Acknowledgement of Country

The Kadaltilla/Adelaide Park Lands Authority (Kadaltilla) acknowledges the Kurna people as the traditional owners of the Adelaide Plains and pays respect to Elders past and present. Kadaltilla recognises and respects the cultural heritage, beliefs and relationship which the Kurna people have with the land and acknowledges that they are of continuing importance to the Kurna people living today.

Kadaltilla extends that respect to other Aboriginal Language Groups and other First Nations. Kadaltilla is the principal advisor to both the Council and the State Government on the protection, management, enhancement and promotion of the Adelaide Park Lands.

Kadaltilla is a traditional Kurna word meaning Green place/Green lands/Parklands.

1. Executive Summary

On 23 May 2024, the Kadaltilla / Adelaide Park Lands Authority (Kadaltilla) endorsed the draft Adelaide Park Lands Management Strategy (APLMS) - Towards 2036 for public consultation. The last phase of engagement, Phase 3, commenced for a period of eight weeks from, 17 June to 9 August 2024.

The Phase 3 engagement program was designed to collect both broad and detailed feedback from the community. A range of promotional and engagement methods were utilised to obtain views from community members and key stakeholders on the draft APLMS – Towards 2036. By employing various in-person and online techniques, the program accommodated stakeholders' schedules and preferences, ensuring that the feedback was relevant to the draft.

The engagement process saw overwhelmingly positive feedback on the draft APLMS - Towards 2036. Respondents expressed strong support for the document, affirming its direction and content. While the overall reception was highly favourable, a few minor amendments were suggested, reflecting a thoughtful and collaborative approach to refining the strategy.

During the public consultation, we engaged with over 400 people:

- 300 people were spoken to at the Rundle Mall information booth and 196 completed the survey in-person
- 74 responded to the online survey
- 40 people emailed directly with written feedback
- Over 1,000 promotional postcards were distributed in hard copy to residents and businesses in the City of Adelaide.
- Over 18,000 people were reached via social media posts with 12,471 total 'events' (interactions).
- 2,908 people viewed the webpages created for phase three.
- 74 people completed online surveys.
- 26 organisations provided written submissions, including:
 - City of Adelaide
 - City of Burnside
 - City of West Torrens
 - City of Norwood Payneham & St Peters
 - City of Unley
 - Town of Walkerville
 - Office for Design and Architecture SA
 - Planning and Land Use Services
 - Office for Recreation, Sport and Racing
 - Department of Climate Change, Energy, the Environment and Water
 - Green Adelaide
 - Kurna Yerta Aboriginal Corporation (KYAC)
 - South Australian Motor Sport Board
 - Botanic Gardens and State Herbarium
 - SANFL
 - The University of Adelaide
 - Australian Institute of Landscape Architects
 - Pulteney Grammar School
 - South Australian Cricket Association
 - The North Adelaide Society Inc.
 - SECRA
 - State Planning Commission

- Walking SA
- National Parks and Wildlife Service South Australia
- The City of Adelaide Reconciliation Committee
- Adelaide Park Lands Association

The majority of responses were supportive of the draft APLMS, including its Vision and Guiding Pillars. Feedback from the community and key stakeholders endorsed the continued enhancement and protection of the Adelaide Park Lands while recognising the challenges of balancing open spaces, upgraded facilities, and temporary installations. Conversely, opposing views typically expressed concerns that certain developments might restrict public access at specific times or to certain facilities, at the detriment of the environment.

The key themes identified from the engagement activities and submissions were:

- **Built Form and Land Use:** Desire to remove unused structures and strengthen the commitment to returning areas to Park Lands purposes.
- **Biodiversity and First Nations:** Emphasis on enhancing biodiversity, retaining trees, planting native species, and increasing First Nations representation through land-management practices.
- **Park Lands Protection and Access:** Importance of preserving Park Lands for public use, ensuring strong legislative safeguards, and improving access.
- **Heritage and Cultural Values:** Support for State Heritage Listing and UNESCO recognition to protect the unique heritage and environment of the Park Lands.
- **Stormwater Management and Pathways:** Focus on improving stormwater quality and expanding walking paths with surfaces that minimise environmental impact.
- **Park Lands Hubs and Major Events:** Need for clearer definitions of Park Lands hubs to avoid overdevelopment, while recognising the importance of major events in attracting visitors.
- **Community Facilities and Car Parking:** Ensure community facilities are non-exclusive and consider reintroducing car parking reduction targets.
- **Governance and Legislative Context:** Explore making Kadaltilla a statutory authority and ensure transparency in development processes.
- **Design and Safety:** Strengthen safety measures through CPTED principles and apply Good Design principles across all goals.

2. Introduction

It is a requirement under section 18 of the of the *Adelaide Park Lands Act (2005)* (the Act) that an APLMS is prepared and maintained by Kadaltilla.

The APLMS must:

- (a) *in relation to each piece of land within the Adelaide Park Lands owned, occupied or under the care, control or management of the Crown, a State authority or the Adelaide City Council—*
 - (i) *describe the occupation, tenure and existing use of the land; and*
 - (ii) *provide information about the State Government's or the Council's (as the case may be) plans for the use and management of the land into the future; and*
 - (iii) *identify any plans or feasible options for increasing public access to the land for recreational purposes (taking into account the existing or proposed use of the land); and*
 - (iv) *if the land is owned, occupied or under the care, control or management of the Crown or a State authority—provide information about its suitability for use as park lands under the care, control and management of the Adelaide City Council, or through transferring the land to the Council, and, if appropriate, a program for its future use as park lands; and*
- (b) *identify any land within the Adelaide Park Lands that is, or that is proposed to be (according to information in the possession of the Authority), subject to a lease or licence with a term exceeding 5 years (including any right of extension), other than a lease or licence that falls within any exception prescribed by the regulations for the purposes of this paragraph; and*
- (c) *identify goals, set priorities and identify strategies with respect to the management of the Adelaide Park Lands; and*
- (d) *include any other information or material prescribed by the regulations; and*
- (e) *be consistent (insofar as is reasonably practicable) with any plan, policy or statement prepared by or on behalf of the State Government*

The current [Adelaide Park Lands Management Strategy 2015 – 2025](#) was adopted by Kadaltilla in May 2016, followed by adoption by the Council in December 2016, and by the Minister for Adelaide in August 2017. The APLMS was publicly released in January 2018.

The APLMS is a joint State Government and Council owned document, which is prepared and maintained on their behalf by Kadaltilla.

It is a requirement under section 18(14) of the Act that a review is required every five years. Kadaltilla may amend the APLMS by adopting a new management strategy, as outlined in Section 18(12) of the Act, with any changes requiring approval from both the City of Adelaide and the Minister for Planning.

In anticipation of the current APLMS concluding in 2025, in 2022, Kadaltilla commenced a review and extensive engagement program to shape the next APLMS, to become known as the “Adelaide Park Lands Management Strategy – Towards 2036”.

In early 2022, a comprehensive mid-point review of the APLMS was commenced with engagement phases 1 and 2 completed in 2022–2023. The draft APLMS was informed by

Phase 1 with over 2,500 community engagement participants over a nine-month consultation window. Phase 1 engaged with 18 stakeholder groups representing three distinct communities categorised by their level of interest, impact and knowledge. The purpose of Phase 1 was to test the vision, outcomes and priorities contained in the APLMS 2005–2015 and explore new ideas and opinions to inform the mid-term review. Phase 2 of the APLMS strengthened the representation of under-represented stakeholders and groups and engaged with seven main stakeholder groups.

The last phase of engagement, phase 3, commenced in early 2024 and on 23 May 2024 Kadaltilla endorsed the public consultation on the draft APLMS – Towards 2036 for a period of eight weeks from, 17 June to 9 August 2024.

This report provides an overview of the Phase 3 engagement process, the feedback received, and recommendations for incorporation into the draft APLMS.

2.1 Previous Engagement

Community and stakeholder consultation on the draft APLMS has been undertaken in a phased approach:

1. First phase: a call for ideas from different perspectives to start shaping a new APLMS (complete).
2. Second phase: a chance to test and shape early project ideas and respond to / build an overarching vision for the APLMS (complete).
3. Third phase: presentation of a draft document for testing, challenging and refining through open consultation.

2.1.1 Phase One Summary

A detailed [Engagement Report](#) and [What We Heard](#) document has been published for Phase 1 which elaborates on the considerable efforts and activities that were undertaken to engage the community and stakeholders in the review of the APLMS.

Engagement was aimed towards three main communities:

1. Communities of interest; stakeholders with an interest in the project and its outcomes,
2. Communities of impact; stakeholders that will be affected by the project and its outcomes, and
3. Communities of knowledge; stakeholders with a working and technical knowledge of the contemporary drivers for the Park Lands.

The strategic and comprehensive approach successfully captured community feedback across three levels of involvement (consultation, involvement, and collaboration) relevant to the knowledge base, areas of interest and technical capacity of each group.

Highlights of the Phase 1 engagement:

- 18 stakeholder groups were engaged, which represented three distinct communities, categorised by their level of interest, impact and knowledge.
- Methods of engagement were tailored to each stakeholder group, including workshops, Kadaltilla Board meetings, online surveys (Yoursay Adelaide), advisory/reference groups and public forums.

- The Engagement team gained insight on how communities value and use the Park Lands and actively sought input about issues and opportunities with the current APLMS and future visions for the Park Lands.

Feedback was categorised in 14 Consultation Themes that were common across stakeholder groups and identified the four key idea topics of Climate change, Kaurna cultural heritage, Societal change and COVID-19, and Technology as Investigation Areas.

Consultation Themes and Investigation Areas reflect the analysis of a thorough consultation phase that represents a wide variety of stakeholders. Feedback indicated the vision, outcomes and priorities of the APLMS remain relevant, appropriate and important.

2.1.2 Phase Two Summary

Targeted stakeholder consultation on the draft APLMS commenced on 27 February 2024 and concluded on 9 April 2024. Consultation was in the form of a written letter with the draft APLMS attached. The letter requested any feedback from targeted stakeholders that would affect Kadaltilla endorsing the draft APLMS progressing for community consultation.

The internal review process at the conclusion of phase one indicated that, going forward, there would be a focus to strengthen representation from under-represented stakeholders and broadening understanding about feedback that wasn't given in detail.

The consultation feedback supported the draft APLMS progressing to community consultation with revisions to account for the consultation feedback provided.

Key matters raised in the consultation included:

- Advice from the Minister for Planning and Council
- General support for the APLMS and progressing the document to public consultation
- Suggestions to enhance recognition of elements such as biodiversity, Colonel Light and the role of City Gardeners
- Suggestion to adjust the formal and structure of the draft APLMS to improve navigation, consistency of expression, and presentation of mapping, including consideration of an index and improvements to precinct-level maps
- Minor editorial changes and typographical corrections
- The targeted consultation has not resulted in changes to the priorities or goals.

25 targeted stakeholders, including state government, education institutions and clubs, and the adjacent six local Councils were invited to review and provide feedback, with the following doing so:

- City of Adelaide
- Minister for Planning
- Office for Design and Architecture SA
- Renewal SA
- University of Adelaide
- City of West Torrens
- City of Norwood, Payneham and St Peters
- City of Unley
- City of Prospect

There was some overlap between phase two and three engagement activities where meetings and interviews with key stakeholders were collaborative opportunities to test and

shape what had already been included in the draft, and to seek specific information where earlier engagement had not given the level of detail required for the Strategy.

3. Phase 3 Engagement Plan

The Phase 3 engagement program was designed to collect both broad and detailed feedback from the community. A range of promotional and engagement methods were utilised to obtain views from community members and key stakeholders on the draft APLMS – Towards 2036. By employing various in-person and online techniques, the program accommodated stakeholders' schedules and preferences, ensuring that the feedback was relevant to the draft.

3.1 Engagement Objectives

The engagement objectives were shaped by legislation, the City of Adelaide's community consultation policy, previous engagement activities, and feedback from Kadaltilla.

Key objectives were to:

- Introduce the draft Adelaide Park Lands Management Strategy - Towards 2036 to key stakeholders and the community
- Engage with the State Government, City of Adelaide and adjoining councils as active contributors to proposals and outcomes of the APLMS
- Proactively approach a range of communities to obtain diverse insights and values on the Park Lands
- Employ a mix of online and in person engagement techniques that optimise opportunities for communities to influence the project
- Supply timely and relevant information in plain language or visual formats that support meaningful and relevant input from engagement participants
- Obtain broad perspectives from different disciplines such as environmental, social, political, economic, cultural and heritage.

3.2 Engagement Outcome

The engagement outcome was:

- A draft APLMS document that has broad support from State Government and Council as well as the broader South Australian community.

3.3 Engagement Approach

In developing or amending the APLMS, section 18(4) of the Act requires Kadaltilla to:

(a) prepare a draft of the proposal; and

(b) refer the proposal to the Minister, the Adelaide City Council, and any State authority or adjoining council that has a direct interest in the proposal; and

(c) at a time determined to be appropriate by the Authority, by public advertisement, invite any interested person to make written submissions to the Authority within a period specified by the Authority (being not less than 1 month from the date of publication of the advertisement), and to attend a public meeting to be held in relation to the proposal.

Early in 2024, confidential targeted stakeholder meetings were held with the intent of testing and refining the feedback that had been provided to-date, and supplementing areas where expert advice would enhance the intent of the APLMS. In addition, during the confidential targeted engagement, 14 submissions were received from:

- City of Norwood Payneham & St Peters
- City of Prospect
- City of Unley
- City of West Torrens
- Department of Climate Change, Energy, the Environment and Water
- KYAC
- Minister for Planning
- Minister for Recreation, Sport and Racing
- Office for Design and Architecture SA
- Planning and Land Use Services
- Renewal SA
- State Planning Commission
- The University of Adelaide
- World and National Heritage Branch

On 23 May 2024, Kadaltilla endorsed the draft APLMS - Towards 2036 for public consultation. The last phase of engagement, Phase 3, commenced for a period of eight weeks from, 17 June to 9 August 2024.

Phase Three engagement activities included:

- In-person:
 - Information booth in Rundle Mall
 - Public Hearing
 - Workshops
 - Key stakeholder information event
- Online:
 - Downloadable draft APLMS – Toward 2036
 - Interactive digital version of the draft APLMS – Toward 2036 using spatial mapping
 - Quick Reference Guides
 - Technical Fact Sheets
 - Information about engagement opportunities
 - Online survey
 - Link to the project team’s email and mailing address for written submissions

The key stakeholders engaged during the public consultation included:

- City of Adelaide Council
- Minister for Planning
- State Government agencies
- Adjoining Councils
- Other Local Councils
- Council businesses (e.g. Golf, Aquatic Centre)
- Residential community (including new residents)
- Representative bodies
- Resident Associations and Business precincts
- Education institutions
- Visitors
- Committees - Reconciliation and Access and Inclusion

- Adelaide Economic Development Agency
- City institutions - Zoo, museum, galleries, libraries
- General Public
- Council volunteers
- Council service consumers
- Youth
- Tenure holders

3.4 Level of Involvement

The third phase of engagement aimed to refine the draft based on earlier feedback, with a focus on consulting and involving key stakeholders and the community. This phase emphasised collaborative opportunities, particularly where stakeholders could offer specialised expertise.

To effectively engage participants, Phase 3 employed three key methodologies tailored to the stakeholders' level of interest, potential impact, and expertise related to the APLMS. These approaches were designed to address varying degrees of knowledge and technical input, ensuring that all relevant perspectives were considered in the refinement of the strategy.

The three levels of involvement were defined as:

	1. Consult	2. Involve	3. Collaborate
Goal	Two-way communications designed to obtain feedback on ideas, alternatives and proposals to inform our decision making	Participatory process designed to help identify issues and views to ensure that concerns and aspirations are understood and considered prior to our decision making	Working together to develop an understanding of all issues and interests to work out alternatives and identify preferred solutions for joint decision making
Commitment (definition of the goal)	We will explore options, gain feedback and an understanding of your concerns and preferences	We will involve you in the process, so your ideas, concerns and aspirations are reflected in the alternatives developed or the final decision	We will collaborate with you so your advice, innovation and recommendations are included in the final decision that we make together
Participant Role	Contribute	Participate	Partner

3.5 Consultation Tools and Techniques

A summary of the consultation tools and techniques used during the consultation is provided below:

TECHNIQUE / TOOL	PURPOSE/DESCRIPTION
Advertisement	To inform and make people more broadly aware of the project, capture paper-based and e-readers (e.g. InDaily, City Business, Carbon Neutral,

	Wellbeing in the City, Your Community, Art in the City, The Next Edition, and North Adelaide Golf Course).
Digital Screens	Digital screens that display messages in the City of Adelaide's public foyers and facilities included an invitation to participate.
Email Signature Banner	All City of Adelaide email footers included the invitation to find out more about the draft APLMS and participate in the engagement.
'On hold' messages	Callers to the City of Adelaide were broadcast a recorded message encouraging them to find out more about the draft APLMS and how they could provide feedback.
Information at CoA Customer Centre and Library	Hard-copy versions of the Fact Sheets were on display, and available to take, at the Council's Customer Service Centre and City Library.
Social Media	Posts and updates promoting the consultation.
Onsite signage	Attract attention from commuters, visitors and users of the Park Lands as well as people visiting, working or living in the city.
A6 Postcard	Inform people of the opportunity to review the draft APLMS, participate in the online survey or find out more about Kadaltilla. Postcards were distributed to 1,000 CoA residents and businesses; placed at over 70 key venues (information booths, community centres and libraries) for people to take.
Invitation included in CoA Publications	An invitation to find out more about the draft APLMS and to provide feedback was included in the following publications: <ul style="list-style-type: none"> - City Business - Carbon Neutral - Wellbeing in the City - Your community - YourSay - Art in the City - The Next Edition - North Adelaide Golf Course
OurAdelaide (online engagement)	Online project portal to form the online project interface that provides information to participants and receives feedback and ideas.
Distribution Lists	Utilise existing email distributions lists from across the organisation (OurAdelaide, and its predecessor branding "Yoursay Adelaide" and community development etc.) to spread the message to audiences that may be more likely to show interest following Council contact on projects and initiatives.
Rundle Mall Public Engagement Booth	On 3 July 2024 a public engagement activation was held in the Rundle Mall as a pop-up information booth. The general public were approached to clarify any questions they have about the Park Lands, and ask them to respond to a series of questions about the Strategy and it's role in managing the Park Lands. People who spoke with a team member were offered a plant or coffee voucher to acknowledge their contribution.
Targeted Stakeholder Meetings	Kadaltilla project team members met directly with key stakeholders, including peak bodies, interested groups and individuals.

3.6 Schedule of Consultation Activities

A summary of the timing of the various consultation activities is detailed below:

DATE	PARTICIPANTS (AUDIENCE)	CONSULTATION ACTIVITY	NUMBER OF ATTENDEES / RESPONSES
17 June – 9 August 2024	Open to all	OurAdelaide (previously Yoursay) questionnaire	74 respondents

17 June – 9 August 2024	Open to all	Consultation invited via Facebook, Twitter, LinkedIn, newsletters, digital screens, physical signage, on hold message, coreflute posters in every Park and city square, and postcards distributed citywide and in adjoining Councils	-
20 June 2024	State Planning Commission	Presentation	7 attendees
2 July 2024	City Planning, Development & Business Affairs Committee	Workshop	9 attendees
3 July 2024	Open to all	Rundle Mall Information Booth Drop-in Session	Engaged with approximately 300 attendees; 196 people participated in survey
9 July 2024	City of Adelaide Council	Report	11 attendees
25 July 2024	Public Hearing (Kadaltilla Board Meeting)	Public Hearing	0 attendees
31 July 2024	Key Stakeholders	Information Event	65 attendees
7 August 2024	Community Group Information Session	Informal gathering	5 attendees
3 September 2024	Kurna Yerta Aboriginal Corporation (KYAC) Board	Discussion	4 attendees
4 September 2024	City of Adelaide's Reconciliation Committee Workshop	Discussion	8 attendees

4. Summary of Feedback Received

4.1 'What we Heard' Summary

**Draft APLMS
Phase 3
Engagement**

About the respondents

City of Adelaide resident
vs Other

City of
Adelaide

Other

Gender
(male vs female)

MALE

FEMALE

Do you support the draft vision?

YES

NO

Do you feel that the draft APLMS Towards 2036
is easy to navigate

YES

NO

Do you support the three overarching
draft goals?

YES

NO

Do you support the four draft pillars?

YES

NO

Are you supportive of land that is classed as having a 'Non-Park Lands Purpose'
being returned to a 'Park Lands Purpose'?

YES

NO

4.2 Rundle Mall Pop Up Engagement Summary

Kadaltilla
Adelaide Park Lands Authority

Rundle Mall Activation

We spoke to over **300** people

196 Survey responses

Activation
Wednesday
3 July 2024
11.30am – 1.30pm

To supplement the online engagement scheduled for this phase, a staffed display was created in the Rundle Mall for people to find out more about the strategy, ask questions and for the team to survey them on key inclusions in the Strategy.

Are you aware that an Adelaide Park Lands Strategy exists?

Do you use the Park Lands for any purpose?

Which parklands do you use?

What activity do you use the Park Lands for?*

Also mentioned were:
Skating, Running, Bird watching, Cycling, Dog Parks, Enjoying Nature

If you don't use the Park Lands, is there a reason why?*

- 40%** I live too far away
 - 25%** Not interesting to me
 - 11%** I don't have the time
- Other reasons offered included:
- I'm from Interstate,
 - I'm new to Adelaide, and
 - feeling unsafe

Do you support the draft vision for the APLMS?

Do you support the four pillars of the APLMS?

- Cultural Value
- Environmental Performance
- Management and Protection, and
- Expert Advice

About the respondents:

Where do the respondents live:

- 18%** City of Adelaide/North Adelaide
- 10%** Councils which border the Park Lands
- 62%** Greater Adelaide metropolitan areas
- 7%** Regional South Australia
- 3%** Interstate/overseas

All percentages are rounded to the nearest whole number
* some respondents declined to provide specific details

Additional comments people offered about the pillars and their priorities:

- Environmental protections need to be strengthened
- Emphatically no development on the Park Lands
- Ensure adequate assessments
- Include children in Community Engagement
- Increase focus on native vegetation
- Great Kurna involvement and leadership
- Keep Park Lands for the public, not for developers
- No increase to school-based sports
- Pillars are too generic, would like more detail
- Prioritise biodiversity
- Prioritise security
- Protect existing trees and memorials.

4.3 Online Survey Engagement Summary

The engagement webpage and survey questions are provided in Appendices 4 and 5, with the complete survey responses included in Appendix 6 and summarised below.

Online Survey Consultation

About the respondents

City of Adelaide resident vs Other

Gender (male vs female)

Do you support the draft vision?

Do you support the draft Natural Systems, Cultural Landscapes and Climate Resilience overarching goal?

Do you support the draft Places and Spaces overarching goal?

Do you support the draft Connections and Networks overarching goal?

Are you supportive of land that is classed as having a 'Non-Park Lands Purpose' being returned to a 'Park Lands Purpose'?

Do you feel that the draft APLMS Towards 2036 is easy to navigate?

5. Phase Three Engagement Themes and Recommendations

Based on the feedback from Phase 3 of the public engagement, common themes have been identified and are outlined below, along with 32 recommendations for consideration by Kadaltilla. These recommendations aim to ensure that the stakeholders' views and priorities are accurately reflected in the final document.

The feedback received during Phase 3 has been categorised into themes, with recommendations cross-referenced in the Appendices, allowing respondents to see how their input has been incorporated into these recommendations.

Built Form

There was some desire for a more ambitious program to remove unused or under-utilised sporting facilities and other structures

RECOMMENDATION 1

Strengthen the commitment to returning areas for Park Lands purposes by introducing a new strategy to consolidate buildings in the Park Lands

Biodiversity

There was a strong desire to strengthen strategies for biodiversity, retain existing trees, plant more native species, and Caring for Country.

RECOMMENDATION 2

Include specific projects and/or strategies that demonstrate a prioritising for protecting nature and biodiversity informed by the Biodiversity Monitoring Program

Park Lands Protection and Access

Respondents were keen to ensure that the Park Lands were kept for Park Land purposes and public access maintained.

RECOMMENDATION 3

Ensure the APLMS specifically references legislation and policies that create certainty for stakeholders that the Park Lands will be adequately protected

Heritage Values

Respondents highly value the cultural and built heritage of the Park Lands. Pursuing State Heritage Listing and UNESCO recognition were cited as strategies to ensure protection of the Park Lands and to capitalise on the unique environment they provide making Adelaide an enviable place to live, work and visit.

RECOMMENDATION 4

Consider including direct reference to pursuing State Heritage Listing and progressing with United Nations Educational, Scientific and Cultural Organization (UNESCO) recognition, ensuring consistency of referencing

Stormwater Management and Park Lands Access

Collaborative relationships help maximise access to and use of the Park Lands and to achieve environmental outcomes such as to improve stormwater quality and management, and to improve access to the Park Lands.

RECOMMENDATION 5

Highlight the collaborative relationship and interaction with adjacent local government bodies in relation to the management of infrastructure and developing projects

Pathways

Respondents were pleased with the progress towards more walking and shared-use paths, with the suggestion of endorsing the concept of an Adelaide Recreational Circuit. Consideration should also be given to using appropriate surfaces that allow water absorption, which reduces the impact of run-off and other unintended consequences of hard surfaces. It was specifically referenced in several submissions that pathways (including those on the boundaries) should not encroach onto existing Park Lands. The 5m promenade specification was questioned as to whether it was appropriate as a standard for all locations.

RECOMMENDATION 6

Create a strategy that supports improvements to the Park Lands Trail with the aim of creating a continuous loop

Park Lands Hubs

A clearer definition was requested for the Park Lands 'hubs' as there was concern that ambiguity would lead to too broad a definition and increase developments. Include details on how a site would be assessed for designation of a level of hub.

Conversely, sporting activities and major events are the primary reason that many South Australians (and people from elsewhere in Australia and the world) visit the Park Lands. Whilst some people interpret the original intent of the Park Lands as open space only, they have been the venue for sporting, recreational and artistic expressions since their inception. It could be argued that the ongoing viability and relevance of the Park Lands needs to incorporate contemporary expressions. The role these events play in creating connection and support for the Park Lands should not be undervalued, and it was suggested that events should be more prominently reflected, maybe in the pillars.

RECOMMENDATION 7

Consider further definition or detail on how the Park Lands 'Hubs' will be assigned, and the level of development within these precincts, and the importance of major events to draw people to the Park Lands

Increase First Nations representation and environmental practices

Areas of the Park Lands which reflect how the area would have been pre-colonisation are an important recognition of Kurna Yerta (country). Protecting and regenerating areas give connection and educate us on the natural environment. Some respondents proposed prioritisation of native plantings and adopting land-management practices that the Kurna people would have used pre-colonisation.

RECOMMENDATION 8

Explore how to increase the participation of the Kurna people, Indigenous plantings and environmental management practices

Park Lands Promotion

New arrivals to South Australia and some visitors were unaware of the Park Lands and the facilities and amenities that they incorporate. For 25% of the respondents to the 2024 survey conducted in the Rundle Mall, the Park Lands were seen as irrelevant or not to have anything of interest to them. Consider references to Adelaide being a “National Park City”.

RECOMMENDATION 9

Create more awareness of the Park Lands and the various ways that people can enjoy them and ensure they remain iconic and a destination of choice for South Australians and visitors

Progress Indicators and/or Targets

For some respondents who were generally supportive of the draft APLMS, they had some uncertainty that there was sufficient clarity around the goals, which they suggest could be rectified by including success indicators. Timeframes should be considered where appropriate.

RECOMMENDATION 10

Consider including additional targets or progress indicators for the goals

Investment Models and How They Will Achieve Goals

Including more information on the proposed funding models, partnership and opportunities for partnership would help to allay the concerns of some stakeholders about corporations developing facilities and or benefiting from access to the Park Lands.

RECOMMENDATION 11

Provide examples of funding models and partnerships and how they can help to achieve the goals and strategies in the Strategy

Glossary of Terms and Definitions

Various proponents identified words that they sought clearer definitions for, including, but not limited to:

- Activate / Activation
- Adaptive
- Alternate uses
- Designated for non-park purposes (in relation to areas adjacent to sports fields that may use an area for unstructured activities)
- Development and creation of outdoor rooms
- Expert advice
- Fit-for-purpose
- Future-focussed
- Further development
- Hub
- Landbridge
- Landowners in the Adelaide Park Lands
- Management and protection
- Meeting community expectations
- Places that thrive
- Pavilions
- Private investment
- Proposed land bridge

- Significant piece of public art
- Tree canopy cover

RECOMMENDATION 12

Provide clarification/definitions for terms

Community Facilities

It is acknowledged that a significant number of people interact with and value the Park Lands through engaging in sporting, play and recreational activities. These circumstances highlight examples of where an arbitrary reduction in the footprint of facilities would not be possible or practical. Current and future community-based facilities should be required to be on a 'non-exclusive' and 'shared use' basis. Engagement with the wider community and other users of the Park Lands in these decisions was requested by some parties. Ensure that business cases for proposed developments are substantiated with a clear mandate for need and community desire for such facilities.

RECOMMENDATION 13

Support the upgrade of community buildings to meet community expectations that include opportunities for communities outside of program times

Car Parking

It was noted that the 5% car parking reduction target had been removed from the draft, and the community expressed a desire for a reduction target to be reinstated.

RECOMMENDATION 14

Include 5% car parking reduction target and clarify alternative uses, increased greening and reduction of impervious surfaces

Kadaltilla's Legislative Context

There was suggestion that the Authority should be a statutory authority, rather than advisory in nature. The notion of providing 'expert advice' was questioned by several respondents as too vague and not binding.

RECOMMENDATION 15

Investigate the legislative context in which the Kadaltilla / Adelaide Park Lands Authority operates

Greater Focus on CPTED Design

Increasing safety using Crime Prevention Through Environmental Design (CPTED) principles were strongly encouraged. Some respondents expressed their hesitance to use the Park Lands due to a perception that it is unsafe.

RECOMMENDATION 16

Strengthen the role of Crime Prevention Through Environmental Design (CPTED) principles and active security measures

Horse Agistment Area

Readers expressed that the current content could be interpreted to support a case either to develop or 'return to nature', which left them unsure if their wishes would be upheld. Note that there were people supportive of keeping the horses, conversely others wanted them removed.

RECOMMENDATION 17

Recognise the history of the horse agistment area

Botanic Gardens Retain in BG&H Board Control

The Botanic Gardens & Herbarium Board provided a response that they did not support the suggestion of a transfer of control to the City of Adelaide.

RECOMMENDATION 18

Delete references to transfer of care or control of parcels of land currently part of the Botanic Gardens

Specify the Locations Where There Is an Appetite to Create 'Places' and Attractions

The proposal of an event and destination and its suitability would need to be assessed in light of the location/s being considered in the Park Lands.

RECOMMENDATION 19

Reword strategies that relate to creating places and attractions to identify specific locations

Update Maps and References

Stakeholders with specialised knowledge of specific areas within the Park Lands contributed updates to accurately identify buildings or facilities and offered suggestions for additional information.

RECOMMENDATION 20

Consider suggestions from submissions for additional map references or updates

KYAC Country Plan

The KYAC Country Plan scope encompasses the entire determination area, including state national parks. This will be the strategic reference when managing the environment and spaces with the inclusion of interpretive storytelling, Kaurua acknowledgment/visibility and care for spaces. The estimated document launch of the KYAC Country Plan is December 2024.

RECOMMENDATION 21

Change references from the Kaurua Country Charter to the KYAC Country Plan

Ongoing Engagement with the SA Motor Sport Board

As a significant event convenor, continue ongoing collaboration with the SAMSB on all matters, but specifically referencing their feedback regarding:

- Engage with SAMSB Goal 1: temporary planters, temporary structures, line marking and sporting field optimisation
- Engage with SAMSB re Goal 2: relocating Wakefield Street pedestrian crossing, shared path planning and completion (ensure paths don't impact event vehicle access), improving entry nodes and consideration for temporary event parking
- Engage with SAMSB re Goal 3: consider a broader range of species, consider introduced risk of increased wetlands, consideration for major events when planting.
- Reconsider wording of 'controversial motor racing history', celebrate the history of motorsport in the park, and due consultation relating to the relocation of the Ayrton Senna monument.

RECOMMENDATION 22

Continued engagement with SA Motor Sport Board in relation to major events scheduled for Victoria Park and considerations for redevelopment

Heritage Principle

Rephrase the principle related to heritage to: *'Promote and allow ongoing use, change, development and maintenance of the Park Lands and City Squares whilst retaining their cultural heritage significance.'* and note the Australian Government's role in providing best-practice advice.

RECOMMENDATION 23

Reflect the Australian Government's role and suggested re-wording relating to the heritage principle

Interactions with Adjoining Councils Supported and Encouraged

Adjoining Councils expressed a desire for more interaction between the State Government, City of Adelaide and their jurisdictions. This included events and activations in conjunction with infrastructure and long-term planning.

RECOMMENDATION 24

Identify additional opportunities to interact with adjacent Councils when planning for infrastructure and events/activations

Transparency to How Developments Are Initiated

It was suggested that no 'unsolicited bids' should be received from external parties for the Park Lands.

RECOMMENDATION 25

Include information on how development opportunities are initiated and if there will be any exclusions (e.g. external unsolicited proposals)

Provide Clarity on the Act's Interpretation of the Purpose of the Park Lands

Some proponents adhere to the suggestion that it is the “*public’s long-held desire to establish ways to protect open space and public access to it, free of built form and car parking, to reduce expansion of commercially focussed activities centres on monetising the use of the Adelaide park lands*”. Others interpret the purpose of the Park Lands in a way that includes structures and development.

RECOMMENDATION 26

Include a clear interpretation of the purpose of the Park Lands, to remove any misapprehension about the legality of facilities and development, including times or instances of general public exclusions

Water Efficiency/Reuse

Suggestion of including water efficiency standards to buildings. For new buildings plan to use rainwater run-off in park lands or retrofitting as appropriate.

RECOMMENDATION 27

**Consider how water run-off is currently captured and used in facilities and opportunities for including provision in building renovations/new builds.
Review or develop policy**

Share Produce from Native Edible Plants and Community Gardens

Provide clarity around who can access the fruits of native plants and output from community gardens.

RECOMMENDATION 28

Review community gardens and associated policies to ensure there is clarity regarding the sharing of produce from community gardens and/or native plantings

Include Sport as an Identified Park Lands Activity

Whilst it is implied that sporting activities and facilities are a component of the Park Lands, it is often referenced as recreation. Request by some stakeholders to include sport in wording to provide greater clarity.

RECOMMENDATION 29

Include sport in wording to provide greater clarity

Major Event Policy

Major cultural, sporting and motor-sport events are part of the current calendar in the Park Lands. The amount of time that the public is excluded from areas of the Park Lands prior to, or post an event, should be minimised.

RECOMMENDATION 30

Agreements with major event organisers should stipulate that the amount of time that the public is excluded from areas of the Park Lands prior to, or post an event, should be minimised

Overlay Principles of Good Design into all Goals

Principles of Good Design are included for Goal 1, and it is suggested to also include them for Goals 2 and 3.

RECOMMENDATION 31

Include Principles of Good Design in each of the Goals

The Northern Area of the Golf Course

Respondents expressed that the current content could be interpreted to support a case either to develop or 'return to nature', which left them unsure if their wishes would be upheld.

RECOMMENDATION 32

More clearly define the intention for re-development of the northern area of the Golf Course

APPENDIX 1: Phase 3 Engagement: Submissions Received

During the public consultation, we engaged with over 400 people:

- 300 people were spoken to at the Rundle Mall information booth and 196 completed the survey in-person
- 74 responded to the online survey
- 40 people emailed directly with written feedback
- 26 organisations provided written submissions including:
 - City of Adelaide
 - City of Burnside
 - City of West Torrens
 - City of Norwood Payneham & St Peters
 - City of Unley
 - Town of Walkerville
 - Office for Design and Architecture SA
 - Planning and Land Use Services
 - Office for Recreation, Sport and Racing
 - Department of Climate Change, Energy, the Environment and Water
 - Green Adelaide
 - Kurna Yerta Aboriginal Corporation (KYAC)
 - South Australian Motor Sport Board
 - Botanic Gardens and State Herbarium
 - SANFL
 - The University of Adelaide
 - Australian Institute of Landscape Architects
 - Pulteney Grammar School
 - South Australian Cricket Association
 - The North Adelaide Society Inc.
 - SECRA
 - State Planning Commission
 - Walking SA
 - National Parks and Wildlife Service South Australia
 - The City of Adelaide Reconciliation Committee
 - Adelaide Park Lands Association

1. Confidential Targeted Stakeholder Consultation in Early 2024

Early in 2024, confidential targeted stakeholder meetings were held with the intent of testing and refining the feedback that had been provided to-date, and supplementing areas where expert advice would enhance the intent of the APLMS. In addition, during the confidential targeted engagement, 14 submissions were received from:

- City of Norwood Payneham & St Peters
- City of Prospect
- City of Unley
- City of West Torrens
- Department of Climate Change, Energy, the Environment and Water
- KYAC
- Minister for Planning
- Minister for Recreation, Sport and Racing
- Office for Design and Architecture SA
- Planning and Land Use Services

- Renewal SA
- State Planning Commission
- The University of Adelaide
- World and National Heritage Branch

2. Community Consultation on the Draft APLMS – Towards 2036 from 17 June 2024

Introduction to the information included in the following tables

Stakeholder and community-wide consultation was open from 17 June to 9 August 2024. This section is the feedback and submissions provided by the community, exclusive of survey responses which are provided in Appendix 6.

Many of the stakeholders provided a written submission, which appear in full in Appendix 11, but have been summarised in the following table. The table provides a reference to where the submission includes a question, suggestion or feedback which has been directly reflected in the Recommendations of this report.

The feedback has been grouped into the following categories to assist with understanding the themes and issues that are applicable to groups:

1. Local Government
2. State Government Agencies.
3. User and Advocacy Groups
4. Community

A total of 37 emails were received in direct support of the Adelaide Park Lands Association's submission, which is fully detailed in Appendix 9. Kadaltilla has taken this support into account during its review of the feedback. When an email contained specific comments or suggestions, these have been incorporated into the Community Feedback table and are referenced by a unique number rather than by the sender's name.

Please note that all comments and feedback have been presented exactly as submitted. As a result, there may be variations in spelling, grammar, and syntax that do not adhere to standard conventions. We have deliberately chosen not to edit these elements to preserve the authenticity of each individual's submission. This includes how references to documents, place names, and organizations are presented; for instance, where "parklands" is written as a single word, park names are referenced by number or European name only, or acronyms are not fully capitalised.

1. Local Government

Local Government	Feedback/Comments	Key Feedback	Engagement Response
City of Adelaide	<p>They highlighted several key recommendations for improving the draft APLMS, which include:</p> <p>1. Investment and Funding Clarity: Include a reference to the City of Adelaide’s commitment to investment in Park Lands infrastructure and outline the total investment required for APLMS priorities and strategies.</p> <p>2. Park Land Use and Heritage Preservation: Clearly state the goal of returning hardstand Park Lands to their intended use, emphasise reducing parking, ensure all significant areas and items are designated as heritage items, and recognise and protect significant Kaurua heritage sites.</p> <p>3. Alternative Uses and Road Management: Define "alternative" uses of Park Lands that contribute positively to preservation and enhancement, clarify road closure considerations through modelling and consultation with the Department for Infrastructure and Transport.</p> <p>4. Heritage and Infrastructure: Enhance interpretation of heritage items and reconsider altering the structure of Wellington Square to preserve heritage elements.</p> <p>5. Private Funding and Collaborative Funding Models: Include a precise definition of “private funding” excluding consideration from private corporations, review investment wording distinguishing between maintenance and new infrastructure, and clarify</p>	Investment and funding clarity	Refer Recommendation 11.
		Park lands use and heritage preservation	Refer Recommendations 1, 2, and 3.
		Alternate uses and road management	Refer Recommendation 12.
		Heritage and infrastructure	Refer Recommendation 1, 4 and 8.
		Private funding and collaborative funding	Refer Recommendation 12.
		Definition of ‘private funding’	Refer Recommendation 4.
		Historical context	Refer Recommendation 11 and 17.

Local Government	Feedback/Comments	Key Feedback	Engagement Response
	<p>opportunities and implications of contributions from neighbouring Councils through a new funding model.</p> <p>6. Historical Context: Provide additional references or details on the historical practice of horse pasturing in Lefevre Park / Nantu Wama (Park 6).</p> <p>At a subsequent meeting it was also proposed to no longer allow parking in the Southern Park Lands for the Royal Agricultural Society events.</p>	Royal Agricultural Society events – no parking	Refer Recommendation 14.
City of Burnside	<p>Overall, supportive of the work on connectivity, ensuring the community has access to open space. Highlighting the importance of connectivity of working and cycling paths to surrounding suburbs, to ensure active transport is supported and can be encouraged.</p> <p>In the Victoria Park Precinct, we value:</p>	Create new and enhance existing nodes along key pedestrian access points	Refer Recommendation 6.
	<ul style="list-style-type: none"> - Inclusion of biodiversity elements and intent to “create new and enhance the existing nodes along key pedestrian access points and strengthen connectivity into the city from neighbouring suburbs”. 	Support increase in quality of habitat	Refer Recommendations 1 and 2.
	<ul style="list-style-type: none"> - Biodiversity and strongly support increases in the quality of habitat. - We recognise that this precinct also provides important public space for active and passive recreation for residents in surrounding suburbs and visitors, including large-scale events. 	Public space important for surrounding suburbs and events	Refer Recommendation 24.

Local Government	Feedback/Comments	Key Feedback	Engagement Response
	<ul style="list-style-type: none"> - We urge the City of Adelaide to ensure that the disturbance of nearby residents and businesses is minimised during events. E.g. we hope that events will be required to develop and promote active and public transport, rather than reliance on private cars, to reduce traffic congestion, parking issues and minimise greenhouse gas emissions. 	Minimise disturbance to nearby residents and businesses from major events	Refer Recommendation 29.
City of Norwood Payneham & St Peters	Connections between COA and adjoining councils be more clearly illustrated in each of the Precinct Plans.	Connections	Refer Recommendation 14.
City of Unley	<ul style="list-style-type: none"> • Four pillars: Unley encourages Kadaltilla to have an outward focus – collaboration with adjoining councils. 	In order to implement the pillars – encourage to collaborate with adjoining councils	Refer Recommendations 5, 6.
	<ul style="list-style-type: none"> • Include Principles of Good Design also to Goal 2 and 3 (as per Goal 1). 	Principles of Good Design into Goals 2 and 3	Refer Recommendation 30.
	<ul style="list-style-type: none"> • Shared activations and events should be considered with adjoining councils. 	Shared activations and events with adjoining councils	Refer Recommendation 31.
	<ul style="list-style-type: none"> • Connections and Networks – work more collaboratively with adjacent councils. 	Pathways, connections and networks to be joined up with adjoining councils	Refer Recommendation 6.
	<ul style="list-style-type: none"> • APLMS should advocate for more public transport services to the park lands. 	More public transport services to service the Park Lands	Refer Recommendation 24.
	<ul style="list-style-type: none"> • Council keen to pursue collaborative opportunities for Priority 7, Greenhill Road Corridor. 	Collaboration suggested re Greenhill Road Corridor	Already identified in plans for South East and South West Park Lands.
	<ul style="list-style-type: none"> • Pedestrian/cycling safety – new crossing points, improved visibility and reduce speed limit to 50km/hr. 		

Local Government	Feedback/Comments	Key Feedback	Engagement Response
	<ul style="list-style-type: none"> Suggestion of some additions/amendments to South East Precinct Plan and South West Precinct Plan maps. 	Suggesting more crossing points and reducing speed limit	Refer Recommendation 6.
		Map updates – SE precinct	Refer Recommendation 20.
The Town of Walkerville	<p>1. Places and Spaces – <i>Recommend a more detailed explanation on how these spaces will serve the needs of both local communities and visitors. Specifically it would be beneficial to include targeted plans for integrating new recreational and community spaces to cater to a wide range of activities and age groups. We suggest incorporating flexible use areas that can adapt to changing community needs over time.</i></p> <p>2. Connections <i>We propose a more detailed action plan for achieving these objectives, which could include: comprehensive mapping, infrastructure improvements, integration with local networks.</i></p> <p>3. Natural Systems, Cultural Landscapes and Climate Resilience</p> <p><i>Recommending:</i></p> <ul style="list-style-type: none"> <i>Enhance the strategy by incorporating specific measures to protect and restore natural habitats and biodiversity within the Park Lands.</i> <i>Provide more detail on how the cultural landscapes will be preserved and promoted.</i> <i>Develop a comprehensive climate resilience plan that addresses potential impacts such as extreme weather events and temperature changes.</i> 	Targeted plans for new recreational/community spaces, adaptable to changing needs	Refer Recommendation 7 and 13.
		More detail for pathways and connections with adjoining Councils	Refer Recommendation 6.
		Develop a comprehensive climate resilience plan	The City of Adelaide and the Government of South Australia have existing policies in relation to this topic.

Local Government	Feedback/Comments	Key Feedback	Engagement Response
City of West Torrens	<ul style="list-style-type: none"> Stormwater management interface Connection of pathways between CWTorrens and the Park Lands, CoA 	<p>Stormwater</p> <p>Pathways</p>	<p>Refer Recommendation 5.</p> <p>Refer Recommendation 6.</p>

2. State Government Agencies

Government entity	Feedback/Comments	Key Feedback	Engagement Response
Botanic Gardens and State Herbarium	<p>The Board is not supportive of any proposals to transfer care of control of parcels of Board lands to ACC.</p> <p><i>BGSH provided a table of updates to the maps, tables and text in the Strategy to ensure correct references.</i></p>	Feedback relating to control of Botanic Gardens	Refer Recommendation 18.
Department of Climate Change, Energy, the Environment & Water World & National Heritage Branch	<ul style="list-style-type: none"> State where reinstating heritage planting avenues. Mention the role of the Australian Government and State Government in relationship to World Heritage nomination. Under the National Heritage subheading – list what the National Heritage values are for Adelaide Park Lands and City Layout. APLMS lists what it calls ‘National Heritage conservation principles’. We have a recommendation on one of the principles: 	Detail were reinstating heritage planting avenues	Refer Recommendation 4.
		Include the Australian Government and Government of South Australia’s role in submitting for the World Heritage nomination	Refer Recommendation 4.
		List the National Heritage values	Refer Recommendation 4.

