Brown Hill & Keswick Creeks Storm Water Board Certification of financial statements As at 30 June 2024

We have been authorised by the Board to certify the financial statements in their final form. In our opinion:

- The accompanying financial statements comply with the Local Government Act 1999, Local Government (Financial Management) Regulations 2011 and Australian Accounting Standards;
- the financial statements present a true and fair view of Brown Hill & Keswick Creeks Storm Water Board's financial position at 30 June 2024 and the results of its operations and cash flows for the financial year;
- internal controls implemented by the Board provide a reasonable assurance that the Board's financial records are complete, accurate and reliable and were effective throughout the financial year; and
- the financial statements accurately reflect the Board's accounting and other records.

On behalf of the Board

Board Member

10 September 2024

Note 1. Material accounting policy information

The accounting policies that are material to the Board are set out below. The accounting policies adopted are consistent with those of the previous financial year, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted

The Board has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Basis of preparation

The financial statements are general purpose financial statements that have been prepared in accordance with the Australian Accounting Standards as they apply to not-for-profit entities, other authoritative pronouncements of the Australian Accounting Standards Board (AASB) and relevant South Australian Legislation. These financial statements comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The Brown Hill and Keswick Creeks Stormwater Board (the Board) is a Local Government Regional Subsidiary established under Section 43 of and Schedule 2 to the Local Government Act 1999. The Regional Subsidiary is under the control of City of Adelaide, City of Burnside, City of Unley, City of Mitcham and City of West Torrens.

The Board was established by a Gazettal dated 27 February 2018. The Board has been established to implement the construction and maintenance of infrastructure and other measures for the purposes of a stormwater management plan prepared by the constituent councils and approved by the Stormwater Management Authority. The Board's responsibilities extend to the ongoing maintenance and operation of stormwater infrastructure delivered by the Board under the Stormwater Management Plan. The property owner (whether that be a Council or private land owner) is responsible for maintenance and upkeep of any existing assets, all new non-stormwater assets and all landscaping components. This may require the transfer of assets to the property owner subsequent to the initial construction phase or after the defects period.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in financial statements containing relevant and reliable information about transactions, events and conditions to which they apply. Material accounting policies adopted in the preparation of these financial statements are presented below and have been applied consistently unless otherwise stated.

The financial statements, except for cash flow information, have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and liabilities. The amounts presented in the financial statements have been rounded to the nearest dollar.

The financial statements were authorised for issue on 10 September 2024 by the members of the Board.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Board's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 2.

Note 1. Material accounting policy information (continued)

(a) Revenue recognition

Revenue from contracts with customers

The core principle of AASB 15 is that revenue is recognised on a basis that reflects the transfer of promised goods or services to customers at an amount that reflects the consideration the Board expects to receive in exchange for those goods or services. Revenue is recognised by applying a five-step model as follows:

- 1. Identify the contract with the customer
- 2. Identify the performance obligations
- 3. Determine the transaction price
- 4. Allocate the transaction price to the performance obligations
- 5. Recognise revenue as and when control of the performance obligations is transferred

Generally the timing of the payment for sale of goods and rendering of services corresponds closely to the timing of satisfaction of the performance obligations, however where there is a difference, it will result in the recognition of a receivable, contract asset or contract liability.

None of the revenue streams have any significant financing terms as there is less than 12 months between receipt of funds and satisfaction of performance obligations.

All revenue is stated net of the amount of goods and services tax (GST).

Specific revenue streams

The revenue recognition policies for the principal revenue streams of the Board are:

Operating revenue from constituent councils

Operating revenue from constituent councils is recognised as income as and when the Board becomes entitled to receive the funds. This is outlined within the Boards Annual Budget which is agreed with all constituent councils.

Grant revenue

Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

When grant revenue received meets the "enforceability" and "sufficiently specific" criteria in accordance with AASB 1058 and AASB 15, the grant revenue is recognised in the statement of financial position as a liability until the performance obligations have been met and delivered to the contributor.

Otherwise the grant is recognised as income in the statement of comprehensive income when the Board obtains control of the grant, it is probable that the economic benefits gained from the grant will flow to the Board and the amount of grant can be measured reliably.

