Customer Service points including the Digital screens that Council operates, our Libraries and Community Centres.
  - 30.4. Social Media campaign via City of Adelaide social media channels.
- 31. 'Your Say Adelaide' the community will be encouraged to engage and make written submissions on the draft Public Lighting and Electrical Infrastructure AM Plan through City of Adelaide's website, linking to detailed information on the 'Your Say Adelaide' platform.
- 32. Two drop-in sessions will also be scheduled at community centre locations in the City and North Adelaide.
- 33. Submissions and feedback will also be able to be sent in writing or through e-mail.
- 34. Hard copy submission forms will be available inside Consultation Packs from the City of Adelaide's Customer Service Centre, libraries and community centres.

35. The community will have the opportunity to have their questions answered by City of Adelaide project staff over the phone or by booking an appointment to chat to staff in person.

#### **Next Steps**

- 36. Subject to Council endorsement, the draft Public Lighting and Electrical Infrastructure AM Plan will be released for public consultation, with community engagement scheduled to occur from Tuesday 2 April 2024 to Friday 10 May 2024.
- 37. Following the six-week public consultation period, engagement feedback will be reviewed and findings will be presented to Council in conjunction with the finalised Public Lighting and Electrical Infrastructure AM Plan in June 2024 for adoption.
- 38. Following Council adoption of the Public Lighting and Electrical Infrastructure AM Plan, the LTFP will be updated.
- 39. Adoption of renewal budgets will be considered by Council on an annual basis through the Business Plan and Budget process.