Government entity	Feedback/Comments	Key Feedback	Engagement Response
	<p><i>'Promote and allow ongoing use, change, development and maintenance of the Park Lands and City Squares whilst retaining their cultural heritage significance.'</i></p> <p>This does not foreground the National Heritage values so should not be referred to as a 'National Heritage Conservation Principle'.</p> <p>Recommend removal or it should be rephrased to read 'Ensure the Park Lands and City Squares retain their cultural heritage significance when considering the ongoing use, change, development and maintenance of the place'</p> <ul style="list-style-type: none"> • A point could be added to these principles about seeking best practice National Heritage advice from the Australian Government Department of Climate Change, Energy, the Environment and Water • Refer to World Heritage/UNESCO World Heritage Bid consistently. • On page 140 – recommend reference to the new Adelaide Park Lands and City Layout Heritage Management Plan and provide a discussion on how this interacts with the other plans of management. <p>Each precinct section of the APLMS lists a set of specific considerations and states that these should be considered alongside the Park Lands wide considerations. It would be helpful if the National Heritage values were clearly identified as a Park Lands wide consideration.</p>	<p>Suggestion of rephrasing a principle <i>'Promote and allow ongoing use, change, development and maintenance of the Park Lands and City Squares whilst retaining their cultural heritage significance.'</i></p> <p>Add to principles about best practice National Heritage advice from Australian Government</p> <p>Use consistent convention when referring to World Heritage/UNESCO</p> <p>Reference new Adelaide Park Lands and City Layout Heritage Management Plan</p> <p>Clearly identify each consideration for individual precincts</p>	<p>Refer Recommendation 23.</p> <p>Refer Recommendation 4.</p> <p>Refer Recommendation 4.</p> <p>Refer Recommendation 20.</p> <p>Refer Recommendation 4.</p>
Green Adelaide	It is suggested that the draft Strategy may make mention of Adelaide being an internationally recognised National Park City. As you may be aware,	Include reference to Adelaide being a National Park City.	Refer Recommendation 4 and 9.

Government entity	Feedback/Comments	Key Feedback	Engagement Response
	<p>the National Park City movement is a global movement to create cities worldwide where people and nature are healthier and better connected. Adelaide was recognised as Australia's first National Park City in December 2021. The Adelaide Park Lands play an important role in this status by providing unique spaces for people to connect with nature and each other. Green Adelaide would be pleased to provide further detail and/or specific wording on this matter, if helpful.</p>		
<p>Minister for Recreation, Sport & Racing</p>	<p>Notes that Department of Recreation, Sport and Racing have provided specific feedback.</p>	<p>Feedback was already provided during the early 2024 targeted stakeholder consultation.</p>	<p>Noted. This is a statement that doesn't require an amendment.</p> <p>The feedback provided was incorporated into the draft.</p>
<p>National Parks and Wildlife Service SA</p>	<p>We congratulate the team on pulling together a very comprehensive Strategy for the Park Lands, with the goal of increasing community engagement and access in the next 10 years.</p> <p>Our key feedback is primarily around the Return Areas Reschedule:</p> <ul style="list-style-type: none"> - There are a significant number of land parcels owned by the Minister which are listed as investigating these to be transferred to the City of Adelaide. Have any conversations been had with the Minister or Dept to flag these intentions? We think that it's important that the language in the plan makes no guarantee or assumption that this would be approved without having had further strategic discussions. - Site # 14 we believe is the Minister for Climate, Environment and Water and not Transport Minister. 	<p>The proposed Return Areas Schedule needs to be consulted with appropriate SA Government representatives</p> <p>Return Area Schedule #14: allocate to Minister for Climate, Environment and Water (not Transport).</p>	<p>Refer Recommendations 1, 3, and 13.</p> <p>Consultation is a requirement of the Adelaide Park Lands Act 2005.</p> <p>Noted updated to table.</p>

Government entity	Feedback/Comments	Key Feedback	Engagement Response
	CR5761/141 – we believe might be the same case. Happy for you to contact our team to work this through.		
Office for Design and Architecture SA	Acknowledged ongoing consultation and input to previous drafts have been included.	Feedback was already provided during the early 2024 targeted stakeholder consultation.	Noted. This is a statement that doesn't require an amendment. The feedback provided was incorporated into the draft.
Office of Recreation, Sport & Racing	Goal 1: Strategy 1.1: add in "recreational and sporting needs" Strategy 1.4: add in "responsive to their park setting, are inclusive and meet the needs of their users". Regarding Community Buildings, notes regarding accessible and inclusive clubrooms and how these facilities play a role in creating diversity of park users and maximise investment in the Park Lands.	Including 'sporting needs' after 'recreational' in Goal 1, Strategy 1.1	Refer Recommendation 29.
		Goal 1, Strategy 1.4 – wording change suggestion.	Refer Recommendation 29.
		Community Buildings (club rooms) need accessible and inclusive facilities, creating greater diversity in the range of people who can use facilities and maximise the investment.	Refer Recommendation 13 and 23.
Planning and Land Use Services	The commission have included Principles in the draft GARP and included an action to: Investigate options for a new governance and funding model for the Adelaide Park Lands with potential application to other state significant spaces.	Investigate options for a new governance and funding model for the Adelaide Park Lands.	Refer Recommendations 11 and 15.
Renewal SA	Pleased on anticipated Bonython Park Master Plan	General comment.	Noted. This is a statement that doesn't require an amendment.

Government entity	Feedback/Comments	Key Feedback	Engagement Response
			The Master Plan was check for consistency with the draft APLMS.
South Australian Motor Sport Board	<p>SAMSB did not receive a response from CoA in relation to the Park 16 Master Plan, which included items which may have a significant impact on SAMSB events:</p> <ul style="list-style-type: none"> • Significant changes proposed for pathways and ground treatments • New and upgrade park entry nodes • Temporary pump track, activity zone, temporary structures and painted ground surface on the pit garages/paddock area • New playing fields – one south of the Premium Playing Field and another between the East-West paths and the remnant vegetation conservation zone • New play zone in the float park area • Lots of tree planting, some of which may be impractical for event areas and the race circuit • Expansion of the remnant vegetation and butterfly conservation zone by approximately 14,000sqm. <p>GOAL 1 Master Plan 2.4.7 – 02 Outdoor gathering space Temporary planters – SAMSB would be interested to know about these Master Plan 2.4.7 – 03 Investigate temporary structures</p>	Engage stakeholders for Park 16 Master Plan	Individual Master Plans outline Stakeholder engagement activities.
		Engage with SAMSB Goal 1: temporary planters, temporary structures, line marking and sporting field optimisation	Refer Recommendation 22.
		Engage with SAMSB re Goal 2: relocating Wakefield Street pedestrian crossing, shared path planning and completion (ensure paths don't impact event vehicle access), improving entry nodes and consideration for temporary event parking	Refer Recommendation 22.
		Engage with SAMSB re Goal 3: consider a broader range of species, consider introduced risk of increased wetlands, consideration for major events when planting.	Refer Recommendation 22.
		Reconsider wording of 'controversial motor racing history', celebrate the history of motor sport in the park and due consultation relating to relocation of Ayrton Senna monument.	Refer Recommendation 22.
		Include targets for all eight strategies for Park 18	Refer Recommendation 10.

Government entity	Feedback/Comments	Key Feedback	Engagement Response
	<p>SAMSB would be interested to investigate mutually beneficial outcomes for CoA and SAMSB</p> <p>Master Plan 2.4.7 – 04 Activity zone</p> <p>Cost arrangements for line marking for event mode and everyday use.</p> <p>Master Plan 2.4.7 – 01 Optimise the number of sporting fields</p> <p>SAMSB would like to collaborate on implementation.</p> <p>GOAL 2</p> <p>Master Plan 2.4.2 – 01 Relocate Wakefield St ped xing</p> <p>Relocating may impact pedestrian crossover safety zone to the race circuit</p> <p>Master Plan 2.4.1 – 01 Complete continuous pedestrian/cycling path</p> <p>Would benefit broader community and minimise temporary impacts of redirections for park activities and construction.</p> <p>Master Plan 2.4.2 – 04 Improving entry nodes</p> <p>Supportive, seek to collaborate to ease integration of Adelaide 500 entry points to minimise occupation times.</p> <p>Master Plan 2.4.1 – 01 – Path hierarchy</p> <p>Investigate opportunities for buffer between track and grandstand. Proposed diagonal pathway between Fullarton and Wakefield Roads would impact event service vehicle access.</p> <p>Master Plan 2.4.1 – 07 Removal of underutilised paths</p>	<p>Align tree canopy percentage between Park 16 Master Plan and APLMS</p>	<p>Refer Recommendation 10.</p>

Government entity	Feedback/Comments	Key Feedback	Engagement Response
	<p>SAMSB not supportive of all removal, in some cases suggesting permanent surfaces.</p> <p>Master Plan 2.4.2 – 02 Provide additional Fullarton Road ped xings</p> <p>Consideration to temporary event parking, master plan doesn't seem to take into account temporary event parking.</p> <p>GOAL 3</p> <p>Master Plan 2.4.5 – Celebrate park lands character</p> <p>Suggest consideration be given to other fauna species beyond Chequered Copper (<i>Lucia Limbaria</i>), noting reasons for suggesting so.</p> <p>Master Plan 2.4.6 – Creek line and wetland</p> <p>Proposed creek experience to be given further consideration to the hazards that may be introduced for major event patrons.</p> <p>Master Plan 2.4.5 – Enhanced Park Lands Greening</p> <p>Plantings need to consider the impact to major events, including Adelaide 500. Propose temporary or relocatable greening.</p> <p>Master Plan 2.4.3 – Reveal the narrative of pre- and post-colonial history</p> <p>Reconsider wording of “controversial” motor racing history and any relocation of the Ayrton Senna monument would need to be cognizant of the negotiations with Senna Foundation. SAMSB would like to work collaboratively to celebrate motorsport history at the park.</p> <p>Master Plan Targets 2.2</p>		

Government entity	Feedback/Comments	Key Feedback	Engagement Response
	<p>Targets relate only to two of the eight strategies listed in the Park 16 ***are these numbers correct?*** plan is therefore incomplete without any meaningful targets.</p> <p>Misalignment of tree canopy percentage between Park 16 Master Plan and APLMS.</p>		
State Planning Commission	<p>Following the Kadaltilla presentation to the Commission on 20 June 2024, the members resolved to:</p> <ul style="list-style-type: none"> - include APLMS principles into the draft GARP. - investigate options for a new governance and funding model for the Adelaide Parklands with potential application to other state significant open spaces. 	Actions for the Commission mentioned.	Noted. These are actions for the Commission.
Walking SA	<p>Proposing route changes for the Park Lands trail.</p> <p>Enhancements such as rest points, quality of pavement, wayfinding signage and increasing awareness of the Trail are points highlighted in the submission.</p>	Park Lands Trail route changes, enhancements, path widening suggested	Refer Recommendations 5 and 6.
	<p>Suggestions of locations for consideration of upgrade or widening of shared paths.</p> <p>Suggestion of a model that sees each park with a perimeter and diagonal pathways.</p>	Suggestion of a network of perimeter and diagonal paths	Refer Recommendations 5 and 6.
	<p>Lighting and security upgrades are welcomed by Walking SA.</p>	Lighting and security updates already undertaken appreciated.	Refer Recommendation 16.
	<p>Consideration for more focus on the connections and crossings over roadways from the park lands to neighbouring suburbs, making specific reference to the railway line which doesn't have crossings towards the Port Road and across the Ring Road at Kent Town.</p>	Additional crossings over roadways from park lands to neighbouring suburbs suggested, specifically over railway line and across the Ring Road.	Refer Recommendation 5.

3. User and Advocacy Groups (including professional associations and peak bodies)

Organisation	Feedback/Comments	Key Feedback	Engagement Response
Adelaide Park Lands Association	<ul style="list-style-type: none"> Address tensions between the public interest in Open, Green, Public Park Lands and development that would exclude the public. Clarity on the definition of 'hubs' Endorse concept of proposed Adelaide Recreation Circuit Reinstate ambition to reduce car parking Offering participation to greening areas being returned to park lands use <p>The submission received endorsement from 37 APA members who expressed their support via email.</p>	Address tensions between the public interest in Open, Green, Public Park Lands and development that would exclude the public.	Refer Recommendations 26.
		Definition of 'hubs'	Refer Recommendation 12.
		Endorse concept of proposed Adelaide Recreation Circuit	Refer Recommendation 6.
		Reinstate ambition to reduce car parking	Refer Recommendation 14.
		Offering participation to greening areas being returned to park lands use	Refer Recommendation 26.
Australian Institute of Landscape Architects – SA Chapter	<p>Congratulate City of Adelaide and Kadaltilla on developing an outward-facing community document, celebrating the importance of the Park Lands for all.</p> <ul style="list-style-type: none"> Recommendation 1: Develop a concise Strategy Recommendation 2: Develop a clear and concise Vision for the future of the Adelaide Park Lands Recommendation 3: Acknowledgement of First Nations Recommendation 4: Highlighting and capitalising on the value of green public accessible places 	Develop a concise Strategy	Refer Recommendations 10, 19 and 20.
		Enable even greater appreciation of the Adelaide Park Lands and foster greater use,	Refer Recommendations 3 and 23.
		Encourage greater First Nations acknowledgement and inclusion, and the role of the Park Lands in shaping a more climate resilient and greener Adelaide.	Refer Recommendations 8 and 21.
		Highlighting and capitalising on the value of green public accessible places	Refer Recommendations 2 and 3.

	<p>draft management strategy for the Park Lands:</p> <ul style="list-style-type: none"> a) The Park Lands will provide valuable open space and environmental landscapes to the city, community and adjoining council areas and should be preserved from major developments. b) The Park Lands will be enhanced with green space and biodiversity that is protected from development, commercialisation and privatisation. c) Culturally and historically significant landscapes and built form will be identified and protected. <p>Further consideration be given to the “Adelaide Park Lands Definitions” and inclusion of a glossary of terminology to provide certainty of meaning, ease of interpretation, and assist understanding and intent.</p> <ul style="list-style-type: none"> • Maps and graphics should expressly state what is intended to be depicted and accurately reflect that intent; accurately reflect the area of built form, car parking, hardstand and event areas; and preferably over/underlay the most recently available 	<p>Include APLCLMP consultation in APLMS</p> <hr/> <p>Include ‘three predominant themes’ as objectives/outcomes</p>	<p>The major themes from the APLCLMP consultation were considered during the development of the draft APLMS.</p> <hr/> <p>Refer Recommendation 26.</p>

Organisation	Feedback/Comments	Key Feedback	Engagement Response
	<p>Goals, objectives or outcomes for the Adelaide Park Lands should include:</p> <ul style="list-style-type: none"> The Park Lands will be enhanced with natural verdant tree and ecologically diverse landscape and increased tree canopy, understorey and biodiversity; climate resilient flora and local fauna; and rehabilitate areas to a natural or parkland landscape The Park Lands will be freely publicly accessible year-round with event, sports, social and cultural spaces, walkways and trails conducive to a parkland environment; and enable people to sit, walk, run, cycle, exercise, play, converse, enjoy, socialise, experience, and participate culturally and safely The Park Lands will be recognised for their state and world heritage, cultural, and natural values and features; and will be enhanced by the progressive reduction of above ground built-form footprints, hardstand, carparking, and removal or reduction of state government structures and operations. <p>Too many of the strategies are overly reliant on creating various sorts of built form rather than enhancing natural forms, flora, biodiversity, and low impact parkland experiences.</p>	<p>Maps include year references</p> <hr/> <p>Include maps that show a timeline of boundary changes</p>	<p>A significant upgrade for this version of the APLMS is the introduction of an online APLMS with maps.</p> <p>Aerial photography gives the user the ability to compare areas of the park lands over many years – highlighting plantings, development, boundary changes, etc.</p> <p>It would not be practical to produce these images/maps in hardcopy form.</p> <hr/> <p>The Online version of the APLMS includes interactive aerial photography and/or maps which enable the viewer to see changes to the park lands over their history. It would not be practical to include such a volume of information and images in the document.</p>

Organisation	Feedback/Comments	Key Feedback	Engagement Response
	<ul style="list-style-type: none"> The notion of “medium” and “large” “hubs” on the Park Lands is objectionable. It is wholly inconsistent with the principles applicable to management of the Park Lands. They connote scale and permanence better suited to commercial zoned land or precincts and infer revenue raising. The meaningless and undefined expressions of <i>activate</i> and <i>activation</i> should be expunged from the draft APLMS. The suggestion of 5m wide “promenades” anywhere in the Park Lands without rationale and specification for location is, respectfully, disingenuous and destructive. Design quality says nothing of the natural environment and ecology, nor about minimising and reducing built form and hardstand footprints. The strategies should include natural form non-black heat sink bitumen path/walkways. The suggestion of “design of access roads and car parking should complement their Adelaide Park Lands setting, using permeable surfaces rather than black asphalt and avoiding traditional kerbing” is supported (albeit in conjunction with a strategy of progressively reducing car parking) and ought 	<p>Appendix of history of decisions that have altered the character of the park lands</p>	<p>The APLMS’s purpose is to outline the priorities and goals for the period going forward.</p> <p>Previous decisions would be referenced in preceding APLMS documents and other publications of the APLA.</p>
		<p>Add include enhancing the fundamental natural and ecological features and landscapes to the goals and pillars</p>	<p>Refer Recommendation 3 and 14.</p>

Organisation	Feedback/Comments	Key Feedback	Engagement Response
	<p>to extend to path/walkways.</p> <ul style="list-style-type: none"> Strategies directed to “create[ing] places and attractions that set the Adelaide Park Lands apart”; “provid[ing] permanent and temporary infrastructure to attract and service world class events in the Park Lands”; and “strengthen[ing] the role of the Adelaide Park Lands as a regional destination for competitive sport and a variety of active and passive forms of recreation” ought not be generalised but be conditional on location, impact and appropriateness within the proposed Park Lands context. In general strengthening and enhancing the Park Lands vis a vis State and World Heritage values and listing is critically important and would set the Park Lands apart, and whether a “world class event” or having a “regional destination” is conducive to that or to any part of the Park Lands will very much depend on the specific area contemplated. Any transitional notion as between a Park Land edge and an urban land use should not be within the Park Lands, but rather in the area adjacent that is not Park Lands. That is, no strategy should entail a reduction of parkland land use from the Park Lands nor 	<p>Goals, objectives or outcomes should include return to natural landscape, freely publicly accessible at all times and advance state and world heritage status</p>	<p>Refer Recommendation 3.</p>
		<p>Justification of 5m promenades not provided</p>	<p>Refer Recommendation 6.</p>

Organisation	Feedback/Comments	Key Feedback	Engagement Response
	<p>entail any increase of hardstand surfaces within the Park Lands. That should equally apply to “edge paths”, an horrendous example of which is along LeFevre Terrace and Whitmore Square, both of which have significantly reduced what is colloquially referred to as ‘green space’ in the sense of space on which planting could or would otherwise occur. Similarly, it is somewhat perverse that the area of hardstand surface is increased by widening heat sink black bitumen and wide concrete paths.</p> <ul style="list-style-type: none"> • The strategies should include existing (and any future) Park Lands community and ‘not for profit’ based facilities should progressively be required to be on a ‘non-exclusive’ and ‘shared use’ basis. • The strategies should include that where for any reason a tree is approved to be removed from within the Park Lands, the entity (including governmental) seeking the removal will bear the removal and associated cost of the tree payable to e.g., Kadaltilla, calculated in accordance with the methodology in “Tree Valuations in the City of Melbourne”. 	<p>Include natural environment in the design quality</p>	<p>Refer Recommendation 3.</p>
		<p>Transitions from edge to urban land use should not be within park lands</p>	<p>Refer Recommendation 6.</p>

Organisation	Feedback/Comments	Key Feedback	Engagement Response
	<p>Having regard to its varied experiences of the Corporation's consultation processes and assessment of priorities, and absent transparency of rationale and timing, it remains hesitant about the present consultation and assessment of what are to be the priorities for "Master Planning", save to say the priorities seems excessively focussed on squares and master plans.</p> <p>The priorities should have indicative timelines and should include:</p> <ul style="list-style-type: none"> • Progressive removal of black-heat-sink bitumen and immediate use and replacement with light coloured or other appropriate surface, including solar illuminated; and progressively increase the use of movement activated intensified lighting, and path-level LED type lighting (light the path, not the sky). • Cultural and interpretive work and artwork (temporary & longer-term) conducive to a parkland setting. There should be an objective of a specified percentage of Park Lands capital works being for artworks and creative innovations. • Many of the Squares have been the subject of improvement and master (or sub-master) planning and ought not become crammed full of other than 'green' verdant open space and safe pathways (not "promenades"). 	View expressed on consultation history.	Noted. This is a statement that doesn't require an amendment.
		Precinct Plans need to be explicit, include detail of conservation and cultural heritage, not include proposal to increase road access or on-park carparking	Refer Recommendation 1

5	I heartily endorse the submission made by the Adelaide Park Lands Association. No more buildings or bitumen in OUR parks, in fact demolish and remove some or a lot of these buildings and bitumen and return to greenery. Save our heritage.	No new buildings/bitumen, return to greenery.	Support noted. Refer Recommendations 1, 2 and 3.
8	In Adelaide, we are blessed to be surrounded by our beautiful parklands. They are the lungs of our city, home to treasured wildlife, places of peace and refuge in a time when 'green space' has never been more vital to our mental health. They are the defining characteristic of our city and widely envied by those whose City Fathers lacked such foresight. I'm sick of seeing them being eroded and compromised. I officially endorse the submission presented to you by The Adelaide Park Lands Authority. I urge you to recognise the need to treat the parklands as the treasure they are, before it's too late.	General comment.	Support noted. This is a statement that doesn't require an amendment.
9	I strongly support the submission made by the Adelaide Parklands Association- it is vital that the Council does whatever is possible to preserve the Parklands and prevent further incursion by building and car parks	Prevent further building/car parks on park lands.	Support noted. Refer Recommendations 1, 2 and 3.
13	I would like to endorse the proposal for the Parklands as submitted by the Adelaide Park Lands Association. We need to retain the maximum amount of parkland area. Too much encroachment has already happened. Clean up and clear out unused sites, do much more appropriate planting and quiet zones should be encouraged.	Clean up and clear out unused sites. Create Quiet zones and more appropriate plantings.	Support noted. Refer Recommendations 1 and 2.
15 & 16	As a long-term resident in the city square mile, we wish to endorse the Adelaide Parklands Association parklands management plan. This is a serious voting issue. The City of Adelaide has nothing very interesting to attract visitors & tourists and quality lifestyle investors, without the unique drawcard of being a city built inside a figure eight shaped, continuous belt of green nature parklands. It is of heritage status & a very distinctive attraction ad well as improves wellbeing of everyone able to access and enjoy them. The green nature parklands are our major positive point of difference to other cities worldwide. This is a genuine voting issue. Yes! cost of living squeeze and lack of public + affordable housing are major issues but parklands will tip the balance! I	General comment.	Support noted. This is a statement that doesn't require an amendment.

#	Feedback/Comments	Key Feedback	Engagement Response
	reiterate we wish to support the Adelaide Parklands Association parklands management plan.		
19	I have read the document "Towards 2036" and am concerned with the lack of protection it offers in regard to control over new building within the Parklands and the lack of planning to remove unused sheds scattered throughout the Parklands. I am also very concerned that the Plan does not include any reference to having the Parklands accepted as a World Heritage UNESCO site. This issue has found great support over the past years amongst counsellors, politicians, planning experts, environmentalists, stakeholders in tourism in South Australia, sporting clubs, heritage experts and people like me who recognise the uniqueness of our Parklands and wish to continue to share it and protect its uniqueness by having it recognised by UNESCO. It is particularly important now more than ever that we gain international recognition, put Adelaide on the tourist map and use this gem to South Australia's advantage. I also fully endorse the Parklands Association's submission to Council on "Towards 2036". Please, please consider and take on board this and the Parkland Association's responses to Council and use the Council's unique and powerful position to protect this valuable gem that is fast disappearing under the weight of misuse for public and private buildings.	General comment.	Support noted. This is a statement that doesn't require an amendment.
		Increase protections from new buildings within the park lands	Refer Recommendation 3.
		Remove unused sheds	Refer Recommendations 1 and 3.
		Reference World Heritage UNESCO bid	Refer Recommendation 4.
21	I wish to support the submission. A continuous trail would enhance the usage of the parklands. Look at the Tan track in Melbourne parklands. Anything to increase the usage of this unique resource would assist in promotion and recognition of it on world stage.	Encourage usage of the park lands via continuous trails	Support noted. Refer Recommendation 6.

#	Feedback/Comments	Key Feedback	Engagement Response
22	<p>I endorse the proposal put forward by The Adelaide Parklands Association as I believe our parklands are precious resources greatly appreciated by the Adelaide population at large. The placing of the parklands around the city perimeter by Adelaide's initial designers was a brilliant stroke ensuring green areas, trees, fresh air and recreational area was accessible for those dwelling or working within the city itself, and for all travelling through on their journeys to and fro. Using it as cheap land to build sporting and entertainment facilities for some is a backward and retrograde move and shows contempt for the concept the initial planners had, plus a shrug of indifference towards most of the Adelaide population. The only people satisfied with such moves would be the developers given the land and the handful of club members using the subsequent buildings. The areas around the old railway yards etc could be made so appealing and green and useful for generations to come, like Brisbane has done with their South Bank area, now family friendly, vibrant with the local people and tourists, such a brilliant move. Just thinking of some of the places we have visited during or holidays, Cairns has its famous lagoon area, Townsville has a beautiful development for family relaxation and use. Manly has huge areas of green grass and trees for the public to relax in, Melbourne still has Albert Park (some anyway), Perth has been developed beautifully, and the list could go on. New York has Central Park, I just cannot imagine short sighted government departments carving that up and giving it to self interested parties for their use. London and Paris have conserved huge beautiful, maintained areas around their huge and bustling cities. Why does Adelaide risk greedy snatching up of public land, such as was done across the beachfront in Glenelg some years ago? Why was the land by Festival Theatre given to developers to build another ugly</p>	<p>General comment.</p>	<p>Support noted. This is a statement that doesn't require an amendment.</p>
		<p>Rethink building sporting and commercial enterprises on Park Lands</p>	<p>Refer Recommendations 1 and 3.</p>

#	Feedback/Comments	Key Feedback	Engagement Response
	office tower? That could have been a beautiful area developed for our population to stroll through, sit on benches under trees, and relax in. In years to come these short sighted decisions will be seen as infamous. Please rethink the building of sporting and commercial enterprises on our precious fresh air zones. Admittedly our parklands are mainly dry and sparse and not so pretty - the fault of the combined governments who have not provided grassing, benches, pathways, maintenance - but they are open space, have large mature trees providing life sustaining oxygen and absorbing carbon dioxide, and best of all they are available to all to use and appreciate. In our local area we are lucky enough to boast a large green area providing relaxation and recreation, BBQ facilities, fresh air and mature trees full of bird life in the area surrounding Sturt Creek. It also has a wetlands area providing life and shelter for nature. It is a delight to wander through. Please keep our Parklands public areas.	Keep our park lands public areas	Refer Recommendations 3 and 7.
23	I endorse the submission made by the Adelaide Park Lands Association (copy attached). Further, I would recommend an addition to the strategy of complete removal of all motor vehicle racing events on any part of the park lands.	Add into strategy complete removal of motor sports	Support noted. Refer Recommendation 22 and 29.
24	I have read the 4 page submission by the Adelaide Parklands Association, and I endorse their opinions. There have been many areas allocated to development of buildings in recent years. It is time to stop, reconsider & make the greening of Adelaide a priority. No more new buildings. Save every existing tree, & plant more native habitats. Reject increased use by schools & commercial interests. I live in the hills & am appreciative of trees, birds & nature every time I lift my eyes to look outside. Such environments are soothing, thoughts are diverted, peace heals, nature can be studied. The parklands give us these gifts & more. Let not any more parkland be removed. Conserve & grow what we already possess - for our enjoyment and the enjoyment of future generations.	General comment.	Support noted. This is a statement that doesn't require an amendment.
		No more new buildings	Refer Recommendations 1, 2 and 3.
		Save every tree and plant more native habitats	Refer Recommendations 2, 3 and 8.
		Reject increased use by schools and commercial interests	Refer Recommendation 3.

#	Feedback/Comments	Key Feedback	Engagement Response
25	I am emailing to provide feedback for the Adelaide Park Lands Management Strategy. I endorse the four-page submission made by the Adelaide Park Lands Association. In particular, I am concerned about loss of current open space for large new developments that should have been built elsewhere (e.g., new Women's and Children's Hospital and Swimming Centre). I strongly advocate for State Heritage Listing of the park lands. And, I strongly support re-greening of underused bitumen surfaces.	General comment.	Support noted. This is a statement that doesn't require an amendment.
		Loss of open space for new developments (e.g. WCH)	Refer Recommendations 1, 2, and 3.
		Advocate for State Heritage Listing	Refer Recommendation 4.
		Support re-greening under-used bitumen sites	Refer Recommendation 1.
28	I endorse the submission of the Adelaide Parklands Association, especially with regard to the concerns it expresses re the proposed development of 'hubs' within the parklands for a variety of purposes, including commercial operations, and the failure to mention State Heritage or Unesco listing of the parklands as a desirable and realistic objective.	General comment.	Support noted. This is a statement that doesn't require an amendment.
		Reflect State Heritage/UNESCO listing	Refer Recommendation 4.
		Commercial operations as part of 'hubs'	Refer Recommendation 7.
32	I am an Adelaide resident and ratepayer, living near Hutt Street. I strongly endorse the submission by the Adelaide Park Lands Association. I especially urge the inclusion of reference to the adoption of State Heritage Listing and anything else that try to impede the State Government's intrusion. It is clear that State politicians see the Park Lands as free space for facilities such as hospitals, schools and police which leaves other space for developers. This is unacceptable and needs to stop to preserve Adelaide's unique design. The recent	Adopt State Heritage Listing	Support noted. Refer Recommendation 4.

#	Feedback/Comments	Key Feedback	Engagement Response
	pamphlet by Lucy Hood is a classic example of how politicians will twist the truth. If that was a Harvey Norman brochure, the ACCC would be prosecuting for false advertising.		
35	As a someone who frequently visits the city, I would like to contribute to the feedback requested for the Park Lands Management Strategy: "Towards 2036". I would just like to offer my support for the 4-page submission made by the Adelaide Park Lands Association (attached). This is based on website & information passed to me from my community members/workmates. Thank you for your consideration & we hope the matter will be resolved in the best interest of all.	General comment.	Support noted. This is a statement that doesn't require an amendment.
37	I would like to endorse the 4-page submission made by the Adelaide Park Lands Association in response to the Adelaide Parklands Authority's DRAFT Park Lands Management Strategy: "Towards 2036". As someone who has moved from Perth in 2020, I see the Parklands as a major drawcard to Adelaide. The unique green spaces are important in today's climate – both ecological and material. Research has shown greenery is better for the physical and mental health of the local community. Greenery also lowers the temperature of the area. Once the Parklands are lost, they will not be returned to Parklands, especially if private entities have access to build. Please consider the future of Adelaide on the world stage.	General comment.	Support noted. This is a statement that doesn't require an amendment.
		For climate/environmental protections	Refer Recommendation 2.
		Heritage status and marketing the Park Lands.	Refer Recommendations 4 and 9.
Bridgland, J	<p>The author's own summary:</p> <ul style="list-style-type: none"> Significant areas of ambiguity make it impossible for respondents to clearly comprehend the council's future intentions in a range of areas. In particular, some clauses in Goals 1 and 2 feature a number of ambiguous intentions, which embrace multiple controversial matters. The draft fails to present in simple and clear ways how the city council plans to manage 'hot button' issues that have plagued the South Australian public's park lands concerns for decades, 	More detail/definition on intentions, specifically Goals 1 and 2	See Recommendations 10, 11 and 12.
		<p>Sporting facility increased footprint</p> <p>Issues with other development encroaching on park lands - carparking, event management, commercial operations, fencing.</p>	<p>Refer Recommendation 23.</p> <p>Refer Recommendations 1, 3 and 14.</p>

#	Feedback/Comments	Key Feedback	Engagement Response
	<p>including sports club-room footprint expansions, park lands car parking pressures, events management and related commercial operations, and fencing.</p> <ul style="list-style-type: none"> The draft also features many unexplained matters, in which the administration's apparent desire for brevity has overwhelmed a respectful obligation to enlighten future interpreters in 'plain English' ways. The 'OurAdelaide' consultation explanatory material fails to provide adequate contextual Strategy background regarding the evolution of the three previous Strategies adopted since 1999, and how this draft compares with them. Procedures necessary to underpin some aspirations and management intentions behind this Strategy are not explained but will be critical to assist readers to understand how the procedures would work once the Strategy is endorsed. The distinction between building 'footprint' and 'fit-for-purpose' footprint is neither provided nor explained, even though its procedural application will be critical to the use of the Strategy over time, and to future park lands site builtform management. No clear summary is provided to reflect the public's long-held desire to establish ways to protect open space and public access to it, free of built form and car parking, to reduce expansion of commercially focused activities centred on monetising the use of the Adelaide park lands. <p>The absence of a substantial number of overdue Master Plans (pledged but not yet delivered) means that the draft Strategy is empty of material highly relevant to the future park lands management period 2024 to 2036. The lack of these plans illustrates that the draft is essentially a document that is 'hollow in the middle'. This is a major deficit.</p>	<p>Further definitions, in 'plain English'</p> <p>'OurAdelaide' consultation doesn't include contextual background on previous strategies</p> <p>Aspirations and management intentions behind this Strategy not detailed</p> <p>Definition 'footprint', 'fit-for-purpose'</p>	<p>Refer Recommendations 12 and 14.</p> <p>The previous Adelaide Park Lands Management Strategies are publicly available online. A comparison between the current APLMS and the draft APLMS – Towards 2036 is publicly available in the Kadatilla and Council Board Meetings agendas.</p> <p>There are a number of aspirations outlined in the Adelaide Park Lands Management Strategy that require detailed investigations such as the proposed Adelaide Park Lands Offset Scheme. The Strategy provides the basis for these investigations to occur.</p> <p>Building footprint was defined on page 19 of the Draft Adelaide Park Lands Management Strategy.</p>

#	Feedback/Comments	Key Feedback	Engagement Response
			Refer Recommendation 12 for definition of 'fit for purpose'
		Suggestion to include "public's long-held desire to establish ways to protect open space and public access to it, free of built form and car parking, to reduce expansion of commercially focussed activities centres on monetising the use of the Adelaide park lands".	Refer Recommendation 14 and 26.
		Substantial number of Master Plans not delivered, makes this draft 'hollow in the middle'	Where existing Master Plans are in place, they are referenced. Where there is the intent for a Master Plan to be delivered, that is also noted. Master Plans will be an ongoing planned activity to be developed in consultation with the community and relevant stakeholders and have regards to Precinct Planning Considerations.
Kiriam, H	<ul style="list-style-type: none"> • Bridge next to Beaumont Road – issue for cyclists being able to see oncoming traffic. • Introduce Keep Clear Zones for cycling paths where they intersect with major roads (eg Bartells Road). 	Feedback about specific cycling / pedestrian access.	Refer Recommendations 6 and 24.

#	Feedback/Comments	Key Feedback	Engagement Response
	When cycling on roads, to access the Park Lands, bikes do not trigger light changes which are manually activated. Suggestion of default to pedestrian access at least during the day (eg Greenhill & Fullarton Road intersection).		
Martin, M	<ul style="list-style-type: none"> Water efficiency – ensure new (or in some cases existing) buildings adjacent to squares and park lands use their water run-off to water gardens, etc. 	Suggestion of water efficiency standards.	Refer Recommendation 27.
	<ul style="list-style-type: none"> The Living nature of the Park Lands – developing, not just retaining existing biodiversity, using Aboriginal knowledge, develop a policy on how we share produce of the park lands and accessible to all 	Develop a policy on how we share produce of the park lands.	Refer Recommendation 28.
	<ul style="list-style-type: none"> Definition regarding ‘activation’ – implication is that it is a sporting or big event – needs to reference bush care programs, community gardening, etc 	Definition of ‘activation’	Refer Recommendation 12.
	<ul style="list-style-type: none"> Entries and pathways – infrastructure to have a cooling effect, shared paths are not always a good solution and sometimes undermine safety and enjoyment 	Pathways, entries to have a cooling effect	Refer Recommendation 6.
	<ul style="list-style-type: none"> Active Transport Indicators – introducing pathways on the edges of the park lands (reducing the footprint) is a concern 	Pathways on the edges of the park lands should not reduce boundaries	Refer Recommendation 6.
	<ul style="list-style-type: none"> What constitutes a Hub? Definition of hub unclear 	Definition of ‘hub’.	Refer Recommendation 12.
	<ul style="list-style-type: none"> Tree Canopy Cover – Definition required, does this refer to all trees, or only those of significant size that provide shelter 	Definition of ‘tree canopy cover’	Refer Recommendation 12.
	<ul style="list-style-type: none"> Whitmore Square/Ipparityi – Considerations for development and suggestions of creating outdoor rooms 	Define what is meant by ‘development and creating outdoor rooms’ for Whitmore Square	Refer Recommendation 12.
	<ul style="list-style-type: none"> South-West Park Lands Precinct – continue to engage with and work together with the locals 	Continue engagement with locals	Noted. This is a requirement under the Adelaide Park Lands Act 2005.

Prioritise remediation along Greenhill Road	Greenhill Road is already identified as a priority, refer to the South West and South East Park Lands Precinct Plans.
	<ul style="list-style-type: none"> Don't pave all walkways, some that remain natural give a greater sense of nature and variety. 	Pathway surface, natural is ok sometimes.	Refer Recommendation 6.
	<ul style="list-style-type: none"> Walyu Yarta community garden and key biodiversity areas create opportunities to expand knowledge. Create opportunities for people to help nurture nature. 	Community Gardens and biodiversity areas create educational and beneficial areas.	Refer Recommendation 28. The APLMS envisages community participation
	<ul style="list-style-type: none"> Attendees of events at Showgrounds don't always use the allocated temporary parking at the netball courts. 	Keep temporary event parking within allocated boundaries.	Refer Recommendation 14.
	<ul style="list-style-type: none"> Positive improvements include wetlands in the SE and locals doing plantings in the eastern park lands. 	Positive to include community in plantings.	Support noted. This is a statement that doesn't require an amendment.

APPENDIX 2: The Adelaide Park Lands and Governance

The Adelaide Park Lands is owned by the people of South Australia, under the care of both the City of Adelaide and the Government of South Australia. The following summarises the legislative environment which governs how the Park Lands are protected, managed and developed.

The Adelaide Park Lands

The Adelaide Park Lands are a nationally and internationally recognised network of parks, along with the City Layout, are inscribed on the Australian National Heritage List. Today the Adelaide Park Lands consist of 29 individual Parks and six City Squares, all with a variety of different features and facilities that form the heart of the Metropolitan Open Space System for Greater Metropolitan Adelaide. Forming a cohesive network of open spaces, the Park Lands are managed as a whole, in precincts and at an individual park scale.

The Adelaide Park Lands are a much-loved natural asset that must be protected for future generations, with picturesque landscapes of high biodiversity and heritage value, arts and music festivals, rich cultural heritage, major sporting and cultural events.

Kadaltilla / Adelaide Park Lands Authority (Kadaltilla)

The Kadaltilla / Adelaide Park Lands Authority (Kadaltilla) is the principal advisor to the City of Adelaide and the Government of South Australia on the protection, management, enhancement, and promotion of the Adelaide Park Lands. Kadaltilla is established pursuant to section 5 of the *Adelaide Park Lands Act 2005 (SA)* and operates as a subsidiary of the City of Adelaide, pursuant to section 42 of the *Local Government Act 1999 (SA)*. Kadaltilla acts in accordance with its Charter and the *Adelaide Park Lands Act 2005 (SA)*.

Kadaltilla's Strategic Plan 2024–2028 includes the following guiding principles and pillars:

Guiding Principles

- Preserve and strengthen the integrity of the Adelaide Park Lands
- Promote the values of the Adelaide Park Lands – as Adelaide's defining feature, and an internationally unique asset
- Partner with Council and the state government to advocate the benefits of the Adelaide Park Lands
- Advise Government at all levels on the management and usage of the Adelaide Park Lands for the benefit of all South Australians.

Pillars

Figure 7: Kadaltilla Strategic Plan Pillars

The Adelaide Park Lands Act 2005 (SA)

Since 2005, the Park Lands has received protection through the *Adelaide Park Lands Act 2005 (SA)* (the Act). Kadaltilla provide advice on the Adelaide Park Lands to State and local government.

The Act identifies a key function of Kadaltilla as being:

To ensure that the interests of South Australians are taken into account, and that community consultation processes are established, in relation to the strategic management of the Adelaide Park Lands.

The Adelaide Park Lands Management Strategy (APLMS)

The Adelaide Park Lands Management Strategy (APLMS) has been developed by Kadaltilla and sets the strategies, projects and planning considerations that will be used by Kadaltilla, the City of Adelaide, the Government of South Australia, cultural institutions, and community stakeholders to guide decisions relating to the Adelaide Park Lands.

The APLMS takes into account a range of trends and changes affecting the Adelaide Park Lands, climate, population growth in the City of Adelaide and Greater Adelaide, increasing demand for use, and public recognition of their uniqueness and need for protection.

A primary purpose of the APLMS is to identify goals, set priorities and identify strategies with respect to the management of the Adelaide Park Lands.

APPENDIX 3: Phase 3 Engagement: APLMS Fact Sheets

A total of 13 fact sheets were prepared to support the engagement for the draft APLMS – Towards 2036.

To communicate the way previous feedback had influenced the updates to the draft APLMS, six Quick Reference Guides were prepared on the themes from those responses:

- Access and Connectivity, 3 pages
- Biodiversity and Greening, 3 pages
- Enhancements and Protections, 4 pages
- Events and Spaces, 3 pages
- Kaurua and First Nations, 3 pages
- Recreation and Sport, 3 pages

A set of seven supplementary Technical Fact Sheets were prepared, and likely to be of interest to a more focussed stakeholder:

- Access Roads and Car Parking, 1 page
- Adelaide Park Lands Gold Course and Surrounds, 2 pages
- Adelaide Park Lands Investment, 1 page
- Community Buildings, 1 page
- Legislative Context and Interactions, 1 page
- What's Changed, 2 pages
- Who are Kadaltilla and what is the APLMS, 3 pages

These Quick Reference Guides and Technical Fact Sheets are reproduced in the following pages for reference.

Adelaide Park Lands Management Strategy — Towards 2036

Access & Connectivity

Opportunities to improve access and connectivity to the Adelaide Park Lands.

The **Adelaide Park Lands Management Strategy – Towards 2036** will support people to walk or cycle to the Adelaide Park Lands and enjoy safe and pleasant surroundings along the way.

With a strategic focus to improve the Adelaide Park Lands Trail through improved connections and crossings, the strategy will encourage active transport, enhanced amenity and improved safety.

Government of South Australia CITY OF ADELAIDE Kadaltilla.
Adelaide Park Lands Authority

Adelaide Park Lands Management Strategy — Towards 2036

Access & Connectivity

Highlights

The Strategy uses a spatial planning approach for to explain the variety of ways in which safe and legible connections and movement into and through the Adelaide Park Lands are provided, allowing users to access the diversity of activities and attractions that are on offer.

Strategies

The Adelaide Park Lands are a network of connected parks

Strategy 2.1 Improve the Adelaide Park Lands Trail linking all parks and providing a pleasant and convenient cycling and walking route.

The Adelaide Park Lands connect the city to the inner suburbs

Strategy 2.2 Connect the Adelaide Park Lands with the hills, coast and metropolitan open space network.

Strategy 2.3 Improve public and active transport connections with Adelaide Park Lands.

Strategy 2.4 Improve safety, universal design and connectivity within and to the Adelaide Park Lands.

The Adelaide Park Lands are easily identifiable

Strategy 2.5 Develop an identifiable landscape character for Adelaide Park Lands edges (urban address).

Strategy 2.6 Create a strong, cohesive overall Adelaide Park Lands identity.

The Adelaide Park Lands invite exploration and are safe and easy to access and move around in, day and night

Strategy 2.7 Install wayfinding signage enhancing the legibility of paths and connections across the Adelaide Park Lands.

Strategy 2.8 Develop a network of bicycle parking and bicycle hire facilities across the Adelaide Park Lands.

Strategy 2.9 Establish shared walking and cycling paths throughout the Parks that include safe connections and crossing points.

Strategy 2.10 Create a path network within each park that complements the landscape character and desired use of the park.

Strategy 2.12 Incorporate smart technology in priority locations across the Adelaide Park Lands

Strategy 2.14 Enhance the Adelaide Park Lands Trail.

Strategy 2.15 Provide lighting to support safe movement throughout the Adelaide Park Lands balanced with preservation of environmental values and biodiversity.

Priorities

The Strategy seeks to improve access and connectivity to the Adelaide Park Lands through the following priorities:

Greenhill Road Corridor
Provide improvements to the Greenhill Road Corridor including an expanded east-west walking and cycling connection, wayfinding and storytelling, safer road crossings, shade and amenities.

Great Connections
Improve pedestrian and cycling networks with regular and safe crossing points, amenity along the route and path lighting.

The Urban Address
Provide an increased level of amenity and attraction along Adelaide Park Lands frontages to both the city and inner-rim suburbs with a focus on park entries to encourage and entice further exploration deeper into the parks.

Access & Connectivity

Lights, Lights, Lights

Provide wildlife appropriate lighting along key paths, at recreation hubs, sporting ovals and the urban address to support increased night-time use and improve safety.

Shade Avenues

Reinstate heritage planting avenues and review opportunities for new avenue planting to provide shade for users.

Wayfinding and Interpretation

Continue to install wayfinding and interpretive signage across all parks as necessary, particularly when associated with other park upgrades, including opportunities for the expression of Kaurua culture.

Adelaide Park Lands Trail

Enhance the Adelaide Park Lands Trail through wayfinding, safer road crossings, shade for users and incorporate storytelling and amenities along the way.