Interest revenue

Interest revenue is recognised using the effective interest method, which for all floating rate financial assets is inherent in the instrument.

Other income

Other income is recognised on an accruals basis when the Board is entitled to it.

(b) Equity

Capital contributions

Capital contributions from constituent councils are recorded directly against equity as and when the Board becomes entitled to receive the funds. This is outlined within the Boards Annual Budget, which is agreed with all constituent councils.

(c) Income tax

The activities of the Board are exempt from taxation under the Income Tax Assessment Act.

Note 1. Material accounting policy information (continued)

(d) Trade and other receivables

The Board has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue.

(e) Financial instruments

Investments and other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement, except for financial assets at fair value through profit or loss. Such assets are subsequently measured at either amortised cost or fair value depending on their classification. Classification is determined based on both the business model within which such assets are held and the contractual cash flow characteristics of the financial asset unless an accounting mismatch is being avoided.

Financial assets are derecognised when the rights to receive cash flows have expired or have been transferred and the Board has transferred substantially all the risks and rewards of ownership. When there is no reasonable expectation of recovering part or all of a financial asset, its carrying value is written off.

Financial instruments are recognised initially on the date that the Board becomes party to the contractual provisions of the instrument.

On initial recognition, all financial instruments are measured at fair value plus transaction costs (except for instruments measured at fair value through profit or loss where transaction costs are expensed as incurred).

Financial assets

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification

On initial recognition, the Board classifies its financial assets into the following categories, those measured at:

- amortised cost
- fair value through profit or loss FVTPL
- fair value through other comprehensive income equity instrument (FVOCI equity)
- fair value through other comprehensive income debt investments (FVOCI debt)

Financial assets are not reclassified subsequent to their initial recognition unless the Board changes its business model for managing financial assets.

Financial assets at amortised cost

A financial asset is measured at amortised cost only if both of the following conditions are met: (i) it is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and (ii) the contractual terms of the financial asset represent contractual cash flows that are solely payments of principal and interest.

The Board's financial assets measured at amortised cost comprise trade and other receivables and cash and cash equivalents in the statement of financial position.

Subsequent to initial recognition, these assets are carried at amortised cost using the effective interest rate method less provision for impairment.

Interest income and impairment are recognised in profit or loss. Gain or loss on derecognition is recognised in profit or loss.

Note 1. Material accounting policy information (continued)

Impairment of financial assets

Impairment of financial assets has been determined using the simplified approach in AASB 9 which uses an estimation of lifetime expected credit losses. The Board has determined the probability of non-payment of the receivable and multiplied this by the amount of the expected loss arising from default.

The amount of the impairment is recorded in a separate allowance account with the loss being recognised in finance expense. Once the receivable is determined to be uncollectable then the gross carrying amount is written off against the associated allowance.

Financial liabilities

The Board measures all financial liabilities initially at fair value less transaction costs, subsequently financial liabilities are measured at amortised cost using the effective interest rate method.

The financial liabilities of the Board comprise trade payables.

(f) Property, plant and equipment

Initial Recognition

All assets are initially recognised at cost. For assets acquired at no cost or nominal consideration, cost is determined as fair value at the date of acquisition. All non-current assets purchased or constructed are capitalised as the expenditure is incurred and depreciated as soon as the asset is held 'ready for use'. Cost is determined as the fair value of the assets given as consideration plus costs incidental to the acquisition, including architects' fees, engineering design costs and all other costs incurred.

The cost of non-current assets constructed by the Board includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overhead. The Board considers that it controls the infrastructure assets in accordance with its Charter. The constructed infrastructure assets may be located on land owned by constituent councils or private property owners.