Investment opportunities

Access and connectivity projects identified in the Strategy include completion of existing priorities and exploration of new opportunities, including:

- Park Lands Trail improvements
- Victoria Park/Pakapakanthi (Park 16) Master Plan implementation
- Bonython Park/Tulya Wardli (Park 27) Master Plan including Kate Cocks Park/Port Road Development
- Greenhill Road Corridor
- Northern Park Lands Master Planning

Adelaide Park Lands Management Strategy —
Towards 2036

Biodiversity & Greening

Adelaide Park Lands rich biodiversity aids ecological connectivity, protecting against climate change, disease, and pests

The *Adelaide Park Lands Management Strategy – Towards 2036* improves biodiversity and delivers on further greening the Adelaide Park Lands. The strategies and priorities protect our remnant vegetation or undertake native revegetation.

With a strategic focus on enhancing ecological connectivity and facilitating movement of animals and plant material (eg seed), the Adelaide Park Lands will be more resilient to threats presented as climate change, disease, and pests, and ensure an enjoyable place to rest and play.

Adelaide Park Lands Management Strategy — Towards 2036

Biodiversity & Greening

Strategy Highlights

The Adelaide Park Lands celebrate biodiversity

Strategy 3.4 Through Biodiversity Sensitive Urban Design enhance biodiversity in the Adelaide Park Lands and provide food resources and habitat for targets species.

Strategy 3.5 Continue to protect and seek to expand Key Biodiversity Sites.

Strategy 3.6 Seek opportunities to improve the condition of remnant vegetation.

Strategy 3.7 Participate and lead in global urban biodiversity initiatives and research.

The Adelaide Park Lands are water sensitive, with healthy watercourses

Strategy 3.8 Enhance the ecological health of Adelaide Park Lands watercourses, including water quality improvement.

The Adelaide Park Lands are climate resilient

Strategy 3.9 Ensure sustainable water use across the Adelaide Park Lands.

Strategy 3.10 Strengthen the Adelaide Park Lands' role in developing a climate resilient city.

Strategy 3.11 Design and manage the Adelaide Park Lands to be resilient to increased use due to population growth.

Strategy 3.12 Retain and strengthen distinctive mature tree species through succession planting.

Strategy 3.13 Seek opportunities to increase greening and tree canopy, including through community participation.

Strategy as 3.14 Understand the risks for tree species and biodiversity from pests, diseases and climate change and develop adaptation responses.

Biodiversity & Greening

Priority Highlights

Ecological health and connectivity of biodiversity within the Adelaide Park Lands:

Kaurna Country Charter

The Kaurna People's connection to country is ongoing. There are opportunities to seek the advice and participation of the Kaurna People in management of biodiversity in the Park Lands. This will improve management outcomes, and will enable acknowledgment and celebration of the Kaurna People's culture and ongoing connection to country.

Restore Riparian Corridors

Realign and naturalise creek networks to improve water quality, biodiversity movement and fauna habitat. Incorporate opportunities for informal recreation and nature play, boardwalks and walking trails, and wayfinding and interpretive signage.

Strategic Water Resources

Improve the sustainable sourcing and use of water throughout the Adelaide Park Lands for sport, recreation, planting, amenity and cooling.

Greening and Canopy Cover

Increase tree canopy cover, reduce hard surfaces in the Adelaide Park Lands, prioritising areas that are the most vulnerable to heat and where tree canopy is at risk from climate change.

Investment opportunities

Priority projects have been identified to guide future investment in the enhancement and protection of the Adelaide Park Lands. Biodiversity and greening projects include completion of existing priorities and exploration of new opportunities, including:

- Park Lands Trail improvements
- Increasing greening and canopy cover
- Northern Park Lands Master Planning
- River Torrens/Karrawirra Pari Restoration

Adelaide Park Lands Management Strategy —
Towards 2036

Enhancements & Protections

Partnering to preserve and celebrate our precious Adelaide Park Lands

The **Adelaide Park Lands Management Strategy – Towards 2036** sets a long-term vision for the Adelaide Park Lands by setting goals and identifying priorities that will guide the protection and enhancement of this National Heritage Listed Landscape through the next decade. The Strategy sets out a long-term vision for our city's open space, and secures this future and responds to the critical challenges of:

- Embedding Kaurna culture
- Respecting and acknowledging the past
- Improving climate resilience
- Learning from management of parks across the world.

Adelaide Park Lands Management Strategy — Towards 2036

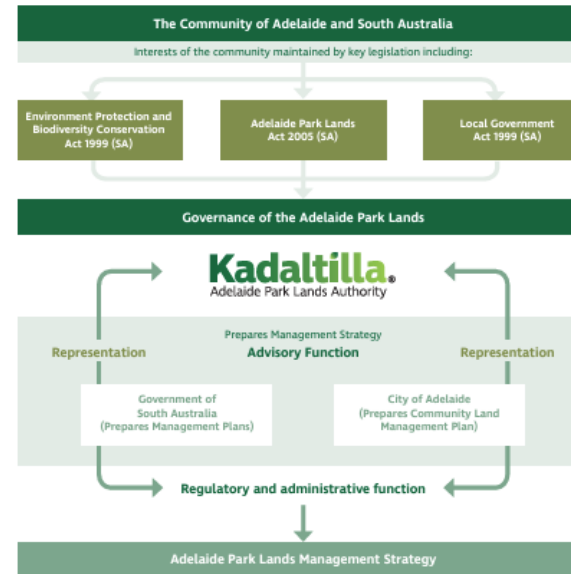

Enhancements & Protections

Governance

The governance of the Adelaide Park Lands is shared between the Government of South Australia and the City of Adelaide.

The Kadaltilla/Adelaide Park Lands Authority (Kadaltilla) is the principal advisor to the City of Adelaide and the Government of South Australia on the protection, management, enhancement,

and promotion of the Adelaide Park Lands. Kadaltilla is established pursuant to section 5 of the *Adelaide Park Lands Act 2005* (SA) and operates as a subsidiary of the City of Adelaide, pursuant to section 42 of the *Local Government Act 1999* (SA). Kadaltilla acts in accordance with its Charter and the *Adelaide Park Lands Act 2005* (SA).

Enhancements & Protections

Kadaltilla/Adelaide Park Lands Authority

Kadaltilla/Adelaide Park Lands Authority is responsible for preparing the Adelaide Park Lands Management Strategy.

The Strategy sets the strategies, projects and planning considerations that will be used by Kadaltilla/Adelaide Park Lands Authority, the City of Adelaide, the Government of South Australia, cultural institutions, and community stakeholders to guide decisions relating to the Adelaide Park Lands.

The APLMS

The Strategy relates to all land managed by state agencies, authorities and City of Adelaide in the Adelaide Park Lands Plan and aims to:

1. Protect the integrity of the Adelaide Park Lands National Heritage Values
2. Manage the Adelaide Park Lands in an environmentally and financially sustainable manner
3. Increase the community's use of the Adelaide Park Lands
4. Ensure the Adelaide Park Lands are widely accessible to the public
5. Safeguard and celebrate the natural, cultural and recreational values of the Adelaide Park Lands
6. Improve the quality of landscapes and facilities
7. Improve the community's awareness of the natural and cultural heritage of the Adelaide Park Lands through interpretation.

Using a spatial planning approach and focusing on key themes identified through stakeholder and community consultation, the Strategy provides a bold vision towards 2036 for the overall enhancement and protection of the Adelaide Park Lands.

The Strategy takes into account a range of trends and changes affecting the Adelaide Park Lands, including: climate, population growth in City of Adelaide and Greater Adelaide, and increasing demand for use. It also takes into account a growing demand for their protection due to public recognition of their uniqueness.

The Strategy responds to the critical challenges of:

- Embedding Kurna culture
- Respecting and acknowledging the past
- Improving climate resilience
- Learning from management of parks across the world.

Heritage

The Strategy recognises that enhancing heritage provides the opportunity to increase awareness and protection of the Adelaide Park Lands to ensure values are retained into the future.

Cultural Heritage

Respecting Kurna people's rights as Native Title holders, relationships with Country and taking a First Nations lens to planning and managing the Adelaide Park Lands as Country benefits community health and wellbeing, education, cultural knowledge protection, and ecological resilience.

The Adelaide Park Lands Management Strategy – Towards 2036 supports Kurna people Caring for Country and returning traditional practices such as cultural burning for management of the Adelaide Park Lands. These traditional practices will be guided by Kurna with support from the City of Adelaide.

World Heritage

The City of Adelaide, in partnership with Adelaide Hills Council (representing councils across the Mount Lofty Ranges) is working on a joint bid for World Heritage Status for the Adelaide Park Lands and City Layout, along with the rural settlement landscapes of the Mount Lofty Ranges.

Enhancements & Protections

National Heritage

The Adelaide Park Lands and City Layout is widely regarded as a masterwork of urban design and signifies a turning point in the settlement of Australia.

The Adelaide Park Lands and City Layout were inscribed on the National Heritage list in November 2008.

State Heritage

The South Australian Heritage Council has recommended the Adelaide Park Lands, Squares and City Layout be recommended to the Minister for Planning for State Heritage Area consideration.

State and Local heritage items are found throughout the Adelaide Park Lands.

Strategic Planning Context

The Government of South Australia and City of Adelaide are required to prepare Management Plans for the Adelaide Park Lands.

The City of Adelaide **Community Land Management Plans (CLMP)** for the Adelaide Park Lands set out objectives, policies and proposals for management of the Adelaide Park Lands, states performance targets and measures, provides information on any restrictions to public use or movement through the Adelaide Park Lands, and includes specific information on relevant policies for the granting of leases and licenses.

Development in the Adelaide Park Lands is assessed against the state government's **Planning and Design Code**.

The State Planning Commission is progressing the **Greater Adelaide Regional Plan (GARP)** that outlines a commitment to building on the **Metropolitan Open Space System (MOSS)** framework.

The City of Adelaide's **City Plan** links with this Strategy to identify opportunities and areas of the Adelaide Park Lands that will need to respond to increased population and visitation.

Priority Highlights

The following priorities will enhance and protect the Adelaide Park Lands:

Kurna Country Charter

Co-develop a Kurna Country Charter with input from Kurna People, City of Adelaide and Government of South Australia to inform decision making for the Adelaide Park Lands that provides guidance to support the implementation of a Connecting with Country Framework.

Restore Riparian Corridors

Realigning and naturalising creek networks to improve water quality, biodiversity movement and fauna habitat. Incorporate opportunities for informal recreation and nature play, boardwalks and walking trails, and wayfinding and interpretive signage.

Strategic Water Resources

Improve the sustainable sourcing and use of water throughout the Adelaide Park Lands for sport, recreation, planting, amenity and cooling.

Greening and Canopy Cover

Increase tree canopy cover, reduce hard surfaces in the Adelaide Park Lands, prioritising areas that are the most vulnerable to heat and where tree canopy is at risk from climate change.

UNESCO World Heritage Bid

Recognised as one of the most complete examples of nineteenth-century colonial planning, achieving UNESCO World Heritage status for the Adelaide Park Lands and City Layout would bring international recognition and attention to our region, be a source of local, state and national pride, and boost optimism and investment.

- Recreation & Sport

Events & Spaces

Enhancing event areas and open spaces to support a diverse range of events and activities

The *Adelaide Park Lands Management Strategy – Towards 2036* reflects and supports a diverse range of environmental, cultural, recreational and social values and activities that should be protected and enhanced.

As the venue for many of Adelaide's and South Australia's premier events and tourist attractions, the Adelaide Park Lands are critical to promoting and enhancing the social, cultural and economic life of the city.

Events & Spaces

Events

With a dynamic cultural life, Adelaide has an enviable reputation as one of the world's most liveable cities. It hosts a year-round calendar of events and activities that delight, inspire and engage local, national and international audiences.

The Adelaide Park Lands' diverse range of beautiful open spaces host major events through to small-scale community events and weddings.

Hubs

A hierarchy of small, medium and large hubs is defined to identify appropriate levels of amenity to be provided.

Small hubs provide basic amenities and are typically located along paths, at path intersections, or adjacent open space where informal recreation may occur.

Medium hubs provide amenities and facilities to cater for large gatherings and are typically located for ease of access and are destinations within the Adelaide Park Lands in their own right.

Large hubs are significant destinations within the Adelaide Park Lands intended to attract large numbers of people and generate high levels of activity.

Formal Parks and Playspaces

Formal Parks and playspaces offer high levels of amenity to attract users and encourage them to stay, providing places for respite with comfort and facilities, and areas for activity, play and amusement. They are well connected to the surrounding suburbs and the city and generally include sustainably irrigated open space for activity and play opportunities.

Strategy Highlights

The Adelaide Park Lands are a place to meet and enjoy diverse experiences

Strategy 1.1 Create a network of activity hubs (small, medium and large) attracting visitors and tourists and supporting the recreational needs of people of all ages, abilities and cultures.

Strategy 1.2 Create places and attractions that set the Adelaide Park Lands apart.

Strategy 1.3 Promote the Adelaide Park Lands as a visitor and tourist destination.

The Adelaide Park Lands will host diverse events, from small to large, in more places more often

Strategy 1.4 Support activation of the Adelaide Park Lands by upgrading and enhancing buildings and structures responsive to their park setting.

Strategy 1.5 Create spaces to accommodate cultural, sporting, artistic and recreational events of varying types and sizes.

Strategy 1.6 Provide both permanent and temporary infrastructure to attract and service world class events in the Park Lands.

The Adelaide Park Lands are Adelaide's hub for sport and recreation

Strategy 1.7 Strengthen the role of the Adelaide Park Lands as a regional destination for competitive sport and a variety of active and passive forms of recreation.

Strategy 1.8 Optimise the community use of sport and recreation areas outside formal game and training times.

Events & Spaces

Priority Highlights

The Strategy seeks to enhance event areas and open spaces to support a diverse range of events and activities through the following priorities:

Light Square/Wauwi Master Plan

Deliver a master plan for Light Square/Wauwi that explores connection and care for country, improved tree canopy, succession planting, heritage values, transport, walking and cycling connectivity, events, adjacent uplift and future uplift potential, climate change mitigation, artwork and cultural celebrations, smart technology and increased residential population and changing demographics.

Helen Mayo Park/Tulya Wardli (Park 27C)

Deliver a master plan and commence return of Helen Mayo Park/Tulya Wardli (Park 27C) to an Adelaide Park Lands destination connecting the North Terrace Health and Education Precinct and Karrawirra Pari to the city.

Victoria Park/Pakapakanthi (Park 16) Implementation

Commence the staged implementation of the Victoria Park/ Pakapakanthi (Park 16) Master

Plan in collaboration with the local community, stakeholders and land managers to improve accessibility and amenity throughout Victoria Park/Pakapakanthi (Park 16).

Bonython Park/Tulya Wardli (Park 27) Master Plan

Deliver a master plan for Bonython Park/Tulya Wardli (Park 27) that provides improvements to the broader Precinct including Kaurna culture, greening, playspaces, connectivity and integration with the New Women's and Children's Hospital.

Investment opportunities

Priority projects have been identified to guide future investment in the enhancement and protection of the Adelaide Park Lands. Events and spaces projects include completion of existing priorities and exploration of new opportunities, including:

- Light Square/Wauwi Master Plan
- Helen Mayo Park/Tulya Wardli (Park 27C)
- Victoria Park/Pakapakanthi (Park 16) Master Plan implementation
- Bonython Park/Tulya Wardli (Park 27) Master Plan including Kate Cocks Park/Port Road Development

Adelaide Park Lands Management Strategy —
Towards 2036

Kurna & First Nations

Promoting the cultural values of the Adelaide Park Lands and respecting Kurna culture, heritage and wellbeing

The *Adelaide Park Lands Management Strategy – Towards 2036* will provide opportunities for ongoing connection to Country for Kurna and other First Nations peoples and provide places to share their rich and abiding cultures with visitors and the South Australian community.

Listening to Kurna people and integrating Kurna knowledge into the planning, design and management of the Adelaide Park Lands respects Kurna people's rights as Native Title holders and their relationship with Country.

Adelaide Park Lands Management Strategy — Towards 2036

Kurna & First Nations

Kurna people's rights, knowledge and living cultures are respected and valued recognising that the Adelaide Park Lands are part of Country and can be accessed and used by First Nations peoples to support their connection and reconnection with Country for cultural, social, spiritual and economic purposes.

With a strategic focus on promoting cultural values of the Adelaide Park Lands and respecting Kurna culture, a Kurna Country Charter will be co-developed with input from Kurna People, City of Adelaide and Government of South Australia to inform decision making for the Adelaide Park Lands that provides guidance to support the implementation of a Connecting with Country Framework.

The Adelaide Park Lands Management Strategy – Towards 2036 supports Kurna people who are Caring for Country and returning traditional practices such as cultural burning for management of the Adelaide Park Lands.

Kadaltilla is a traditional Kurna word meaning *green place*.

Kurna Yerta and its people will be represented in interpretive signage, public art, the creation of Kurna cultural places and playspaces will consider Kurna culture and heritage.

Listening to Kurna people and integrating Kurna knowledge into the planning, design and management of the Adelaide Park Lands respects Kurna people's rights as Native Title holders and their relationship with Country. We will take a First Nations lens to planning and managing the Adelaide Park Lands as Country benefits community health and wellbeing, education, cultural knowledge protection, and ecological resilience.

A Kurna cultural burn was held at Carriageway Park in Tuthangga (Park 17) of the Adelaide Park Lands on Friday 14 May 2021. The burn was the first cultural burn in an Australian capital city and the first on Kurna Yerta (Country) since European colonisation.

Kaurna & First Nations

Strategy Highlights

Strategy 1.1 Create a network of activity hubs attracting visitors and tourists and supporting the recreational needs of people of all ages, abilities and cultures.

Strategy 1.5 Create spaces to accommodate cultural, sporting, artistic and recreational events of varying types and sizes.

Strategy 3.1 Recognise, promote and protect sites of Kaurna cultural heritage and significance and work with Kaurna to provide education to the community about these sites.

Strategy 3.2 Provide a positive visitor experience of sites of cultural significance.

Strategy 3.3 Establish a range of natural, ornamental and cultural landscapes celebrating the diversity of the Adelaide Park Lands.

Priority Highlights

Kaurna Country Charter

Co-develop a Kaurna Country Charter with input from Kaurna to inform decision making for the Adelaide Park Lands that provides guidance to support the implementation of a Connecting with Country Framework.

Amazing Art

Consider permanent and temporary displays of art including art trails and interactive artworks across the Adelaide Park Lands.

Wayfinding and Interpretation

Continue to install wayfinding and interpretive signage across all parks as necessary, particularly when associated with other park upgrades, including opportunities for the expression of Kaurna culture.

Adelaide Park Lands Trail

Enhance the Adelaide Park Lands Trail through wayfinding, safer road crossings, shade for users and incorporate storytelling and amenities along the way.

Investment opportunities

Priority projects have been identified to guide future investment in the enhancement and protection of the Adelaide Park Lands. Projects of importance to the Kaurna people include completion of existing priorities and exploration of new opportunities, including:

- Helen Mayo Park/Tulya Wardli (Park 27C)
- Park Lands Trail improvements
- Bonython Park/Tulya Wardli (Park 27) Master Plan including Kate Cocks Park/Port Road Development
- Golden Wattle Park/Mirru Wirra (Park 21 West)
- River Torrens/Karrawirra Pari Restoration

Adelaide Park Lands Management Strategy —
Towards 2036

Recreation & Sport

The Adelaide Park Lands is the home of metropolitan sport

The *Adelaide Park Lands Management Strategy – Towards 2036* identifies opportunities to strengthen the role of the Adelaide Park Lands as a regional destination for competitive sport and recreation with a strategic priority to redevelop community buildings so that they support sport and recreation in the Adelaide Park Lands and meet community expectations.

Facilities within the Adelaide Park Lands will include a mix of sports fields, cricket pitches, courts, walking and cycling trails, riparian corridors, formal and open spaces and playgrounds.

Adelaide Park Lands Management Strategy — Towards 2036

Recreation & Sport

Community buildings

Community buildings will support a range of community organisations including sport and recreation clubs, community education and community service providers.

Places and spaces within the Adelaide Park Lands will respond to the needs of growing and changing communities in the city and neighbouring suburbs to create great destinations for all South Australians to enjoy.

Strategy Highlights

The Adelaide Park Lands are a place to meet and enjoy diverse experiences

Strategy 1.1 Create a network of activity hubs attracting visitors and tourists and supporting the recreational needs of people of all ages, abilities and cultures.

Strategy 1.4 Support activation of the Adelaide Park Lands by upgrading and enhancing buildings and structures responsive to their park setting.

Strategy 1.5 Create spaces to accommodate cultural, sporting, artistic and recreational events of varying types and sizes.

The Adelaide Park Lands are Adelaide's hub for sport and recreation

Strategy 1.7 Strengthen the role of the Adelaide Park Lands as a regional destination for competitive sport and a variety of active and passive forms of recreation.

Strategy 1.8 Optimize the community use of sport and recreation areas outside formal game and training times.

The Adelaide Park Lands are a network of connected parks

Strategy 2.1 Improve the Adelaide Park Lands Trail linking all parks and providing a pleasant and convenient cycling and walking route.

Strategy 2.3 Improve public and active transport connections with Adelaide Park Lands.

The Adelaide Park Lands invite exploration and are safe and easy to access and move around in, day and night

Strategy 2.14 Enhance the Adelaide Park Lands Trail.

Strategy 2.15 Provide lighting to support safe movement throughout the Adelaide Park Lands balanced with preservation of environmental values and biodiversity.

Recreation & Sport

Priority Highlights

The Adelaide Park Lands will continue to provide for sport and recreation opportunities and prioritise open accessible spaces for the public to enjoy outside of programmed sport and recreation times.

The following priorities will support increased activation of the Adelaide Park Lands:

Adelaide Aquatic Centre Integration

A new Adelaide Aquatic Centre will be built immediately south of the existing facility at Denise Norton Park/Pardipardinnyilla (Park 2) in the northern Adelaide Park Lands as an all electric, sustainable and contemporary aquatic facility. The intergeneration and connectivity of the new facility with the wider Adelaide Park Lands will be a key priority and deliverable of master planning for the Northern Park Lands.

Helen Mayo Park/Tulya Wardli (Park 27C)

Deliver a master plan and commence return of Helen Mayo Park/Tulya Wardli (Park 27C) to an Adelaide Park Lands destination connecting the North Terrace Health and Education Precinct and Karrawirra Pari to the city.

Community Buildings

Upgrade prioritised buildings within the Adelaide Park Lands to offer purpose-designed, safe and accessible facilities, whilst also providing multi-function spaces for flexible community use.

Victoria Park/Pakapakanthi (Park 16)

Implementation

Commence the staged implementation of recommendations within the Victoria Park/Pakapakanthi (Park 16) Master Plan in collaboration with the local community, stakeholders and land managers to improve accessibility and amenity throughout Victoria Park/Pakapakanthi (Park 16).

Investment opportunities

Priority projects have been identified to guide future investment in recreation and sport projects including:

- Adelaide Aquatic Centre Development
- Community Buildings
- Victoria Park/Pakapakanthi (Park 16) Implementation

Technical Fact Sheets -

The **Adelaide Park Lands Management Strategy – Towards 2036** has been developed by Kadaltilla/Adelaide Park Lands Authority in accordance with the requirements of the *Adelaide Park Lands Act 2005* to prepare a Management Strategy to determine the Adelaide Park Lands directions and priorities.

The following is a direct extract from the Strategy.

To view the whole document, or see this section in context, please visit: cityofadelaide.com.au/draft-aplms

Access Roads and Car Parking

The second goal of the Strategy is to enhance connections and networks, and as such it addresses car parking by indicating that car parking is to be provided on, and adjacent to, the Adelaide Park Lands only where the need has been demonstrated and no reasonable alternative exists.

By improving the Adelaide Park Lands pathways, lighting and signage active transport is encouraged.

Reducing existing car parking on council-managed land is an overarching target for the Strategy. This will be investigated as asset renewal is being investigated for a Precinct.

Access roads and car parks will allow for restricted vehicular access into the Adelaide Park Lands with car parking accommodated in some locations. Car parking and access roads will be integrated into the landscape with sensitivity, incorporating trees and other plantings, as well as Water Sensitive Urban Design techniques.

The Statutory Principles of the *Adelaide Park Lands Act 2005* must be observed, these include:

- The Adelaide Park Lands should be held for the public benefit of the people of South Australia, and should be generally available to them for their use and enjoyment (recognising that certain uses of the Park Lands may restrict or prevent access to particular parts of the Park Lands).
- The State Government, state agencies and authorities, and the City of Adelaide, should actively seek to co-operate and collaborate with each

other in order to protect and enhance the Adelaide Park Lands.

- The interests of the South Australian community in ensuring the preservation of the Adelaide Park Lands are to be recognised, and activities that may affect the Park Lands should be consistent with maintaining or enhancing the environmental, cultural, recreational and social heritage status of the Park Lands for the benefit of the state.

The design of access roads and car parking should complement their Adelaide Park Lands setting, using permeable surfaces rather than black asphalt and avoiding traditional kerbing. Car parks will be designed to be flexible encouraging multiple uses, such as market stalls, events, street court sports and recreation.

The inclusion of a Return Areas Schedule in the Strategy highlights the commitment to continue to identify land within the Adelaide Park Lands that is considered as having 'Non-Park Lands Purpose' and offers limited to restricted public access. It is a key priority that this land be returned to a 'Park Lands Purpose'.

Hardstand areas (which include informal and formal car parking, or former sporting surfaces and facilities) that are no longer considered fit for purpose will be investigated to be return to public accessible green space (Park Lands Purpose).

Extract from the Adelaide Park Lands Management Strategy – Towards 2036

1

The **Adelaide Park Lands Management Strategy – Towards 2036** has been developed by Kadaltilla/ Adelaide Park Lands Authority in accordance with the requirements of the *Adelaide Park Lands Act 2005* to prepare a Management Strategy to determine the Adelaide Park Lands directions and priorities.

Adelaide Park Lands Golf Course & Surrounds

The Golf Links Precinct occupies the area bordered by War Memorial Drive, Park Terrace, Jeffcott Road, Barton Terrace, Mills Terrace, Strangways Terrace, Railway lines and Montefiore Road.

North Adelaide Golf Course developed early in the twentieth century, expanded in the 1920s, and further extended northwards in the 1940s. A smaller Par 3 course to the south was added in the 1960s. The area is highly significant to the early history of Adelaide's establishment, being located on one of the main transport routes from Port Adelaide.

The Strategy guides the establishing better facilities and connections as an important way of encouraging people to stay longer and explore the diverse cultural and natural landscapes that characterise Possum Park/ Pirtawardli (Park 1).

The landscape is predominantly irrigated golf fairways and greens set amongst an open woodland.

Greater variety is proposed through the introduction of Formal Parks and an urban address to the edges of the Precinct.

There is currently very little access around or through the golf links. A number of key connections are proposed providing links to North Adelaide, Bonython Park/Tulya Wardli (Park 27) and Bowden. Formalised edge paths are provided for improved pedestrian amenity.

The following is a direct extract from the Strategy.

To view the whole document, or see this section in context, please visit: cityofadelaide.com.au/draft-aplms

Drivers for Change

Expanding resident and worker populations in Bowden and Brompton, and a maturing population in North Adelaide will fuel the demand for a broader range of recreational and sporting activities, particularly in the northern sections of the Precinct. The Bowden Urban Village development, extension of the Adelaide Aquatic Centre and revitalisation of the Riverbank is likely to attract more people (local residents and visitors) into the Precinct. Establishing better facilities and connections will be an important way of encouraging people to stay longer and explore the diverse cultural and natural landscapes that characterise Possum Park/ Pirtawardli (Park 1).

Precinct Considerations

The Precinct contains cultural heritage landscape and contributory features such as exotic species, avenues and corridors. Guidance for planning at the Precinct level and should be considered along with the Adelaide Park Lands wide planning considerations for projects which include:

- Golf course use and layout
- Succession planting between the golf course fairways to strengthen ecosystem processes, improve biodiversity values, and increase visual amenity
- Explore opportunities to naturalise the drainage line along Park Terrace to increase wildlife movement, and improve safety and appearance

- Manage car parking availability for park visitors including users of golf courses and tennis facilities
- Provide a promenade between Montefiore Hill and Hill Street linking to the North Adelaide Golf Course clubrooms
- Strengthen connection from Ward Street across the Golf Course connecting to Bonython Park/Tulya Wardli (Park 27) via a proposed land bridge
- Connect Childers Street to the North Adelaide Railway Station, café and beyond to the community facilities in Bonython Park/Tulya Wardli (Park 27) and Bowden
- Support enhancement and increased usage of the North Adelaide Golf Links golf courses, clubhouse and supporting facilities to broaden opportunities for social activity and other sporting activities
- Investigate opportunities for alternative future uses of all, or part of the North Course
- Assess known areas of remnant vegetation for potential enhanced management.

Extract from the Adelaide Park Lands Management Strategy – Towards 2036

The **Adelaide Park Lands Management Strategy – Towards 2036** has been developed by Kadaltilla/ Adelaide Park Lands Authority in accordance with the requirements of the *Adelaide Park Lands Act 2005* to prepare a Management Strategy to determine the Adelaide Park Lands directions and priorities.

The following is a direct extract from the Strategy.

To view the whole document, or see this section in context, please visit: cityofadelaide.com.au/draft-aplms

Adelaide Park Lands Investment

The implementation of this Strategy will be overseen by Kadaltilla in conjunction with the City of Adelaide and the Government of South Australia and involve the participation of many delivery partners, including Kaurna Yerta Aboriginal Corporation, Government of South Australia departments, agencies, adjoining local councils, volunteers and the broader community.

The Statutory Principles of the *Adelaide Park Lands Act (2005)* highlight that partnerships are critical in the care, development and investment of the Park Lands including:

- The State Government, state agencies and authorities, and the City of Adelaide, should actively seek to co-operate and collaborate with each other in order to protect and enhance the Adelaide Park Lands.
- The interests of the South Australian community in ensuring the preservation of the Adelaide Park Lands are to be recognised, and activities that may affect the Park Lands should be consistent with maintaining or enhancing the environmental, cultural, recreational and social heritage status of the Park Lands for the benefit of the state.

The Strategy takes into account a range of trends and changes affecting the Adelaide Park Lands, including: climate, population growth in City of Adelaide and Greater Adelaide, and increasing demand for use. It also takes into account a growing demand for their protection due to public recognition of their uniqueness.

Clear pathways for investment in the Adelaide Park Lands are embedded in the priorities, directions and goals of the Strategy. These will include an investigation, through an amendment to the Planning and Design Code, the introduction of an Adelaide Park Lands Open Space Offset Scheme or Adelaide Park Lands Overlay to unlock investment in the Adelaide Park Lands. This initiative would apply to future developments that will rely on the Adelaide Park Lands for open space provision but are not located within the City of Adelaide.

Partnerships will be actively pursued with the following parties:

- City of Adelaide
- Government of South Australia
- Community organisations and Sporting clubs
- Private investors
- Councils who share boundaries with the City of Adelaide
- Philanthropists
- Volunteers

Priority projects have been identified to guide future investment in the enhancement and protection of the Adelaide Park Lands. Projects should leverage state and federal investment in community infrastructure to address societal change, population increase and the need for climate resilience.

Extract from the Adelaide Park Lands Management Strategy – Towards 2036

The **Adelaide Park Lands Management Strategy – Towards 2036** has been developed by Kadaltilla/ Adelaide Park Lands Authority in accordance with the requirements of the *Adelaide Park Lands Act 2005* to prepare a Management Strategy to determine the Adelaide Park Lands directions and priorities.

The following is a direct extract from the Strategy.

Community Buildings

The Adelaide Park Lands Management Strategy – Towards 2036 explains that one of the three overarching goals is to:

Support activation of the Adelaide Park Lands by upgrading and enhancing buildings and structures responsive to their park setting.

Strategy 1.4, under Goal 1 (Places and Spaces)

Community buildings in the Adelaide Park Lands consist predominantly of sports and recreation facilities, public amenity buildings, and small-scale structures. These facilities are extensively used by community sports and recreation groups, schools and the public.

As community buildings reach the end of their useful life and no longer respond to community needs, consideration of the future of these buildings and how the redevelopment or refurbishment of these buildings can best serve user groups and the public will be imperative.

Sharing resources, services and facilities through collaboration will help create more sustainable and efficient community buildings, as well as provide opportunities to increase diversity of activity and maximise investment in the Adelaide Park Lands.

The Strategy will ensure that buildings are activated throughout the day and evening, providing spaces for people to play, learn and interact with the

Adelaide Park Lands. Public amenities should integrate and complement their Adelaide Park Lands setting and where appropriate be incorporated into Community Buildings.

Within the Adelaide Park Lands, the designs for new buildings, and upgrades to existing buildings, must respond to their site and context to enable the development to sit comfortably within and enhance the broader experience of its park setting.

Design quality not only relates to the 'look and feel' of buildings and places, but also to how successfully they meet the needs of the people who use and experience them. High-quality design helps to improve our quality of life, attract investment and reduce our impact on the environment.

The ODASA Principles of Good Design principles should be considered for development within the Adelaide Park Lands to enrich the human experience, enhance environmental quality and reinforce local character.

Priority projects have been identified to guide future investment in the enhancement and protection of the Adelaide Park Lands. Projects should leverage state and federal investment in community infrastructure to address societal change, population increase and the need for climate resilience. Policies for two parks have been identified as priorities, they are Golden Wattle Park/Mirnu Wirra (Park 21 West) and Mary Lee Park (Tulya Wardli (Park 27B).

Legislative Context & Interactions

The Adelaide Park Lands Management Strategy – Towards 2036 references the following planning policy documents as relevant to the management and development of the Park Lands:

Management Plans for Adelaide Park Lands

The City of Adelaide Community Land Management Plans (CLMP) for the Adelaide Park Lands set out objectives, policies and proposals for management of the Adelaide Park Lands, states performance targets and measures, provides information on any restrictions to public use or movement through the Adelaide Park Lands, and includes specific information on relevant policies for the granting of leases and licences (*Local Government Act 1995*).

Planning and Design Code – Adelaide Park Lands Zone

Development in the Adelaide Park Lands is assessed against the state government's Planning and Design Code.

The Adelaide Park Lands Zone provides the legislative planning framework and regulations for development within the Adelaide Parks Lands. The Zone covers all of the Adelaide Park Lands, and includes an Aquatic Centre subzone for part of Denise Norton Park/ Pardipardinyilla (Park 2).

Greater Adelaide Regional Plan (GARP)

The State Planning Commission is progressing the Greater Adelaide Regional Plan (GARP) that will replace the current plan, known as the 30-Year Plan for Greater Adelaide.

Once implemented, the GARP will allow for a holistic view of growth for the Greater Adelaide Region which must be considered in the planning for the Adelaide Park Lands, as an open space system for all South Australians.

City of Adelaide – City Plan

City Plan is an urban design and strategic planning process that outlines the spatial vision, goals, and strategies for future sustainable growth and development across the City of Adelaide into the next decade.

The City Plan links with this Strategy to identify opportunities and areas of the Adelaide Park Lands that will need to respond to increased population and visitation.

Metropolitan Open Space System

The underpinning strength of open space in Adelaide is the Metropolitan Open Space System (MOSS) which is a network of parks and open spaces located throughout metropolitan Adelaide.

Extract from the Adelaide Park Lands Management Strategy – Towards 2036

1

The **Adelaide Park Lands Management Strategy – Towards 2036** seeks to promote a balanced approach to decision-making around the Adelaide Park Lands, but ensures we are always striving to retain their natural, social and recreational values.

Towards 2036 maintains the following from the 2015–2025 strategy:

- A spatial planning approach to the inclusion of Hubs, movement types
- Precinct Plans
- The core Strategies from the 2015–2025 APLMS have been reviewed and contemporised.

What's Changed

Below is a summary of the changes and inclusions which have been introduced into the Towards 2036 Strategy:

New:

Topic	The new strategy (Towards 2036) includes:
Align the structure of the document for easier reference to the <i>Adelaide Park Lands Act 2005</i>	The document is now easier to navigate, and is presented in three sections: <ul style="list-style-type: none"> • Part A – Background, governance, consultation • Part B – Priorities, directions and goals • Part C – Implementation, partnerships and investment
Summarising the current state and amenities provided and how the community uses them	The Strategy now includes an Adelaide Park Lands Snapshot.
Introduction of a Caring for Country section	Having an appreciation of how the Park Lands are being used helps to understand the context for the priorities and projects outlined in the Strategy.
Introduction of key Adelaide Park Lands Definitions	As the Strategy aims to promote the cultural values of the Adelaide Park Lands and respect Kaurna culture, heritage and wellbeing, it is important that is represented as a priority in the document.
Community Building section	This document is for all South Australians. We've sought to provide clarity and consistency when referencing the Adelaide Park Lands.
How will we know that the Goals are being achieved?	Community buildings on the Park Lands are used to support sport, recreation and community learning. The Strategy includes the guidelines and recommendations for development and evaluation of our facilities.
New Government of South Australia and Council project priorities	The new version of the strategy introduces indicators, targets and baselines for each Goal, providing greater confidence to the community that the purpose of the Strategy is being achieved.
	Priority projects for future investment in the Adelaide Park Lands include: <ul style="list-style-type: none"> • Adelaide Aquatic Centre Development • Bonython Park/Tulya Wardli (Park 27) Master Plan • Community Buildings • Greenhill Road Corridor • Helen Mayo Park/Tulya Wardli (Park 27C) • Kaurna Country Charter • Light Square/Wauwi Master Plan • New Women's and Children's Hospital linkage • Strategic Water Resources

Topic	The new strategy (Towards 2036) includes:
Partnerships, Planning and Investment Section	It is important to understand the context in which decisions about the Park Lands are made. The strategic priorities of the Government of South Australia and the City of Adelaide, as the custodians of the Park Lands are guided by: <ul style="list-style-type: none"> • The Greater Adelaide Regional Plan • Metropolitan Open Space System • The Adelaide City Plan.
Introduction of a Return Areas Schedule	There are areas of the Park Lands that can be investigated to be returned to a 'Park Lands Purpose'. There are ongoing efforts to identify land within the Adelaide Park Lands that is currently considered as having a 'Non- Park Lands Purpose' and offers limited or restricted public access.
Inclusion of an Investment Framework	The Strategy seeks to be a practical and effective tool for the balanced approach to decision-making around the Adelaide Park Lands. Identifying investment opportunities, pathways and assessment criteria guides the way the projects included in the Strategy will be delivered.

Changes:

Topic	The current version (2015–2025)	The new strategy (Towards 2036)
Closely align the structure of the document to be in line with the <i>Adelaide Park Lands Act</i>	Insights and initiatives are themed according to Outcomes, Strategies and Actions	In the new document, initiatives are represented as Goals, Strategies and Priorities
Vision Statement updated	Inspiring growing numbers of residents, workers and visitors, the Park Lands will continue to provide a myriad of recreational and sporting opportunities and events for everyone to enjoy, enhancing physical and mental well-being and cementing Adelaide's place as one of the planet's most liveable cities. There will be a balanced approach to a diverse range of environmental, cultural, recreational and social values, activities and developments. All resources will be protected and enhanced.	Located on Kaurna Yerta, the Adelaide Park Lands support our environment, provide connections to nature and offer places for people to participate in events, cultural experiences and recreational activities. We will work together to enhance and protect the Adelaide Park Lands for future generations.

2

Kadaltilla/Adelaide Park Lands Authority

The Kadaltilla/Adelaide Park Lands Authority (Kadaltilla) is the principal advisor to the City of Adelaide and the Government of South Australia on the protection, management, enhancement, and promotion of the Adelaide Park Lands.

Kadaltilla is established pursuant to section 5 of the *Adelaide Park Lands Act 2005 (SA)* and operates as a subsidiary of the City of Adelaide, pursuant to section 42 of the *Local Government Act 1999 (SA)*. Kadaltilla acts in accordance with its Charter and the *Adelaide Park Lands Act 2005 (SA)*.

On 11 May 2023, the Minister approved a change to Kadaltilla's Charter so that it would be branded as the 'Kadaltilla/Adelaide Park Lands Authority' (Kadaltilla).

Governance

Governance of the Adelaide Park Lands is shared between state government and the City of Adelaide. Kadaltilla/Adelaide Park Lands Authority is the

principal advisor to the state government and the City of Adelaide on the Adelaide Park Lands and is responsible for preparing the Adelaide Park Lands Management Strategy.

Membership

Pursuant to section 6 of the *Adelaide Park Lands Act 2005 (SA)*, membership of the Kadaltilla/Adelaide Park Lands Authority comprises:

- The Lord Mayor (as Presiding Member) or, if the Lord Mayor chooses not to be a member of Kadaltilla, a person appointed by the City of Adelaide (as the Presiding Member)
- Four other members appointed by the City of Adelaide
- Five members appointed by the Minister (one of whom will be the Deputy Presiding Member).

Functions

Within the Governance and Planning Framework, Kadaltilla was established to undertake the following Functions, as set out in the *Adelaide Park Lands Act 2005 (SA)*:

1. To undertake a key policy role with respect to the management and protection of the Adelaide Park Lands
2. To prepare, and as appropriate, to revise the Adelaide Park Lands Management Strategy in accordance with the requirements of the *Adelaide Park Lands Act 2005 (SA)*
3. To provide comments and advice on any management plan prepared by the Adelaide City Council or a State Authority under the *Adelaide Park Lands Act 2005 (SA)* or the *Local Government Act 1999 (SA)* that relates to any part of the Adelaide Park Lands; and to monitor and, as appropriate, to provide comments, advice or reports in relation to the implementation or operation of any such plan
4. To provide comments or advice in relation to the operation of any lease, licence or other form of grant of occupation of land within the Adelaide Park Lands
5. On the basis of any request or on its own initiative, to provide advice to the Adelaide City Council or to the Minister on policy, development, heritage or management issues affecting the Adelaide Park Lands
6. To promote public awareness of the importance of the Adelaide Park Lands and the need to ensure that they are managed and used responsibly
7. To ensure that the interests of South Australians are taken into account, and that community consultation processes are established, in relation to the strategic management of the Adelaide Park Lands
8. To administer the Adelaide Park Lands Fund

9. To undertake or support other activities that will protect or enhance the Adelaide Park Lands, or in any other way promote or advance the objects of the *Adelaide Park Lands Act, 2005 (SA)*.

Adelaide Park Lands Management Strategy

The Adelaide Park Lands Management Strategy (the Strategy) has been developed by Kadaltilla/Adelaide Park Lands Authority and sets the strategies, projects and planning considerations that will be used by Kadaltilla/Adelaide Park Lands Authority, the City of Adelaide, the Government of South Australia, cultural institutions, and community stakeholders to guide decisions relating to the Adelaide Park Lands.

Using a spatial planning approach and focusing on key themes identified through stakeholder and community consultation, the Strategy provides a bold vision 'Towards 2036' for the overall enhancement and protection of the Adelaide Park Lands.

The Strategy relates to all land managed by state agencies, authorities and City of Adelaide in the Adelaide Park Lands.

Statutory Principles for planning the future of the *Adelaide Park Lands Act 2005 (the Act)* are outlined in the Strategy and must be observed.

The Strategy takes account of a range of trends and changes affecting the Adelaide Park Lands, climate, population growth in the City of Adelaide and Greater Adelaide, increasing demand for use, and public recognition of their uniqueness and need for protection.

The Strategy secures this future and responds to the critical challenges of:

- embedding Kauria culture
- respecting and acknowledging the past
- improving climate resilience
- learning from management of parks across the world.

2

Guiding Principles

- Preserve and strengthen the integrity of the Adelaide Park Lands
- Promote the values of the Adelaide Park Lands – as Adelaide’s defining feature, and an internationally unique asset
- Partner with Council and the state government to advocate the benefits of the Adelaide Park Lands
- Advise Government at all levels on the management and usage of the Adelaide Park Lands for the benefit of all South Australians.

APPENDIX 4: Phase 3 Engagement: Online Engagement Webpage

The online engagement webpage was hosted on the City of Adelaide website: <https://www.cityofadelaide.com.au/community/get-involved/consultation-aplms-towards-2036/>

It opened on 17 June 2024 and closed on 9 August 2024.

The engagement website included:

- The web page
- The survey
- Introduction video
- FAQs
- Park Lands photos
- Staff contact details
- Copies of any supporting documentation

Stakeholders were invited to share their feedback through email submissions or by completing the online survey. The feedback gathered from these channels is documented in Appendices 1 and 6.

The Kadaltilla / Adelaide Park Lands Authority (Kadaltilla) has undertaken a review of the existing Adelaide Park Lands Management Strategy 2015-2025 (APLMS) with a bold vision for the overall enhancement and protection of the Adelaide Park Lands.

The APLMS is a joint State Government and Council owned document, which is prepared and maintained on their behalf by Kadaltilla.

Draft APLMS "Towards 2036"

The draft APLMS sets out a long-term vision for our city's open space and guides us in ways to protect and manage them through the next decade.

The following fact sheets have been created as a quick reference guide on how the draft APLMS "Towards 2036" addresses each of the below major themes:

- [Access & Connectivity](#)
- [Biodiversity & Greening](#)
- [Events & Spaces](#)
- [Recreation & Sport](#)
- [Kairna & First Nations](#)
- [Enhancements & Protections](#)

NEW! APLMS Goes Digital

An interactive PDF of the draft APLMS has been produced with digital mapping to provide an interactive user experience.

Click the leaf on pages 63 and 145 to see the digital maps.

[View interactive draft APLMS \(49 MB\) \(pdf\)](#)

- [See map of Adelaide Park Lands](#)

Where we're at

In 2022 and 2023 a comprehensive review commenced with over 2,500 stakeholder and community participants providing input. Find out more about the engagement process and outcomes in the [What We Heard](#) and [Engagement Report](#). We gained insights into how the community values and uses the Park Lands and the opportunities they see and future visions.