Assets with an economic life in excess of one year are only capitalised where the cost of acquisition exceeds the materiality thresholds set by the Board within the capitalisation policy. In determining (and in annually reviewing)) such thresholds, regard is had to the nature of the asset and its estimated service life. Current thresholds applicable to Board assets are as follows:

Drains and culverts - \$2,000
Paving and footpaths, kerbs and gutter - \$2,000
Office furniture and equipment - \$1,000
IT hardware and computer equipment - \$ 1,000
Other assets - \$1,000

Subsequent Measurement

Stormwater infrastructure is subsequently measured at fair value, based on periodic, at least every 5 years, valuations by external independent valuers, less accumulated depreciation and impairment. Fair value is determined with regard to the asset's highest and best use (considering legal or physical restrictions imposed on the asset, public announcements or commitments made in relation to the intended use of the asset) and is determined using the current replacement cost method.

The most recent valuation of infrastructure and land improvements had been undertaken on 30 June 2023. The valuation was undertaken by Tina-James Freeman, Asset Consultant at Tonkin. Refer to Note 20 for additional information on fair value determination of stormwater infrastructure.

Computer equipment and office equipment are carried at cost less accumulated depreciation and impairment.

Note 1. Material accounting policy information (continued)

Depreciation

Property, plant and equipment, excluding freehold land, is depreciated on a straight-line basis over the assets useful life to the Board, commencing when the asset is ready for use.

The depreciation rates used for each class of depreciable asset are shown below:

Fixed asset class	Depreciation rate
Land improvements	1.67% - 10%
Stormwater structures	1% - 1.25%
Stormwater quality devices	1% - 10%
Footpaths	2% - 20%
Kerbs and gutters	1% - 2.5%
Office furniture and fittings	10%
Other plant and equipment	3.3% - 50%
IT hardware and computer equipment	14.3% - 50%

At the end of each annual reporting period, the depreciation method, useful life and residual value of each asset is reviewed by the Project Director. The Project Director also reviews the asset register to ensure inclusion of all completed projects and correct delineation of maintenance responsibility between the board and the property owner. In addition, the Board's Asset Capitalisation Policy is reviewed every 2 years, with the last review undertaken in June 2023. Any revisions are accounted for prospectively as a change in estimate.

(g) Impairment of non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

(h) Employee benefits

Short-term employee benefits

Provision is made for the Board's liability for employee benefits arising from services rendered by employees to the end of the reporting period.

Employee benefits that are expected to be wholly settled within one year have been measured at the amounts expected to be paid when the liability is settled.

No accrual is made for sick leave. The Board does not make payment for untaken sick leave.

Other long-term employee benefits

The liability for annual leave and long service leave not expected to be settled within 12 months of the reporting date are measured at the present value of the estimated future cash outflows to be made for those benefits. In determining the liability, consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Cashflows are discounted using market yields on high quality corporate bond rates, with terms to maturity that match the expected timing of cashflows. Changes in the measurement of the liability are recognised in the profit or loss.

(i) Economic dependence

Brown Hill and Keswick Creeks Stormwater Board is dependent on its constituent councils and other funding bodies for the majority of its revenue used to achieve its objectives. At the date of this report, the Board believe that the Member Councils and other bodies will continue to support the Board.

Note 1. Material accounting policy information (continued)

(j) New Accounting Standards and Interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Board for the annual reporting period ended 30 June 2024. The Board has not yet assessed the impact of these new or amended Accounting Standards and Interpretations.

Note 2. Critical accounting judgements, estimates and assumptions

The Board makes estimates and judgements during the preparation of these financial statements regarding assumptions about current and future events affecting transactions and balances.

These estimates and judgements are based on the best information available at the time of preparing the financial statements, however as additional information is known then the actual results may differ from the estimates.

The significant estimates and judgements made have been described below.

Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, grouped based on days overdue, and makes assumptions to allocate an overall expected credit loss rate for each group. These assumptions include recent sales experience and historical collection rates.

The fair value of assets and liabilities classified as level 3 is determined by the use of valuation models. Level 3 inputs are unobservable inputs. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs. For further information relating to fair value measurement, refer to Note 20.

Impairment of property, plant and equipment

The Board assesses impairment of property, plant and equipment at each reporting date by evaluating conditions specific to the Board and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

Key estimates fair valuation of stormwater infrastructure and land improvements

Stormwater infrastructure assets are carried at fair value. As there is no market for the Board to use to determine fair value, all assets have been valued as Level 3 inputs using a cost approach. Level 3 inputs are unobservable inputs. For further information relating to fair value measurement refer to Note 20.

Note 3. Operating contributions

	2024 \$	2023 \$
City of Mitcham	140,000	133,594
City of Burnside	140,000	133,594
City of West Torrens	140,000	133,594
The Corporation of the City of Adelaide	140,000	133,594
The Corporation of the City of Unley	140,000	133,594
	700,000	667,970

In accordance with the Charter of the Brown Hill and Keswick Creeks Stormwater Board Schedule 1, operating contributions are received equally from each of the constituent councils at an agreed rate. The total value of operating contributions to be received is agreed in the annual budget prepared by the Board.

Note 4. Investment income

	2024 \$	2023 \$
Bank Interest	445,125	349,089
Note 5. Employee Costs		
	2024 \$	2023 \$
Salaries and wages - board Salaries and wages - employee Superannuation contributions Workers compensation Employee entitlement costs	87,000 254,520 37,493 2,775 2,801	80,500 239,464 33,596 1,452 15,378
Total Employee costs	384,589	370,390
Note 6. Materials, Contracts & Other Expenses		
	2024 \$	2023 \$
Contractor & consultant services Meeting room hire and teleconference Financial services Insurance - mutual liability scheme IT services Legal services Office expenses, printing and postage PR, website and graphic design Professional development Asset operating costs & maintenance Asset management plan & valuations Prescribed expenses - audit remuneration Sundry	38,514 1,794 37,960 51,430 4,809 19,522 1,933 14,755 6,904 345,755 16,171 5,700 1,476	23,056 1,256 33,164 48,981 4,718 10,422 2,966 12,068 1,182 172,829 10,470 5,270 648
Total Materials, Contracts & Other Expenses	546,723	327,030

Asset operating and maintenance costs are generally expected to increase over time as additional project works are completed. Maintenance costs associated with the South Park Lands wetland are, however, expected to be higher in the early establishment phase (years 1-4).

Note 7. Finance costs

	2024 \$	2023 \$
Bank fees	376	204

Note 8. Depreciation

	2024 \$	2023 \$
Infrastructure and land improvements Office equipment	168,522 1,849	192,947 605
	170,371	193,552
Non-atomic and a contract of a contract of the stime of t		. 5.400

Non-stormwater assets at completed project locations were transferred to the responsibility of the property owner in FY23, resulting in a decrease to the Board's annual depreciation in 2024. These assets generally have shorter lives and therefore depreciate at much higher rates than the stormwater assets that remain under the Board's responsibility.

2024

2023 \$

Note 9. Capital Funding / Grants for New / Upgraded assets

Stormwater Management Authority Federal Funding		5,642,025 4,061,849	585,986
		9,703,874	585,986
The table below shows the reconciliation of capital funding received, recognised	d as revenue and	I resulting incom	e in advance.
	Stormwater Management Authority	Federal Funding	Total
Income in advance 1 July 2022	-	-	_
Funding received Revenue recognised	-	4,120,105 (585,986)	4,120,105 (585,986)
Income in advance 30 June 2023		3,534,119	3,534,119
Funding received	8,500,000	3,595,735	12,095,735
Revenue recognised	(5,642,025)	(4,061,849)	(9,703,874)
Income in advance 30 June 2024 (note 14)	2,857,975	3,068,005	5,925,980
Note 10. Asset disposal			
		2024 \$	2023 \$
Carrying amount of assets transferred to council	;	_	1,417,180
Note 11. Cash and cash equivalents			
		2024 \$	2023 \$
Current assets Cash at bank and in hand		13,326,831	10,151,401

As at 30 June 2024, cash held includes an amount of \$2,254,917 (2023: \$8,803,000) which is restricted for the purpose of approved capital development projects (refer to Note 24 'Commitments').

Note 12. Trade and other receivables

	2024 \$	2023 \$
Current assets Trade receivables	125,432	_
GST receivable	629,584	248,626
Accrued revenue	20,750	33,344
Prepayments	14,493	13,551
	790,259	295,521

The carrying value of trade receivables is considered a reasonable approximation of fair value due to the short-term nature of the balances.