As a result of the comprehensive review, key changes introduced include:

1. Stronger alignment with the Act to meet statutory requirements, including:
 1. Inclusion of Principles from the Act
 2. A 'Return to Park Lands' section that identifies opportunities for State Government managed land to be transferred to City of Adelaide and key terminology regarding Park Lands uses
 3. Inclusion of land tenure schedule.
2. Recognition of key achievements and integration of contemporary focus areas into the APLMS.
3. Consolidation of actions as identified through stakeholder consultation into principle-based descriptions that guide decisions and activities within the Adelaide Park Lands by City of Adelaide, State Government and landowners.
4. Updated major projects to be costed for implementation.
5. Alignment with strategic documents including:
 1. [Greater Adelaide Regional Plan](#)
 2. [Metropolitan Open Space System](#)
 3. [City of Adelaide City Plan](#) (in development)
 4. [Kadaltilla Strategic Plan 2023 – 2028](#)
 5. [City of Adelaide Strategic Plan 2024-2028](#)
 6. [City of Adelaide Community Land Management Plan \(CLMP\) for the Adelaide Park Lands](#)
6. Consideration of governance, funding and investment pathways for the Adelaide Park Lands

The Kadaltilla / Adelaide Park Lands Authority (Kadaltilla)

The [Kadaltilla / Adelaide Park Lands Authority \(Kadaltilla\)](#) is the principal advisory body to both the City of Adelaide and the State Government on the protection, management, enhancement, and promotion of the Adelaide Park Lands.

Kadaltilla is skills based including expertise across biodiversity/environment, recreation/open space, cultural heritage, landscape design/ park management, tourism/ events, indigenous culture/ reconciliation, financial and local government.

Kadaltilla comprises a Presiding Member (the Lord Mayor), and four other members appointed by Council and five members appointed by the Minister for Planning.

The development and review of the Adelaide Park Lands Management Strategy is one of Kadaltilla's key responsibilities under Section 18 of the [Adelaide Park Lands Act 2005](#) (the Act).

Frequently asked questions

— What is the Adelaide Park Lands Management Strategy (APLMS)?

The [Adelaide Park Lands Management Strategy 2015 -2025 \(APLMS\)](#) provides a framework for the important and ongoing advisory role of the Kadaltilla / Adelaide Park Lands Authority (Kadaltilla) on Park Lands policy and projects. Kadaltilla is committed to the protection and enhancement of the Park Lands as a globally recognised park system which surrounds and permeates the city, and which are central to its identity.

The APLMS also guides the decision making and funding contributions of both the City of Adelaide and the State Government.

— What is the difference between the APLMS and the Community Land Management Plan (CLMP)?

The Adelaide Park Lands Management Strategy (APLMS) is an aspirational document which identifies what Kadaltilla / Adelaide Park Lands Authority, Council and the State Government are trying to achieve at a strategic level.

The Community Land Management Plan (CLMP) identifies how the land will be used and managed.

These two documents must work together such that the CLMP must be consistent with the APLMS.

— Why is the APLMS being revised?

The [Adelaide Park Lands Act 2005](#) requires that Kadaltilla undertake a comprehensive review of the Management Strategy at least once every 5 years.

— Do you have any summary documents or technical fact sheets on the draft APLMS?

Yes, the below documents summarise different themes from the draft APLMS:

- [Fact Sheet - What's Changed](#)
- [Fact Sheet - Who are Kadaltilla & What is the APLMS](#)
- [Fact Sheet - Adelaide Park Lands Golf Course & Surrounds](#)
- [Fact Sheet - Legislative Context & Interactions](#)
- [Fact Sheet - Adelaide Park Lands Investment](#)
- [Fact Sheet - Community Buildings](#)
- [Fact Sheet - Access Roads and Car Parking](#)

— How has stakeholder feedback shaped this new version?

Engagement To-Date

In early 2022, a comprehensive review of the APLMS was commenced in line with the Act. The purpose of Phase 1 was to test the vision, outcomes and priorities contained in the APLMS 2005-2015 and explore new ideas and opinions to inform the review.

Phase 1 engaged with 18 stakeholder groups representing three distinct communities categorised by their level of interest, impact, and knowledge.

Methods of engagement were tailored to each stakeholder group, including workshops, Kadaltilla Board meetings, online surveys (Your Say Adelaide), advisory/reference groups and public forums. This strategic and comprehensive approach successfully captured community feedback across three levels of involvement (consultation, involvement, and collaboration) relevant to the knowledge base, areas of interest and technical capacity of each group.

Phase 1 included feedback from over 2,500 community engagement participants over a nine-month consultation window, including:

- **246 people** participated in person
- **438 responses** received in person
- **over 2,500 individual responses** received via post, email, social media or Your Say.

Engagement gained insight into how communities value and use the Park Lands and actively sought input about issues and opportunities with the current APLMS and future visions for the Park Lands.

Consultation Themes and Investigation Areas reflect the analysis of a thorough consultation phase that represents a wide variety of stakeholders. Feedback indicated that the vision, outcomes, and priorities of the APLMS remain relevant, appropriate and important. The analysis also revealed key areas to focus on in future investigations.

Phase 2 of the APLMS strengthened the representation of under-represented stakeholders and groups and engaged with seven main stakeholder groups. The draft APLMS was further informed by Phase 2 where the opportunity was also taken to test and shape early project ideas and respond to, and build upon, an overarching vision for the APLMS.

— What's the best way to provide feedback?

You can complete the [short survey](#) on this page.

You may also like to share your feedback by attending the public hearing at the Kadaltilla Board meeting on 25 July 2024, 4:30 pm. Remember to [request to appear as a deputation at the meeting](#) in advance if you intend on doing this.

— How will I know if my feedback has been received?

All feedback, including survey responses, submissions and other correspondence will be acknowledged in writing via email.

— What will Kadaltilla do with my feedback?

The Kadaltilla / Adelaide Park Lands Authority (Kadaltilla) will consider all of the feedback it receives as part of the current engagement. The information gathered via the survey and drop-in sessions will inform the development of a revised draft APLMS.

— What are the next steps after public consultation?

In accordance with section 18(4) of the Adelaide Park Lands Act 2005, in order to vary the APLMS, Kadaltilla must prepare a draft of the proposal and then refer the proposal to the Minister for Planning, the City of Adelaide, and any State authority or adjoining council that has a direct interest in the proposal, which is the purpose of this engagement.

As the variations made to the draft APLMS are not considered of minor significance, public consultation is anticipated to be undertaken from April 2024 as per section 18(5) of the Act with any interested persons invited to make written submissions to Kadaltilla and attend a public meeting to be held in relation to the proposal.

In accordance with sections 18(6)-(8) of the Act, following consultation Kadaltilla will amend the draft APLMS and furnish copies of the report to the Minister for Planning and the City of Adelaide for them to confer on the APLMS and either adopt the proposal with or without amendment, or refer the proposal back to the Kadaltilla for further consideration.

In the event the APLMS is adopted, the requirements of sections 18(9)-(10) of the Act will then be progressed, which include the Minister within six sitting days after the APLMS is adopted, causing copies of the APLMS to be laid before both Houses of Parliament, and the City of Adelaide and the Minister ensuring copies of the revised APLMS are kept available for public inspection.

Based on the above, it will be recommended that the APLMS be varied by the substitution of a new APLMS, in accordance with section 18(12) of the Act, and Kadaltilla will undertake a comprehensive review of the APLMS at least once every 5 years, in accordance with section 18(14) of the Act.

Background

— 17 February 2023 update

Our invitation to help shape the future of the Adelaide Park Lands resulted in a strong response from the community and stakeholder groups. This valuable feedback is helping to identify key issues and opportunities that will inform the priorities and projects for inclusion in the revised APLMS.

Among the feedback were the following messages about the future of the Adelaide Park Lands:

- Enhance connections, access and movement.
- More and higher quality social infrastructure.
- Create a better path network.
- More native flora and fauna.
- Create more attractions / destinations.
- Make better use of smart technology.
- Recognise and celebrate Kaurna culture and heritage.
- Inclusive sporting facilities.
- Cater for diversity / multi-cultural / all access.
- Adapt to climate change.

A comprehensive summary of the engagement results is provided in the [APLMS Engagement Report](#) and [Progress Report](#).

— 5 September 2022 update

The initial engagement phase has now concluded. Thank you for all your valuable comments and emails regarding this project!

Project Information

Kadaltilla is the principal advisor to Adelaide City Council and the State Government on the protection, management, enhancement and promotion of the Adelaide Park Lands.

The [Adelaide Park Lands Management Strategy \(APLMS\)](#) identifies the actions, projects and 'big moves' that set the future direction of the Park Lands. The management of the APLMS is one of Kadaltilla's key responsibilities under the [Adelaide Park Lands Act 2005](#). The review of the APLMS is now underway.

How you can Participate

Community feedback is being sought at the following key stages:

- *July - August 2022:* Initial engagement with the community and key stakeholder groups to help Kadaltilla determine the focus of the revised Strategy.
- *20 August 2022:* Kadaltilla Community Forum at the Adelaide Zoo, Plane Tree Centre (10:00 am - 3:00 pm).
- *February - April 2023 (TBC):* Consultation on the draft revised APLMS.

If you'd like to be kept up to date with community and stakeholder engagement activities in relation to the review of the APLMS, please provide your details under 'Stay Informed'.

How can I provide my feedback?

There are several ways in which you can provide feedback:

In Person

3 July 2024 – Wednesday – 11:30 am to 1:30 pm

Visit us at Rundle Mall to give your feedback. Free coffee and plant giveaways!

Public Hearing Kadaltilla Board Meeting

25 July 2024 – Thursday – 4:30 pm

Note: To speak to the Kadaltilla Board, you must [request to appear as a deputation at the meeting](#).

Online

Contribute your feedback by completing our [short survey](#).

APPENDIX 5: Phase 3 Engagement: Online Engagement Survey Questions

Adelaide Park Lands Management Strategy Towards 2036

*** 1. What is your name?**

* First name

* Last name

*** 2. Year of birth**

*** 3. What is your gender?**

Female

Male

Other (specify)

*** 4. What is your address?**

* Residential address

* Suburb

* Post Code

* 5. What is your email address?

* 6. **Are you a City of Adelaide resident?**

Yes

No

7. The draft Adelaide Park Lands Management Strategy (APLMS) Towards 2036 Vision is:

Located on Kurna Yerta, the Adelaide Park Lands support our environment, provide connections to nature and offer places for people to participate in events, cultural experiences and recreational activities. We will work together to enhance and protect the Adelaide park Lands for future generations.

Do you agreement with the vision of the draft APLMS Towards 2036?

Yes

No

Unsure

Please help us understand your response by providing a comment.

Adelaide Park Lands Management Strategy Towards 2036

8. We have four pillars that will help guide the Kadaltilla / Adelaide Park Lands Authority. **To what extent do you support each of these pillars?**

	Strongly Support	Support	Neutral	Somewhat support	Do not Support
Cultural Value Promote the cultural values of the Adelaide Park Lands, including Kaurna culture, heritage and wellbeing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmental Performance Maintain and improve climate resilience and the landscape values of the Adelaide Park Lands	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Management and Protection Treat the Adelaide Park Lands holistically with an adaptive, future-focussed approach	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Expert Advice Function as the peak advisory body for policy, development, heritage and management of the Adelaide Park Lands, based on sound data and evidence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please help us understand your response by providing a comment.

9. We have identified three overarching goals in the draft APLMS Towards 2036 (page 31)

To what extent do you support each of these goals?

	Strongly support	Support	Neutral	Somewhat support	Do not support
Places and Spaces Places of activity, creativity and tranquillity for everyone that support our changing lifestyles, health and wellbeing; offer diverse landscapes and natural beauty and provide a range of recreational, sensory and stimulating experiences.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Connections and Networks A system of connected and legible places and spaces enabling safe movement via paths and trails linking the city to the suburbs, hills and coast.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Natural Systems, Cultural Landscapes and Climate Resilience Places that thrive in the face of a changing climate and celebrate Adelaide's unique natural and cultural heritage.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please help us understand your response by providing a comment.

10. 'Return Areas' continue to identify land within the Adelaide Park Lands that is currently considered as having a 'Non-Park Lands Purpose' and offers limited or restricted public access. It is a key priority that this land be returned to a 'Park Lands Purpose'.

Areas that are classified as having a 'Non-Park Lands Purpose' which could be returned to a 'Park Lands Purpose' include:

- Land that is currently under the care, control or management of the Crown or a State Authority that could be transferred to the care, control and management of the City of Adelaide to allow for increased public access
- Hardstand areas that are no longer considered fit for purpose and could be returned to publicly accessible green space.

You can read more about our return areas schedule on pages 146-148

Are you supportive of land that is classed as having a 'Non-Park Lands Purpose' being returned to a 'Park Lands Purpose'?

- Yes
- No
- Unsure

11. Do you feel that the draft APLMS Towards 2036 is easy to navigate?

- Yes
- No
- Unsure
- Please help us understand your response by providing a comment

12. Do you have any additional feedback on the draft APLMS Towards 2036?

APPENDIX 6: Phase 3 Engagement: Online Engagement Survey Responses

The City of Adelaide hosted an online engagement webpage for the third phase of consultation, with a survey open from 17 June to 9 August 2024.

A total of 70 valid responses were received during this period. Although 74 responses were initially recorded, four were identified as either tests or invalid/spurious data.

Note: During this engagement, the City of Adelaide's online engagement platform was undergoing a transition to new branding and a new back-end system—from Yoursay Adelaide to OurAdelaide. To ensure data integrity, the survey was hosted on SurveyMonkey, as neither the Yoursay nor OurAdelaide platforms were available throughout the engagement.

As names and contact details have been excluded from this report, the responses reflecting participants' feedback on the draft Strategy begin with Question 6 of the survey.

Q6 Are you a City of Adelaide resident?

Answered: 74 Skipped: 0

ANSWER CHOICES	RESPONSES	
Yes	36.49%	27
No	63.51%	47
TOTAL		74

Engagement Note on the Residency Question: We appreciate community members who indicated whether they reside within the City of Adelaide or elsewhere. This question was included not to suggest that some opinions hold more weight than others, but to reassure the City of Adelaide, one of our key partners, that a significant number of their ratepayers participated in the feedback process.

Q7 The draft Adelaide Park Lands Management Strategy (APLMS) Towards 2036 Vision is: Located on Kaurna Yerta, the Adelaide Park Lands support our environment, provide connections to nature and offer places for people to participate in events, cultural experiences and recreational activities. We will work together to enhance and protect the Adelaide park Lands for future generations. Do you agree with the vision of the draft APLMS Towards 2036?

Answered: 74 Skipped: 0

ANSWER CHOICES	RESPONSES	
Yes	56.76%	42
No	12.16%	9
Unsure	31.08%	23
TOTAL		74

Comments from respondents who answered 'Yes' to this question:

Verbatim Response	Key Feedback	Engagement Response
Absolutely agree. Excellent steps forward working with the Kaurna community. Thank you for your commitment to our mob, cultural knowledges and inclusion.	Support provided.	Noted. This is a statement that doesn't require an amendment.
Adelaide's Parklands are unique and precious. They are for public use - not for private profit and need to be preserved for their natural and important beauty and support of wildlife.	Retaining park lands.	Refer Recommendations 1, 2 and 3.
As a frequent user of the Victoria Park precinct I am very please to see the high priority ranking for the Elm Avenue upgrade as it has so much potential but is so tired and tree well past their best years. I would like to see a side sealed walking /cycling path through the middle of the promenade and some benches for seating. Thank you.	Victoria Park comments. Pathways and amenity upgrades.	Refer Recommendation 29. Refer Recommendation 6.
But I do not support large, intrusive, noisy events. One if several such examples is car racing. On the other hand, events such as the gathering of vintage cars and their owners should be permitted.	Not supportive of car racing, but of gathering of vintage cars.	Noted. Refer Recommendation 29.

I am in general agreement with much of it however I would note that events and organised activities account for by far the greatest visitor numbers to the parklands.	Supportive of events occurring.	Noted. This is a statement that doesn't require an amendment.
I approve of the idea of enhancing and protecting the Adelaide Parklands for future generations'. However 'places for people to participate in events, cultural experiences and recreational activities' is open to possibilities of exploitation	Suggest greater clarity regarding development to preclude possibility of exploitation	Refer Recommendations 1, 2, 3, 11 and 29.
I believe we have a responsibility to care and protect the parklands for the future. It is an environment that is becoming of increasing importance and value with time and its future requires protection and work.	Protection of Park Lands needed.	Refer Recommendation 3..
I do not support the use of indigenous language to identify places	Noted.	Noted. This is a statement that doesn't require an amendment.
I do, but want to see more focus on indigenous ownership, care and connection to the land	Greater connection needed.	Refer Recommendation 8 and 21.
It covers the most critical elements that need enhancement and protection	Noted.	Noted. This is a statement that doesn't require an amendment.
The Adelaide park lands are a vital asset and are worth preserving	Protection of Park Lands needed.	Refer Recommendation 3..
The focus on the Kaurna culture, the many uses and purposes of the park lands, and the acknowledgement of our role as custodians of the park lands for future generations is to be commended.	Acknowledgement of Kaurna culture	Refer Recommendation 8.
The parklands are so unique and so critical to Adelaide. We need to get this right and spend the right time on this.	Protection of Park Lands needed.	Refer Recommendation 3..
They need more trees in Adelaide not just the city	Further greening needed.	Refer Recommendation 2.
Vision is clear and the final statement aligns well with a positive future for the Parklands. The first statement seems to describe the current use and feel of the Parklands rather than identify a preferred future state.	Comment regarding prioritisation of environmental purpose over public enjoyment	Refer Recommendations 2 and 3.

Comments provided by people who responded 'No' to this question:

Verbatim Response	Key Feedback	Engagement Response
<ul style="list-style-type: none"> • Significant areas of ambiguity make it impossible for respondents to clearly comprehend the council's future intentions in a range of areas. • In particular, some clauses in Goals 1 and 2 feature a number of ambiguous intentions, which embrace multiple controversial matters. • The draft fails to present in simple and clear ways how the city council plans to manage 'hot button' issues that have plagued the South Australian public's park lands concerns for decades, including sports club-room footprint expansions, park lands car parking pressures, events management and related commercial operations, and fencing. • The draft also features many unexplained matters, in which the administration's apparent desire for brevity has overwhelmed a respectful obligation to enlighten future interpreters in 'plain English' ways. • The 'OurAdelaide' consultation explanatory material fails to provide 	These comments are a repeat of the Bridgland, J submission.	Refer to the responses provided in that section.

adequate contextual Strategy background regarding the evolution of the three previous Strategies adopted since 1999, and how this draft compares with them. • Procedures necessary to underpin some aspirations and management intentions behind this Strategy are not explained, but will be critical to assist readers to understand how the procedures would work once the Strategy is endorsed. • The distinction between building 'footprint' and 'fit-for-purpose' footprint is neither provided nor explained, even though its procedural application will be critical to the use of the Strategy over time, and to future park lands site built-form management. • No clear summary is provided to reflect the public's long-held desire to establish ways to protect open space and public access to it, free of built form and car parking, to reduce expansion of commercially focused activities centred on monetising the use of the Adelaide park lands. The absence of a substantial number of overdue Master Plans (pledged but not yet delivered) means that the draft Strategy is empty of material highly relevant to the future park lands management period 2024 to 2036. The lack of these plans illustrates that the draft is essentially a document that is 'hollow in the middle'. This is a major deficit.		
I don't agree with sporting clubs being able to add more permanent infrastructure. There is not enough protection of the parklands in the strategy.	Increase protections.	Refer Recommendations 7 and 13.
I think it's focus, in parts, is out of step with most of society and panders to the select few.	Noted.	Noted. This is a statement that doesn't require an amendment.
Please refer to the Adelaide Parlands Association response	Noted	Noted. The Adelaide Park Lands Association response is included in Appendix 1.
Reference to natural habitats for animals is lacking. Also, it's Yarta" (no "e" in Kurna language)	For references to natural habitats for animals –	Refer Recommendations 2 and 8. <i>Regarding spelling, noted. Kurna Yerta Aboriginal Corporation are represented on our board and we have followed the spelling as per their convention.</i>
The vision expresses a priority for an environmental purpose, and only loosely refers to the purpose of the park lands, as expressed on page 19, namely: • Adelaide Park Lands that provide for publicly accessible open space for the benefit of the people of South Australia and are generally available to them for their use and enjoyment • Adelaide Park Lands that support a diverse range of environmental, cultural, recreational and social values and activities.	Include clearer definition of the purpose of the park lands.	Refer Recommendations 1 and 26.

Comments provided by people who responded they were 'Unsure' to this question:

Verbatim Response	Key Feedback	Engagement Response
Addition of more exotic trees (moreton bay figs, plane trees, oaks and elms) would greatly improve our city parklands	Planting suggestions.	Refer Recommendation 1.
Agree but there is a typo - "P"ark also insert "all of" after protect. I like the 4 aspects of the vision statement - environment, connection with nature, participation and protection. It aligns with the APA strategy - explore, protect, inspire and restore.	Spelling mistake.	Noted and already corrected. This is a statement that doesn't require an amendment.

However all of the events (whether recreational or cultural) should not compromise other aims such as the connection with nature or our environment.		
Agreement? I'll have to read it	Noted.	Noted. This is a statement that doesn't require an amendment.
Haven't read it best to make sure	Noted.	Unable to decipher what this comment is in relation to.
I agree with it but not sure that I "agree" with it. If Council paid for this survey, it should get a refund. If it was prepared by Council, someone should receive some instruction. A start like this does not inspire confidence.	Noted.	Typographical error in the survey question noted.
I agree with the thrust but "events" should be "environmentally responsible" events. Plus make it clear that does not mean building an events stadium	Include 'environmentally responsible' as a requirement of events.	State Government legislation now precludes single use plastic for take-away foods which was previously an environmental impact from events.
I love the wildness of the area - I am concerned about heaps of lights - for the sake of wildlife and also light pollution for sky watchers	Impact of development	Refer Recommendations 1 and 3.
I would like to see Park 20 amenities upgraded so that sporting Changerooms support female participation in sport (currently sharing facilities with male players)	Changerooms for female sporting participants where previously not provided.	Refer Recommendation 23.
It's a lot to take in.	Noted.	Noted. This is a statement that doesn't require an amendment.
No (more) buildings on the Parklands. No removing mature trees to plant buildings for private enterprises.	Resists additional buildings or removal of trees.	Refer Recommendations 1, 2, 3 and 13.
One can only hope that trees are kept and trees that are suitable to the area which they are planted in are always a part of our environment. Trees are life.	Resists removal of trees.	Noted. Refer Recommendations 2 and 3.
Please provide more protection for wild birds. Pigeons get extremely mistreated by a lot of folks. Maybe some signs discouraging people from harming them, punishable with a fine or something?	Habitat for birds.	Refer Recommendation 1 and 2.
The intention for the land on which the Riverside Rowing Club sits is unclear to me.	Greater clarity of the intent of the site requested.	Refer Recommendation 20.
There needs to be a greater focus on the Park Lands being space that is properly available and supported by facilities that allow a wider range of users. I'm concerned about the lack of forward thinking in terms of growing demand for good quality sporting facilities. There seems to be no acknowledgement of the boom in female participation and providing the most basic facilities required.	Sport facilities development, including inclusive change rooms	Refer Recommendations 7, 13, 16, 23 and 29.
Too much of the parklands are being taken over for buildings and other uses other than recreation	Not supportive of development	Refer Recommendations 2, 3 and 13.
Walking with interstate guests last weekend around the new wetlands we all had the same thought. Why is this area and around Victoria Park so devoid of trees. Our summers are getting hotter, we do need more trees as do the wildlife the wetlands are attracting	Additional shade in Victoria Park	See Recommendation 29.
what is the APLMS	Noted.	Refer to the Kadaltilla website or the draft

		APLMS – Towards 2036 Consulation Webpage.
--	--	--

Q8 We have four pillars that will help guide the Kadaltilla / Adelaide Park Lands Authority. To what extent do you support each of these pillars?

Answered: 63 Skipped: 11

	STRONGLY SUPPORT	SUPPORT	NEUTRAL	SOMEWHAT SUPPORT	DO NOT SUPPORT	TOTAL	WEIGHTED AVERAGE
Cultural ValuePromote the cultural values of the Adelaide Park Lands, including Kaurna culture, heritage and wellbeing	50.79% 32	23.81% 15	14.29% 9	1.59% 1	9.52% 6	63	1.95
Environmental PerformanceMaintain and improve climate resilience and the landscape values of the Adelaide Park Lands	74.60% 47	14.29% 9	6.35% 4	1.59% 1	3.17% 2	63	1.44
Management and ProtectionTreat the Adelaide Park Lands holistically with an adaptive, future-focussed approach	57.14% 36	19.05% 12	17.46% 11	6.35% 4	0.00% 0	63	1.73
Expert AdviceFunction as the peak advisory body for policy, development, heritage and management of the Adelaide Park Lands, based on sound data and evidence	52.46% 32	21.31% 13	18.03% 11	6.56% 4	1.64% 1	61	1.84

Comments provided by respondents who generally responded that they 'Supported or Strongly Supported' the four pillars:

Verbatim Response	Key Feedback	Engagement Response
Our Parklands provide the best open space for us all. I strongly object to them being used as a land bank by Governments and other organisations. I disapprove of Bartels Rd being closed for through traffic. How does a car race fit with our environmental credentials?	Against government undertaking major development on park lands. Major event impacts. Environmental focus.	Refer Recommendations 2, 7 and 15. Refer Recommendation 29. Refer Recommendations 1 and 2.
I would favor seeing the park lands favor local plant species and I would not want any land given up for more structures other than subtle shelters and appropriate refurbishments. Unsure what data and evidence you will be using for your policy development	Local indigenous plantings. No more land for new developments.	Refer Recommendations 1, 2 and 8. Refer Recommendations 19, 23 and 26
Not certain about what is meant in these terms for Adaptive, Future-focussed? What may the ramifications be?	Definitions for 'adaptive' and 'future focussed'	Refer Recommendation 12.
So far APLA have ignored 'sound data and evidence'.		Noted.
"Adapting" and "future focus" is often used to modernise parklands to accommodate human needs. Nature needs to be given space to do its thing and be protected from human activity too.	Definitions for 'adaptive' and 'future focussed'	Refer Recommendation 12.
are the experts all gonna be white? or are we going to see indigenous people at the forefront of the panel providing expert advice and care?	First Nations representation	Refer Recommendation 8.
The parklands need to ultimately be respectful, engaging, comfortable, environmentally sound and beautiful. Let's try and get there!		Refer Recommendations 1, 2, 3, 7, 8, 9 and 13.

I strongly agree with all, but Cultural Value can be improved as follows: 'Promote *and protect* the cultural values of the Adelaide Park Lands, including Kaurna culture, heritage and wellbeing'	Noted additional suggestion of inclusions to Cultural Value.	Refer Recommendation 8.
I'm devastated by the value given to the parklands by the state government and decisions re developments. Strategies to ensure this trend is stopped and the parklands are valued are vital.	Against government undertaking major development on park lands.	Refer Recommendation 15.
It is vital to recover and retain the Adelaide park lands as open green space freely available to all.	Noted.	Refer Recommendation 3 and 26.
None of these guides sounds open to development and destruction - too much of which has already had grave impacts on the parklands.	It has been interpreted that this comment is supportive of efforts to retain or return to park lands use.	Refer Recommendation 3 and 26.
Please see additional comments in emailed letter "Adelaide Park Lands Management Strategy Towards 2036 - SANFL response"	Noted.	Noted. This is a statement that doesn't require an amendment.
The Adelaide Park Lands (APL) do require a recognized peak body, given the Adelaide Park Lands disparate legislative foundation. I have suggested previously that this may be better undertaken through the creation of a statutory authority under the Local Government Act in a similar way to the Adelaide Economic Development Authority. This would enable the Kadaltilla to fulfill the full range of policy, development, heritage and management functions as required by the Act and to be appropriately funded. A re configuration of the management of the Adelaide Park Lands may contribute towards greater public confidence and for the CoA to become a more credible custodian. A more radical idea establishes a new paradigm giving legal status to trees, creeks, animals seen as "natural objects" in the environment through a guardian, Kadaltilla, as proposed in the influential essay "Should Trees Have Standing - Towards Legal Rights for Natural Objects" allowing our APL to be seen very differently and strongly orientated towards its cultural values. Certainly, there is an opportunity to in the draft APLMS Towards 2036 to consider the most effective way to manage the amazing legacy of the APL and to deliver a modern and appropriate management structure within this time frame. I respectfully suggest that such an initiative should be placed within the LM opening remarks.	Review Kadaltilla's legislative standing.	Refer Recommendation 15.
The cultural significance of the Park Lands cannot be overstated. The role of Kadaltilla as advisory body and advocate is crucial.	Review Kadaltilla's legislative standing.	Refer Recommendation 15.
The pillars are closely aligned with the City of Charles Sturt Community Vision and Open Space Strategy.	Noted.	Noted. This is a statement that doesn't require an amendment.
These 4 pillars are clearly well thought out and are appropriately articulated.	Noted.	Noted. This is a statement that doesn't require an amendment.
They should all be a given.	Noted.	Noted. This is a statement that doesn't require an amendment.
whilst all the pillars are important, the management of, and protection of, the Park Lands is so important as we need a body to have the overarching strategy and direction to protect and maintain, and develop only where appropriate	Review Kadaltilla's legislative standing.	Refer Recommendation 15.
May need more input from community including indigenous and historical scholars	Input from experts.	Refer Recommendations 4 and 8.

Adaptive, future-focussed could be interpreted to build a wind farm etc	Definitions for 'adaptive' and 'future focussed'	Refer Recommendation 12.
I use the park lands for walking as exercise. I completely agree with the new wetlands area which is extensively used. I don't agree with the state government taking sections of the park lands for commercial use.	Against government undertaking major development on park lands.	Refer Recommendation 15.
I am concerned that the majority of users of the parklands are not being appropriately recognised. By far the majority of visitors to the parklands are to events. I don't see a lot of talk about how best to treat this major function of the parklands. It would be a monumental mistake in my view to have a parklands authority that did not have a set of plans and policies in place to deal with events, given they are such a key part of what the public uses the parklands for. It baffles me that events and the authorities approach to them are not one of the key pillars.	Further clarity/definition of Park Lands 'Hubs'.	Refer Recommendations 7 and 12.
As I stated in an earlier comment, trees are life, and therefore must always be maintained and kept wherever possible.	Noted.	Refer Recommendations 1 and 2.
As long as expert advice isn't attached to vested interests eg business/development ventures. The Parklands should be maintained at all costs - not further built upon.	Definition of 'expert advice' and 'further development'.	Refer Recommendation 12.
Strike[s] the balance between the anti everything views of the Park Lands group and the need for public use in keeping with the 21st century lifestyles rather than only the views of a nineteenth century Englishman (as good as those views were)	Noted.	Interpreted as supportive of the draft APLMS.
The current approach does not appear to be either adaptive or future-focused. Goals around growing the city population do not align with what appears to be a lack of intent when it comes to proper useable space in the Park Lands, particularly in terms of sport and recreation. Community buildings are not adequate to deal with future expansion and the boom in female participation across a number of sports. All efforts needs to reflect the views and goals of the entire community, not just those who wish to keep the Park Lands for their own benefit.	Definition of 'adaptive' and 'future focussed'. Community building upgrades.	Refer Recommendation 12. Refer Recommendations 13 and 23.
The four pillars should align more closely to achieving the purpose of the park lands, as expressed on page 19 Namely: • Adelaide Park Lands that provide for publicly accessible open space for the benefit of the people of South Australia and are generally available to them for their use and enjoyment • Adelaide Park Lands that support a diverse range of environmental, cultural, recreational and social values and activities. On their own, the pillars are make a useful contribution, but they are missing the key point, and are overtly conservative in their composition. They should include pillars such as: - "Improve public accessibility via multiple modes and additional connection points to city streets and key feeder pathways to adjacent suburbs." - "Ensure the park lands provide a diverse range of environmental, cultural, recreational and social activities and experiences for a greater number of South Australians to enjoy." The expressed purpose for the park lands, as expressed on page 19, does not stipulate it should be a national or a conservation park, yet the vision reads as if this is the primary vision for the Kadatilla strategy. This is contrary to the expressed purpose and risks perpetuating a misplaced perception that the park lands are not for people to use, including but not limited to organised sport, and that they are only for the few, not the many. The purpose statement is exceedingly clear that their purpose is for all South Australians, not just nearby residents, or decision makers of one council.	Definitions and purpose of the park lands	Refer Recommendation 26.

The vision should be re-written to reflect a closer alignment to achieving the clearly stated purpose.		
Some of the current activities being promoted in our parklands have outgrown the space used and should not be accommodated as they detract and restrict the public's access to our parklands through long periods of time during the year. I draw attention to the Velo car race and the accompanying motor sport activities. The noise and damage due to the ever growing bitumen is destroying the core values of our parklands as a tranquil and welcoming natural setting. These events should be moved to the dedicated motor sport facilities at Talem bend. Etc.	Concern that major events, including motor sport, reduces public's access to the park lands for long periods of time. Authority to manage Park Lands events as one of the pillars.	Refer Recommendations 3, 15, 22 and 29.

Comments provided by respondents who generally responded that they were 'Neutral' to the four pillars:

Verbatim Response	Key Feedback	Engagement Response
Fundamentally, these pillars are unlikely to have much opposition due to their incredibly vague nature. There is extraordinary scope for interpretation here, so the pillars don't really tell us much about the priorities of Kadaltilla. In order to offer my support, I would need to understand more about what each pillar means in practise.		Noted. This is a statement that doesn't require an amendment.
These "pillars" are essentially motherhood statements. In relation to the draft Strategy, it is not a matter of whether respondents support them (who wouldn't?), it is a matter of whether the draft Strategy presents a clear and comprehensive action plan to see them supported in a transparent, fully funded and well-structured way. The draft Strategy does not do this. See attached submission.		Noted. This is a statement that doesn't require an amendment.
I don't know what you have in mind under Management and Protection. Who or what is meant to function as the peak advisory body? Advisory to whom?	Definition 'management and protection'	Refer Recommendations 12.
Dont focus so much on the Kaurna side of things but more making the parklands enjoyable for people as that is what will make people enjoy the parklands and want to go there more often.	Prioritise infrastructure that will attract people to the park lands.	Refer Recommendation 7.
More trees for all the obvious reasons.	More trees.	Refer Recommendations 1 and 2.
Very good 👍 please let me know if you have any questions or concerns regarding my freedom of information Act of the same crutch		Noted. This is a statement that doesn't require an amendment.

Comments provided by respondents who generally responded that they 'Somewhat support' or 'Do not support' the four pillars:

Verbatim Response	Key Feedback	Engagement Response
Need to be willing to take action on things.		Refer Recommendation 3.
It should focus on all owners of the parklands, not a select few. It doesn't belong to indigenous members of society, for instance, at the exclusion of others. It definitely doesn't belong to the Adelaide Parklands Authority! World heritage status - come on - that is a gross waste of rates/taxpayer dollars. No discussion of cleaning up the: crime, public safety or homelessness issues (that I could see).	Access to park lands Safety	Refer Recommendations 1, 3, 6, 7 and 13. Refer Recommendation 16.

Q9 We have identified three overarching goals in the draft APLMS Towards 2036 (page 31) To what extent do you support each of these goals?

Answered: 63 Skipped: 11

	STRONGLY SUPPORT	SUPPORT	NEUTRAL	SOMEWHAT SUPPORT	DO NOT SUPPORT	TOTAL	WEIGHTED AVERAGE
Places and Spaces Places of activity, creativity and tranquility for everyone that support our changing lifestyles, health and wellbeing; offer diverse landscapes and natural beauty and provide a range of recreational, sensory and stimulating experiences.	65.08% 41	30.16% 19	4.76% 3	0.00% 0	0.00% 0	63	1.40
Connections and Networks A system of connected and legible places and spaces enabling safe movement via paths and trails linking the city to the suburbs, hills and coast.	61.90% 39	23.81% 15	9.52% 6	1.59% 1	3.17% 2	63	1.60
Natural Systems, Cultural Landscapes and Climate Resilience Places that thrive in the face of a changing climate and celebrate Adelaide's unique natural and cultural heritage.	66.67% 42	20.63% 13	7.94% 5	1.59% 1	3.17% 2	63	1.54

Comments provided by respondents who generally responded that they 'Supported or Strongly Supported' the four pillars:

Verbatim Response	Key Feedback	Engagement Response
Let's not skimp out here ... let's do what we can to make this the most amazing place in Australia.		Refer Recommendation 4.
Oaks Elms Plane trees add so much beauty		Noted. This is a statement that doesn't require an amendment.
definitely want to see safer trails, and more variety in walking trails across the city. also more spaces for community to gather, maybe even some outdoor working spaces w PowerPoints or something to encourage people to work outside?	Walking trails / pathways / event spaces	Refer Recommendations 6 and 7.
Each of these goals are important. I feel that a lot of people take the Park Lands for granted, so keeping a focus on developing and 'marketing' the Park Lands is part of ensure it is treasured and protected into the future	Increase awareness raising and 'marketing' the park lands to be used and protected.	Refer Recommendation 9.
I cycle through the Park Lands to work. Climate cool pathways make it possible to keep cycling through summer.	Pathways	Refer Recommendation 6.
I regularly cycle through the parklands and love the improvements eg wetlands, spaces for recreational activities for everyone, and plantings.		Noted. This is a statement that doesn't require an amendment.
Leave them as they are, they are perfect as they are		Refer Recommendations 3 and 4.
Making more open spaces and even adding tennis courts which is something that won't really take up as much room as a soccer pitch or footy oval would and even adding pickleball or paddle courts which are both sports becoming quite popular. And more off leash areas for dogs. West terrace is currently the only OPEN space for dogs to run around with out a leash. However I do	Additional community facilities	Refer Recommendations 7 and 13.

quite like the dog parks located on south terrace and North Adelaide they are very good.		
Spell out to support a continuous bike/walking loop. Get rid of unnecessary bitumen	Remove unnecessary bitumen, upgrade pathways	Refer Recommendations 1 and 6.
Strongly support the goal of connections and networks, to improve the safety and accessibility of park spaces and particularly to and from buildings such as clubrooms that are currently poorly lit and offer no clear line of site between the road, footpath, parking options and ovals.	Support for pathways and connections	Refer Recommendation 6.
The goals are succinct whilst providing adequate detail on the purpose and future possibilities within the park lands.		Noted. This is a statement that doesn't require an amendment.
These are all items I think the Park Lands should serve.		Noted as support for the goals.
These three goals are self-evident and encompass what are identified as essential aims		Noted. This is a statement that doesn't require an amendment.
Well known diplomat who played the wall accept the same crutch		Unable to decipher what this comment is in relation to.
Agree with these as goals. Unfortunately, much of the supporting material and what has been put forward by the elected body does not reflect this or allow for it to happen.	Unsure what is being referred to as 'material and what has been put forward by elected body'.	Refer Recommendations 3 and 11.
I support the three goals, and particularly the order they are written in. Goal 1 is generally good and well written. Sporting uses are supported in the community consultation phase, and Goal 1's strategies address this fairly well. However none of the proposed indicators require activity levels to be measured, benchmarked or increased. If this goal is serious, and the strategies are important, then the indicators should measure success, or the reporting on them reveal otherwise and lead to corrective actions. For example, how much organised sport is being played? What can the existing playing surfaces sustain? How can activity levels be sustainably increased? How will this be measured? What new opportunities for organised sport should be explored? What other sporting and recreation uses are occurring? Could these levels be sustainably increased? How? How measured? Goal 2 is generally good and well written. Note however the Park Lands Trail, which is often referred to as an asset, is listed at number 14 of 15 strategies. This is unfortunate because it is very much underwhelming in many locations, meandering in odd ways, stitching together routes across existing paths without a clear purpose, and wayfinding is not easy unless you are prepared to stop at each intersection and read the detailed maps. Not great on a bike or if running. It should and could be a great asset if it was designed as a great and leafy promenade generally through the central zones of each park, easy to intuitively navigate and a great experience on any day. As opposed to a mystery tour with head scratching and unattractive deviations away from desire lines. Goal 2 seems to get lost in procedural or lower order matters like path heirarchy and distinctions that see tertiary to purpose, vision and strategy. Instead, this section should be rewritten a "connection strategies" to draw a focus on identifying where and how South Australians are to find and experience all the park lands have to offer, and aspire to in the future. How do locals within the city and surrounding it access the park lands? Is it only at major traffic lit intersections? Why? Are some streets/suburbs	<p>Community facilities</p> <p>The Park Lands Trail needs its own section. Revisit the network of walking and shared-use paths to work towards a coordinated plan and incorporate natural crossing points and access to public transport.</p> <p>Greening and canopy growth is supported, but suggested only where reduction of hard surfaces, not on median and other locations. Include indicators or measures of how tree canopy will be increased.</p> <p>'Return to nature' Park 6's horse agistment areas</p> <p>Reforestation of the northern golf course</p>	<p>Refer Recommendation 13</p> <p>Refer Recommendation 6.</p> <p>Refer Recommendations 1, 2 and 10.</p> <p>Refer Recommendation 17.</p> <p>Refer Recommendation 32.</p>

<p>too far from a crossing point? Could this be improved? If an activity zone is designed to host large numbers, has their arrival been considered? Does public transport or car parking availability work for that arrival point? Similarly, within the park lands, are the connections optimal? Do they provide logical connection routes, to encourage greater use? Are there walking/running/cycling loops so users can safely experience the parklands and without having to cross a main road or to return back along the same path? There is reference to the high use paths being lit, which is supported, and all should be shady in summer. To this end the indicators are deficient. They should include items such as “develop clear connection routes within, to and from the park lands (from ACC and surrounding LGA’s) to maximise access and enjoyment by a greater number of South Australians (this ties directly to strategy, goal and purpose of park lands). Another could be “Identify gaps or deficiencies in key connections and develop strategies to remedy them.” And “Ensure key areas of use and enjoyment are serviced by high quality connections, public transport and available car parking (in or adjacent, or within acceptable walking distance), and that these connections, transport and parking are provided at the density required to meet the anticipated demand.” The Park Lands Trail needs its own paragraph and indicators. It could be such a desirable asset but few people know about it, hardly anyone uses it as a trail. An indicator should developed to measure use, and to improve attraction levels and useability. Goal 3 is mostly okay but may be missing an opportunity to link to objectives in other places, such as Green Adelaide’s vision and strategy, and Planning SA’s vision for growth in tree canopy cover in metro Adelaide. For example, the proportion of canopy cover in most parks is quite low. In some parks it’s equivalent to surrounding suburbia, which is dominated by built form. The park lands could play a much greater role in increasing metro canopy cover, particularly by converting low use areas into urban forest areas. The northern golf course and Park 6’s horse agistment areas are ripe for reforestation, noting in particular that horses are an introduced species and would be suppressing natural regrowth. Medians in roads crossing the park lands, and perimeter paths could also accomodate more trees in many places. Under priorities, page 52, greening and tree canopy growth is supported, but the priority unnecessarily targets a reduction in hard surfaces to achieve this. Delete these words and the priority still reads well, and avoids a clear conflict of interest with achieving Goal 1, for the access and enjoyment of South Australians. Noting the importance of greening and increasing canopy cover, the stated indicators do not refer to tree canopy cover, nor do they directly address any of the top three strategies. This should be remedied.</p>		
<p>Common sense approach.</p>		<p>Noted. This is a statement that doesn’t require an amendment.</p>
<p>I feel there is a risk we could lose the current park land feel with major lighting and more pathways</p>	<p>Protect park lands feel</p>	<p>Refer Recommendations 1, 2, 3, 4 and 9.</p>
<p>I would like to see greater and safer connection between the parks. Ideally road crossing should be seperated from traffic with tunnels or bridges, allowing for continues running, walking and riding and giving active transport users a quicker journey through the parklands and around the city. As a fist step towards this vision, pedestrians and active transport users should be prioritised over and above vehicle traffic when crossing over</p>	<p>Support for planned pathway network and safety upgrades</p>	<p>Refer Recommendation 6 and 16.</p>

roads between the parks. This would improve and encourage greater and wider use of our parklands. It would be a great tourist attraction, longest continuous uninterrupted park running/walking trail, etc.		
Planting and protection of indigenous plants using Aboriginal knowledge and traditions.	Indigenous plantings and implementing indigenous land management principles.	Refer Recommendation 8.
The provision of 'a range of recreational, sensory and stimulating experiences' may include motor car racing and the continued hijacking of parklands for private sporting clubs.	Noted concern regarding sporting club and major event usage.	Refer Recommendation 7 and 22.
Definitely need more activation of spaces for value for money and safety of all. Permanency of structures in Victoria Park for motor sports or the like. See how well the facilities in Albert Park, Vic are used for major and minor events all year. Not this ridiculous, costly and disruptive bump-in/bump-out debacle. Makes Adelaide look like a joke. Also no mention of permanent sealed car park between Anzac and Goodwood at the netball courts where thousands of cars and residents drive and park each week. As well as the Royal Adelaide Show crowds.	Victoria Park and major events Carparking	Refer Recommendations 22 and 29 Refer Recommendations 14.
When will the foxes be eradicated?		Noted. This is a statement that doesn't require an amendment.
I LOVE the parklands. What I love the most are the large trees and open green spaces. Whilst I support new landscaping ideas, I think it is more important to care for and maintain the beautiful un landscaped parts of the parklands. I would warn against over designed spaces that incorporate a lot of hard surfaces. Older people like me and younger ones like my grandchildren love having big open spaces to play. (not always playgrounds and designed spaces. Wild spaces are the best.	Supportive of retaining trees, additional plantings and landscaping, but avoiding large hard surfaces. Natural play spaces.	Refer Recommendations 3, 4 and 6.
Continued development of accessible cycling/walking paths through the parklands would be valuable	Shared paths	Refer Recommendation 6.
I support these things, but primarily the focus needs to be on public green spaces. There are enough sporting ovals and sporting facilities. The parklands should be wilder, with more trees and plants. There are missed opportunities for existing spaces to be re-greened.	More undeveloped space in park lands.	Refer Recommendations 1, 2 and 3.
Please see additional comments in emailed letter "Adelaide Park Lands Management Strategy Towards 2036 - SANFL response" Goals are supported with inclusion of 'sport' alongside 'recreation'		Refer Recommendation 29.
Trees were here before settlement, and need to continue to be in place as long as there is our ability to enjoy them and be protected by their being.	Retaining trees and new plantings	Refer Recommendations 1 and 2.

Comments provided by respondents who generally responded that they were 'Neutral' to the four pillars:

Verbatim Response	Key Feedback	Engagement Response
These "goals" are essentially motherhood statements. In relation to the draft Strategy, it is not a matter of whether respondents support them (who wouldn't?), it is a matter of whether the draft Strategy presents a clear and comprehensive action plan to see them delivered in a transparent, fully funded and well-structured way. The draft Strategy does not do this. See attached submission.	Further clarity / definitions.	Refer Recommendation 12.

These goals aren't specific, measurable or time-bound. This makes them focus areas, not goals. Again, the lack of specificity makes them hard to support, as I actually don't understand what the tangible actions will be for each.	Targets	Refer Recommendation 10.
Covering the parklands with asphalt so 'athletes' don't get their shoes dirty while walking from their cars to the sports ground is not smart. Bicycle and walking paths don't need to be concreted. Other more natural surfaces (eg dirt or a porous material) should be used. (Yes, you will have dirty shoes occasionally.)	Pathways and surfaces	Refer Recommendation 6.

Comments provided by respondents who generally responded that they 'Somewhat support' or 'Do not support' the four pillars:

Verbatim Response	Key Feedback	Engagement Response
We should not treat the parklands as a thoroughfare. The establishment of concreted pathways is unnecessary and exaggerated. Some of the natural paths, that are being concreted over, were very accessible and suitable even for prams and manual wheelchairs. Concrete paths take away the character of the natural environment. They are also a terrible surface for running and jogging (damaging for joints).	Preference for flexible/permeable surfaces for walking and shared-use paths	Refer Recommendation 6.

Q10 'Return Areas' continue to identify land within the Adelaide Park Lands that is currently considered as having a 'Non-Park Lands Purpose' and offers limited or restricted public access. It is a key priority that this land be returned to a 'Park Lands Purpose'. Areas that are classified as having a 'Non-Park Lands Purpose' which could be returned to a 'Park Lands Purpose' include: Land that is currently under the care, control or management of the Crown or a State Authority that could be transferred to the care, control and management of the City of Adelaide to allow for increased public access Hardstand areas that are no longer considered fit for purpose and could be returned to publicly accessible green space. You can read more about our return areas schedule on pages 146-148 Are you supportive of land that is classed as having a 'Non-Park Lands Purpose' being returned to a 'Park Lands Purpose'?

Verbatim Response	Key Feedback	Engagement Response
I believe that the park lands surrounding the city be only used for recreation	Park lands for recreation	Refer Recommendations 1, 2, 3 and 4.
I find it easy to navigate		Noted. This is a statement that doesn't require an amendment.
I think it needs to be available in simpler terms and more needs to be discussed on social media	More issues relating to the park lands on social media	Refer Recommendation 9.
It is written in corporate speak that makes it hard to understand the actual intent		Noted. This is a statement that doesn't require an amendment.
It's a huge document, so appreciate the effort to take it online and do the fact sheets, like any strategy or policy document however, it's hard for people to really feel compelled to read into it - even tho we know it's important		Noted. This is a statement that doesn't require an amendment.
It's very high level and could be used to implement vastly different outcomes. It should have clearly defined objectives that the public can discuss and not generic values.		Refer to "The APLMS Strategy" section which explains the purpose of the strategy and the subservient policies and procedures which

		provide the detail you may be looking for.
My response to this is biased, having worked on the document.		Noted. This is a statement that doesn't require an amendment.
No guidance on what buildings will be built. 'Private' buildings should provide toilets accessible to the public as part of their privileged lease.	Access to facilities	Refer Recommendations 3, 7 and 13.
No HTML5 3D hardware detected		Indicates user device was not compatible with interface.
Returning non park land purpose could be returned however always look at options and benefits of alternative uses first. Draft plan easy to navigate for those with plenty of time and detail interest however it would benefit with having an APLMS for dummies document too - maybe not called that.	Alternate use for structures if no longer required.	Refer Recommendations 1, 2 and 3.
SA Government proposals to take any more of the Parklands for its buildings should be strenuously resisted.	Resist more large government owned buildings	Refer Recommendation 2, 3, 4 and 15.
Splitting up the sections that load separately make it harder to piece together.		Noted. This is a statement that doesn't require an amendment.
The details as shown mostly appear clear and concise but the aims concerning sports and recreation are in danger of becoming overly emphasised/over dominant in respect to other aims as articulated.	Ensure balanced representation of all users of the park lands.	Refer Recommendations 1, 2, 3, 4 and 7.
The Plan is well laid out, however the draft 'interactive' document does not seem to have any interactive elements which would certainly simplify the reading process and make a large and comprehensive plan much easier to navigate. Print maps within the document could also include additional information to give greater context to the space, including street names and key locations of interest. The Adelaide Park Lands Precincts ArcGIS map is a great tool and very helpful to access information about key sites of personal interest without having to filter through a document. Satellite imagery layer would be helpful under a more transparent overlay of Strategy elements for those who aren't as clear with where things are located.		Noted. This is a statement that doesn't require an amendment.
There is too much clutter in the document before the three core goals appear (pp 32, 44, 48). This is supposed to be an action plan, but there is no evidence presented that it is one. There are no "achieve by" schedules, no Key Performance Indicators, there is no funding allocated. Moreover, the significant extent of ambiguity contributes to the navigation problem.		Noted. This is a statement that doesn't require an amendment.

Q12 Do you have any additional feedback on the draft APLMS Towards 2036?

Answered: 35 Skipped: 39

Verbatim Response	Key Feedback	Engagement Response
<p>The Riverside Rowing Club (RRC), established in 1943, has a deep historical and cultural significance in the Adelaide community. Originally founded as the South Australian Railways Institute Rowing Club, it has a rich legacy that connects it to the broader history of rowing in the region, including ties to the famous Murray Cods and the 1919 Peace Regatta. Over the decades, the club has not only promoted the sport of rowing but has also contributed significantly to the social fabric of Adelaide. The RRC provides a wide range of community services, including supporting veterans through a dedicated rowing program, offering learn-to-row courses that engage the public with the Adelaide Parklands, and sponsoring school rowing programs like that of St Ignatius School. The club's facilities, including a boat shed, gymnasium, and a function center, are vital to its operations. These facilities not only support the club's rowing activities but also serve as a hub for social events, fundraisers, and community gatherings. The club also relies on a boat landing maintained by the Adelaide City Council for launching and retrieving boats, underlining its integration into the local infrastructure. The club has expressed a willingness to collaborate to ensure that, should redevelopment occur, the club can continue to offer its community services and maintain financial viability. The RRC underscores the importance of retaining its facilities to continue promoting rowing and contributing to the community's social capital, bringing the River Torrens and the Adelaide Parklands alive through active engagement. In summary, the Riverside Rowing Club is more than just a sports facility; it is a cornerstone of the Adelaide community, fostering physical activity, community spirit, and historical continuity in the heart of the city. Its presence adds vibrancy to the Adelaide Parklands, and its loss would be a significant detriment to the community it serves.</p>	<p>Highlighting the history of the club.</p>	<p>Refer Recommendation 13.</p>
<p>sporting facilities on the parklands that support female participation. The plan does not acknowledge the need to increase square meterage of facilities to allow for female users to have their own accessible Changerooms.</p>	<p>Increased participation by providing accessible and female change rooms.</p>	<p>Refer Recommendations 13 and 23.</p>
<p>I loved the maps! It was also interesting to read the Return Areas, as this highlights some of Council's ambition. Any positive vision should be communicated clearly and loudly.</p>		<p>Noted. This is a statement that doesn't require an amendment.</p>
<p>it needs more of an indigenous focus</p>	<p>Increased indigenous input.</p>	<p>Refer Recommendation 8.</p>
<p>I hope to see the strategy "increase greening and tree canopy" to be seriously put into action</p>	<p>Measures / targets for increased greening</p>	<p>Refer Recommendations 2, 3 and 10.</p>
<p>I'm glad there is a commitment to asking the community for their opinion.</p>		<p>We appreciate you saying so. Kadaltilla and the engagement team have made considerable efforts to engage and ensure community views are incorporated into this Strategy.</p>

We need greater protection for our public parklands and the state government should not longer be able to take and rezone parts of the parklands to build public infrastructure on. The public is black mailed and leveraged into supporting large building projects on our parklands with a false narrative that implies new infrastructure has to be built on parkland sites or not built at all. This binary argument is false when many other city land sites could be purchased for infrastructure projects. Recent examples of this abuse of the parklands by the state government show that we need greater protection to prevent the continual land grabs and parklands losses for future generations. This is my primary concern with the lack of detail in this draft.	Kadaltilla's legislative standing / protections for park lands.	Refer Recommendations 3 and 15.
The Parklands should be open and free to everyone. The Parklands in the Eastern side of the city are too often and for too long fenced off .		Refer Recommendations 1, 2 and 29.
You have to listen to the people more, not be blinded by the past. It's clear reading this document, you haven't. "Use of the parklands BY ALL" should be the focus. This means: more infrastructure, more parking, increased safety, no-one living there (temporary or permanent), dry zones, permanent sporting venues, more activation of unused spaces. The parklands belongs to ALL people, not the select few (whatever happened in the past) and NOT the Adelaide Parklands Authority and their blinkered views.	Park lands are for everyone	See Recommendations 1, 2, 3, 8, 9, 13 and 26..
I am not confident of the SA Government (Labor or Liberal) will recognise that they must stop 'stealing' park lands to build massive and inappropriate structure like hospitals, swim centres and large sporting structures	Kadaltilla's legislative standing / protections for park lands.	Refer Recommendations 3 and 15.
Plenty. This respondent has a 29-page submission to contribute, but this online survey does not provide a mechanism to attach this pdf submission. Please record that this respondent will seek a way to deliver this by the 9 August 2024 deadline.		Noted, and included in Appendix 9.
Sort out the foxes and rats.		Noted. This is a statement that doesn't require an amendment.
I would like to see work towards faster assembly and disassembly of temporary infrastructure for fee paying events - in particular related to the extended restrictions related to motorsport festivals, everything else seems to get set up and down much more quickly	Major event policy recommendations	Refer Recommendations 22 and 29.
Appreciate the opportunity provide feedback.		Noted. This is a statement that doesn't require an amendment.
Endorse State Heritage listing. Stop giving the State Government excuses to steal more Park Lands	Endorse Heritage listing	Refer Recommendation 4.
The City of Charles Sturt (CCS) supports the draft APLMS Towards 2036, and acknowledges the inclusion of key information, including the role of the Kaurna people in managing the land, as well as tree canopy and river health, which have a direct 'flow on' impact to CCS and our community. The acknowledgement of growth is important, including Bowden Urban Village. CCS recognises the importance of the western park lands for our community, including connections via the Outer Harbor & Gawler greenways, open space, sport and recreation facilities, dog parks and the Adelaide Aquatic Centre. CCS is interested in providing input into future projects, including master plans at Park 27 and Park 27C.	CCS provided a submission which is able to be viewed in Appendix 9.	Refer appendix 1 for individual responses to points raised by Council
It's pretty high level and sometimes vague. At times I didn't understand what you have in mind. I'm suspicious of "create a strong, cohesive, overall Adelaide Park Lands identity".	Request for greater clarity.	Refer Recommendation 12.

Hopefully we will go on having parks that vary a lot from each other.		
Well done		Noted. This is a statement that doesn't require an amendment.
To achieve Strategies 1.1-1.6 I'd like to suggest the establishment of the: 1. Adelaide Park Lands International Garden Design Series - Building on Himeji Garden, it would consist of a number (6-12) of formal gardens throughout the Park Lands focusing on different garden design styles from around the world e.g. French, Italian, Persian, Indian, Chinese etc. They could be similar sizes to Himeji or if larger could also facilitate event spaces or a culturally inspired restaurant/cafe. 2. Adelaide Park Lands International Art Park Series - In many parks around the world unique outdoor art galleries have become great tourist attractions whilst retaining greenery and open space, e.g. Vigeland Park, Oslo; Park Guell, Barcelona; Millennium Park, Chicago; Gardens by the Bay, Singapore etc. These two ideas could be established in multiple locations throughout Parks South, West and North Park Lands to increase tourist visitations to these parts of the Park Lands.	Suggestion of events	Refer Recommendation 11.
I endorse the 4-page submission made by the Adelaide Park Lands Association. It is important first and foremost to retain the parks in as natural a state as possible with minimal interference from built structures. There are already enough and caution needs to apply such that the parklands are not overrun by buildings under the guise of providing for recreational pursuits	Retain park lands in natural state	Refer Recommendations 1, 2, 3 and 4.
I was just wondering about the homeless and visiting Aboriginal population that are often sleeping rough in the park lands. Would there be space or opportunity for them to continue sleeping rough if the non-park land was re-zoned as park land purpose. It would be good to be able to give some options for those who chose not to stay within the confines of a building. I am not sure how that would work but it would be good if the Council, at least considered it.	Use of the park lands by Aboriginal visitors and homeless population	Managed under CoA and SA Government policies
The Park Lands are indeed something that need to be properly protected. However, this does not mean development and activity that attract people to them need to be opposed. They are ideas that can-exist. More people need to recognise that different outcomes can be equally pursued at the same time.	Pursue balanced protection and development for all	Refer Recommendation 3, 7, 9 and 13.
There is a lot of detail provided that is not questioned in this survey, which is disappointing. Firstly, the priorities listed on page 55, show only one new and one achieved in the northern park lands precinct. Both were initiated by parties outside ACC and both were funded by the State. This indicates a lack of diversity of focus by those governing decision making over the park lands. Equally, the draft strategy does not seek to identify areas of underinvestment or a deficiency in aspiration on page 55. Secondly the concept of precinct as expressed on page 63 is very much supported. However the obvious opportunity to involve nearby communities in decision making is lost. For example, within each precinct there are heavy users and leasees of facilities. Adjoining each precinct are thriving councils where many South Australians live. More so than within the ACC. These are the users, or are aspirant users, and could very much be involved in caring for and guiding investment in "their" precincts. This model should be investigated to make the governance model more inclusive and to hear directly from	Explaining the purpose of the APLMS and how it interacts with other documents.	Refer to "The APLMS Strategy" section which explains the purpose of the strategy and the subservient policies and procedures which provide the detail you may be looking for.
	Investment in the Park Lands is not just by AOC	- Refer Recommendation 11 and to Investment Framework which outlines a shared vision and investment.

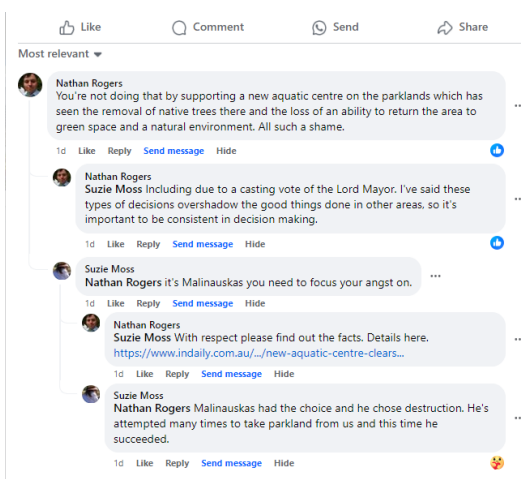

<p>locals about connectivity, amenity, and new ideas. The West precinct has a very low level of canopy cover, and large elements not used as sporting fields, yet there is no target expressed for canopy cover. Overall the precinct seems to lack purpose and connection to adjoining residential areas. Why would they go there? What is there to enjoy? The South West precinct contains parking areas that are of strategic importance to the state economy and the success of one of the state's largest collection of flexible indoor venues at the Showgrounds. This use does not appear to be about to change, therefore the strategy should embrace the use, and do a better job of catering for it, including planting vastly more trees. The park lands trail is very indirect and the proposed new route is supported. Connection to southern suburbs is generally poor, in terms of connecting to park features once having crossed Greenhill Road. South East contains many attributes to be highlighted and enjoyed. It also contains much land that could be forested. The park lands trail should be re-routed more centrally, to a new mid block tram and road crossing. Connections to the south are generally lacking outside of main road crossings. Vic Park precinct could accommodate significantly more trees in the SE corner, vastly more. Connectivity to surrounding suburbs is weak outside of formal crossings, which are a very long way apart. The highest "people" amenity is at the built facilities and crossing Fullarton road is very difficult in this area, leading to an over-reliance on the slip lane car parking, which is therefore incredibly important at this location. East precinct is very highly serviced and this is a level of service which should be a template for other precincts. It is a joy to be in, to traverse, to look at, to host events in and to enjoy. It probably hosts one of the higher user densities, and thereby appears to meet the "purpose" of the park lands, as stated on page 19, most closely. It is a model that should be repeated elsewhere. The strategy does not allocate a precinct to the area occupied by the Botanic Gardens etc and this should be remedied. There is much to like and also much to consider for improvement in this precinct. Such as the park lands trail and how it skirts rather than traverses the rich content of this precinct. Similarly, impacts on water quality and other connection paths is not commented on, and should be. Particularly the relative lack of east west connections to surrounding suburbs. The Northern precinct is an area of great deficit of enjoyment and vision. The fallback or default position is to convert as much to vegetation as possible. This is difficult to reconcile with the feedback provided in the public consultation phase. Equally evident, here and in every precinct, is a deliberate avoidance of showing or highlighting any organised sporting fields. This is shameful and reveals appears to indicate these uses and their leasees and user groups are of no value to those who have drafted this strategy. This should be remedied throughout the document, as it appears to be in direct contravention to achieving the purpose of the park lands, as expressed on page 19. Other uses in this precinct appear to be supported even though they are at odds with other strategic objectives. Maintaining horses on such a large land parcel is in direct</p>	Future engagement	Ongoing engagement is part of Kadaltilla's remit and community views are regularly represented by council members at meetings and workshops.
	Other themes and reference to the recommendations which addresses these comments follow: Trees/plantings	Refer Recommendation 2 and 3.
	Parking areas	Refer Recommendation 14.
	Park Lands Trail	Refer Recommendation 6.
	Connections to the East	Refer Recommendation 5.
	Water quality – Rec 5.1	Refer Recommendation 5.

<p>conflict with increasing native species, tree cover, restoring the environment, protecting and improving water courses, and maximising enjoyment by south Australians. I support the review of the northern golf course, and the need for a specific strategic plan for the north park lands, however I do not agree it needs to wait until the new aquatic centre is delivered. It should be done concurrently. Other precincts on the perimeter similarly lack vision for connections to surrounding suburbs, or things for thier residents to enjoy. On other matters in the draft strategy: - the page on partnerships expresses a very narrow view of potential partners. It also reveals ACC prepare yet another management plan all on their own which can be driven by their own objectives and not take into consideration the need to govern and manage the park lands on behalf of all South Australians. - the strategy nominates 4 hectares per 1000 people as adequate open space. Where is this target drawn from? A reference should be included. The information provided is helpful to an extent, but would be more helpful if it genuinely addressed the need for open space for metro Adelaide and if the combined area of the inner councils meets the target, if the park lands area is considered as an asset for the broader area of South Australians, not just those residing within its perimeter. - the governance model in use doesn't reflect the above. - reference is made to how the park lands make Adelaide so liveable, but this thin analysis is easily questioned by noting Melbourne rates much higher on almost all global measures., with much less open space. - utilisation rates indicate "enjoyment" rates but are not referred to in the analysis or objectives. It would be better if the strategy nominated some targets for utilisation, per precinct. - a small note suggests developments in surrounding councils could have their open space contributions funnelled into investing in the park lands. This idea has merit subject to the proposed investments servicing and being easily accessed by the residents in the developments making the contributions. Thank you for the opportunity to make a detailed submission.</p>	Northern Golf Course/Horses	Refer Recommendation 17 and 32.
	Suggesting own section for Botanic Gardens.	Directly addressed in "Botanic Estate Lands and Adelaide Zoo Precinct" section.
	Suggests a broader interpretation of potential partners	Refer Recommendation 11.
	Include targets	Refer Recommendation 10.
I would like to thank you for the changes made to the APLMS recognizing the considerable community input to the initial drafts. Two further matters are the need for more diverse funding of the APL perhaps using the Adelaide Park Lands Fund and the Planning and Development Fund already established under legislation. Further private funding of the APL through a Foundation or similar should also be investigated. Secondly activities and events held on the APL should be aligned to or further the vision of the APLMS rather than largely commercially orientated when alternative venues are available.	Investment suggestions	Refer Recommendation 11.
As an event organiser that has run events in the parklands for around twenty years I love them. The council has continued to improve them and make them beautiful. The new work in them is often excellent and improves usability. The only concerns I have would be that events are continued to be valued in the parks designated for event use. That does sometimes contradict the desire for more trees. Many events needs open space to be able to exist and planting trees in what is often scant open areas seriously restricts what event organisers can do.	Definition of 'hubs' and their purpose	Refer Recommendation 7 and 12.
The Parklands need support to just be in their natural, beautiful state. They do not need publicity or activities so that they can be to be 'better utilised' - they are not there for commercial ventures or to somehow make money.	Retain natural beauty.	Refer Recommendations 2 and 3.

<p>Any Return Areas being explored must be specifically consulted on with existing formal, informal and nearby users to identify impacts of return to Park Lands Purpose and those remediation for potential impacts included in any project planning and budgeting. Please see additional comments in emailed letter "Adelaide Park Lands Management Strategy Towards 2036 - SANFL response"</p>	<p>SANFL submission is included in Appendix 9 and specific responses provided.</p>	<p>SANFL submission is included in Appendix 9 and specific responses provided in Appendix 1.</p>
<p>Suggestion to manage pigeons in the city, peacefully and humanely. ● Pigeons are appreciated in many cultures, so many people loves them and enjoy having company with them. There are many people who feed them and unfortunately many pigeon lovers get many abuses by sick head people for feeding the pigeons. City of Adelaide is belong to everyone and all citizens have right to enjoy green areas. Feeding pigeons is a good therapy for elders, children, lonely people and even office people who come to the green areas for their breaks, therefore these places should be for everyone to enjoy, being bully and abusive towards people who love pigeons is so shallow minded. WHAT CITY OF ADELAIDE CAN DO? 1. City of Adelaide can either provide pigeon houses in the green areas for the pigeon and hire two staff members to constantly monitor the pigeon houses and remove the eggs and replace with the fake eggs to control the pigeon populations and also clean up the facilities. The pigeon houses are in many cities of Germany, Denmark, Switzerland and ... 2. If building pigeon houses are not possible at this stage, Council can provide automatic retail kiosks around the green areas to sell bags of OvoControl seeds to the people who love to feed the pigeons, by this method the pigeon populations get undercontrol without hurting and killing the birds and also the people who love the pigeons, enjoy their time. (https://www.evicom.com.au/garrards-adelaide) ● Introducing pigeons as pests causing some people reach to the fact that they are allowed to hurt them by kicking them and running over them, this sick mentality has to stop, all living creatures should have respect and right to live regardless of the bad reputations. WHAT CITY OF ADELAIDE CAN DO? 1. City of Adelaide can install the signs around the city to stop kids ran over them for fun and set up penalties for offenders. I am looking forward to hearing from you as all citizens should enjoy the new development plans of Adelaide and not just specific groups.</p>		<p>Refer to CoA policies/procedures around indigenous animals and non-indigenous pest control.</p>
<p>It is concerning to see increasing numbers of homeless people living in the parklands. Can they be assisted to find emergency accommodation....</p>	<p>Use of the park lands by homeless people</p>	<p>Managed under CoA and SA Government policies</p>

APPENDIX 7: Phase 3 Engagement: Social Media

1. Social Media (Facebook) posts hosted the Lord Mayor's Facebook page and responses

Lord Mayor Jane Lomax-Smith
Published by Jane Lomax-Smith

Maintaining parks and recreation is a cornerstone of our Draft Adelaide Park Lands Management Strategy (APLMS).

From upgrading community buildings to rolling out the Victoria Park/Pakapakanthi Master Plan, we're committed to ensuring the Park Lands remains a destination for sport and recreation.

Have your say on the Draft APLMS here: <https://www.cityofadelaide.com.au/~/consultation-aplms/>

We're making the Park Lands a place for sport and recreation

- 
Upgrading community buildings
 Upgrade prioritised buildings within the Adelaide Park Lands to offer purpose-designed, safe and accessible facilities.
- 
Implementing the Victoria Park/Pakapakanthi Master Plan
 Start implementing the recommendations from the Victoria Park/ Pakapakanthi (Park 16) Master Plan in collaboration with the local community, stakeholders and land managers.
- 
New Adelaide Aquatic Centre
 A new Adelaide Aquatic Centre will be built immediately south of the existing facility at Denise Norton Park/Pardipardinnyilla (Park 2). The intergeneration of the new facility with the wider Adelaide Park Lands will be a key priority.

Chris Colhoun
Less motor sport please, just human scale sports and recreation. The State government motor sport events have overgrown the Victoria Park area and restricted access to the general public and Adelaide residents. Perhaps the motor sport events can be moved to "The Bend Motorsport Park" or be significantly down scaled.

2w Like Reply Hide Edited 11 🗨️👍👍

Lord Mayor Jane Lomax-Smith (Author)
Chris Colhoun Thanks for the question, Chris. The most we can do is to work with event organisers to minimise disruption and ensure they return the site to its previous condition once the event is complete.

Chris Colhoun
Lord Mayor Jane Lomax-Smith I get motor sport enthusiasm and the tourist draw card but at some point we should acknowledge that it has outgrown the space. 🙄 The area never truly gets returned to the previous condition and the whole process takes longer to set up and then pack up each year. I appreciate the limited power that the council has over the state government around this event.

2w Like Reply Hide 3 🗨️👍

Nathan Rogers
The Adelaide Aquatic Centre is a terrible project, with huge numbers of trees cut down to put it in. I'm ashamed with all those who supported it. It's really unfortunate as it overshadows all of their good work elsewhere.

2w Like Reply Hide 3 🗨️👍

Lucian Chaffey
Please find another home for the Adelaide 500 races. The infrastructure is ugly and takes up too much of the park for too many months of the year, meaning regular park users are impinged upon unfairly

How we're enhancing and protecting the Park Lands

UNESCO World Heritage Bid

The City of Adelaide, in partnership with Adelaide Hills Council (representing councils across the Mount Lofty Ranges) is working on a joint bid for World Heritage Status for the Adelaide Park Lands and City Layout, along with the rural settlement landscapes of the Mount Lofty Ranges.

National heritage

The Adelaide Park Lands and City Layout were included on the National Heritage list in November 2008.

State Heritage

The South Australian Heritage Council has recommended the Adelaide Park Lands, Squares and City Layout be recommended to the Minister for Planning for State Heritage Area consideration.

Making our Park Lands more connected and accessible for its users is one of the goals of our draft Adelaide Park Lands Management Strategy (APLMS) - Towards 2036 document.
To have your say, click the link: <https://www.cityofadelaide.com.au/.../consultation-aplms.../>

How we're making the Park Lands more connected and accessible

- Greater connections**
Improved pedestrian and cycling networks with regular and safe crossing points.
- Lighting 'em up**
Providing wildlife appropriate lighting along key paths, at recreation hubs, sporting ovals and the urban address.
- Shadier paths**
Reinstate heritage planting avenues and find opportunities for new avenue planting.
- Greenhill Rd upgrades**
Improvements to the Greenhill Road corridor including an expanded east-west walking and cycling connection, wayfinding and storytelling, safer road crossings, shade and amenities.

Natural areas are integral to our Park Lands.
Our Adelaide Park Lands Management Strategy (APLMS) looks at how to improve their biodiversity and sustainability.
Have your say on the draft document before August 9:
<https://www.cityofadelaide.com.au/.../consultation-aplms.../>

What's are we doing about ...

Biodiversity

Adelaide Park Lands Management Strategy Towards 2036

Restore riparian corridors

- Realign and naturalise creek networks to improve water quality, biodiversity movement and fauna habitat.
- Incorporate opportunities for informal recreation and nature play, boardwalks and walking trails, and wayfinding and interpretive signage.

Greening and canopy cover

- Increase tree canopy cover
- Reduce hard surfaces in the Park Lands
- Prioritising areas that are the most vulnerable to heat and where tree canopy is at risk from climate change.

Strategic water resources

Improve the sustainable sourcing and use of water throughout the Adelaide Park Lands for sport, recreation, planting, amenity and cooling.

How we're honouring Kaurna & First Nations across our Park Lands

- Kaurna Country Charter**
Co-develop a Kaurna Country Charter with input from Kaurna to inform decision making for the Adelaide Park Lands that provides guidance to support the implementation of a Connecting with Country Framework.
- Amazing Art**
Consider permanent and temporary displays of art including art trails and interactive artworks across the Adelaide Park Lands.
- Wayfinding and Interpretation**
Continue to install wayfinding and interpretive signage across all parks as necessary, particularly when associated with other park upgrades, including opportunities for the expression of Kaurna culture.
- Adelaide Park Lands Trail**
Enhance the Adelaide Park Lands Trail through wayfinding, safer road crossings, shade for users and incorporate storytelling and amenities along the way.

Source: Draft Adelaide Park Lands Management Strategy (APLMS) - Towards 2036

lordmayoradl
Adelaide Park Lands

lordmayoradl Respecting Kaurna culture, heritage, and well-being and promoting the cultural values of Adelaide Park Lands are important parts of the Adelaide Park Lands Management Strategy - Towards 2036.

We want to provide opportunities for ongoing connection to Country for Kaurna and other First Nations peoples.

We also want to create places where they can share their rich culture with the community.

Make sure you have your say on the draft APLMS before August 9.

We're making the Park Lands a place for sport and recreation

- Upgrading community buildings**
Upgrade prioritised buildings within the Adelaide Park Lands to offer purpose-designed, safe and accessible facilities.
- Implementing the Victoria Park/Pakapakanthi Master Plan**
Start implementing the recommendations from the Victoria Park/Pakapakanthi (Park 16) Master Plan in collaboration with the local community, stakeholders and land managers.
- New Adelaide Aquatic Centre**
A new Adelaide Aquatic Centre will be built immediately south of the existing facility at Denise Norton Park/Pardipardinnylla (Park 2). The intergeneration of the new facility with the wider Adelaide Park Lands will be a key priority.

jordmayoradi

Maintaining parks and recreation is a cornerstone of our Draft Adelaide Park Lands Management Strategy (APLMS).

From upgrading community buildings to rolling out the Victoria Park/Pakapakanthi Master Plan, we're committed to ensuring the Park Lands remains a destination for sport and recreation.

How we're enhancing and protecting the Park Lands

- UNESCO World Heritage Bid**
The City of Adelaide, in partnership with Adelaide Hills Council (representing councils across the Mount Lofty Ranges) is working on a joint bid for World Heritage Status for the Adelaide Park Lands and City Layout, along with the rural settlement landscapes of the Mount Lofty Ranges.
- National heritage**
The Adelaide Park Lands and City Layout were included on the National Heritage list in November 2008.
- State Heritage**
The South Australian Heritage Council has recommended the Adelaide Park Lands, Squares and City Layout be recommended to the Minister for Planning for State Heritage Area consideration.

jordmayoradi

It's up to us to protect and enhance our Park Lands.

Our draft Adelaide Park Lands Management Strategy (APLMS) - Towards 2036 gives us a blueprint and a roadmap towards safeguarding them for future generations.

How we're making the Park Lands more connected and accessible

- Greater connections**
Improved pedestrian and cycling networks with regular and safe crossing points.
- Lighting 'em up**
Providing wildlife appropriate lighting along key paths, at recreation hubs, sporting ovals and the urban address.
- Shadier paths**
Reinstate heritage planting avenues and find opportunities for new avenue planting.
- Greenhill Rd upgrades**
Improvements to the Greenhill Road corridor including an expanded east-west walking and cycling connection, wayfinding and storytelling, safer road crossings, shade and amenities.

jordmayoradi
Adelaide, South Australia

Making our Park Lands more connected and accessible for its users is one of the goals of our draft Adelaide Park Lands Management Strategy (APLMS) - Towards 2036.

🌱 Our draft 'Adelaide Park Lands Management Strategy – Towards 2036' (APLMS) is now available for your feedback!

This strategy outlines our vision for the next decade, focusing on protecting and enhancing our beautiful open spaces.

🎯 Goal 1: 'Places and Spaces' aims to make the Adelaide Park Lands a vibrant hub for all which includes:

- 🎪 Hosting diverse events, big and small, more often and in more places.
- 🏃 Making the Park Lands the go-to spot for sport and recreation.
- 👥 Creating spaces where everyone can meet and enjoy a variety of experiences.

Take a look at our strategy and share your thoughts by Friday, 9 August 2024: <https://brnw.ch/21wL5Mr>

Don't forget to join us today at [Rundle Mall](#), in front of Gong Cha, from 11:30 am to 1:30 pm for a FREE coffee and plant giveaway! ☕🌱 Drop by our session to connect and share your thoughts on our Draft APLMS – Towards 2036.

Submission

Draft Adelaide Park Lands Management Strategy: "Towards 2036"

<https://www.cityofadelaide.com.au/community/get-involved/consultation-aplms-towards-2036/>

OPEN, GREEN PUBLIC – PROTECT & RESTORE?

The Objectives of the Adelaide Park Lands Association ("APA") specified in the Association's Constitution, relevantly include "to ensure that:

- "i) the Park Lands are reserved as a place for public recreation, leisure and enjoyment;
- "ii) the public, so far as practicable, has free and unrestricted access to and use of the Park Lands;
- "iii) the Park Lands are preserved and maintained to give priority to biodiversity, including gardens, grassland, water, wetlands, trees and other vegetation rather than buildings, fences or artificial surfaces;
- "iv) alienated areas of the Park Lands are restored to Park Lands
- "v) the open space character of the Park Lands as a place dividing the City of Adelaide from the suburbs is preserved;
- "vi) the Park Lands are preserved and maintained in a manner that enhances their special place in the design of the City of Adelaide;
- "vii) the amenity of the Park Lands is not impaired by inappropriate development on Park Lands."

APA simplifies and portrays the general thrust of these Objectives with the slogan "Open, Green, Public" and the diagram that appears on the last page of this submission.

Consistent with these Objectives, we undertake activities that we characterise under four broad headings: "Explore", "Inspire", "Protect" and "Restore."

It follows, therefore that the Association supports any new or amended legislation, policy or plan that would advance these Objectives. Conversely, of course, APA would be critical of moves to hinder or thwart these Objectives.

The Draft *Park Lands Management Strategy: Towards 2036* includes some elements which would tend to thwart or hinder some of these APA Objectives, (e.g. Objectives ii, iii, and vii); as well as some elements that would assist in progressing Objective iv. To simplify our response, we refer below to our broad aims of "Protect" and "Restore."

www.adelaide-parklands.asn.au

PROTECT

Part B "Priorities, Directions, Goals."

This is the Part where we would hope to see reflected an ambition to PROTECT the Adelaide Park Lands from repeated incursions of private facilities, including more and more State infrastructure, sports club function centres etc.

The language of the three high-level "Goals" in Part B is uncontroversial, although somewhat vague. However, their meaning becomes clearer when the "goals" are broken down into multiple "strategies". Even though there are already dozens of different privately-leased sports buildings on the Park Lands, the first four draft strategies call for a new "network of activity hubs" including "upgrading and enhancing buildings and structures."

Strategy 1.6 calls for more "permanent infrastructure". A "hierarchy of hubs" is envisaged and on page 18, the draft Strategy calls for "a forecast of major projects to guide staged investment."

There are suggestions for better "design principles" for new buildings, "redevelopment or refurbishment" of existing buildings, but **there is no goal or strategy or even aspiration to PROTECT Open, Green, Public space** from a multiplicity of new such buildings.

That is to say, there is **no "Goal" or "Strategy" to limit the number or size of new buildings, much less any ambition to remove or reduce any of the dozens of existing ones.**

On the contrary, the document explicitly envisages:

- "Medium hubs" which may include Clubroom/**multi-use facility**; and
- "Large hubs" which may include: "Pavilions or other multi-use built form to service sporting **clubrooms**, community groups and **commercial operations** (café)"

There is a wide range of features that might be included in a "hub" so that the term "hub" itself is almost devoid of meaning. In practice, this Strategy might be relied upon to justify (within proposed new "hubs") anything that is perceived to be expedient at the time.

As an aside, it is disappointing that the document does not contain any Strategic Priority to progress long-delayed [State Heritage listing of the Park Lands](#).

"Connections and Networks"

Under this heading the document endorses a strategy to "improve safety, universal design and connectivity" and another to "establish shared walking and cycling paths throughout the Parks that include safe connections and crossing points." It calls for "safety upgrades to all road crossings".

There are references elsewhere in the document to the possibility of pedestrian bridges across some roadways (Donald Bradman Drive, Glover Avenue, page 34). However the document stops short of endorsing the concept of the **Adelaide Recreation Circuit** - a proposed all-weather, unbroken, illuminated full loop running /cycling/walking trail.

By uniting the entire garland of Park Lands, this concept has the potential to become a world-unique active tourism destination. The Draft Strategy could be improved by acknowledging community support for the concept and including it on the wish-list of future projects.

Car parking

A disappointing omission from the Draft Strategy is the abandonment of a previous ambition to reduce car parking on the Adelaide Park Lands.

The current Park Lands Management Strategy 2015-2025 has an "Action" to "Reduce car parking on the Park Lands by 5% in the period to 2025." This has been dropped from the new "*Towards 2036*" document. Instead the draft document proposes (on page 23) that "car parking and access roads will be integrated into the landscape with sensitivity."

Goal 3: Natural Systems, Cultural Landscapes, and Climate Resilience

Under this heading APA welcomes the various proposed strategies to protect and promote biodiversity and Kaurna culture.

In particular, APA welcomes Strategy 3.13 to "Seek opportunities to increase greening and tree canopy, including through community participation." It is hoped that this Strategy would lead to belated approval of APA's long-awaited ambitions to re-green one or more bitumen sites within the Park Lands. <https://www.adelaide-parklands.asn.au/blog/2023/10/28/back-to-square-one-on-restoration>.

RESTORE

The *Adelaide Park Lands Act 2005* provides that the Management Strategy must include: "any plans or feasible options for increasing public access... for recreational purposes."

It is pleasing to note that the draft Strategy "*Towards 2036*" has a wish-list of sites that might be returned to 'Open, Green, Public' over the next decade or longer, by removal of bitumen or other hard-stand surfaces. At least eight sites have been identified for potential return as a "high priority" over the next "one to five years".

These sites (numbered 3, 9, 10, 11, 12, 13, 15, and 17) are hard surfaces no longer needed for their previous purposes. However there are no buildings on any of these sites that are identified for removal, to enable Park restoration. The only building identified on any of these sites (at Site 13) which is no longer needed for its previous purposes, has been identified as suitable not for removal but for "adaptive re-use".

Nevertheless, APA would be delighted to work with the City Council and other volunteer groups, to re-green one or more of the sites identified.

SUMMARY

The draft Park Lands Management Strategy: "*Towards 2036*" disappointingly fails to address the tensions between the public interest in Open, Green, Public Park Lands and the ever-present sectional demands for more and larger private facilities that would exclude the public.

The concept of Park Lands "hubs" is so broadly defined as to be devoid of meaning. The ambiguity seems to offer carte blanche to sectional interests to stake an unlimited number of future ambit claims on Park Lands real estate.

While endorsing "safer crossing points" over Park Lands roads, the document disappointingly stops short of endorsing the concept of the proposed Adelaide Recreation Circuit to unite the Park Lands.

It is also disappointing to see the abandonment of a previous ambition to reduce car parking on the Adelaide Park Lands.

However, it is is pleasing to see at least eight bitumen ("hard-stand") sites identified for potential return as a "high priority" over the next "one to five years" and APA welcomes Strategy 3.13 to "Seek opportunities to increase greening and tree canopy, including through community participation."

Shane Sody, President

20 July 2024

About the Adelaide Park Lands Association

Our Association was founded in 1987 as a non-profit community based organisation - a 'watchdog' to guard Adelaide's greatest treasure: the world-unique, National Heritage-listed Adelaide Park Lands.

But we are much more than a watchdog. We offer a focal point for South Australians to explore, be inspired by, protect and restore the Open Green Public spaces that are matched nowhere else in the world.

Our support comes from a broad cross-section of the South Australian community, across the political spectrum - people who Love Your Park Lands, as Open, Green, Public spaces.

On 7 July 2024, our newsletter subscription list contained 4,061 active subscribers.

Our following on Facebook was 6,435, and on Instagram 1,621. Our list of full (paid-up) members contained more than 600 names.

These numbers do not include sponsors, donors and subscribers to separate feeds for our Adelaide Park Lands Art Prize competition.

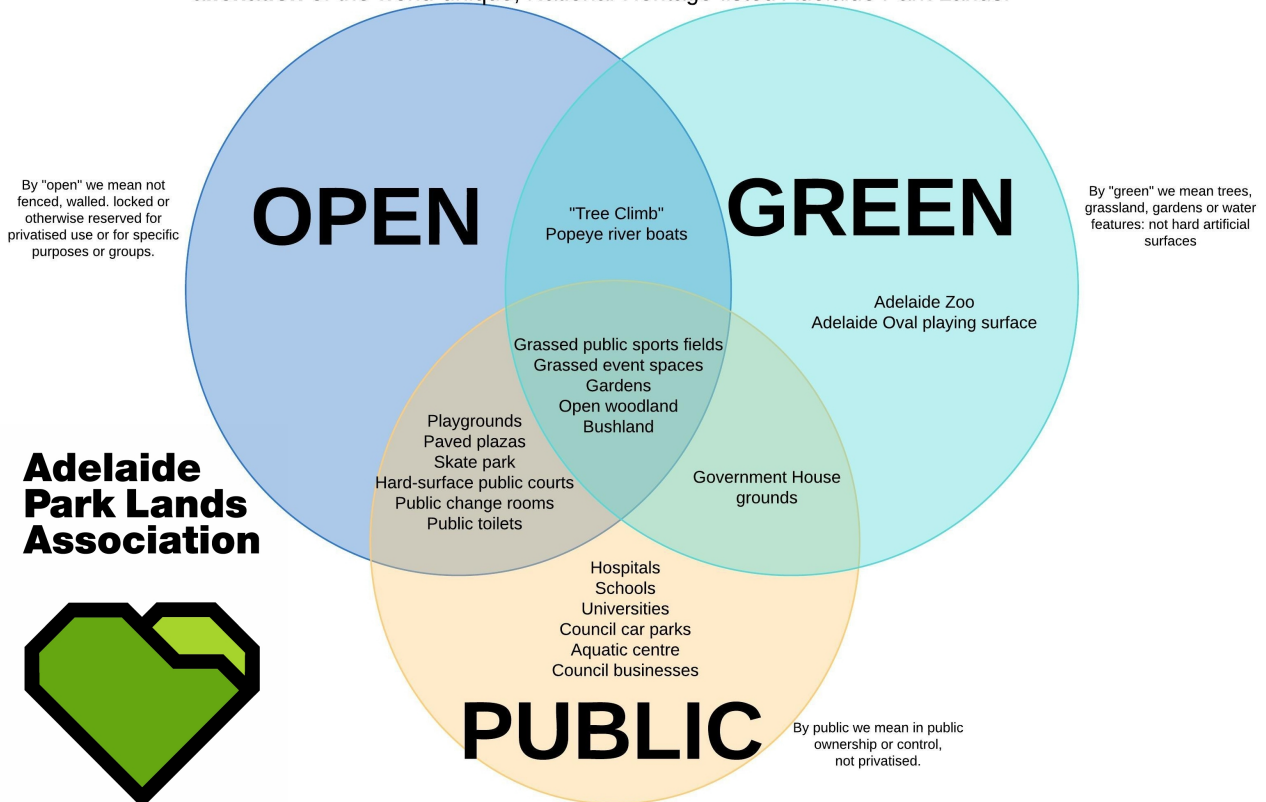

We "Explore, Inspire, Protect, Restore"
www.adelaide-parklands.asn.au/what-we-do

We simplify our Constitutional Objectives with this diagram:

PARK LANDS ARE OPEN, GREEN, PUBLIC (at least 2 out of 3)

If a proposed building or other permanent land use can't fit into at least two of these overlapping circles, then it's an **alienation** of the world-unique, National-Heritage-listed Adelaide Park Lands.

Bridgland: 9 August 2024: response to Adelaide City Council’s
‘OurAdelaide’ public consultation on the draft
Adelaide Park Lands Management Strategy, Towards 2036.

This draft Strategy, the third in 14 years, is a politically driven expression of 2005 park lands legislation that vests the state with unfettered control over how the Adelaide park lands are managed and the way in which their open spaces are continuously exploited for economic purpose.

It does not represent a shareholder vision. The shareholders are the people of South Australia. It is a *stakeholder* vision. The stakeholders are the state ministers, their planning bureaucracy, state development agencies, and inner-city local government corporations.

Evolution of the past Strategy versions, since 2010, ostensibly written and delivered by a subsidiary of the Adelaide City Council, has in fact been directed and controlled through the iron grip of the state government.

The periodic presentation for public comment of each evolving draft version has been a disingenuous practice, because nothing arising from public responses of the past has ever influenced the ultimate content of each version. We know this from hard experience since 2010, when the state government, through the Adelaide Park Lands Authority, delivered its new version to replace the original 2000–2037 vision of 1999. The content of the subsequent 2010 version, and later the 2016 version, established a pattern and a practice that is now being repeated with this 2024 version.

This current draft is obviously not a shareholder vision. The people of South Australia do not hunger for more major infrastructure projects on the park lands, or sports-focused, private, pavilion projects, or facilities enabling the monetisation of the park lands via commercial operations across the parks’ most desirable landscapes. That these outcomes continue to appear as aspirations presented in each consecutive draft illustrates aspects of the *stakeholders’* vision and the power of the state to enable that vision. The ‘stakeholders’ are outnumbered in the millions by the shareholders, but the stakeholders have the law on their side. And who wrote the law? Today, everything can be traced back to 2005 when state parliament claimed to deliver a shareholder vision for the legislated ‘protection and enhancement’ of the Adelaide park lands. The truth is that parliament delivered a *stakeholder* model in which the Adelaide park lands in the 21st century exist to serve a series of economic purposes. This 2024 draft Strategy presents the clearest contemporary example.

There are at least nine sound reasons to reject this draft, noting that the state planning minister has already endorsed it ahead of the public consultation phase. This will have the effect of compromising the draft's author, the city council, because it will restrict its capacity to respond to, and ultimately reflect, likely alternative views from the South Australian public – the shareholders.