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable in the financial statements.

Note 13. Infrastructure, property, plant and equipment

Note 13. Infrastructure, property, plant and equipment (continued)

Asset valuations

In line with the Board's capitalisation policy, a valuation of assets was not undertaken in the financial year ended 30 June 2024. The last valuation of completed infrastructure and land improvements was undertaken as at 30 June 2023. The valuation was undertaken by Tina-James Freeman, Asset Consultant at Tonkin. The valuation basis used for the infrastructure and land improvement assets is the depreciated replacement cost basis.

Note 16. Capital contributions of constituent councils (continued)

Capital contributions of constituent councils are payments received for investing in infrastructure. The rates of contributions are agreed in the Charter of the Board.

Summary of capital contributions of constituent councils during the year:

	2024 \$	2023 \$
City of Mitcham City of Burnside	400,000 480,000	245,000 294,000
City of West Torrens City of Adelaide City of Unley	1,960,000 320,000 840,000	1,200,500 196,000 514,500
	4,000,000	2,450,000
Note 17. Asset revaluation reserve		
	2024 \$	2023 \$
Infrastructure and land improvement Opening balance 1 July Net increment/(decrement)	570,390 	408,652 161,738
Closing balance 30 June	570,390	570,390
Note 18. Capital funding and grants		
	2024 \$	2023 \$
Opening balance Transfer from accumulated surplus	17,224,448 9,703,933	16,638,521 585,927
	26,928,381	17,224,448

Capital funding and grants reserve records the total revenue recognised from the funding providers for capital works to date.

Total capital funding/grants for new/upgraded assets revenue recognised in FY23 was \$585,986 but the amounts transferred to reserve was \$585,927, \$59 less. This understatement has been fixed in FY24 by increasing the transfer to reserve by an additional \$59 to the revenue recognised of \$9,703,874.

Note 19. Financial instruments

Financial risk management objectives

The Board is exposed to a variety of financial risks through its use of financial instruments. The most significant financial risks to which the Board is exposed to are described below:

Specific risks

- Liquidity risk
- Credit risk

The principal categories of financial instrument used by the Board are:

- Trade receivables
- Cash at bank
- Trade and other payables

Note 19. Financial instruments (continued)

Objectives, policies and processes

The Board Members have overall responsibility for the establishment of the Board's financial risk management framework. This includes the development of policies covering financial governance and the identification and management of financial risk in accordance with the Board's risk management policy.

Details of significant accounting policies and methods adopted including the criteria for the recognition, the basis of measurement and the basis on which income and expenses are recognised with respect to each class of financial asset, financial liability and equity instruments are disclosed in note 1 Material Accounting Policy Information.

Mitigation strategies for specific risks faced are described below:

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Board.

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposure to customers, including outstanding receivables and committed transactions.

The credit risk for liquid funds and other short-term financial assets is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

Credit risk is managed through maintaining procedures to regularly monitor the financial stability of customers and counterparties. There is no collateral held by the Board securing trade and other receivables.

Liquidity risk

Liquidity risk arises from the management of working capital. It is the risk that the Board will encounter difficulty in meeting its financial obligations as they fall due.

The Board manages this risk by preparing and monitoring budgets, only investing surplus cash with major financial institutions and proactively monitoring the recovery of unpaid debts.

At the reporting date, the Board has sufficient liquid resources to meet its obligations under all reasonably expected circumstances. The following table depicts the categorisation of financial instruments held by the Board, noting that due to the nature of the balances held, carrying value is equal to fair value:

	2024 \$	2023 \$
Financial assets Held at amortised cost Cash and cash equivalents (due less than 1 year)	42 200 004	40 454 404
Trade and other receivables (due less than 1 year)	13,326,831 790,259	10,151,401 295,521
Total financial assets	14,117,090	10,446,922
	2024 \$	2023 \$
Financial liabilities Held at amortised cost Trade and other payables	2,508,166	467,269