SUMMARY

- Significant areas of ambiguity make it impossible for respondents to clearly comprehend the council's future intentions in a range of areas.
- In particular, some clauses in Goals 1 and 2 feature a number of ambiguous intentions, which embrace multiple controversial matters.
- The draft fails to present in simple and clear ways how the city council plans to manage 'hot button' issues that have plagued the South Australian public's park lands concerns for decades, including sports club-room footprint expansions, park lands car parking pressures, events management and related commercial operations, and fencing.
- The draft also features many unexplained matters, in which the administration's apparent desire for brevity has overwhelmed a respectful obligation to enlighten future interpreters in 'plain English' ways.
- The 'OurAdelaide' consultation explanatory material fails to provide adequate contextual Strategy background regarding the evolution of the three previous Strategies adopted since 1999, and how this draft compares with them.
- Procedures necessary to underpin some aspirations and management intentions behind this Strategy are not explained, but will be critical to assist readers to understand how the procedures would work once the Strategy is endorsed.
- The distinction between building 'footprint' and 'fit-for-purpose' footprint is neither provided nor explained, even though its procedural application will be critical to the use of the Strategy over time, and to future park lands site built-form management.
- No clear summary is provided to reflect the public's long-held desire to establish ways to protect open space and public access to it, free of built form and car parking, to reduce expansion of commercially focused activities centred on monetising the use of the Adelaide park lands.
- The absence of a substantial number of overdue Master Plans (pledged but not yet delivered) means that the draft Strategy is empty of material highly relevant to the future park lands management period 2024 to 2036. The lack of these plans illustrates that the draft is essentially a document that is 'hollow in the middle'. This is a major deficit.

Overview

South Australia is witnessing the same park lands exploitation disappointments that prevailed ahead of the 1999 *Adelaide Park Lands Management Strategy Report 2000–2037*, published by the City of Adelaide when Dr Lomax-Smith was Lord Mayor at that time. That Strategy Report aimed to address these disappointments. It did not see out its 36-year vision and was made redundant within 10 years.

Twenty-five years later, in the latest version, again under the leadership of Dr Lomax-Smith, the city council and the state are pursuing a management approach in which the focus relies on enabling state and/or commercial development projects and use of associated facilities across the park lands.

This Strategy represents a missed opportunity. The city council could alternatively choose to adopt a fresh, disciplined and unequivocally clear management approach, via its draft version of this statutory park lands policy instrument prescribed under the *Adelaide Park Lands Act 2005*. It could, once and for all, create statutory instrument policy through this Strategy that fully protects the open-space landscape integrity of the state’s globally renowned public-realm asset – the Adelaide park lands. That this draft will not do this signals that the council continues to choose a ‘business as usual’ pathway.

Under this proposed draft:

- **Permanent infrastructure development projects and “built form and associated facilities” in the park lands will continue to be encouraged and endorsed.**
- **Related commercial activities will continue to be encouraged.**
- **More widespread car parking in the park lands will be endorsed as recreational and other sport-related pressures grow and the council accedes to these pressures.**
- **Unexplained “alternative uses” for sections of the park lands may be adopted.¹**
- **Selected private investment in the park lands will be encouraged, and several clubs are to be in receipt of direct city council (ratepayer funded) contributions to expand their sports facilities, leading to new or extended lease periods.**

“A 37-year vision

“It is a matter long forgotten, but the 1999 Strategy Report was intended to survive, operationally intact, until 2037, the 200th anniversary of the creation of Colonel William Light’s 1837 Adelaide City Plan. That intention was driven by Adelaide Lord Mayor, Dr Jane Lomax-Smith, the leader of the Strategy management committee and the advisory group. The *Park Lands Management Strategy Report* featured actions, priorities and timelines, as well as “a plan indicating how much of the overall strategy should be achieved by 2037.” A strong theme was that there was a new energy to pursue a trend towards park lands ‘social enterprise’, as opposed to ‘commercial enterprise’. In her preface to the Strategy, Dr Lomax-Smith, wrote:

“The Management Strategy reflects the broad consensus of our community; that the park lands are of outstanding value, helping to define Adelaide physically, culturally and emotionally, in ways both obvious and subtle; that there should be no further commercial development within them and that they must be protected and enhanced into the future.”²

The “no further commercial development” intention spoke of the prevailing sentiment, widely shared.”

- Bridgland: *Pastures of plenty* © 2024, ‘The first Park Lands Management Strategy Report’, Chapter 11, extract from pages 111–12. The book can be found today and read and downloaded free through www.adelaideparklandssecrets.com

The Adelaide City Council’s June 2024 draft *Adelaide Park Lands Management Strategy, Towards 2036* fails to reflect publicly sought after protections of the park lands as a contemplative landscape place – as opposed to a series of state or commercial development project sites and associated facilities. It is ironic that the City of Adelaide’s Lord Mayor as at 2024 is the same person who 25 years ago presided over and vigorously pursued the objectives of the original *Adelaide Park Lands Management Strategy Report* of 1999. That report featured a maturity year of 2037, comprising a series of plans aimed at reducing exploitation of the park lands.

The critical consequence of 2005 legislation

The difference between then and now is that six years after the council’s adoption of the 1999 *Strategy Report* the Labor state government passed new legislation, the *Adelaide Park Lands Act 2005*, whose ambiguous provisions regarding the content of any future *Adelaide Park Lands Management Strategy* version would enable the frustration of attainment of the open-space, landscape-focused aspirations reflected in that council-authored 1999 pre-legislation policy document.

Section 18 (3) of the *Adelaide Park Lands Act 2005* begins with: “(3) The management strategy must— (a) in relation to each piece of land within the Adelaide Park Lands owned, occupied or under the care, control or management of the Crown, a State authority or the Adelaide City Council –” Unfortunately, two clauses that follow on do not sit well together.

- “(ii) provide information about the State Government’s or the Council’s (as the case may be) plans for the use and management of the land into the future; and

² In: Hassell, *Park Lands Management Strategy Report: Directions for Adelaide’s Park Lands 2000–2037*, 10 November 1999, Preface, [Footer] Executive summary, page ii.

Bridgland: 9 August 2024: response to public consultation on the draft *Adelaide Park Lands Management Strategy – Towards 2036*

- “(iii) identify any plans or feasible options for increasing public access to the land for recreational purposes (taking into account the existing or proposed use of the land);

The problem that arises from this section of the Act

The intent of clause (iii) – “increasing public access” – is effectively overwhelmed by the intent of clause (ii), which provides complete freedom to the Adelaide Park Lands Authority to encourage land-use allowances that would deliver the government’s and the council’s “plans for the use and management of the land”. If the Authority chooses to do so, in some cases its proposed plans could restrict public access because management of the park lands open space landscape character could become compromised. In the case of this ‘Strategy to 2036’ version, the Authority encourages expansion of built-forms under long-term leases of land, the traditional terms of which have meant that the public are not ordinarily free to randomly access that land. The same result arises in relation to licensed areas under the lease, areas to which the public are not ordinarily free to access at any time.

In summary, it has been the *silences* in s18 of the Act that have allowed a post-2005 Adelaide City Council, via its subsidiary the Adelaide Park Lands Authority, the freedom to create content in subsequent Strategy documents *as it thinks fit*.³ In this way, the aspirations of Dr Lomax-Smith’s 1999 non-legislated blueprint were compromised as soon as the replacement Strategy was adopted (in 2010) under the provisions of s18 of the new Act, and again when the subsequent Strategy was adopted in 2016.

To some examples: compromises evident in the draft 2024 ‘Strategy to 2036’ will include:

- “pavilions or other multi-use built form to service sporting club rooms, community groups and commercial operations (café)”.
- “Provide both permanent and temporary infrastructure to attract and service ... events...”
- “Temporary or permanent stage/bandstand/ampitheatre”.
- “car parks for multiple users, such as market stalls, events, street court sports and recreation”.
- Northern golf course “[unexplained] future uses”.
- “... upgrading and enhancing buildings and structures responsive to their park setting”.
- “Allowing private investment in the park lands” (sports buildings, etc).
- “Highest priority projects for community buildings”.
- “Enhance[d] built form and associated facilities to service both sporting and community needs”.

Of particular concern has been the importation of wording embedded in the recently approved Community Land Management Plan (20 October 2023) which wording appears to have been crafted to allow expanded footprint of new or replacement sports buildings using a new way of measuring – and managing – it. This appears to have altered a previous procedural approach. It appears that this approach has been created to deliver expanded footprint approvals for several projects, but how the

³ Always noting that this discretion had to comply with the views of the minister in whose portfolio the Act resided, and always did.

mechanism is to operate is unexplained, because this Strategy focuses on content, not process.⁴

Who is the author of this submission?

This author, a ratepayer of the city, is familiar with the recent history of the evolution of this Strategy document, beginning with the 1999 version. It was followed by two later versions: in 2010 and 2016. Each has been studied in detail.⁵

The public consultation approach as at July 2024

It is not made clear to respondents, but this draft is an outcome of a series of ‘filter stages’, commencing with a group of unidentified persons chosen by the state government whose minutes of deliberations and other records are not publicly available (see footnote 26 on page 28). The state’s planning minister (in whose portfolio the *Adelaide Park Lands Act 2005* resides) was then consulted in detail in the months leading up to the release of the draft. It was only after that procedure that the minister gave “endorsement to proceed to public consultation”.⁶ Curiously, one matter revealed in council’s Attachment A on page 12 preceding the draft, an ‘Adelaide Park Lands Open Space Offset Scheme’, is not revealed in the draft and therefore remains unexplored. This appears to be a major lapse in consultation due process. This is further discussed in this submission: see Chapter F: ‘Unexplained aspects’.

The history of evolution of this Strategy

It is notable that the city council has not invested any documentation effort during its July/August 2024 public consultation period to address and explain the Strategy’s evolutionary pathway. Moreover, it also has not invested any effort in explaining the practical linkages with the October 2023 *Community Land Management Plan* (CLMP), the second of the two land-use policy instruments specified under the *Adelaide Park Lands Act 2005*.⁷

⁴ Further explanatory detail appears in this submission, in **Appendix 3**.

⁶ 23 May 2024 Adelaide Park Lands Authority, Agenda, 23 May 2024, Item 6.2: found on page 12 of introductory matter preceding the actual draft Strategy, ‘Attachment A: Targeted Stakeholder Consultation – Summary Report: point 3: Minister for Planning’.

⁷ Useful background to this document, see: Bridgland: *Pastures of plenty* © 2024, Relevant chapters: 5. ‘A brief introduction to Adelaide’s park lands administrative machinery’ (see the sections on the CLMP and the Strategy); and the observations in that work’s Appendix 11: ‘Community Land Management Plan’. Explore: www.adelaideparklandssecrets.com

It is not good enough to simply provide Figure 2 (governance) on page 24 of the draft, or a ‘YourSay/Our Adelaide’ link to the October 2023 CLMP as if that satisfies a need to explain its key place in the park lands management policy framework, and its legislated relationship with the Strategy. Unfortunately, the council appears contented with this approach.

DISCUSSION

A. Contemporary context

Few respondents to this consultation will recall the city council’s controversy in 2023 while the *Community Land Management Plan* (CLMP) draft was being discussed ahead of its endorsement (on 20 October 2023). It was eventually endorsed, but only via the casting vote of the Lord Mayor.

The extent of dissatisfaction had been such that the elected member vote had become stuck at 4-all. The endorsed CLMP version (20 October 2023) is riddled with ambiguity, with management-direction content likely to enable a culture of heightened commercial activity, expanded built form, and expanded car parking and fencing across the park lands’ landscapes. In short, a series of economic priorities.

Under the *Adelaide Park Lands Act 2005*, a CLMP must be “consistent” with any future update of the *Adelaide Park Lands Management Strategy*. But in October 2023 there was no Strategy update version available because the council was running years behind schedule. (In a major compromise, driven by sustained state government pressure, the council did it all backwards: first endorsing the CLMP, and now, six months later, in the middle of 2024, flagging endorsement of the Strategy). The late emergence of the current draft Strategy (through the Adelaide Park Lands Authority, released on 23 May 2024 and open to public comment from 17 June to 9 August) now means that its authors are crafting its contents to be “consistent” with that CLMP.⁸

In a 2023 deputation to the council, the author of this submission described that CLMP version as a proxy document to a park lands zone development plan (today called the Planning and Design Code), and unless the current draft Strategy is amended, it will also fulfil the same purpose. Since the publication of the 2010 Strategy (a product of the 2005 legislation) the *Adelaide Park Lands Management Strategy* has become a proxy a planning document, linked to SA’s planning legislation with which the 2005 park lands Act interacts. Few South Australians realise this. Many are entranced by the Strategy’s pretty pictures and maps, but the Goals lists and their ‘enabling’ clauses are where the real intentions are revealed. These intentions are development focused – economic purpose priorities.

In the council’s crafting of the current 2024 version, it has once again written it to enable this planning proxy purpose. The council’s proposed (but unexplained) procedure to create a metric to measure built-form footprint expansion is a classic example. (This is explored in detail in **Appendix 3**, at points 2–4.) Worse, there is no reference to a critically required distinction between ‘footprint’ and ‘fit-for-purpose’ footprint. (This matter is also explored in **Appendix 3** at point 4.)

⁸ Before the final 20 October CLMP sign-off, the minutes of the Council of 10 October 2023 required council staff who were preparing the draft Strategy to transfer the CLMP’s “management directions” to the draft Strategy, and requested that the definition of “footprint” in the council’s Adelaide Park Lands Building Design Guidelines “be expressly specified in the [future] Adelaide Park Lands Management Strategy”. The relevance of the need for footprint concept procedural assessment explanations, which would be critical to the Strategy, is discussed in this submission in **Appendix 3** (see points 2–4).

B. The operational context

It is notable during the draft's June/July/August 2024 public consultation period the city council did not make clear the circumstances under which this Strategy should be read and will operate. The following are important contextual facts. For example:

- The Strategy is an 'action plan', but multiple ambiguities overwhelm many intended 'actions' and leave the reader unclear about explicit intentions.⁹
- The council authors instead imply that it is more a general philosophical guide to future concepts and ideas for the park lands.
- There are no deadlines stated for the achievement of any of the actions, merely a concluding end-date or 'shelf life' for the Strategy, ending in 2036.
- The extent of ambiguity for a document that claims to be close to a 'final' version should be of significant concern to all South Australians.
- The Strategy is not funded.
- The likely costs arising from its aspirations are not even scoped.
- There are only very limited allotted and therefore guaranteed state government funding grants to support each one of its aspirations. Most have no allocations.¹⁰
- Even though it is an 'action plan', there are no 'Performance Measures' presented as part of the draft Strategy document (otherwise known as Key Performance Indicators).
- Readers cannot know how the council will annually measure and assess progress to 2036.¹¹
- While it appears to commit the city council to achieve certain things, the lack of an action plan schedule suggests that there is no firm commitment behind objectives. This applies especially to pledges to create unscoped Master Plans.

Additional features are noted in **Appendix 4**. They cover: • Who will actually pay? • Why did the 'Stakeholders' get preferential access to the draft before the park lands shareholders, the South Australian public? • Why were the identities of persons who crafted this Strategy, members of a Project Steering Committee, kept anonymous?

C. The 'enabling' content

Despite the attractiveness of multiple pages of coloured photos and maps, there are three particularly critical Goals pages in this draft whose content will enable the council (and the state government) to endorse park lands development-related policy and action: page 34 'Places'; page 42 'Connections, networks'; and page 48 'Natural systems'. These might be labelled as 'core policy'

⁹ These are explored in detail later in this submission. Look for the heading G: 'Ambiguities'.

¹⁰ Only two were claimed to exist by the council, recorded in a council Finance and Governance Committee budget summary of 18 June 2024 (page 56): 'Community Sports Buildings', Parks 27B and 21West: State Government Funding of \$100,000 towards each building.

¹¹ At APLA's 23 May 2024 meeting, the draft Strategy attached to the agenda paper was the first publicly released version, but the agenda (Item 6.2) did not contain an executive summary of performance measures to apply to the Strategy during its 2024–2036 shelf life.

statements. Certain statements among them are ‘enabling’ clauses. Their presence will enable council and state administrators to use them as endorsements for planning and development project purposes, such as built form, expanded footprints related to these forms, car parks and allowances for car access into the park lands, fencing, and other commercially related activities. (This approach was replicated in each of the 2010 and 2016 Strategy versions.) However, few respondents in 2024 will comprehend the planning-related intent. Many will not have previously seen a draft Strategy. (The last Strategy consultation, for the 2016 version, occurred in 2015, nine years ago.) Moreover, few respondents also will have responded in detail to the council’s July 2023 public consultation phase on the ‘companion’ park lands document, the draft *Community Land Management Plan*, which was endorsed on 20 October 2023. Had more done so, they may have concluded the bleeding obvious – that there is similar ‘enabling’ content in that, commonly referred to when an applicant seeks council or state assessment indulgence regarding proposed park lands built form, footprint expansion related to these forms, expanded car parking allowances, expanded fencing and multiple other commercially related matters. Future development applicants, having examined the CLMP wording, will then look for supporting Strategy policy material.¹² They’ll find it on those three pages (page 34 ‘Places’; page 42 ‘Connections, networks’; and page 48 ‘Natural systems’).

D. The draft is released too early

Key matters unresolved as at the commencement of the public consultation phase (17 June 2024) are summarised in **Appendix 3** of this submission. These almost certainly will have major bearing on the ultimate version of the Strategy. In short, the author of this submission notes that:

- Council updates that would better inform the draft Strategy, relating to multiple overdue **park lands community buildings policy** amendments and overdue **lease and licence policy** amendments, were not resolved at the time the public consultation commenced (17 June 2024). This is a ‘red flag’ matter because those policies will be central to the future implementation of the ultimate Strategy.
- There appears to be an unexplained proposed new area assessment metric and related procedure under contemplation by council’s administrators, regarding built-form **footprint** expansion for future park lands buildings and other facilities proposals. But it was not well explained.
- There are important but unaddressed matters regarding car parking on the park lands – important caveats in the previous 2016 Strategy version (2015–2025). These caveats have been omitted from this version, without explanation.

These matters are fully explored in **Appendix 3**. Their critical relevance means that the draft has been released too early, because when fresh explanatory material is provided by council’s administration, each could trigger subsequent amendment of the 17 June draft document – after the public consultation phase has concluded on 9 August. If that occurs, public respondents will likely not see the consequential, consolidated final-version until after it is formally endorsed. This is evidence of poor

¹² **Appendix 2** in this submission contains an extract from Bridgland’s July 2023 critique of the draft CLMP.

public consultation management procedure and a failure of due process. Respondents ought to have the right to demand a repeat consultation phase if this occurs. But on past performance, the city council will probably deny it, simply because, legally, it only has to satisfy the one-time-only requirements of the *Local Government Act 1999* regarding ‘public consultation’.

E. Failure to deliver Master Plans

The draft Strategy adopts a similar approach to that which applied to the 2010 *Adelaide Park Lands Management Strategy, Towards 2020* with regard to referencing one conceptual Master Plan that did not exist at the time. This approach has been replicated with the 2024 version. But this time the ‘2036’ draft version refers to *multiple* plans yet to be created, some of which will obviously take years to emerge.

Recent history

The 2010 Strategy was endorsed in that year with a pledge that a major ‘whole of park lands’ Master Plan would be subsequently created. This would turn out to be the late-2011 *Adelaide Park Lands Landscape Master Plan*. It proved to be the central element of the 2010 Strategy in landscape policy terms. Importantly, however, this was the only Master Plan necessary for that Strategy. It aimed to ‘unify’ park lands policy across the whole of the landscape estate in terms of the park lands zone policy areas. It endured as formal policy for five years, until the replacement 2016 Strategy (2015–2025) was formally endorsed, at which time that Master Plan was very suddenly dumped. The public was not informed of its demise. It had cost a fortune. Nothing replaced it.¹³

Current 2024 arrangement

The 2024 draft ‘Strategy to 2036’ was circulated for public comment from 17 June 2024, for eight weeks. There was no detail in the draft as to when its pledged Master Plans would be delivered (eight, among which are plans for Hurtle, Hindmarsh, Whitmore and Wellington Squares: see draft pages 38–39). The number of plans promised is substantial. Some, such as plans for Parks 27 and 27C, will embrace a large area of the park lands and their policy effect is certain to be significant. The absence of these plans at the release of the draft Strategy, as well as a schedule timeline for their fully costed delivery, represents a major failure in council park lands policy management terms, a serious flaw of the draft. As it stood at release in June 2024, the draft Strategy was like the metaphorical false woodpile – hollow in the middle.

Given that there is no formal budget funding allocated for delivery of all aspects of this Strategy, the Strategy could be likened to a half-empty blueprint masquerading as an information-rich, costed and achievable management action plan for the future. But the absent Master Plans illustrate that this is a grossly

¹³ See: Bridgland: *Pastures of plenty* © 2024, Relevant chapter: 41. ‘The silent abandonment of a unique park lands master plan’. The chapter can be found in the book *Pastures of plenty*, and read and downloaded free through www.adelaideparklandssecrets.com

misleading picture. Moreover, if after 12 years nothing has been delivered by 2036, there is no consequence for the council, or its subsidiary, the Adelaide Park Lands Authority.

The administrative consequence of the pledge to deliver Master Plans

The pledge to deliver future Master Plans essentially segments sections of the park lands zone into modular policy areas. Such segmentation highlights a model of great political convenience, but not of shareholder (city ratepayer and/or taxpayer) convenience, because those reading the draft Strategy as it currently stands cannot anticipate what the contents of each Master Plan will be, or whether a new Master Plan might suddenly be amended under ministerial instruction, or be suddenly deleted (as occurred to the 2011 Landscape Master Plan the day the 2016 Strategy was endorsed by the council as formal policy). Such a policy model allows for easy ministerial manipulation, which could be imposed by the park lands minister at his/her discretion, and without public notice. If the minister doesn't like a particular plan, or wishes to change any aspect of it, it will be much easier to fiddle with. (It will also be easier for the council's administration to take such instruction and act on it, again with no lawful requirement to give notice to the public about any sudden change.)

Other flaws

The proposed segmentation of sections of the park lands by attaching Master Plans to them should require the authors to identify clear thematic policy links between the contents of the 2024 Strategy (as found in the Goals 1, 2 and 3; page 34 'Places'; page 42 'Connections, networks'; and page 48 'Natural systems') and the likely contents of the plans. However, given that most of the plans don't yet exist in public form, respondents to the draft in July/August 2024 could not be assured about what these links might be, or whether these links would ever be established. (This is just another negative legacy of the Council's wasted years between 2022 and 2024, when these plans ought to have been finalised so that they could be included in this five-year update to the Strategy, delivering a comprehensive, whole-of-park-lands management vision.) The Park 16 (Victoria Park) plan was still in draft during the draft Strategy consultation period and its final public consultation phase had not begun. The same circumstances applied to a draft Light Square plan. Neither would arrive for formal council or ministerial endorsement until long after the close of the draft Strategy consultation.

One practical example of a guessing game encouraged

A proposed Master Plan for the North Park Lands is apparently to feature 'new content' (the draft's words) relating to the potential for "alternative future uses of all, or part of, the North (golf) Course" (not explained) and/or a plan to "return to park lands of roads."¹⁴ But at August 2024, as the Strategy

¹⁴ APLA 23/5/24 agenda, Attachment A, 'Consultation summary table', page 11.

consultation period was closing, there was no hint of the “new content”. This was not only ambiguous, but also disingenuous.

Another curious example

Thirteen years ago, in 2011, the council budgeted \$1.7m for a master plan for Park 27, with a particular focus on greening Helen Mayo Park adjacent to Torrens Lake. It was partially pursued in 2012: contamination adjacent to the rail yard was capped, and some landscaping commenced. The council appears to have either forgotten the particulars of that master plan or doesn't like it anymore. This Strategy version throws no light on this matter, but should.

F. Unexplained aspects

Much of the discussion below is further explored under a subsequent heading ‘G: Ambiguities’. However, these comments are relevant at this heading. It was claimed that a public hearing at an Adelaide Park Lands Authority board meeting was to be held on 25 July 2024. While some verbal explanations were likely to be expressed by council or other expert staff at this meeting, little of the Strategy content delivered at that time would have contributed to the preferred level of transparency that should be afforded to persons who could not attend this meeting or otherwise observe the meeting content online.

Other unexplained aspects found in the draft include:

1. “Allowing private investment in the park lands” (pages 9,10, Attachment A: Consultation Summary Table, APLA Agenda, 23 May 2024)
2. “Highest priority projects for community buildings” (10, ditto).
3. “Return to park lands of roads” (11, ditto)
4. “Provide both permanent and temporary infrastructure to attract and service ... events...” (34)
5. “pavilions or other multi-use built form to service sporting club rooms, community groups and commercial operations (café)” (36)
6. “Temporary or permanent stage/bandstand/ampitheatre” (36)
7. “car parks for multiple users, such as market stalls, events, street court sports and recreation” (page 44)
8. “Enhance built form and associated facilities to service both sporting and community needs” (74, point 23)
9. “Investigate opportunities for alternative future uses of all, or part of, the North (golf) Course” (90).

Of particular concern is a lack of explanatory material relating to park lands car parking, especially to the omission of important caveats found in the previous 2016 Strategy version (at page 21), which have not been copied over to the new draft. These sought, in additional clauses, policy to minimise car parking. For example: “Reduce car parking in the park lands by 5% in the period to 2025”; “return under-utilised car parks in the park lands”; and “Improve existing car parks in the park lands to: • provide car parking layouts that minimise the total area of park lands used” (page 21 of the 2016 Strategy). Moreover, in this 2024 draft Strategy a pledge to

“define [car parking] reduction targets to 2036” (page 45 in the 2024 draft) remains undefined and unspecified, and in this version of the draft Strategy council’s administration do not commit to providing such definitions at any future date. This is a major deficit and must be addressed by adding to the draft comprehensive reduction targets, and specifying ‘achieve by’ dates, in the document.

Aspects *not* found in the draft – but should be

Reference in a council attachment preceding the actual draft¹⁵ is made to a matter that remained unexplained during the public consultation period. This is an “Adelaide Park Lands Open Space Offset Scheme”, arising from “proposed amendments to the Planning and Design Code” (see source below: footnote). Council’s administration comment noted that the council would “... further discuss the proposed amendments to the Planning and Design Code, that seek to introduce an Adelaide Park Lands Open Space Offset Scheme or Adelaide Park Lands Overlay”. The administration comment then went on to note: “Public consultation will allow for further input into this approach” (see source below: footnote). It should be obvious that, given the silence in the draft about this matter, public consultation could not possibly allow for further input.

What this appears to suggest is that planning matters of some complexity and relevance to a contemporary Strategy were being discussed behind closed doors. Because of that they were not revealed in the draft document, with the public being quarantined from any participation in commenting on their likely consequences. This is a major lapse in draft Strategy public consultation due process. This is especially the case if an “Adelaide Park Lands Open Space Offset Scheme or Adelaide Park Lands Overlay” has major land-use consequences across the land within the 2005 legislation’s Adelaide Park Lands Plan. The nine matters listed in this submission (see list previous page) all have land-use consequences. The silence within the draft about this ‘Offset Scheme’ brings the tally to 10 matters that have not been adequately explained.

G. Extensive ambiguities

It is never ‘best practice’ that a long-term, ministerially driven city council park lands draft policy document with significant future city budget ramifications is riddled with ambiguity at public consultation stage. But on the basis of this respondent having explored and responded in detail to previous Strategy versions (2010 and 2016), it is clear that a common, long-term council habit is to insert ambiguities into drafts for public consultation, and then fail to explain them. Sometimes the ambiguity relates to a procedure that is evolving behind the scenes, and could be of great convenience to future administrators.

Ambiguities include:

1. An example in an Adelaide Park Lands Authority (APLA) agenda of 23 May 2024 (Item 6.2: first public release date of the draft Strategy) where notes

¹⁵ 23 May 2024 Adelaide Park Lands Authority, Agenda, 23 May 2024, Item 6.2: found on page 12 of introductory matter preceding the actual draft Strategy pages, ‘Attachment A: Targeted Stakeholder Consultation – Summary Report: point 3: Minister for Planning’.

appeared relating to consistency between the CLMP and a Strategy (relating to increases in building footprint). The page 12 APLA discussion in that agenda item (Stakeholder feedback) is the source of the ambiguity. (More explanation appears in **Appendix 3** of this submission, paragraphs under points 2 and 3).

2. A second example appears in the draft Strategy on page 24, under strategy 1.4: “Support activation of the Adelaide park lands by upgrading and enhancing buildings and structures responsive to their park setting”. This repetition of identical ambiguous wording lifted from the 2016 Strategy ties in with a council intention to selectively enable redevelopment of sports buildings. The term “enhancing” (a code word for ‘expanding’) is obviously and deliberately ambiguous. The sentence is an ‘enabling’ clause in a planning sense; however, the Strategy is not a Planning and Design Code document. There is a significant difference between the idea of ‘activation’ (more sport and events activity in a recreational sense) and the idea of built-form development and expansion of footprint (in a legal planning sense). Moreover, ‘responsive to their park setting’ is architectural jargon that is meaningless.
3. A third example relates to proposed car parking policy on park lands, also imported from the previous (2016) Strategy. However, key previous Strategy caveats, seeking reduction of car parking, are missing. (See detailed discussion in this submission in **Appendix 3**, paragraph, point 5.)
4. A fourth example refers to ‘Goal 2 connections and Networks’, strategy 2.5, page 42, which states ‘Develop an identifying landscape for the park lands edges (urban address)’. This statement is not only meaningless to most public readers, but it also pledges nothing tangible to them. What is “an identifying landscape” meant to be? Its ambiguity clearly has corporation purpose, but one not explained on page 42. It needs comprehensive explanation. This is a construct based on a notion that residential and commercial zones development adjacent to the park lands zone boundaries should impose a planning consequence on the landscapes of adjacent park lands. In reality, this is code wording for an existing and future planning construct labelled as “the urban address”. If there is any practicable intention behind the wording it obviously relates to the master planning promised, but not at this time delivered, in this Strategy draft.¹⁶ But all of this is beyond most respondents’ comprehensions and as such reflects a high-order planning contemplation unreasonably thrown at the responding public, without explanation. They are assumed (by council) to understand ‘the code wording’. What is it really enabling? On the basis of historic park lands adaptations already made, for

¹⁶ Revealingly, the matter is well described in the Attachment A paper contained in the APLA 23 May 2024 Agenda paper, preceding the agenda’s copy of the draft Strategy document. (Attachment A is a paper the respondents likely to comment on the draft Strategy will almost certainly never see or read because it is not included in the ‘Attachment B’ draft. In that Attachment A (page 13) Renewal SA summarised the need for the park lands to be adapted for a “significant increase in the resident and working population utilising the park lands from ... projects (particularly from Bowden, the former Brompton Gasworks and the former West End Brewery site”. Renewal SA noted that the draft Strategy “has recognised this and has proposed to prepare the Bonython Park Master Plan (Strategic Priority 6).” Given that the West End brewery residential development and the master plan don’t yet exist, the curious public are left completely in the dark at the time of the draft Strategy June–August 2024 consultation. This is a major consultation flaw.

example, to the western park lands adjacent to Bowden Village (a state development project west of park lands, rezoned as a residential zone in 2012), the ‘identifying landscape’ in the park lands opposite became a permanent playground, community garden, other hard-stand recreational facilities, and associated hard-stand car parking facilities, provided at city ratepayers’ expense, even though the Bowden Village development is in the City of Charles Sturt. Its ratepayers paid nothing; city ratepayers paid for it. The matter reappears on page 44, where one of the ‘Priorities’ reads: “Provide an increased level of amenity and attraction along Adelaide park lands frontages ...” These words are highly ambiguous, and need to be clarified. (See also point 9 below: related matter.)

5. A fifth example of ambiguity is found at Goal 2 strategy 2.11: “Provide car parking on and adjacent to the Adelaide park lands only where need has been demonstrated and no reasonable alternative exists.” But neither the “demonstrated need” nor the “no reasonable alternative” is quantified or explained. Such explanation is warranted, perhaps with discussion about the **procedure** that might establish how the “demonstrated need” will be established and the words “no reasonable alternative” are to be assessed. The current wording in this draft simply reproduces the same ambiguity that now exists in the October 2023-endorsed *Community Land Management Plan* (CLMP), the ‘management-direction’ companion to this Strategy. The full revision of the CLMP, concluded in October 2023, delivered an updated perspective, in which more expanded car parking in the park lands is now allowed, but the new policy wallows in ambiguity. For example, in the CLMP, the ‘purpose for which the land is held’ policy refers to a range of park lands objectives, including provision of: **“Public facilities, furniture and amenities Including but not limited to: public toilets, dog parks, play spaces, courts, pitches, fields, skate park infrastructure, lighting, benches, shelters, bike racks, BBQs, drinking fountains, signage, exercise equipment, fencing, car parking that supports the use of the Adelaide Park Lands.”** Under the council’s November 2023 draft *Park Lands Community Buildings (Sport and Recreation) Policy*, the statement “car parking will not be permitted on the park lands” cannot now be applied as policy, because the new CLMP now endorses park lands car parking, albeit in a most ambiguous way.
6. In an example linked to 5 above, the car parking policy is further expanded in the draft Strategy on page 44. The particularly ambiguous wording of the paragraph is underlined (in this submission) as follows. “Access Roads and Car Parking “Access roads and car parks will allow for restricted vehicular access into the Adelaide Park Lands with car parking accommodated in some locations. Car parking and access roads will be integrated into the landscape with sensitivity, incorporating trees and other plantings, as well as Water Sensitive Urban Design techniques.” The subject matter of access roads is blended in with the subject matter of car parking. This is disingenuous policy wording. It goes on: “The design of access roads and car parking should complement their Adelaide Park Lands setting, using permeable surfaces rather than black asphalt and avoiding traditional kerbing. Car parks will be designed to be flexible encouraging multiple uses, such as market stalls, events, street court sports and recreation.” Again, the blending of subject matter is disingenuously ambiguous. The topics of access roads and car parking should be presented separately so that they can be explored separately.

7. A seventh example relates to fencing (associated with car parking), with draft policy content appearing on page 44. The particularly ambiguous wording is underlined below. “Car parks will be designed to be flexible encouraging multiple uses, such as market stalls, events, street court sports and recreation. Consideration should be given to low scale, open and discrete fencing options. Where possible, fencing for temporary activation of a park should be temporary in order to maximise community access to the Adelaide Park Lands. Heritage fencing may be maintained to preserve heritage connections.” It would appear that a future initial creation of a new car park is to lead to market stalls and events, which could lead to a demand for new fencing surrounding discrete areas whose area, or total allowance period, are not qualified in the Strategy and left ambiguously so. This needs clear explanation.
8. An eighth example relates to built form in the ‘Precinct Considerations’ on page 74, ‘Places and Spaces’ (and, in particular, point 23 on that page): “Enhance built form and associated facilities to service both sporting and community needs”. This statement is a repetition of clauses found in previous Strategy versions, favoured by council and state administrators because it is a key enabling clause for future planning applications. It is ambiguous because the term ‘enhance’ is ambiguous, yet at the same time it suggests activity that enables at park lands development assessment stage anything that a state, community or commercial applicant might seek. In today’s context, it is actually code wording enabling the council’s preferential bid to fund replacement of two existing club rooms with two much larger sports clubrooms, in Parks 27B (west park lands) and 21West (south park lands).¹⁷ This clause is crucial to each upgrade bid, and will be drawn on to support the redevelopment bid for the two clubrooms, each of which are to feature a major footprint expansion. But the Strategy is not a planning document; it is not an adjunct to the Planning and Design Code under the 2016 planning legislation. Despite that, this is how council’s administrators seek to present the Strategy to support assessment and approval of the projects.
9. A ninth example relates to Goal ‘strategies’ that do not sit easily with each other. This matter expands on bullet point 4 above, and relates to the ‘urban address’ construct. In Goal 2 (page 42), two strategies are presented (2.5 and 2.13) each of which relates to this ‘urban address’ notion. Each envisages necessary adaptations to certain sites to deliver supporting management responses (“identifiable landscape character” and in 2.13, “large tree species” etc). But in Goal 3, (page 48) strategy 3.11 encourages managers to be “resilient” to the consequences of “population growth” on the park lands. In other words, to be alert to and perhaps even resist that growth influence, to somehow find the means to manage the implied negative consequences. Strategy 3.11 is too ambiguous (and *resilient* is the wrong word). Moreover, the ambiguity discounts the *realpolitik* of state political pressure on the city council to adopt park lands design and landscape features supportive of the urban address construct. (It has already occurred near Bowden Village, as referred to in bullet point 4 of this list.)
10. A tenth example relates to the text about ‘Hubs’ (pages 34–37). Goal 1’s strategy 1.1 (page 34) reads: “Create a network of activity hubs ...” Three

¹⁷ This is confirmed in the early pages of the draft, under Attachment A ‘Consultation summary table’ in the ‘Administration comments’ under point 4 (two new community buildings: Parks 27B and 21 West).

pages (35–37) follow, devoted to explaining to readers what hubs are about, but nowhere in the document is there any explicit detail about where future small, medium or large hubs will be located. This contrasts with the former (2016) Strategy, which featured significant detail, park by park, precinct by precinct, identifying ‘Key Moves’. (This draft uses the words ‘New Moves’, but these refer to photo images, and some of the images illustrate park lands sites that are not so new.) It is probable that council staff today will respond by pointing out that a significant number of Master Plans are envisaged, and when those are revealed the hub type and location will be revealed. However, there are various plans already in existence, and the plans for Park 16 (Victoria Park) and Park 14 (Rymill Park) are now complete as drafts for future consultation, yet the Strategy’s authors still do not identify the locations of the hub types in the Strategy document. Council authors may suggest that readers access those Master Plans, but their contents are not revealed in the Strategy. This matter highlights the tactical use of ambiguity by park lands administrators. In the 2016 version, much detail was revealed. But in the 2024 (current draft) version, everyone has to wait until all will be revealed. Moreover, even if it is never revealed during the 12-year period to 2036, there are to be no consequences for the council or APLA, its subsidiary.

All of these ambiguities need to be clarified. Use of clear, plain English would be a good start. If this cannot be achieved, or if the ambiguity exists to deliberately flag development-project-related policy, or to deliberately avoid committing the council to future conceptual projects (such as exact location, size, explicit purpose of hubs and budget allocations), they should be deleted.

Remember – the Strategy is not a Planning and Design Code document. It does not arise from the *Planning, Development and Infrastructure Act 2016*, as does the Code. It arises from the *Adelaide Park Lands Act 2005*, in which section 18 (3) states at (ii): “provide information about the State Government’s or the Council’s (as the case may be) plans for the use and management of the land into the future; ...”

Appendix 1

Adelaide Park Lands Act 2005

Version 19.3.2021—Adelaide Park Lands Act 2005 Management of Adelaide Park Lands—Part 4 Adelaide Park Lands Management Strategy—Division 1 Published under the Legislation Revision and Publication Act 2002 p13

Section 18

(4) The Authority must, in relation to a proposal to establish or vary the **management strategy**—

(a) prepare a draft of the proposal; and
(b) refer the proposal to the Minister, the Adelaide City Council, and any State authority or adjoining council that has a direct interest in the proposal; and
(c) at a time determined to be appropriate by the Authority, by public advertisement, invite any interested person to make written submissions to the Authority within a period specified by the Authority (being not less than 1 month from the date of publication of the advertisement), and to attend a public meeting to be held in relation to the proposal.

(5) Subsection (4)(c) does not apply if the proposal relates to a variation of the management strategy that is, in the opinion of the Authority, of minor significance.

(6) The Authority may, on the basis of any consultation undertaken or submissions received under subsection (4) (or as it thinks fit), amend the proposal.

(7) The Authority must then prepare a report on the matter (incorporating the proposal, as finalised by the Authority) and furnish copies of the report to—

(a) the Minister; and
(b) the Adelaide City Council.

(8) The Minister and the Adelaide City Council must confer on the report (and proposal) and may then— (a) adopt the proposal with or without amendment; or (b) refer the proposal back to the Authority for further consideration and, if appropriate, amendment and then subsequently adopt the proposal, with or without amendment, after taking into account any report or recommendation from the Authority.

(9) The Minister must, within 6 sitting days after a proposal is adopted under subsection (8), cause copies of the management strategy (with any amendments) to be laid before both Houses of Parliament.

(10) The Minister and the Adelaide City Council must ensure that copies of the management strategy are kept available for public inspection— (a) in the case of the Minister—at an office designated by the Minister; (b) in the case of the Adelaide City Council—at an office of the Council designated by the Council.

(11) A State authority and the Adelaide City Council must provide such information as the Authority may reasonably require for the purposes of preparing or revising the management strategy under this section.

(12) For the purposes of this section, the management strategy may be varied by the substitution of a new management strategy.

(13) The Authority must prepare the management strategy within 2 years after the commencement of this section. (14) The Authority must undertake a comprehensive review of the management strategy at least once in every 5 years.

Appendix 2

Key document policy supporting ‘economic purpose’ in the Adelaide park lands

Extract from Bridgland’s submission to the city council in July 2023 regarding its draft *Community Land Management Plan* (page 12) and references to park lands *facilities*

[Subsequent note: The Council resolved on 20 October 2023 to endorse the CLMP, but before that meeting and vote, on 10 October it agreed to remove the word ‘ancillary’ “where it related to public facilities, furniture and amenities”. This arose from “feedback detailed in the Consultation Summary Report presented in Attachment A to Item 7.5 on the Agenda for the meeting of the City Planning, Development and Business Affairs Committee held on 3 October 2023.”]

The practical effect of this removal of the word ‘ancillary’ is yet to become clear.

EXTRACT AS AT JULY 2023

“13. New, embedded ‘contemplation’ statement (‘ancillary’ and ‘facilities’)

An ambiguous new statement has been introduced to this draft CLMP, and it repeats across the document, under each of the 40 references to parks or sites. It reads:

“Providing facilities, furniture and amenities ancillary to park uses”. This did not appear in previous CLMPs as an embedded, universal ‘contemplation’ and it should not appear in this CLMP. Alarming, this sentence is stated in the draft as the “Purpose for which the land is held”. Then, in repeated park or site references, the ‘Management Proposals’ are stated to “support proposals that are consistent for which the land is held”. This delivers a circular proposition – that the Adelaide park lands are in future to be a site focused on the provision of “facilities, furniture and amenities” because that is (apparently) the purpose of the land. This is not only wrong, but highly misleading because it implies that the CLMP is some sort of development plan (or in the current language, a version of a planning code).

This ‘contemplation’ focus falls on what is defined as ‘development’ under the 2016 state planning legislation (the *Planning, Development and Infrastructure Act 2016*).

However, it is alien to the future management direction for the Adelaide park lands. It should not be focused on what is essentially a Planning and Design Code function. Instead, the focus should be on presenting a park lands management-direction statutory guideline, mapping (among other things) leases across the park lands, not simply a guideline enabling allowances for *“facilities, furniture and amenities ancillary to park uses”*. But the draft at July 2023 claims that this is the “purpose for which the land is held”.

If this statement is retained for each of the 40 parks or sites, the planning-related consequences could be profound, because it would be seen as the CLMP’s principal ‘contemplation’ and, as such, would be widely exploited in subsequent planning assessment contexts.”

[End note: unfortunately, the wording was retained.]

Appendix 3

Five outstanding matters requiring extensive explanation, including procedural explanations

At 23 May 2024 (the Adelaide Park Lands Authority’s date of approval to soon commence public consultation of the draft Strategy) there were sound reasons as to why endorsement of the proposed draft of the *Adelaide Park Lands Management Strategy Towards 2036* should have been delayed until certain matters had been publicly clarified. The following ambiguities ought to be clearly and unambiguously addressed in an update to the draft Strategy, because some matters that could be critical to the life of the Strategy remained unresolved as at the commencement of the July/August 2024 consultation.

1. Council policy that will better inform the draft was not yet resolved: draft Park Lands Community Buildings (Sport and Recreation) Policy, and draft Lease and Licensing policy

Re: City Council’s City Community Services Committee, Agenda Item 7.3, 7 May 2024, ‘Park lands community buildings investment plan’ pp 14-18.

This agenda item noted that, because of council administration policy management activity in recent months about related matters (evolving park lands community buildings (sport and recreation) policy, and evolving park lands lease and licence policy) two fresh rounds of community consultation still needed to be conducted. Moreover, before that occurred, administration had pledged to deliver on 4 June 2024 to committee elected members responses to outstanding, unresolved park lands matters, as requested by them previously. No doubt the looming commencement of the draft Strategy public consultation phase was a major impetus. However, this meeting (and resolution of issues) did not occur.¹⁸

There were 11 complex matters still not addressed by administration as at 7 May relating to the community buildings policy, and another nine complex matters about council’s lease and licence policy.¹⁹ Alarming, in the 7 May committee agenda, council’s administration highlighted that the arising revised versions of each policy (at a date not yet known) “will substantially differ” from previously consulted versions. This would have effect on the contents of any arising version of the APLM

¹⁸ No public evidence exists that this information was delivered on 4 June.

¹⁹ A workshop was scheduled for 2 July 2024 – in the middle of the draft Strategy’s public consultation period. It originally aimed to tease out and address the problematic ‘tensions’ in terms of community buildings (and in relation to the contents of a future draft APLM Strategy). Instead it heard elected members’ broad concerns about draft content. Those more detailed issues, flagged in the 7 May agenda, had included: the need to clearly define the terms ‘no net loss of park lands’; ‘footprint and hardstand are not necessarily interchangeable’, “define fit for purpose”; “introducing common rooms in new community buildings may create more car parking demand”; “minimise footprint by excluding common areas and kitchens”. The fact that Strategy wording regarding these matters was obviously still going to evolve *after* the document had been released for public comment illustrates the council’s draft management chaos existing at the time. Would public respondents get to see a subsequently updated draft Strategy version before it is approved by the council, and then the minister? Doubtful.

Strategy. Endorsement of the draft Strategy for public consultation has therefore been premature.

While this might be obvious to some public respondents, council’s administration on 7 May had created a fresh rationale to address the lack of action and instead proposed a more convenient solution. In the ordinary (logical and practicable) administrative course of city council business, fine-detail park lands policy matters under the control of the relevant park lands landlord (the council) should be resolved before a ‘big picture’ statutory policy instrument such as the Strategy is updated to accurately reflect them. But in a ‘cart-before-the-horse’ manoeuvre, on 7 May council’s administration argued that the Strategy content should instead inform the future policy. Administration advised: “The Draft Park Lands Community Buildings (Sport and Recreation) Policy and Draft Park Lands Lease and Licence Policy need to be considered in the context of the APLMS to ensure consistency with this overarching park lands strategic document.”²⁰

This might be practicable were the draft Strategy to be explicit on such policy matters, but it was not. When released on 23 May (and after public consultation began on 17 June) it immediately became clear that it was riddled with ambiguous and/or unexplained statements and, as such, could not possibly inform the policy complexities. This reflected a highly chaotic level of documentation management.

2. Apparent inconsistency between CLMP content (‘fit for purpose’ and consequential potential of expanded footprint across the park lands of proposed new or replacement buildings)

An apparent inconsistency between the draft June 2024 draft Strategy, and the Community Land Management Plan (CLMP), endorsed on 20 October 2023, was highlighted by the planning minister in his early 2024 feedback about the draft (as recorded in the 23 May 2024 Adelaide Park Lands Authority’s agenda, Item 6.2: found on page 12 of introductory matter preceding the actual draft Strategy, ‘Attachment A: Targeted Stakeholder Consultation – Summary Report: Minister for Planning’.)

This regarded a “fit for purpose” definition, potentially encouraging approval of an increase in the footprint area of proposed buildings in the park lands.

In the minister’s feedback, he had pointed out that the CLMP, signed off in October 2023, noted that there shall be no increase in building footprint across the Adelaide park lands. But he appeared to misread what appears to have been a subtle but critical revision of the intent prior to the 20 October 2023 CLMP version (and since captured in the final approved version of the CLMP in a table), such that new wording introduced a new ‘whole of park lands’ metric concept, something that did not previously exist. To put it another way, as long as *total footprint across the park lands* did not increase, it was apparently acceptable to approve any individual park lands sports building development application (refurbishment or total replacement) that featured a new, expanded footprint. In essence, the CLMP table implied that *individual* footprint site measurement was no longer the key determinant for assessment and approval. Instead, assessment would draw on a new metric, *total footprint across the park lands*.

²⁰ City Community Services Committee, Agenda Item 7.3, 7 May 2024, point 24, page 18.

Please see the CLMP table extract reproduced below.

EXTRACT: CLMP OCTOBER 2023

SECTION 10: OVERARCHING OBJECTIVES, TARGETS AND MEASURES FOR THE ADELAIDE PARK LANDS

“This section outlines the overarching objectives, targets and measures that apply to each park (as relevant) within the Adelaide Park Lands under the care, control and management of the CoA...

PLEASE NOTE:

- The overarching objectives, targets and measures are not listed in any particular order.
- If there are inconsistencies between the park specific management statements (including objectives, targets and measures) and the overarching management statements, the park specific management statements take precedence.”

Extract below from: Table 2 (page 19) The overarching objectives, targets and measures

Sporting buildings and facilities (leases and licences)	<p>OBJECTIVE O15 To support the provision of community sports buildings and facilities that are fit for purpose Park Lands setting and of high-quality so as to complement the land context when viewed from all perspectives The replacement of an existing building should be considered in the context of the overall building footprint in the Park Lands and not increase total footprint across the Adelaide Park Lands</p>	<p>T15.1 To support upgrades to community sports buildings (where viable) and construction of new community sports buildings that are fit for purpose, and which maximise community participation and diversity of physical activity but to not result in a net increase of built form footprint across the Adelaide Park Lands</p>

3. Related footprint matter to point 2 above:

Future park lands new or expanded buildings: unexplained proposed new area assessment measurement metric

The above matter (noted at point 2) prompted a council administration response in the draft Adelaide Park Lands Authority 23 May 2024 **Strategy** Stakeholder discussion (on page 12) challenging the minister’s obvious (and quite reasonable) assumption. In appearing to confirm the conclusion noted above (at point 2) the council’s administration responded:

“Inconsistency between the APLMS and the CLMP will therefore only occur if the *total footprint* of buildings is increased across the park lands *as a whole*.”

This implies that council’s administration appear to assume that if a proposed particular building footprint area is approved to be expanded in an upgrade project, then somewhere else in the park lands the footprint sum will reduce to compensate for it. How is this to occur? The council does not say. Its apparent mechanism to monitor this miraculous result is to be a new and speculative measurement metric, derived from a novel approach “in the context of the *overall* building footprint”. This metric is new, unexplored, untested, and at odds with all previous Strategies (1999, 2010, 2016) in which footprint assessment has always been made on the basis of the specific site and the specific proposed built form for that site – not against a new sum tally comprising “total footprint across the park lands”.

While this ‘whole of park lands footprint area tally’ concept is not stated in the draft Strategy’s desired page 34 *Goal 1 Places and Spaces*, policy strategies 1.4 and 1.6, each makes clear that ‘buildings and structures’ (1.4) and ‘permanent and temporary infrastructure’ (1.6) are preferred outcomes for the park lands. Enabling these two strategies from now on appears to not be based on a footprint area measure of the specific *individual* proposed built form for that specific site, but instead in the context of a total park lands footprint sum “across the Adelaide park lands *as a whole*”.²¹ How this **procedure** will be exercised and managed (and especially transparently managed) is not explained, but the ambiguity is significant and needs substantial clarification in the draft Strategy.

4. Related footprint matter – definition of ‘footprint’ and ‘fit for purpose footprint’

A further issue related to **procedure** (but not a procedure spelled out in the Strategy) arises in regard to how administrators are in the future to define building ‘footprint’ as it interacts with a contemporary architectural ‘fit-for-purpose’ footprint. The assumption put about by council administrators has been that these concepts are interchangeable, but that is misleading. For example, a park lands building replacement project may have an existing footprint area of x, but architects and their park lands clients may argue that to satisfy contemporary building code purposes, which require that the building be legally ‘fit for purpose’ in terms of access arrangements, toilet numbers, changing facilities and in disability discrimination terms, then the future footprint area must be significantly increased to, say, x plus 2. Moreover, elected member chatter during the Strategy’s public consultation phase implied that the ‘code’ concept is in itself a code word. For example, if the code is not related to the building code, then there appears to be another type of code, perhaps a series of ‘fit-for-purpose’ sporting codes arising from and relating to each individual sport, including (for example) those prescribed by netball, soccer, football,

²¹ Quoted from a council administration response to the minister’s query: 23 May 2024 Adelaide Park Lands Authority, Agenda, 23 May 2024, Item 6.2: found on page 12 of introductory matter preceding the actual draft Strategy, ‘Attachment A: Targeted Stakeholder Consultation – Summary Report: Minister for Planning’.

cricket and other sport industry peak bodies. The Strategy throws no light on this, but ought to address this ambiguity for the reason below.

In the Strategy there are very few specific references to the ‘fit-for-purpose’ concept, but where there is reference it is used as a type of code jargon, because in practice it talks of the ‘x plus 2’ adaptation. A good example appears on page 70 (item tag 20 on that page) of the draft Strategy where it refers to redeveloped built form: “Redevelop built form and associated facilities to service both sporting and community needs that are contemporary and fit for purpose.” The explanatory **procedural** approach cannot be found in the Strategy. Architecturally, it is instead found in the council’s publication *Adelaide Park Lands Building Design Guidelines* Principle 5 (Footprint) that features an objective (5.1) which reads:

“Balance a minimal footprint with fit-for-purpose needs”.²² Again, what does ‘fit for purpose’ really mean? It is not explained in the draft Strategy, and not included in the definitions that appear on its list on its page 19. This deficit needs to be addressed in the draft.

Moreover, in reality there is to be no future ‘balance’, no equitable compromise arising from the *Adelaide Park Lands Building Design Guidelines*. The critical clarification in those *Guidelines* reads: “The expansion of footprint can be justified for the inclusion of change rooms and toilet facilities for gender diverse and disabled uses, while other facilities can be incorporated in floor areas”. To put this another way, unless these change rooms and toilet facilities for gender diverse and disabled users are provided, the subsequent building upgrade would not be ‘fit for purpose’. In summary, especially regarding upgrades of old park lands club rooms and other facilities, the ‘fit for purpose’ construct will prevail in practice. (Moreover, the ambiguous ‘minimal’ footprint concept to which the *Guidelines* refer is merely Town Hall architectural semantics.)

5. Car parking in the park lands: previous Strategy caveats missing, policy wording likely to trigger unquantified consequences that are not described

Council’s administration had in May 2024 copied a car parking policy statement from the previous (2015–2025) Strategy (page 21 of that former Strategy version) to be re-endorsed and adopted in the new 2024 draft Strategy. Administration proposes to adopt the same policy wording in the new draft Strategy at 2.11 (p 42): “Provide car parking on the Adelaide park lands only where need has been demonstrated and no reasonable alternative exists.” However, omitted from the new draft are other meaningful and qualifying caveats found in the previous (2015–2025) Strategy version (at page 21), which sought in myriad additional clauses ways to minimise car parking in the park lands. These included “Reduce car parking in the park lands by 5% in the period to 2025”; “return under-utilised car parks in the park lands”; and “Improve existing car parks in the park lands to: • provide car parking layouts that minimise the total area of park lands used.” (page 21) Moreover, in this 2024 Strategy

²² As found in a 2023 council City Community Services Committee agenda, (Rymill Park kiosk reburishment) recommendation 2, Item 7.2, Attachment A, which was all copied to a Council agenda of 14 November 2023, on page 94.

draft a pledge to “define [car parking] reduction targets to 2036” (page 45)²³ remains unspecified, and administration does not commit in this draft to providing definitions at any future date to any future version of the Strategy.

Further, in the draft 2024 Strategy, related car parking policy wording has been expanded to include car parking allowances for “market stalls, events, street court sports and recreation” (page 44).²⁴ These ambiguously described matters could lead to significantly expanded park lands car parking activity in the park lands, and to an unquantified extent. The likely consequences to 2036, coupled with this version’s high level of ambiguity regarding myriad other matters, is of major concern. If the council’s administration has any idea what the specific consequences will be, and how it plans to manage them, it is not revealing the detail in the background information informing the public about this draft Strategy. This includes the ‘YourSay/OurAdelaide’ documentation released on 17 June. It appears to be a guessing game. This is a major failure of due process.

²³ Page 45 table, extract: “Target: Investigate long stay Adelaide Park Lands parking and define reduction targets to 2036”.

²⁴ Page 44, extract: Access Roads and car parking; Fencing: “Car parks will be designed to be flexible encouraging multiple uses, such as market stalls, events, street court sports and recreation.”

Appendix 4Continuation of chapter B: **The operational context**

More unaddressed questions relating to the creation of this draft Strategy.

- The South Australian public has not been told, but if any of the proposed Master Plans are created, only the 26,000 ratepayers of the city will pay the associated costs. The ‘YourSay/OurAdelaide’ briefing did not mention this, but should have.
- None of the local government corporations surrounding the City of Adelaide will be required to pay for anything contemplated in this Strategy.
- Despite this, in April 2024 these corporations were labelled by the council as ‘stakeholders’, and their contributions during the non-public consultation period (January to early May 2024) were given preferential attention, leading to Strategy content amendments before the public was allowed access to the draft.
- Most ‘stakeholders’ listed were entirely happy with the contents of the draft, because it either had high potential to deliver on their particular aspirations for the park lands, or cost them nothing, in which case it represented no threat to their relevant government legislative portfolios, administrative domains, or surrounding local government domains (and budgets).
- The ratepayers of the city (intimately involved shareholders of the park lands estate given that the city council has custodianship of 74% of the total area of park lands and ratepayers pay more than \$20m annually for its maintenance and operations) were relegated to ‘last on the list’ in the consultation phases.
- Under the *Local Government Act 1999*, the city council is required to consult with these shareholders, but has no legal obligation to take any notice of any feedback they provide, or make any subsequent amendments to the content.
- On the basis of close scrutiny of the public consultation outcomes of the 2010 and 2016 draft Strategies, it is highly likely that rational, soundly based public critiques will be similarly ignored by the city council’s administrators in charge of delivery of the ultimate Strategy. This general indifference is empowered by the *Local Government Act 1999*.²⁵
- The council has been bound by, and committed to, various invisible restrictions applying to major potential revisions of the draft, enforced through the authority conferred by the state government via a shadowy ‘Project Steering Committee’ whose members have not been identified.²⁶

²⁵ See: Bridgland: *Pastures of plenty* © 2024, Relevant chapter: 48 ‘The consultation lark’, as found on: www.adelaideparklandssecrets.com

²⁶ As the draft reveals at ‘2. Background’, page 4: “A Project Steering Committee representing targeted stakeholders has been overseeing the review process informed by over 12 months of engagement activities with representatives from State and Local Government, including adjoining Councils.” (Source: Adelaide Park Lands Authority Agenda 23 May 2024, Item 6.2), draft Strategy: “2. Background”, page 4). The key influencing agencies, those most invested in outcomes arising from the draft Strategy were: Minister for Planning, Office for Design and Architecture, Renewal SA (the state’s land development agency), and four inner city local governments: West Torrens; Norwood, Payneham and St Peters; Unley; and Prospect. (See ‘4. Who we heard from’, page 5.) However, the full listing of ‘targeted stakeholders’ totalled

Bridgland: 9 August 2024: response to public consultation on the draft *Adelaide Park Lands Management Strategy – Towards 2036*

- This is similar to a body, a Project Advisory Group', that was formed in 2014 when the 2016 Strategy was being crafted, to ensure that the draft delivered what state and local government politicians desired.²⁷ It is evidence that, while the city council claims to be the author and manager of this statutory policy instrument, in fact the state government is fully in control of its contents, aided and abetted by surrounding council corporations, and its 'group' activity has delivered the contents that we see today.
- Further evidence of state government meddling in this draft emerged in early 2024 regarding confidentiality orders applied to Strategy related matters under which the planning minister was involved in Strategy content negotiations.²⁸ These occurred before public release of the draft. While these orders are in place (for a likely very long time) the public cannot know the details of the negotiations or what the "sensitive" matters were about. On the assumption that the minister had been satisfied in his negotiations, this delivers yet another reason why the contents of the draft are highly unlikely to be subject to publicly initiated amendment after the consultation period.
- These matters summarise a procedure where the public, the key *shareholders* of the park lands estate, 'can look, but can't influence' the contents.

more than 20. Most had nothing to contribute and were silent, because they were obviously satisfied with the content.

²⁷ As a city councillor once noted at the time: "*These people, unelected to the role, unknown to most South Australians and meeting behind closed doors ever since, have become known among insiders by the somewhat unattractive acronym of PAG – the Project Advisory Group.*" As found in: Bridgland, © 2024 *Pastures of Plenty*, Appendix 20, containing an opinion essay by a city council elected member, authored and published in December 2016.

²⁸ 5 March 2024: City Planning, Development and Business Affairs Committee, Item 9: Exclusion of the public, 10.1, Draft Adelaide Park Lands Management Strategy, s 90 (3) and (j) of the Act. Order to exclude: "This item contains material provided on a confidential basis which the state government has requested be considered in confidence on the grounds that the details of the request are sensitive in nature and the release of this information prematurely may be misleading. The disclosure of information in this report could reasonably be expected to prejudice the position [of] any negotiations between the City of Adelaide and the state government."

E: A.Ackland@cityofadelaide.com.au

Dear Alison,

Re: Submission from the Board of the Botanic Gardens and State Herbarium on the Consultation for the APLMS

On behalf of the Board of the Botanic Gardens and State Herbarium I would like to thank you for the opportunity to provide detailed comment on the Adelaide Park Lands Management Strategy (APLMS) on behalf of the Board of the Botanic Gardens and State Herbarium (BGSB).

Overall, we are pleased to support the broad intent of the Strategy to balance diversity of activity with the sustainability and resilience of the Park Lands, and note that it is developed with awareness of the BGSB's plans and strategies for the management of those parts of the Park Lands vested in the care and control of its Board.

With regard to the proposed investigation of transfers of ownership raised in the document, the BGSB Board understands that the Park Lands Act calls for the strategy to identify lands under the care, control or management of the Crown or a State authority and "provide information about its suitability for use as park lands under the care, control and management of the Adelaide City Council, or through transferring the land to the Council, and, if appropriate, a program for its future use as park lands".

In the cases listed in the document relating to lands under the care and control of the BGSB, the Board is not supportive of any of the proposals (p104/105, p163/164) to transfer care of control of parcels of Board lands to ACC. Under the Botanic Gardens and State Herbarium Act, the Board may not divest or be divested of interest in lands allocated to it except in pursuance of resolution of Houses of Parliament. The parcels of land flagged in the document are currently actively used and maintained by the BGSB for our visitors and event stakeholders. The Board has no intention of seeking to divest its interest in them and would oppose such proposals.

There are some relatively minor additional comments we would make in the details of the text and maps and these are detailed in the table below.

The Botanic Gardens and State Herbarium team would be very pleased to meet with the ACC team to go through any of these comments in detail and to provide advice and assistance in developing the precinct-specific content that relates to our work.

We commend the ACC team on the development of a detailed and comprehensive document and look forward to working with you on its further development.

Yours sincerely

Michael Harvey
Director

BGSH Detailed Comments on APLMS

SECTION	PAGE	BGSH COMMENT
Adelaide Park Lands map	P4	On the map, the Mistletoe Park label is incorrectly positioned. It would be more accurate for the text label saying Mistletoe Park to be placed directly under the Bundeys Paddock (9) label.
Existing Uses of the Adelaide Park Lands	P16	Suggest Adelaide Botanic Garden (ABG) and Botanic Park should also be recognised for their key biodiversity and conservation contributions to the Park Lands. The Botanic Estates are highly species diverse and contain significant remnant trees.
	P16	It should be stated that the Parklands Authority does not govern the ABG & Botanic Park, which are separately governed by a Ministerially appointed Board and the BGSH Act.
Goal 2 – Connections and Networks	P42	As the Parklands trail traverses land which is managed by the BGSH Board, is there scope for the BGSH to apply for funding support to develop and maintain its part of the trail to that same standard as other sections of the trail?
Goal 3 – Natural Systems, Cultural Landscapes and Climate Resilience	P48	Suggest that the ABG & Botanic Park biodiversity and conservation contributions should also be mentioned here – an opportunity to flag the inclusion of key scientific research and collections via the State Herbarium and South Australian Seed Conservation Centre, both situated within the grounds of the ABG.
	P50	Suggest the listing of Water Features/Water Use also includes the ABG First Creek Managed Aquifer Recovery and Storage System and Main Lake.
	P50	If needed, ABG has State Heritage listed buildings, which could be cited as examples: Palm House, Goodman Building, Tram Barn, North Lodge, Bicentennial Conservatory.
	P50	ABG & Botanic Park (Tainmuntilla) have significant cultural heritage, so could be specifically included in the Cultural Heritage section (we note that this point is made on p102).
In Progress	P57	8 – reference “Adelaide Botanic Gardens Master Plan” (remove s from existing “Gardens” – correct name is Adelaide Botanic Garden).
Riverbank Precinct	P97	As above - remove s from existing “Gardens” – correct name is Adelaide Botanic Garden (Lot Fourteen section)
	P98	Re the reference to sight between the university and the Adelaide Botanic Garden, it should be noted that these sight lines are now greatly reduced due to the extension of the Adelaide Botanic High School.
Botanic Estate Lands and Adelaide Zoo Precinct	P102	Suggest the ABG and Botanic Park context section could be expanded slightly to flag that the sites contain cultural and social heritage landscapes and contributory features such as heritage listed buildings and sites (eg Speakers’ Corner, former Asylum sites, exotic and native species, avenues, corridors and the vulnerable species colony of the Grey-headed Flying-fox). It could also highlight the extensive public programming and educational outcomes provided by BGSH which contributes to state’s wellbeing, educational and conservation goals.
Precinct considerations	P104/ 105	Some of the numbers in the triangles do not match up with the relevant text:

		<p>On map</p> <ul style="list-style-type: none"> • 1 is correct with text • 2 is correct with text • 3 should be relocated to centre of map • 4 is Hackney Rd area – proposed transfer not supported • 5 text references interface projects where marker 6 is located (suggest that this marker should be duplicated with one close to Botanic Rd – the proposed Lot Fourteen interfaces are at both locations) • 6 is not referenced in text but is at a Lot Fourteen interface location
	P104	See note above re removing "s" from Adelaide Botanic Gardens
	P105	Suggest the blue 'riparian' zone indicated misses all of First Creek and could be expanded to include it.
	P104	Connections and Networks 4 – we are very supportive of the point re safe crossing areas and suggest also adding a requirement for more public transport connections, as bus connections to the ABG and Botanic Park were lost due to Obahn tunnel.
	P104	Places and Spaces 4 – The Board does not support this statement that these is such an opportunity. This is a critical part of Botanic Park and contains key infrastructure, is part of the WOMAD contract footprint, has important living collections maintained by BGSB.
	P104	Places and Spaces 5 – The Board is very supportive of progress in these interface areas.
Return Areas Schedule	P147	Line 16 – need to clarify – this is described as Park 11 Botanic Park, for which the custodian is the BGSB Board, not the Corporation of the City of Adelaide. The Board does not support the proposed investigation of transfer of ownership from Board to ACC. The rationale of for the opportunity is redundant as there is public access/interface already provided.
Appendix A	P161	Suggest check ownership of parcel F41835A6 Cr5807/966. If this is part of Botanic Park the custodian is BGSB Board, or does this refer to the slim parcel of land adjacent to Botanic High School?
	P163	H105100S574 proposed transfer of ownership from Board to ACC. Per notes above, BGSB Board do not support this proposal.
	P164	Opportunity of for the Hackney Road carpark land to be transferred to the ACC. Parcel H105100S640 (PART) Cr57561652. Per notes above, BGSB Board does not support this proposal.
General		Through document, plant species names should be italicised.
General		We note that the document uses both "Governors" and "Board" when describing holders of BGSB lands. This may be reflective of the land titles, however we suggest that, for consistency with our current Act, "Board" is the correct term to use throughout the document.

DRAFT ADELAIDE PARK LANDS MANAGEMENT STRATEGY – TOWARDS 2036

Council Submission

2 July 2024

ACKNOWLEDGEMENT OF COUNTRY

The City of Adelaide acknowledges that we are located on the traditional Country of the Kurna people of the Adelaide Plains and pays respect to Elders past, present and emerging.

We recognise and respect their cultural heritage, beliefs and relationship with the land. We also extend that respect to visitors of other Aboriginal Language Groups and other First Nations.

INTRODUCTION

On 23 May 2024, the Kadaltilla / Adelaide Park Lands Authority (Kadaltilla) endorsed the draft Adelaide Park Land Management Strategy (APLMS) – Towards 2036 for the purposes of public consultation, which is being undertaken from 17 June to 9 August 2024.

At its meeting on 4 June 2024, Council noted that a workshop will be held with Council Members at the City Planning, Development and Business Affairs Committee (CPDBAC). This workshop was held on 2 July 2024 to gather feedback on the draft APLMS – Towards 2036.

This draft submission on the draft APLMS summarises the feedback provided by CPDBAC at that meeting.

Council Members were invited to respond to key questions:

1. What are Council Members' views on the draft APLMS – Towards 2036?
2. What feedback do Council Members have for consideration by Kadaltilla on the draft APLMS – Towards 2036?

Following the conclusion of the public consultation period, the draft APLMS will be presented to Kadaltilla in September/October 2024 for approval. Following approval by Kadaltilla, the draft APLMS will be sent to Council and the Minister for Planning seeking adoption of the draft APLMS with or without amendment.

This submission provides the Council's response to the draft Adelaide Park Lands Management Strategy – Towards 2036.

1. COUNCIL FUNDING ALLOCATION FOR COMMUNITY BUILDINGS

For the current financial year and the duration of this Council's term, the Council has approved a Business Plan and Budget that allocates 1.5% of the total budget specifically for improvements to community buildings located in the Park Lands. This allocation signifies a substantial commitment by the Council to enhance these facilities. It is important that this commitment is clearly reflected in the draft APLMS. The inclusion of this information in the APLMS will underscore the Council's dedication to maintaining and improving community infrastructure within the Park Lands, ensuring that these spaces continue to serve the needs of the community effectively.

Recommendation:

- Include reference to the City of Adelaide's commitment to investment in Park Lands infrastructure.
- Consider the inclusion of an understanding of the total investment required to undertake the work for the priorities and strategies outlined in the APLMS.

2. CAR PARKING

The current APLMS states that Council wants to see a reduction in parking by 5%, acknowledging that this target has not yet been achieved. In contrast, the draft APLMS fails to mention a car parking target, and potentially suggests an increase in car parking.

The current APLMS sets a clear goal of reducing parking by 5%, though it acknowledges that this target has not yet been met. This objective highlights the Council's commitment to minimizing car usage and promoting more sustainable transportation options within the Park Lands.

However, the draft APLMS does not include a specific target for car parking reduction. Instead, it potentially implies an increase in car parking availability. This omission and potential shift in focus could undermine the original intent of promoting a greener, more pedestrian-friendly environment in the Park Lands. It is crucial for the draft APLMS to align with the established goals of reducing car dependency to ensure consistency in the Council's vision for sustainable park management.

Recommendation:

- The draft APLMS should clearly articulate the Council's objective to restore hardstand areas of the Park Lands to their intended use as open green spaces, with a specific emphasis on reducing parking within the Park Lands.

3. HERITAGE ITEMS

Council Members expressed strong endorsement for the transfer of heritage items from the Community Land Management Plans (CLMPs) into the draft APLMS. It was observed that in the North Park Lands, specifically in Parks 8-10, there were items previously recommended for heritage listing that are now included as historical items in the draft APLMS. Among these are gate posts which were part of the original Park Lands when they were established, including those associated with the War Memorial. This inclusion underscores the Council's commitment to preserving and highlighting the rich historical and cultural heritage of the Park Lands, ensuring these significant elements are protected and celebrated for future generations.

Recommendation:

- Include a more active interpretation of the heritage items to enhance understanding and appreciation of the Park Lands' rich history and cultural value.

4. KAURNA SITES

Council Members noted the presence of significant Kaurna sites within the Park Lands that are related to early European settlement and hold substantial cultural importance to the Kaurna people. These sites should be recognised and considered as heritage items to honour and preserve the historical and cultural legacy of the Kaurna community.

Recommendation:

- Ensure that all areas and items of significance are considered as heritage items.

5. GOLF COURSE – NORTHERN AREAS

The draft Adelaide Park Lands Management Strategy (APLMS) indicates an intention to explore alternative uses for the northern area of the golf course. Council Members expressed a desire for the inclusion of a clear definition of "alternative uses" to specify the intended activities or purposes for this area. Providing a detailed definition will help ensure transparency and prevent any potential confusion or misinterpretation regarding the Council's plans for the northern part of the golf course

Recommendation:

- Consider including language that defines "alternative" uses of Park Lands or uses that contribute positively to the Park Lands' preservation and enhancement.

6. ROAD CLOSURE – LEFEVRE ROAD

While supporting the investigation of return of hardstand to open green space, Council Members highlighted the considerable volume of traffic currently using Lefevre Road. It is crucial to thoroughly assess the implications for traffic flow if these vehicles were redirected to alternative routes. Understanding these potential consequences is essential for making informed decisions that balance the restoration of Park Lands' functions with the practicalities of traffic management.

Recommendation:

- Clarify that any considerations for road closure, including Lefevre Road, would undergo modelling and consultation with the Department for Infrastructure and Transport to ensure thorough qualification and assessment.

7. WELLINGTON SQUARE

Council Members noted that the draft APLMS proposes structural alterations to the square, which currently stands as the last remaining square in its original established form. Council considers these proposed changes to be contradictory to the current objective of the APLMS, which aims to preserve and maintain heritage elements within the Park Lands. The Council emphasises the importance of safeguarding historical integrity and advocates for strategies that respect and uphold the original design and character of such significant cultural assets.

Recommendation:

- Reconsider altering the structure of Wellington Square in order to retain heritage elements.

8. PRIVATE INVESTMENT FUNDING

Council Members noted the inclusion of a "private investment" section in the draft APLMS and expressed the need for clarification. It is essential to specify that the intended source of this investment is community clubs rather than private corporations. This distinction aims to safeguard the Park Lands from corporate interests and ensure that any financial contributions align with community-oriented goals and values. Clarifying this point will reinforce the commitment to preserving the Park Lands as public, community-focused spaces.

Recommendation:

- Include a clear definition of "private funding" to exclude any consideration of funding from private corporations, aligning with the intended scope of the draft APLMS.

9. INVESTMENT IN THE PARK LANDS

While the draft APLMS includes an investment section, there is a need for clarity on how these investments align with the outlined priorities. Nevertheless, Council Members offered positive feedback, especially regarding the inclusion of Part C in the draft APLMS and its accompanying investment framework. There is a suggestion to consider acknowledging the necessity of a new funding model to secure the investments needed for the protection and enhancement of the Park

Lands. This would ensure that financial strategies are robust and aligned with the overarching goals of the APLMS.

Recommendation:

- Review the wording concerning investment in the Park Lands, clarifying the distinction between maintenance and investment in new infrastructure.
- Consider enhancing clarity regarding opportunities and implications for contributions from others, including neighbouring Councils, through the implementation of a new funding model.

10. NORTH PARK LANDS PRECINCT – HORSE PASTURING

Given the historical significance of horses being located in Lefevre Park / Nantu Wama (Park 6) and its importance to certain individuals, it is crucial to explore how this can be appropriately recognised and acknowledged within the draft APLMS. This could involve incorporating provisions that respect and honour the cultural and recreational practices associated with horses in the Park Lands, ensuring their continued relevance and accessibility for those who value this aspect of the area's heritage.

Recommendation:

- Consider including more references or providing additional details regarding the historical practice of horse pasturing in Lefevre Park / Nantu Wama (Park 6).

11. SUMMARY

Council Members commended the progress made and the high quality of the presented document. They highlighted several key recommendations for improving the draft APLMS, which include:

1. **Investment and Funding Clarity:** Include a reference to the City of Adelaide's commitment to investment in Park Lands infrastructure and outline the total investment required for APLMS priorities and strategies.
2. **Park Land Use and Heritage Preservation:** Clearly state the goal of returning hardstand Park Lands to their intended use, emphasise reducing parking, ensure all significant areas and items are designated as heritage items, and recognise and protect significant Kaurna heritage sites.
3. **Alternative Uses and Road Management:** Define "alternative" uses of Park Lands that contribute positively to preservation and enhancement, clarify road closure considerations through modelling and consultation with the Department for Infrastructure and Transport.
4. **Heritage and Infrastructure:** Enhance interpretation of heritage items and reconsider altering the structure of Wellington Square to preserve heritage elements.
5. **Private Funding and Collaborative Funding Models:** Include a precise definition of "private funding" excluding consideration from private corporations, review investment wording distinguishing between maintenance and new infrastructure, and clarify opportunities and implications of contributions from neighbouring Councils through a new funding model.
6. **Historical Context:** Provide additional references or details on the historical practice of horse pasturing in Lefevre Park / Nantu Wama (Park 6).

These recommendations aim to strengthen the APLMS by addressing clarity, inclusivity of cultural heritage, financial planning, and historical preservation within the Park Lands.

Submission on Draft Adelaide Park Lands Management Strategy

The City of Burnside places great strategic importance on place making and environmental sustainability. Council's Strategic Community Plan, 'Burnside 2030', includes several priorities that demonstrate this commitment:

- Master planning our precincts and open spaces;
- Functional and attractive streets, spaces and neighbourhoods that are green and cooling;
- Balancing protection of character and heritage with planned growth;
- Healthy habitats and biodiversity preserved and enhanced; and
- Enhance canopy cover and greening.

We commend Kadaltilla on the development of a new Management Strategy for the Park Lands, particularly the consultative approach to this work. Thank you for the opportunity to provide input as the plan was developed. We provide some comments on the draft below.

Overall, we support the work on connectivity, ensuring the community has access to open space. We highlight the importance of connectivity of walking and cycling paths to surrounding suburbs, to ensure active transport is supported and can be encouraged.

In the Victoria Park Precinct, we value the inclusion of biodiversity elements and the intent to, "Create new and enhance the existing nodes along key pedestrian access points and strengthen connectivity into the city from neighbouring suburbs." We value biodiversity and strongly support increases in the quality of habitat. We recognise that this precinct also provides important public space for active and passive recreation for residents in surrounding suburbs and visitors, including large-scale events. We urge the City of Adelaide to ensure that the disturbance of nearby residents and businesses is minimised during events. For example, we hope that events will be required to develop and promote active and public transport, rather than reliance on private cars, to reduce traffic congestion, parking issues, and minimise greenhouse gas emissions.

Thank you again for the opportunity to provide input to the development of the Management Strategy.

Kind Regards

Dr Philip Roetman
Environmental Sustainability Manager

Dear Lord Mayor

DRAFT ADELAIDE PARK LANDS MANAGEMENT STRATEGY

Thank you for your letter dated 4 March 2024, regarding the Draft Adelaide Park Lands Management Strategy (the draft Strategy) and for the opportunity to review the draft document before it is publicly released.

As outlined in my previous correspondence dated 27 March 2024, the Council considered the draft Strategy in confidence, at a Special Council Meeting held on 8 April 2024. At that meeting, the Council resolved to firstly congratulate Kadaltilla and all those involved in the development of the draft *Adelaide Park Lands Strategy – Towards 2036*. In doing so, the Council acknowledged the significance of this document, not only for the City of Adelaide and adjoining Councils, but also for the broader community of South Australia.

Email
townhall@npsp.sa.gov.au

Website
www.npsp.sa.gov.au

As part of its resolution, the Council also requested that the connections between the Adelaide Park Lands and adjoining suburbs, be more clearly illustrated on each of the Precinct Structure Plans contained in the draft Strategy, to reinforce the importance of having safe and accessible connections from the adjoining suburbs to the Adelaide Park Lands. In particular, the Council expressed its desire to collaborate with the City of Adelaide, Kadaltilla and the Department for Infrastructure and Transport, to facilitate improved pedestrian linkages into and out of the Adelaide Park Lands, with a particular emphasis on enhancing pedestrian access from the adjoining suburbs situated east of Hackney Road and Dequetteville Terrace.

In addition, whilst not directly related to the draft Strategy, the Council also requested that the City of Adelaide work with the Department of Infrastructure and Transport, SA Motorsport Board and other organisations, to ensure that closure of connecting roads through the Victoria Park and the East Park Land precincts occurs only for major events and for the minimum durative time necessary.

In conclusion, I would like to once again extend my congratulations to you and Kadaltilla on the development of this comprehensive document and thank you for the opportunity to provide feedback.

Yours sincerely

Mario Barone PSM

7 August 2024

Dr Jane Lomax-Smith AM
Lord Mayor
Presiding Member, Kadaltilla / Adelaide Park Lands Authority
Via email: j.lomax-smith@cityofadelaide.com.au

Dear Lord Mayor

Re: Draft Adelaide Park Lands Management Strategy

The City of Unley has appreciated the opportunity for our staff to be part of the Project Steering Committee and to assist in the review of the Adelaide Park Lands Management Strategy (APLMS).

The document sets out a robust and detailed long-term vision to protect and enhance the parklands, in anticipation of the impacts of climate change, population, and open space demand. The City of Unley has the lowest amount of public open space, and the Adelaide Park Lands, which defines our northern boundary, provides a much-loved destination for our community and their quality of life.

Further to our letter dated 15 March, staff have provided a further review of the document and its relevance to our own established strategic directions. In response to the questions posed in the online survey, please see responses below:

APLMS Vision

The vision set out in the strategy is holistic and encompassing of the many different values of the Adelaide Park Lands. For many residents of the City of Unley, and the growing number of commuters who walk or ride through the City of Unley daily into the CBD for school or work, the parklands provides a unique setting that connects the surrounding neighbourhoods of Greater Adelaide with the CBD.

Four Pillars

The four pillars of Cultural Value, Environmental Performance, Management and Protect and Expert Advice are strongly supported. Of particular interest to the City of Unley is the promotion of wellbeing for our adjacent residents and growing business community working, as well as improving climate resilience.

The City of Unley would encourage Kadaltilla to continue to support the outward focus of the Adelaide Parklands, improving local connections and increasing activation and amenity towards the surrounding communities to realise the value of the Parklands for Greater Adelaide.

Three Goals

The three goals reflect the value of the Parklands to the City of Unley. The **Principles of Good Design** (page 34) are referenced with *Goal 1 Places and Spaces*, and it may be appropriate to apply these principles to Goals 2 and 3 as well. In recognition of the importance of good design in preserving and enhancing the quality of the Adelaide Park Lands. Alternatively, as the State Government's definition of good design, it could benefit from elevation to inform all of the APLMS.

Regarding *Places and Space*, the Council is working to increase its urban biodiversity and the long-term opportunity to connect the Foothills with the Parklands through the open space network and linear trails across the City of Unley.

In addition, support for shared activation and events with neighbouring Councils and communities should be considered.

Regarding *Connections and Networks*, the Council is willing to work more collaboratively with the City of Adelaide, as well as with the State Government, to explore opportunities to increase safe movement across Greenhill Road and movement through the South Parklands, in particular, expanding safe and efficient north/south crossings and east/west pathways.

The APLMS should advocate for improved public transport services to the Parklands, accessing the outside edges, as well as the internal CBD streets, to provide a practical alternate to the increasing car parking demand requirements of the adjacent sporting and business precincts.

The Council would support further opportunities for collaboration regarding the adaptation and future activation of the edge of the southern parklands adjacent to Greenhill Road – identified as **Priority 7, Greenhill Road Corridor**. The Council is keen to pursue opportunities to work together to improve the amenity and accessibility along the Greenhill Road edge, balanced with the need for increased car parking to manage the demand of the adjacent sporting and business precincts.

This commitment has been demonstrated by past decisions of Council to engage with the City of Adelaide regarding Greenhill Road.

The indicator 'Safe road and path crossing points' should consider the following:

- include new pedestrian and cycle crossings at key bicycle network junctions on the surrounding DIT road network, as well as improved pedestrian accessibility at all existing intersections.
- Extend the 50km/hr speed limit within the city to include the roadways passing through the park lands. The City of Unley are advocating for speed changes to the key DIT roadways leading to the parklands from the south (to 50km/hr).

In addition, the indicator 'Connectivity with surrounding bicycle networks' should also consider the planned progress by the City of Unley for connection with Joslin Street and Roberts Street.

Regarding *Natural Systems, Cultural Landscapes and Climate Resilience*, the co-funded Brownhill Keswick Creek Stormwater Projects recently completed in the South Parklands (Victoria Park/ Pakapakanthi / Park 16, and Creek Works in Blue Gum Park/ Kurangga / Park 20) are an important demonstration of quality design outcomes, providing increased value to the amenity of the Parklands, as well as greater protection to the downstream neighbourhoods in response to increasing pressures as a result of a changing climate.

Returning of Land

The Council is supportive of initiatives that will see land that is classified as having a 'Non-park Lands Purpose' being returned to a 'Park Lands Purpose'.

In March 2023, the Council unanimously supported a motion that demonstrated Unley's recognition and support of the importance of the Adelaide Parklands to the City of Unley. The motion included:

- Support investigation of the addition of the Adelaide Park Lands to the State Heritage register.
- Recognise the environmental significance of the Adelaide Park Lands and importance to residents of the City of Unley for both recreation and wellbeing.
- Request that SAPOL and the State Government investigate alternative sites for the Mounted Operations Unit and associated buildings and structures that do not impact areas of high biodiversity value nor result in the alienation of publicly accessible Park Lands.
- Request a briefing by ACC staff to the City of Unley's Elected Members on the Adelaide Park Lands Management Strategy 2015-2025, highlighting opportunities for projects and further engagement in the review process in the vicinity of Greenhill Road, which would provide amenity to residents from both cities, as well as outline opportunities for Council to further engage in the City Council's current review of the Strategy.

APLMS Presentation

The structure and graphical representation of the document is easy to read and understand and is recognised as a refinement of the previous study. The ongoing commitment to the strategic directions set out in the previous APLMS is encouraged.

The City Council is commended for the initiative to create an interactive PDF of the draft APLMS. The digital mapping provides greater understanding of the long-term plans for the precinct and set a new benchmark in open space planning.

The City Council would be encouraged to share the platform with the neighbouring Council to extend long term planning, for the parklands and surrounding suburbs, to ensure more co-ordinated and strategic decision making by State Government, as well as local governments.

Other Comments

The following comments are provided for further consideration:

- **South East Precinct Plan**

- Edge Paths to be shown along Greenhill Road
- Urban Address to incorporate off-road cycle movement, footpaths, on-street parking provision (sport and business parking demand) and improved public transport accessibility.

- **South West Precinct Plan**

- Additional north / south path connections required to improve walking and cycling connections across Park Lands between the City and Joslin Street Active Transport Connections.
- It is requested that the proposal to investigate the removal of the tennis courts (no 19) will consider the views of the adjacent City of Unley residents.
- Pedestrian Crossing points at Greenhill Road / ANZAC Road intersection required to support the proposal for a fenced off-leash dog park (no 22).
- Edge Paths to be shown along Greenhill Road.
- Urban Address to incorporate off-road cycle movement, footpaths, on-street parking provision (sport and business parking demand) and improved public transport accessibility.

Should you have any queries regarding this matter, please contact Ben Willsmore, General Manager, City Shaping via bwillsmore@unley.sa.gov.au or 8372 5111.

Yours sincerely

Peter Tsokas

a.ackland@cityofadelaide.com.au

16 July 2024

Mr Michael Sedgman
Chief Executive Officer
City of Adelaide
GPO Box 2252
ADELAIDE SA 5001

Dear Michael,

RE: Adelaide Park Lands Management Strategy - Towards 2036

The City of West Torrens acknowledges the key role that the Adelaide Park Lands play in providing unique spaces for events, cultural experiences, recreational activities, and connection to nature. On this basis the City of West Torrens welcomes the opportunity to collaborate with the City of Adelaide on projects arising from the Adelaide Park Lands Management Strategy (the Strategy).

The Adelaide Park Lands border a diverse range of activities and suburbs within the City of West Torrens which necessitates a range of different responses. From our perspective, areas requiring the most thought are the Bonython Park Lands Precinct and the West Park Lands Precinct. Given the potential for significant residential development along Port Road at Thebarton, the City of West Torrens is keen to collaborate with the City of Adelaide on matters concerning the Bonython Park/Tulya Wardli (Park 27) including recreational uses, playing surfaces and active transport.

An important role that the Park Lands provides is the control and management of stormwater flows for critical rainfall events through the strategically located earth mounding and levee structures. These works protect the downstream stormwater systems within the City of West Torrens and hence reduce the risk of flooding within the Council. The City of West Torrens requests that greater emphasis is placed on maintaining these works for all the Park Lands and that any stormwater quality improvements undertaken also includes the objective of treating stormwater directed to the Local Government drainage system discharging to the west.

A project of interest identified in the Strategy is the encouragement and facilitation of active transport with construction of new connections including a bridge to the South Australian Sports Institute. During discussions with Department for Infrastructure and Transport on various road projects the City of West Torrens has advocated for improvements to the Sir Donald Bradman Drive rail overpass to facilitate greater active transport usage and connect into the West Adelaide Bikeway. Council welcomes discussion and collaboration between all interested parties on achieving these outcomes.

The City of West Torrens deeply values the vibrant communities that operate within the City of Adelaide and seeks to foster our shared visions for growth and prosperity through sustainable partnerships, community initiatives, and investments that enrich the social fabric and economic vitality of our two cities.

Should you require any additional information or clarification, please do not hesitate to contact Shanti Ditter, General Manager Communities on 8416 6261 or SDitter@wtcc.sa.gov.au

Yours sincerely,

Alison Ackland
Kadaltilla / Adelaide Park Lands Authority Advisor
2nd Floor 25 Pirie Street
Adelaide, South Australia, 5000

Dear Alison,

Re: Feedback on Draft Adelaide Park Lands Management Strategy (APLMS) – Toward 2036

I am writing on behalf of the Walkerville Council to provide our feedback on the draft Adelaide Park Lands Management Strategy (APLMS) – Toward 2036. We appreciate the opportunity to review and contribute to this pivotal document. Below, we offer our input on key areas: places and spaces, connections and networks, and natural systems, cultural landscapes, and climate resilience.

1. Places and Spaces:

Walkerville Council acknowledges and supports the strategy's focus on enhancing the quality and functionality of the Park Lands. The emphasis on creating diverse and accessible places is commendable. However, we recommend a more detailed exploration of how these spaces will serve the needs of both local communities and visitors. Specifically, it would be beneficial to include targeted plans for integrating new recreational and community spaces that cater to a wide range of activities and age groups. We suggest incorporating flexible use areas that can adapt to changing community needs over time.

2. Connections and Networks (Cycling and Pedestrians):

Improving connectivity through cycling and pedestrian networks is crucial for enhancing access to the Park Lands and promoting active transport. We strongly support the strategy's goals in this area but propose a more detailed action plan for achieving these objectives. This could include:

- **Comprehensive Mapping:** Develop a detailed map that identifies existing and proposed cycling and walking routes, with a focus on connecting key destinations within the Park Lands to surrounding neighbourhoods, including Walkerville.
- **Infrastructure Improvements:** Outline specific infrastructure enhancements, such as dedicated bike lanes, pedestrian crossings, and wayfinding signage, to improve safety and convenience.
- **Integration with Local Networks:** Ensure that the Park Lands network is well-integrated with local cycling and pedestrian routes. Collaboration with neighbouring councils, including Walkerville, will be essential to create a seamless and comprehensive active transport network.

3. Natural Systems, Cultural Landscapes, and Climate Resilience:

We commend the strategy's attention to natural systems and cultural landscapes. Walkerville Council is particularly interested in how the strategy addresses climate resilience and the preservation of natural and cultural assets. We offer the following recommendations:

- **Natural Systems:** Enhance the strategy by incorporating specific measures to protect and restore natural habitats and biodiversity within the Park Lands. This could involve targeted conservation projects, partnerships with environmental organisations, and monitoring programmes to track ecosystem health.
- **Cultural Landscapes:** Provide more detail on how cultural landscapes will be preserved and promoted. This might include initiatives to highlight and maintain significant cultural sites and involve local heritage groups in planning and management efforts.
- **Climate Resilience:** Develop a comprehensive climate resilience plan that addresses potential impacts such as extreme weather events and temperature changes. This should include strategies for managing water resources, increasing green cover, and incorporating sustainable practices in park management.

In conclusion, Walkerville Council supports the overarching goals of the draft Adelaide Park Lands Management Strategy – Toward 2036 and is enthusiastic about collaborating on its development. We believe that addressing these key areas will greatly enhance the strategy's effectiveness and ensure that the Park Lands remain a vibrant and sustainable asset for all.

Thank you for considering our feedback. We look forward to further discussions and are available to provide additional input as needed.