Remaining contractual maturities

The table below reflects the undiscounted contractual maturity analysis for financial liabilities:

Note 19. Financial instruments (continued)

2024	Weighted average interest rate %	1 year or less \$	Between 1 and 2 years \$	Between 2 and 5 years \$	Over 5 years	Remaining contractual maturities
Non-derivatives Non-interest bearing Trade and other payables (excluding estimated annual leave) Total non-derivatives	-	2,508,166 2,508,166				2,508,166 2,508,166
2023	Weighted average interest rate %	1 year or less \$	Between 1 and 2 years \$	Between 2 and 5 years \$	Over 5 years \$	Remaining contractual maturities \$
Non-derivatives Non-interest bearing Trade and other payables (excluding estimated annual leave) Total non-derivatives	-	467,269 467,269				<u>467,269</u> 467,269

The timing of expected outflows is not expected to be materially different from contracted cashflows.

Note 20. Fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

Note 20. Fair value measurement (continued)

Fair value hierarchy

Infrastructure assets are carried at fair value. AASB 13 Fair Value Measurement requires all assets and liabilities measured at fair value to be assigned to a 'level' in the fair value hierarchy as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Unobservable inputs for the asset or liability

In determining fair values for infrastructure and land improvements there is no known market for these assets, and they are valued at depreciated current replacement cost. This method involves:

- The determination of the cost to construct the asset (or its modern engineering equivalent) using current prices for materials and labour, the quantities of each being estimated based on recent experience, or on industry construction guides where these are more appropriate; and
- The calculation of the depreciation that would have accumulated since original construction using current estimates of residual value and useful life under the prime cost depreciation method adopted by the Board.

This method has significant inherent uncertainties, relying on estimates of quantities of materials and labour, residual values and useful lives, and the possibility of changes in prices for materials and labour, and the potential for development of more efficient construction techniques. Accordingly, the fair value of all assets within the infrastructure and land improvements class are considered Level 3 in the fair value hierarchy.

Note 21. Key management personnel disclosures

Compensation

Key management personnel of the Board include the Project Director and members of the Board appointed under section 112 of the *Local Government Act 1999*. The aggregate compensation made to key management personnel of the Board is set out below:

	2024 \$	2023 \$
Short-term employee benefits Post-employment benefits	300,262 33,029	284,774 29,901
	333,291	314,675

Note 22. Remuneration of auditors

During the financial year the following fees were paid or payable for services provided by the auditor of the Board:

	2024 \$	2023 \$
Audit remuneration	5,700	5,270

Note 23. Contingent liabilities

In the opinion of the Board Members, the Board is unaware of any liability, contingent or otherwise, which has not already been recorded elsewhere in this financial report at 30 June 2024 (30 June 2023: None).

Note 24. Commitments

Note 25. Related parties

Key management personnel

Disclosures relating to key management personnel are set out in note 21.

There were no transactions with related parties during the current and previous financial year.

Note 25. Related parties (continued)

Other related parties include close family members of key management personnel and entities that are controlled or significantly influenced by those key management personnel or their close family members. There were no transactions with other related parties for the year ending 30 June 2024 (2023: Nil).

Note 26. Statutory Information

The registered office and principal place of business of the Board is: Brown Hill & Keswick Creeks Stormwater Board PO Box 124 Unley SA 5061

Note 27. Events after the reporting period

No matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Board's operations, the results of those operations, or the Board's state of affairs in future financial years.

Note 28. Reconciliation of net surplus/(deficit) to net cash from/(used in) operating activities

Brown Hill & Keswick Creeks Storm Water Board Certification of auditor independence As at 30 June 2024

To the best of our knowledge and belief, we confirm that, for the purpose of the audit of Brown Hill and Keswick Creeks Stormwater Board for the year ended 30 June 2024, the Board's Auditor, Dean Newbery & Partners has maintained its independence in accordance with the requirements of the Local Government Act 1999 and the Local Government (Financial Management) Regulations 2011 made under that Act.

This statement is prepared in accordance with the requirements of Regulation 22(3) Local Government (Financial Management) Regulations 2011.