Yours sincerely

Subject: Content Manager (CM) - RE: Correspondence from the Department of Climate Change, Energy, the Environment and Water [SEC=OFFICIAL]

Hi Alison,

Thank you very much for giving us the chance to review the draft Adelaide Park Lands Management Strategy (APLMS). Apologies again for sending this through late. We have the following comments on the World and National Heritage content within the APLMS:

- On page 44 - the APLMS notes the intention to reinstate heritage planting avenues but does not say where specifically. The planted avenues are important to the values but it is important to note that reinstating heritage planting avenues in some areas cannot be used to offset cumulative or significant impacts on other areas of the Adelaide Park Lands.
- On page 51 regarding World Heritage - there is a lack of clarity around the fact that it is the responsibility of the Australian Government, as the State Party, to submit the nomination dossier to the World Heritage Centre. This section should mention the role of the Australian Government and State Government in working together to finalise and submit the nomination dossier.
- On page 51 under the National Heritage subheading – it would be beneficial to list what the National Heritage values are for Adelaide Park Lands and City Layout.
- On page 51 the APLMS lists what it calls ‘National Heritage conservation principles’. We have a recommendation on one of the principles:
 - ‘Promote and allow ongoing use, change, development and maintenance of the Park Lands and City Squares whilst retaining their cultural heritage significance.’
- This does not foreground the National Heritage values so should not be referred to as a ‘National Heritage Conservation Principle’.
- Recommend removal or it should be rephrased to read ‘Ensure the Park Lands and City Squares retain their cultural heritage significance when considering the ongoing use, change, development and maintenance of the place’
 - A point could be added to these principles about seeking best practice National Heritage advice from the Australian Government Department of Climate Change, Energy, the Environment and Water
- On page 51 the World Heritage subheading is ‘World Heritage’ but on page 52 is ‘UNESCO World Heritage Bid’. Recommend keeping these consistent as they refer to the same thing.
- On page 140 – recommend reference to the new Adelaide Park Lands and City Layout Heritage Management Plan and provide a discussion on how this interacts with the other plans of management.

- Each precinct section of the APLMS lists a set of specific considerations and states that these should be considered alongside the Park Lands wide considerations. It would be helpful if the National Heritage values were clearly identified as a Park Lands wide consideration.

Happy to answer any questions if any of the above information is unclear.

Thanks again for the opportunity to comment on the document and we look forward to further updates as the Strategy is finalised.

Dear Ms Ackland

Thank you for the opportunity to provide feedback on the draft *Adelaide Park Lands Management Strategy – Towards 2036* (the draft Strategy), which outlines the strategies, projects and planning considerations that will be used to guide decisions relating to the Adelaide Park Lands.

Green Adelaide is broadly supportive of the draft Strategy and commends the Adelaide Park Lands Authority for developing such a comprehensive document. It is understood that the Strategy has been updated in accordance with the *Adelaide Park Lands Act 2005* which requires a comprehensive review of the Strategy at least once every 5 years.

The draft Strategy aligns well with Green Adelaide's aims of greening and cooling our neighbourhoods, enhancing biodiversity, and creating healthy green spaces for everyone. Further, it aligns well with Green Adelaide's 7 legislated priorities, in particular, Green Streets and Flourishing Parklands and Fauna, Flora and Ecosystem Health in the Urban Environment.

The following general comments and suggestions are provided for your consideration:

- The three goals outlined in the draft Strategy that guide the Adelaide Park Lands strategies and priorities are supported.
- The draft Strategy's aim to promote the cultural values of the Adelaide Park Lands and respect Kurna culture, heritage and wellbeing are supported.
- It is noted that the draft Strategy suitably supports matters that Green Adelaide has a strong interest in, including biodiversity, restoration of the River Torrens and its tributaries, management of wetlands, sustainable water supply, and biodiversity-sensitive and water-sensitive urban design.
- It is suggested that the draft Strategy may make mention of Adelaide being an internationally recognised National Park City. As you may be aware, the National Park City movement is a global movement to create cities worldwide where people and nature are healthier and better connected. Adelaide was recognised as Australia's first National Park City in December 2021. The Adelaide Park Lands play an important role in this status by providing unique spaces for people to connect with nature and each other. Green Adelaide would be pleased to provide further detail and/or specific wording on this matter, if helpful.

Green Adelaide looks forward to its continued collaborative efforts with the Adelaide Park Lands Authority and wishes the Authority all the best on finalising the Strategy. For further information please contact Alison Collins, Team Leader Planning at alison.collins@sa.gov.au.

Yours sincerely

A handwritten signature in blue ink that reads "Louisa".

Subject: Feedback Park Lands Development

Dear Kadaltilla Team,

I appreciate your reach out for feedback. I would like to share the following suggestions:

1. Bridge next to Beaumont Road: When crossing the bridge as a bike-rider, even at moderate speeds, it is not possible to see the upcoming traffic from the opposite direction. The issue is the strong bend of the path right north of the bridge.

2. On several occasions, bike paths that connect parts of the parklands are intersected by major roads, these should have keep-clear zones for the bike paths. An example the gets packed up during morning

commutes is shown below:

3. A general problem when accessing the parklands without a motorized vehicle is that traffic lights require manual activation, this leads to a huge timeloss and reduces the accessibility of the parklands. Pedestrian traffic lights should be activated always on default, at least during the day, e.g. 6am-10pm. One example is entering the parklands from the SouthEast.

Please let me know if there are any questions on my feedback. I am reachable under 0493677508

Best regards,
Hannes Kiriam, resident of Glenside
0493 677508

Adelaide Park Lands Management Strategy Towards 2036

Thank you for the comprehensive, impressive, and useful report to help understand the proposed management strategy for the Park Lands. I will make some general comments that apply to the Park Lands generally and some specific comments about the Park Lands nearest to where I live.

General comments

Broad Based Long-term thinking and strategies

The Park Lands Management Strategy recognises that climate change will bring significant change to the whole city not just the Park Lands.

The Council is responsible for integrating all aspects of city living and hence planning within silos is limiting. The challenge is to capitalise on the broad-based opportunities that are available for adapting to climate change.

Water efficiency

For example the planned new big build developments are an opportunity for improving water supply to the Squares and Park Lands. Developers need to ensure the buildings' grey water is siphoned off to water nearby city Squares and/or Park Lands.

Current buildings in suitable locations may be adapted to help supply this network of watering the commons.

The living nature of the Park Lands

There are numerous groups and individuals who complement what CoA staff do to maintain and improve the Park Lands. This is an area where more can be done, and CoA's challenge is to make it easy for groups and individuals to do so.

In the Strategy very little attention is focused on the potential in our daily life for using bush tucker, community gardens, orchards such as olives from earliest Park Land days through to the more recent planting of fruit trees in Bunday's Paddock.

The Park Lands also provide mulch, kindling such as twigs and acorns, habitat for a variety of animals and birds. Whilst biodiversity is mentioned it is more of a passing reference to saving some of what is left rather than doing better.

Drawing on traditional Aboriginal knowledge needs to be more than the one cultural burn off we had a few years ago.

Council will need to clarify policies as to how we as a community share the produce of the Park Lands, not just among people but also with other animals and birds. And once clarified, ensure policies are implemented and maintained.

For example I strongly feel community gardens as well as sporting fields should be open and accessible to all. However the Park Tce Community Garden has been locked for years and fencing of a sporting field in the western Parklands has been allowed.

Generally 'activation' of the Park Lands need not focus on sport and big events. Activation could include a combination of socialising while helping care for the Park Lands eg citizen science projects, teams of residents and city workers to regularly remove rubbish in a specific park, more Bush Care groups, more community gardening, or recording in a diversity of ways the changes occurring in the Park Lands. Increase knowledge of the Park Lands through complementing APA walks with regular Bush Tucker walks led by Aboriginal guides.

Entries and pathways

There is a marked enthusiasm to continue to put in what look and feel like tar or concrete pathways. This is especially so around the perimeter of many parks and entry points to the Park Lands. The entries have wide curved paths to create a circular impression with concrete blocks as seating.

This infrastructure does not have a cooling impact on the Park Lands. For much of the year the 'seats' are too cold or too hot and lacking shade, to be comfortable to use. A big gum tree with a wooden seat around its base I think would make for a more appropriate entry to a park land.

The increasing number of pathways and the widening thereof to accommodate shared pathway use, between pedestrians and those on wheels, challenges safety.

While I think we should share whatever resources are available I frequently see near accidents when a cyclist enjoys zooming through the Park Lands and a pedestrian is meandering, enjoying nature, and slowing down to relax. I think this issue should be carefully considered in creating greater access to the Park Lands. Our city needs contrasting areas for enjoyment – not everything need be a fast transport corridor.

Active Transport Indicators

On the Precinct and Square maps in section C it is not clear to me if the purple stars are meant to indicate there is, or should be in the future, active transport on the streets next to the precincts and squares or on the Park Lands. Possibly it varies from one site to another. I am concerned that the trend I have seen of introducing pathways along the edges of the Park Lands is reducing the size of our Park Lands and their contribution to cooling the city.

What constitutes a HUB?

In some areas mention is made of creating a hub, or a medium hub and indicates it is to service sporting facilities and other times the public. For example would a hub, whatever its size, automatically include general access toilet facilities, seating, and shade?

On the Precinct Maps the toilets and seating is not indicated. I notice on the maps in the Park Lands it varies as to whether they are marked or not. Yet for many people this is important to know when wishing to enjoy a walk, run, picnic, sport or whatever.

Tree Canopy Cover

I have assumed that canopy cover means being able to stand or sit under the branches of a tree. Is that correct? Looking at the Precinct Snapshot information and maps I think I am incorrect.

Trees being planted are often small and narrow in structure. While they cast some narrow-angled shade when the sun is in the right position to do so, I do not think of them as providing canopy cover.

I understand that streets can often only incorporate small trees that do not give much shade or no trees, and hence the need to consider other shade options. In the Park Lands however I would hope that there will be many trees to either give shade because they have wide branches such as Moreton Bay Figs or Brazilian pepper tree or as a stand of trees, say pine trees, providing good shade under which you can linger getting away from the heat of the day.

I don't mean that there should only be shade trees but certainly areas that are focused on keeping the earth cool and hence people and other animals.

Precincts and Squares

Whitmore Square/Iparrityi

A little bit of history

In the 30 years I have lived in the SW quadrant the changes to the Square have focused on slowing down traffic while keeping it moving and widening existing paths and adding more paths within the Square.

The most common themes locals have suggested is to use zebra crossings rather than more traffic lights and to keep planting more trees and providing additional seating.

Locals in persisting to suggest zebra crossings rather than traffic lights thought that as well as slowing traffic, zebra crossings may discourage the through traffic along Morphett Street.

The greatest success for locals has been to request in between consultations, the installation of a half basketball court and table tennis.

There have not been community requests for more paths within the Square. A circular path around the outer edge was proposed by the last consultants. It was promoted as a running track. No-one runs on it, and very few push a pram or walk a dog around it.

I note this as some of the last plan's design are still to be implemented, yet the world has changed. We are now facing up to the difficult issues of climate change, the understanding that resources are finite and the increasing inequality between the resources people have for themselves and at a community level.

What could be

There is no need in my view to finish the outer edge pathway around the southern end of Whitmore Square as there are other options for enhancing the Square.

For example I have counted the number of trees in and around the Square and come to 230. So we have some way to go before we reach the 305 of the tree count given.

Within the Square the future consideration of creating outdoor rooms including tree planting, seating and shelter is worth bringing into the present. Include bush tucker and hardy herbs into the rooms and there will be additional reasons for people to come and enjoy being outside in a wide variety of weather.

Avoid

Don't spend more time and other resources on what is already there eg wide central north/south spine with many paths leading off it and a wide west/east path.

I hope that the W/E tram track suggested by State government to go through Whitmore Square, will not become a reality.

Some future considerations seem to be contradictory. I have my doubts that bitumen or equivalent will ever be reduced around and within the Square as it is also flagged that new paths and more of a hub is to be considered.

Entrances and hubs being installed in the Park Lands all look like concrete, curved wide paths with pathways running off them and concrete seats that are not inviting in hot or cold weather.

Build on success

In the late 1990's CoA worked with locals who were keen to establish street gardens in the SW. Many streets enjoy an improved amenity through the work of those living in the street. Several people took on the western side of Whitmore Square as their focus. They called themselves the Greening Group and worked with the support of Council staff to create a water efficient garden.

When circumstances changed, the style of garden changed – again a joint effort between locals and Council staff. Today that western side continues to give much pleasure to many people. Many conversations are engendered because of the shared enjoyment of the garden. The locals who do the gardening keep changing but when they leave, they ensure others take their place. Likewise with Council staff.

Why not extend that process around the Square? The style of garden does not need to be the same all around the Square. One suggestion made for the eastern side is to include Greek garden features as once there were many Greek people living in the SW corner of the city. So perhaps there could be some vine covered arches with seating underneath and some pots with fruit trees and herbs.

At present a mobile laundry van parks on the western side to provide a regular service to homeless people. Think how they may enjoy such a setting and may help with its upkeep.

Locals and CoA working together to green the Square is an all-round plus.

South-West Park Lands Precinct

A brief aside

It is such a big report that a few errors have escaped notice. Edwards Park p68 is not part of area outlined but is a Park that would benefit from remediation such as removal of tar and replanting.

The Conservatory referred to is the one built during the time of Town Clerk Veale at the back of Veale Gardens, officially opened in March 1964. It became derelict and was demolished in August 2016. The Bicentennial Conservatory p69 is in the Botanic Gardens.

Appreciating the variety

The three Park Lands being considered here are diverse in their nature and that is of benefit to current and future people. The challenge is not to lose the focus on nature.

I would like to see the Nurses Memorial Garden be sign posted with some history included as are Lundie and Veale. Knowing a bit about each garden does make for greater interest and a sense of knowing your Park Lands.

I would prioritise the remediation of numbers 11 and 19 p70 which are located just in from Greenhill Road. All along Greenhill Road there are opportunities for creating seating, some bins, and shady areas to relax. Not only workers would cross Greenhill Road to eat their lunch or go for a walk or take their dog for a walk.

In these Park Lands there are several dirt paths meandering through wooded and open areas. These are a pleasure to use as you feel much more as if you are in a natural environment. My hope is that these will stay as is and keep a greater sense of being out in nature and maintain variety in our Park Lands.

The community garden Walyu Yarta provides an interesting focus for gardeners, other groups who like to meet near them and passers-by. They are all curious as to what is growing, how they are organised and how come it works without being enclosed. The people working there change but friendships remain. As does knowledge gained from conversations on the many aspects growing and eating food.

Managing key biodiversity areas is important and I hope this focus will be increased. Learning from Aboriginal knowledge and experience may mean there will be cultural burns in the future and interest may be developed in Bush Tucker here and throughout the Park Lands.

Why assume sport and big events are the main ways to activate the Park Lands? With uncertain weather becoming the norm people may increasingly move away from outdoor sport and buying tickets to big events. Now is the time to prepare for shorter forays outside such as enabling individual or small group exercise, food gathering, growing, or harvesting food, or meeting friends. More and more people may want to help nurture nature as its importance to our well-being is realised.

There could be through CoA citizen science research projects, teams of residents and city workers who remove rubbish in a specific park on a regular basis with coffee afterwards, more Bush Care groups established or recording the changes occurring in the Park Lands using different technologies.

Our relationship with the Park Lands will continue to change as the climate changes.

Car parking

While goals have been set to reduce parking on the Park Lands for the south-west Park Lands the issue is more than managing the car parking for the Royal Adelaide Show.

Whenever there is some major event on at the Show Ground people park on Park 22. With the three-day Caravan show recently people made a beeline for parking as close to Greenhill Road as they could creating rows and rows of parking on the Park Land. They did not use the available allocated parking around the Netball courts.

Inappropriate parking is still a major issue here and throughout the Park Lands.

Resourcing

Time, materials, and funds are limited no matter the context of operations. I hope for the sustainability of the Park Lands that more resourcing is put into time and people, paid staff and enabling community members to be involved.

In Conclusion

It is wonderful to see improvements being made to the Park Lands such as the wetlands in the SE and the locals doing plantings in the eastern Park Lands. As a local I hope for ongoing improvements and believe that will happen when most people realise the importance of the Park Lands in keeping Adelaide a liveable city in the years ahead.

Marjon Martin inner city homeowner and resident since 1994

SUBMISSION

Re:

Draft Adelaide Park Lands Management Strategy Towards 2036

**The Corporation of the City of Adelaide
Kadaltilla, Adelaide Park Lands Authority**

Public consultation (170 pages) concludes 9 Aug 2024

Where in the wide world will you find a city better planned than Adelaide? Adelaide with its broad streets and with its quincunx of squares and its park lands 2,300 acres in extent—a grand inheritance of the citizens for all time.”

Sir Samuel Way (1836-1916), former Chief Justice of SA (1876-1916)

*The spatial arrangement of the outer ring of parklands surrounding the city forms a greenbelt that stands in contrast to the inner urban built form. This arrangement is a **defining aesthetic for Adelaide** – either when viewed from flying into Adelaide, from Mount Lofty, or when moving through the outer ring of parklands into the city centre.*

*Heritage Assessment – Adelaide Park Lands and City Squares
DASH Architects and Peter Bell, 17.5.2018*

The expansive Adelaide Park Lands are the city’s crowning glory.

Historical Context & Future Significance

Since its establishment as a Corporation in 1849, Adelaide City Council has played a major role in the care, control and management of the Park Lands. If not for this, the integrity of the Adelaide plan would very likely have been diminished and compromised through the growing needs of a capital city, like most other planned colonial cities across the world.

The Council and its staff have shaped its design and ultimately ensured its overall preservation. Since the 1850s Council has organised replanting programs, designed and improved structured and unstructured spaces for community enjoyment and supported various compatible uses. For these reasons, the Adelaide Park Lands, Squares and City Layout have a special historic and ongoing association with the Adelaide City Council.¹

1. The intergenerational responsibility of the Adelaide City Council (**ACC**) towards the Adelaide Park Lands (**APL; Park Lands**) transcends the temporal decisions of its administrative staff, elected members, and Kadaltilla-APLA. Custodianship requires a decision made in the passing moment of convenience to not diminish for future generations the future environmental and ecological value of the Adelaide Park Lands and its parks and squares.
2. The legislated principles applicable to a management strategy for the Park Lands are directed to contemporary and future free public access to a sustainable natural, ecological, and biodiverse landscape and uses consistent with that landscape and its cultural and heritage values.
 - **Protection** of the National Heritage values
 - The Park Lands to be **freely available** to the people
 - Protect and **enhance environmental**, cultural, recreational and social uses
 - Protect, enhance and interpret cultural heritage sites
 - **Enhance the biodiversity**, including **remnant vegetation** and biodiversity significance
 - Enhance the ecological health of watercourses
 - Manage landscapes and buildings sustainably.²

The North Adelaide Society Inc ³

3. The North Adelaide Society Inc. (**TNAS**) was established in 1970 and has 54 years of experience and advocacy about planning, park lands, and land use within or affecting the City of Adelaide. It is a community based association with a diverse membership (>200) and links with community associations to address issues such as planning, public spaces, park lands, and infrastructure that impact local communities.

¹ *Heritage Assessment – Adelaide Park Lands and City Squares*, DASH Architects and Peter Bell (2018), p51

² Cf. City Planning, Development and Business Affairs Committee, 3.10.2023, Attachment A; *Adelaide Park Lands Act 2005 (APL Act)*

³ The views expressed herein are not intended to reflect adversely on any person or entity concerned with, or in any way involved in, developing the draft document or material the subject of this submission. Nothing herein is intended to detract from the work and effort that has resulted in the draft. To avoid doubt, footnotes are included in this submission and TNAS reserves the right to clarify, amend, or correct any aspect of this submission.

4. TNAS advocates for:
 - 4.1 Conserving and enhancing the Adelaide Park Lands as ecologically verdant publicly accessible parklands of immeasurable historical, contemporary and future cultural and environmental value
 - 4.2 Intergenerational inheritance of the cultural, heritage and ecological value of verdant Park Lands
 - 4.3 Respecting and nurturing each park as parklands to collectively be worthy of state, national and world heritage recognition
 - 4.4 People, Park Lands, and liveability are the heart of the culture of the living city that evolves within the City of Adelaide and Greater Adelaide
 - 4.5 Adelaide as a humanistic⁴ capital city that is enhanced, identified and defined by natural Park Lands.

Adelaide Park Lands

5. The Adelaide Park Lands are internationally renowned; they are an iconic feature and world class as parklands. They are first and foremost parklands to be nurtured, used, and valued as publicly accessible parklands with cultural and historical significance. They make an immense and significant contribution to the natural heritage, environment, and ecology of the City of Adelaide. Their strategic management as a world-class public and culturally sensitive asset to be conserved as an urban vegetated park with a variety of subordinate recreational uses for the benefit and wellbeing of present and future generations, is unarguable and supported by landmark legislation (*Adelaide Park Lands Act 2005*).
6. The Kadaltilla Adelaide Park Lands Management Strategy 2015-25 (Jan. 2018) heralds: “*The Adelaide Park Lands will be a globally recognised park system which surrounds and permeates our city and is central to our identity*”, variously refers to the role the Park Lands play in showcasing world and national heritage values, and dedicates Strategy 5 to the Park Lands being “*valued as a National Heritage site worthy of World Heritage listing, and as a place of Kaurna cultural significance and to inspire visitors.*”
7. The Park Lands have markedly shrunk despite exemplary utterances that become consumed by political convenience.

Once described by Sir Samuel Way as 2,300 acres (930 ha), it is now 723 hectares of parklands and city squares; 116 hectares of institutions such as universities, hospitals and cemeteries; 22 hectares of rail infrastructure; and 69 hectares of roads and car parks.

Of the 723 hectares, 675 hectares are managed by the CoA (incl. River Torrens / Karrawirra Pari and six Squares) and the State Govt is responsible for the remaining 48.⁵

The generational inheritance to which Sir Samuel Way referred is squandered by intergenerational theft and puffery.⁶ State governments and political parties too

⁴ Gehl, *Cities for People* (2010)

⁵ Cf. APLCLMP; Oct 2023, Attachment B, Item 7.5 Adelaide Park Lands Community Land Management Plan, City Planning, Development and Business Affairs Committee, 3.10.2023

⁶ The following is an example from a CoA publication that arguably belies governmental reality (e.g. a closed circuit motor car racetrack).

readily retreat from the foresight policies of the 1970s and instead reassert the “*free land bank view of the park lands*”; legislate to demolish heritage buildings; and withdraw pre-election support legislation to list the Park Lands as state heritage.⁷

8. **TNAS supports** referencing and “*embedding Kaurna culture*” as laudable features of the draft APLMS.
9. However, it is disgraceful that built form, car parking, hard surfaces, and uses incompatible with protecting, enhancing and sustaining the natural environs of the park lands are featured in the draft APLMS, despite enhancing and sustaining the natural environment and cultural/heritage values being at the heart of the legislative principles.
10. It is the **general submission** of TNAS the draft APLMS should expressly state to the effect that:
 - 10.1 The land use of each park and precinct within the Adelaide Park Lands is as parklands, albeit that each park may include public activity or a community based purpose conducive to it being Park Lands. That is, as the Park Lands are sometimes described as the lungs or heart of the City of Adelaide, that can only be the case “towards 2036” and well beyond if the Park Lands continue as nature-based natural parklands.
 - 10.2 Vegetation in each park ought to be the subject of an audit and periodic ‘vegetation stocktakes’ (at least once in the review period of a management strategy).

Draft Management Strategy

11. The Corporation of the City of Adelaide (**Corporation**) is undertaking the review of the current APLMS 2015-2025 on behalf of Kadaltilla.
12. The Corporation adopted a new Adelaide Park Lands Community Management Plan (APLCLMP) in or about Oct. 2023, which is required to be consistent with the APLMS⁸ (s. 19(1), *Adelaide Park Lands Act 2005 (APL Act)*). The APLCLMP was eventually revised to be partly responsive to public consultation,⁹ albeit not as evolved, informative, detail, or useful as its predecessor.

“Designed in balance with nature, to nurture. The Adelaide Park Lands are the largest inner urban park system in Australia. Nationally Heritage listed for their unique design which cocoons the city and creates the world’s only ‘city in a Park’, they are the city’s lungs, backyard, playground, meeting space and more. A big backyard. Spanning over 760 hectares, the Adelaide Park Lands provide a space where residents and visitors alike can enjoy healthy and balanced living through sport and exercise, recreation, and relaxation. A total of 29 Parks and 6 city squares all with an array of different features, facilities and biodiverse ecosystems combine to form the people’s Park Lands.”

⁷ InDaily Opinion, 4.11.2022 *Public asset now a free land bank for government*, Chris Sumner, former Labor minister in the Corcoran, Bannon and Arnold State Governments.

<https://www.indaily.com.au/opinion/2022/11/04/are-the-park-lands-a-community-asset-or-free-land-bank-for-government>

⁸ *Adelaide Park Lands Management Strategy 2015-2025*, Jan. 2018 (Prepared by the Adelaide Park Lands Authority 2014-15; Adopted by the City of Adelaide December 2016; Adopted by the Minister for Adelaide August 2017)

⁹ CPDBA Cttee 3 Oct 2023, Agenda Item 7.5

13. Oddly, the new APLCLMP predates the draft APLMS notwithstanding the following:

What is the difference between the APLMS and the Community Land Management Plan (CLMP)? The Adelaide Park Lands Management Strategy (APLMS) is an aspirational document which identifies what Kadaltilla / Adelaide Park Lands Authority, Council and the State Government are trying to achieve at a strategic level. The Community Land Management Plan (CLMP) identifies how the land will be used and managed. These two documents must work together such that the CLMP must be consistent with the APLMS.¹⁰

14. The issues and concerns raised during community consultation for the new APLCLMP are relevant to the APLMS.

Part 2 - Community Consultation

Feedback from the community provided a strong response that the Park Lands should be protected and enhanced for the benefit of the communities that it serves and that the Draft CLMP does not provide adequate protection against future or proposed major developments (noting development is assessed against the South Australia Government's state-wide Planning and Design Code). The community responses indicate a strong desire for the Park Lands to be publicly accessible, with less build form and development and more open spaces focused on the natural environment and biodiversity. Feedback outlined that the commercialisation, privatisation and major developments should be minimised or stopped all together in the Park Lands. Strong community feedback against development of the Park Lands by the State Government was received, including the New Aquatic Centre in Park 2 and the New Women's and Children's Hospital in Park 27. Concern was raised that the Council has changed its approach to the Draft CLMP with less detailed content – as previous versions of the CLMP contained information beyond the requirements of the LG Act and APL Act. Concern was raised that the removal of this detail will compromise the protection of the Park Lands. Community responses included concern about policy ambiguity and sought better clarity of policy in the CLMP.

*Some feedback provided on the Draft CLMP included aspirations for the enhancement of the Park Lands, **whilst this feedback is helpful for the future planning of the Park Lands, these aspirations are more closely aligned to Adelaide Park Lands Management Strategy (APLMS) which sets future aspirational targets and objectives for the Park Lands.** The APLMS is currently under review, with consultation on this document to occur in 2023.*

Key Points from Responses

The Draft CLMP does not provide the same level of information on protection for the Park Lands from major development as previous versions. The Draft CLMP introduces increased ambiguity which does not support the protection of the Park Lands. The objectives and purpose in which the Park Lands are held should reflect the environmental and open space nature of the Park Lands and the reinstatement of land as Park Lands rather than being built on.

Key Feedback Themes

Three predominant themes ... identified through ... feedback, including:

Valuable community and environmental asset

The Park Lands provide valuable open space and environmental landscapes to the city, community and adjoining council areas and should be preserved from major developments.

Enhancement and protection of environmental landscapes

The community want the Park Lands enhanced with green space and biodiversity that is protected from development, commercialisation and privatisation.

Protection of cultural and heritage values

State Agencies and Local Government outlined the need for greater identification and protection of culturally and historically significant landscapes and built form.

¹⁰ <https://www.cityofadelaide.com.au/community/get-involved/consultation-aplms-towards-2036/>

*The three themes highlight the importance and value of community land and specifically the Park Lands to the city, communities and South Australia. The **themes will help Council in its ongoing management of the Park Lands and contribute to future strategic planning to ensure that the Park Lands are enhanced and protected for future generations.***¹¹ (emphasis added)

15. **TNAS Submits**

- 15.1 That the matters of community concern identified during consultation for the Corporation's APLCLMP ought to be reflected in the APLMS.
- 15.2 That the "*three predominant themes*" ought to be included as objectives / outcomes for the draft management strategy for the Park Lands:
 - a) The Park Lands will provide valuable open space and environmental landscapes to the city, community and adjoining council areas and should be preserved from major developments.
 - b) The Park Lands will be enhanced with green space and biodiversity that is protected from development, commercialisation and privatisation.
 - c) Culturally and historically significant landscapes and built form will be identified and protected.

Terminology¹²

16. Words, phrases and expressions that are of indefinite or uncertain meaning will be open to conjecture, misapprehension, or subjective interpretation. The draft uses many words that presumably are intended to have a particular meaning or purpose, which nonetheless is not clear. For example, what is meant by: accessible, activate/activation, activity, open space, active transport, urban address, city, partner/s, legible places, stimulating experiences?
17. The draft APLMS usefully includes "*Adelaide Park Lands Definitions*" for:
 - Adelaide Park Lands
 - Park Land Purposes
 - Non-Park Land Purposes
 - Net loss – Publicly Accessible Adelaide Park Lands (Alienation)
 - Permanent Net loss of Adelaide Park Lands
 - Return to Publicly Accessible Adelaide Park Lands
 - Building Footprint
 - Hardstand.
18. The inclusion of definitions and explanations will assist understanding and certainty of intent and reduce the risk of misapprehension or yet further diminution of the Adelaide Park Lands.
 - 18.1 For example: "Park Land Purposes" and "Non-Park Land Purposes"
 - a) The use of "*publicly accessible open space*" is not instructive. An open lot car park, a concrete apron, and a multi-lane road all fit that description.

¹¹ Pages 9-10, Consultation Summary Report, Attachment A of Agenda Item 7.5, City Planning, Development and Business Affairs Committee, 3 October 2023

¹² Glossary In this submission, unless the context suggests otherwise, "City of Adelaide" and "CoA" means the area of local government known as the City of Adelaide; "Park Lands" means the Adelaide Park Lands (APL); "parkland" means land use as natural park or vegetated open space, often referred to as 'green space' that is freely accessible by the public; "Corporation" means The Corporation of the City of Adelaide (i.e., the administrative function of the elected Adelaide City Council); "Kadaltilla" and "APLA" refer to the "Kadaltilla, Adelaide Park Lands Authority"; "APLCLMP" means the Adelaide Park Lands Community Land Management Plan; "draft APLAMS" and "draft" mean the "Draft Adelaide Park Lands Management Strategy, Towards 2036".

- b) The APL Act refers to “special status, attributes and character of the Adelaide Park Lands; to provide for the protection of those park lands and for their management as a world-class asset to be preserved as an urban park”. The use of “park lands” and “urban park” is indicative of something more than open space.
- c) What is “open space”? In the context of parklands, the type of *open space* land use is critically important. Open space cannot include a closed space or a space on which there is built form. Open space that is not freely publicly accessible is a space and can be spatially identified, but is not open to the public, for example a rail or a racetrack.
 In the context of the public Adelaide Park Lands, open space ought to mean an area of natural environment; ecological setting; verdant, vegetated, grassed, or treed landscape; parkland; or hardstand, which is freely accessible to the public and excludes an area of land on which there is built form. In contemporary terms that could more helpfully be expressed as ‘green’ or hardstand open space or a space on which there is no built form or from which the public access is not excluded.¹³
- d) The use of “*limited*” is not qualified or quantified in any respect and thus becomes ‘limitless’. It ought to be clarified as to time, accessibility, use, purpose, or authorisation.
- e) Why is “*benefit*” to be limited to the people of South Australia? Seeking world heritage listing connotes a benefit well beyond this State. The APL Act refers to “*management as a world-class asset to be preserved as an urban park for the benefit of present and future generations*”. While state legislation may refer to the people of South Australia, in the historical context of the Park Lands, and having regard to the benefit of present and future generations, the inference must – or ought – to go beyond the people of South Australia to include visitors.
- f) What does “generally available” mean and how is that to be assessed?
- g) There is purpose in differentiating Park Land Purposes and Non-Park Land Purposes but having both is confusing. If Park Land Purposes is sufficiently defined, then everything that is not within that definition is a non-park land purpose. Alternatively, if Non-Park Land Purposes is sufficiently defined, then everything that is not within that definition is a park land purpose.
- h) There is purpose in defining or explaining what is meant by net loss alienation from Park Lands, the more so when an area ceases to be freely publicly accessible open space parklands. That generally occurs consequent on a built form footprint or secure fencing that seeks to exclude public access. “*Net loss ... (Alienation)*” occurs when the loss of area is not “permanent” (i.e., does not result in a technical boundary change formally recorded on the applicable registered plan) and the area was not already for a “Non-Park Lands Purpose”; the latter may not necessarily be easily characterised.
 What is more easily capable of being ascertained is an area of built form footprint, and an area of fencing that seeks to exclude public access without payment of an entry fee or on pain of penalty. An example of that would be the motor car race, which would be a temporary albeit periodic alienation.

¹³ The draft has a comparison of “Metropolitan Open Space System” (draft p 142-43) that states “760 Open Space (Hectares)”, for which no source is provided. A webpage of the Corporation states “Covering over 760 hectares” but does not describe that as “open space”.

- 18.2 Use of “activate” and “activation” suggest a current absence of activity or that current land use non-existent or to be disparaged. To put it differently, the use of those expressions presumes that the Park Lands primarily have value if they are used by reference to number of activities and visitor numbers.
- a) Respectfully, it is unintelligible to speak of “*activate/ing our/the Park Lands*”. It is a fact that the Park Lands as parklands are constantly in use and provide a human benefit every hour of every day and night (24/7). They are continuously used passively, actively, ecologically, bio diversely, and usually reverently. They are dear to the daily hearts and minds of Adelaideans and are always being promoted as an asset and distinguishing feature of the City of Adelaide and greater metropolitan Adelaide.
 - b) Everyday tens of thousands of people move through or around the Park Lands while travelling to, from or around the City Centre, and thus experience the natural vista and landscape of the Park Lands that would not otherwise be available. If those expressions are intended to refer to areas fenced off or dilapidated, it would be useful to speak in terms of park land rehabilitation or making it publicly accessible.
 - c) The use of “*activate*” and “*activation*” is disparaging and says nothing of the activity that is sought to be achieved in place of whatever use or activity currently occurs. One suspects an underlying theme of commercialising or revenue raising. In any event, those expressions are meaningless puffery that has entered the political and bureaucratic lexicon without utility. They ought to be expunged and replaced with meaningful language and transparent intent.
19. **TNAS Submits** that further consideration be given to the “Adelaide Park Lands Definitions” and inclusion of a glossary of terminology to provide certainty of meaning, ease of interpretation, and assist understanding and intent.

Maps and Graphics

20. Maps/graphics ought not to be misleading in their colouring or presentation.
- For example, the graphic map at page 4 of the draft shows the whole of the area outside of the urban areas as coloured ‘green’ with an adjacent reference to “Adelaide Park Lands”. If that is intended to represent what was once Park Lands, it ought to state that. If intended to represent what is now technically freely publicly accessible public Park Lands, then much of what is shaded ‘green’ does not meet that intent; significant areas no longer meet that criterion, and much is built form or hard surfaces.
- Maps/graphics should not be capable of being characterised as ‘greenwashing’ and often include authorship.
21. Maps ought to be dated and factually represent what is ‘green’ (i.e., of natural form) and freely publicly accessible as parklands within the area delineated as “*Park Land*” and what is not. To do otherwise is to put form over substance.
- The graphic at page 17 of the draft creditably shows ‘existing uses’ structures.
22. Where a built form, car park or sufficiently large area of hardstand is located on a park or in a precinct, the map/graphic should include at least the extent of its footprint and area, which should be depicted or scaled on the applicable map/graphic.
23. Similarly in relation to a Precinct in which major or parkland impacting events are held for a substantial period (say, 4 weeks or more). If free public access is excluded or impeded, that ought to be reflected in the map/graphic/explanation as an existing, foreshadowed, or time limited activity.

24. Use of aerial photographs (source & dated), even if overlaid by a graphic (source & dated), provide a temporal record. That is managerially important when dealing with a strategy concerning an intergenerational public asset such as the Adelaide Park Lands.
25. **TNAS Submits** that:
 - 25.1 Maps and graphics should expressly state what is intended to be depicted and accurately reflect that intent; accurately reflect the area of built form, car parking, hardstand and event areas;¹⁴ and preferably over/underlay the most recently available aerial photograph or electronic depiction of the applicable area; and include their source and date/year
 - 25.2 The APLMS should include an appendix of maps that show the map/graphic/pictorial timeline history of movement in boundaries, and of predominant land uses, of the parks or areas of and within the Adelaide Park Lands.

Past management

26. Transparency about the facts of past management is instructive for future strategic management.
27. **TNAS Submits** that an effective management strategy for a public asset like the Park Lands should include in an appendix a short history of decisions made by state or local governments that have altered the characterization or use of land within the historically delineated Adelaide Park Lands.

Guiding principles and pillars

28. **TNAS Submits** that the “*guiding principles*” and “*pillars*” are largely laudable but ought expressly to include enhancing the fundamental natural and ecological features and landscapes of the Adelaide Park Lands.

Goals

29. Fundamentally, the draft APLMS¹⁵ does not differentiate what is sought to be strategic management outcomes for the Park Lands by 2036; how that is presently envisaged to be achieved; and the practical management of existing uses in the interim. To not address those issues puts at immediate risk the “*grand inheritance of the citizens for all time*” of the “*jewel in Adelaide’s crown*”¹⁶ and the “*city’s crowning glory*”.¹⁷
30. Three “goals” are identified: “1. places and spaces”, “2. connections and networks”, “3. natural systems, cultural landscapes and climate resilience”.
31. **TNAS Submits** that these are worthy topics but only “Goal 3” is closest to being an objective, ambition or aspiration. However, it is spatially directed to “places that thrive” (whatever that means). It should instead be aspirational, for example to increase the extent of tree canopy, biodiversity, vegetation and understorey,

¹⁴ See above at paras 22, 23

¹⁵ S.18 *Adelaide Park Lands Act 2005*

¹⁶ Minister Nick Champion, Minister for Planning, InDaily, 20.09.2023

¹⁷ For a management strategy for the iconic Adelaide Park Lands that permits and says so little to readdress the extent of car-centric parking, the repeated use of “drivers of change” is perversely ironic turning parklands into car park land.. That is the more so in the absence of clarity about the desired future outcome for Park Lands Precincts sought to be achieved in the years “towards 2036”.

- and reduce built form and hardstand footprints, extent of car parking, periods of public inaccessibility. That might then encompass a strategy to, for example, shift by 2030 motor car racing to the purpose built facility at The Bend or elsewhere.
32. Interestingly “goal” does not appear in the current APLMS. The current APLMS expresses its aims as “objectives” and “outcomes”, which are then underpinned by “strategies”.
 33. The legislative description of “*identify goals, set priorities and identify strategies*” (s. 18(3)(c) APL Act) does not require replication of that terminology in a draft APLMS. To the extent that does occur, nonetheless, the “goal” identified ought then to be an objective, ambition, aspiration or outcome.
 34. The question of “goal” is a question of what is sought to be achieved. The Park Lands already has “places and spaces”, “connections and networks”, and “natural systems, cultural landscapes” but perhaps not yet “climate resilience”.
 35. What does TNAS seek from the Park Lands by 2036? First and foremost, that they be iconic natural landscape parklands with which current and future generations can engage individually, socially and collectively.
 36. **TNAS Submits** that the goals, objectives or outcomes for the Adelaide Park Lands should include:
 - 36.1 The Park Lands will be enhanced with natural verdant tree and ecologically diverse landscape and increased tree canopy, understorey and biodiversity; climate resilient flora and local fauna; and rehabilitate areas to a natural or parkland landscape
 - 36.2 The Park Land will be freely publicly accessible year-round with event, sports, social and cultural spaces, walkways and trails conducive to a parkland environment; and enable people to sit, walk, run, cycle, exercise, play, converse, enjoy, socialise, experience, and participate culturally and safely
 - 36.3 The Park Lands will be recognised for their state and world heritage, cultural, and natural values and features; and will be enhanced by the progressive reduction of above ground built-form footprints, hardstand, carparking, and removal or reduction of state government structures and operations.

Strategies

37. **TNAS Submits** that:
 - 37.1 Too many of the strategies are overly reliant on creating various sorts of built form rather than enhancing natural forms, flora, biodiversity, and low impact parkland experiences.
 - 37.2 The notion of “medium” and “large” “hubs” on the Park Lands is objectionable. It is wholly inconsistent with the principles applicable to management of the Park Lands. They connote scale and permanence better suited to commercial zoned land or precincts and infer revenue raising.
 - 37.3 The meaningless and undefined expressions of *activate* and *activation* should be expunged from the draft APLMS.
 - 37.4 The suggestion of 5m wide “*promenades*” anywhere in the Park Lands without rationale and specification for location is, respectfully, disingenuous and destructive.

Promenades at large connote creating yet more super-expressways where none is required or sought. It is one thing to create such a path on the edge of the Torrens Lake (Torrens/Karrawirra Pari) adjacent to the area of the Festival Centre in the Riverbank Precinct, it is quite another to do so in any other area

or location in which such a 5m “*promenade*” is simply yet another hardstand surface: in effect an unnecessary roadway¹⁸ in a parkland.

- 37.5 Design quality says nothing of the natural environment and ecology, nor about minimising and reducing built form and hardstand footprints. “Good design principles” ought not to be a basis or a form of subterfuge for enabling yet more built form and handstand surfaces, as opposed to having a strategy for exemplary ecological and landscape design.
- 37.6 The strategies should include natural form non-black heat sink bitumen path/walkways.
- 37.7 The suggestion of “design of access roads and car parking should complement their Adelaide Park Lands setting, using permeable surfaces rather than black asphalt and avoiding traditional kerbing” is supported (albeit in conjunction with a strategy of progressively reducing car parking) and ought to extend to path/walkways.
- 37.8 Strategies directed to “*create[ing] places and attractions that set the Adelaide Park Lands apart*”; “*provid[ing] permanent and temporary infrastructure to attract and service world class events in the Park Lands*”; and “*strengthen[ing] the role of the Adelaide Park Lands as a regional destination for competitive sport and a variety of active and passive forms of recreation*” ought not be generalised but be conditional on location, impact and appropriateness within the proposed Park Lands context. In general strengthening and enhancing the Park Lands vis a vis State and World Heritage values and listing is critically important and would set the Park Lands apart, and whether a “world class event” or having a “regional destination” is conducive to that or to any part of the Park Lands will very much depend on the specific area contemplated.
- 37.9 Any transitional notion as between a Park Land edge and an urban land use should not be within the Park Lands, but rather in the area adjacent that is not Park Lands. That is, no strategy should entail a reduction of parkland land use from the Park Lands nor entail any increase of hardstand surfaces within the Park Lands. That should equally apply to “edge paths”, an horrendous example of which is along LeFevre Terrace and Whitmore Square, both of which have significantly reduced what is colloquially referred to as ‘green space’ in the sense of space on which planting could or would otherwise occur. Similarly, it is somewhat perverse that the area of hardstand surface is increased by widening heat sink black bitumen and wide concrete paths.
- 37.10 The strategies should include existing (and any future) Park Lands community and ‘not for profit’ based facilities should progressively be required to be on a ‘non-exclusive’ and ‘shared use’ basis.
- 37.11 The strategies should include that where for any reason a tree is approved to be removed from within the Park Lands, the entity (including governmental) seeking the removal will bear the removal and associated cost of the tree payable to e.g., Kadaltilla, calculated in accordance with the methodology in “*Tree Valuations in the City of Melbourne*”.¹⁹

¹⁸ A standard Australian road lane of 3.5m.

¹⁹ <https://www.melbourne.vic.gov.au/tree-policy> & <https://mvga-prod-files.s3.ap-southeast-4.amazonaws.com/public/2024-04/Tree-valuations.DOC>

Priorities

38. The disconnect between goals, strategies and priorities is most evident in the expression of priorities, which are not indicated as against a strategy nor given any timeline or relative priorities. Many are reliant on built form activity and “master planning” (i.e., undertake, prepare, or deliver the master plan). Many do not specify a rationale for inclusion as a priority. TNAS is not able to assess as between stated priorities.
39. TNAS lacks confidence, but remains ever hopeful, in the Corporation’s assessment of priority and consultation processes²⁰ most recently reinforced by its experience with Wellington Square (Kudnartu).²¹
40. Master plans of city squares feature within the priorities “towards 2035”. No rationale is indicated. Other than Light Square, most appear to have had considerable past plans and effective work done, and ostensibly appear in good order for the foreseeable decade.
41. **TNAS Submits** that having regard to its varied experiences of the Corporation’s consultation processes and assessment of priorities, and absent transparency of rationale and timing, it remains hesitant about the present consultation and assessment of what are to be the priorities for “Master Planning”, save to say the priorities seems excessively focussed on squares and master plans.²²
42. **TNAS Submits** that the priorities should have indicative timelines and should include:
 - 42.1 Progressive removal of black-heat-sink bitumen and immediate use and replacement with light coloured or other appropriate surface, including solar illuminated; and progressively increase the use of movement activated intensified lighting, and path-level LED type lighting (light the path, not the sky).
 - 42.2 Cultural and interpretive work and artwork (temporary & longer-term) conducive to a parkland setting. There should be an objective of a specified percentage of Park Lands capital works being for artworks and creative innovations.
 - 42.3 Many of the Squares have been the subject of improvement and master (or sub-master) planning and ought not become crammed full of other than ‘green’ verdant open space and safe pathways (not “*promenades*”).
 - 42.4 Achieving State Heritage listing by 2026 and World Heritage listing by 2030.

²⁰ For example, re land holding on O’Connell Street; and the statutory representation review processes of a previous corporation and council.

²¹ Ring fencing closure of all of Wellington Square (Park Lands) without prior reasonable notice, reduced after representations to allow partial use. Significant infrastructure works without prior consultation or substantive information; and expenditure on a well-cared for public asset in good condition. The Agenda for the City Planning, Development and Business Affairs Committee, 4 June 2024 for Item 7.3 Draft Adelaide Park Lands Management Strategy (APLMS) – Towards 2036, included: “*Council’s draft 2024/25 Annual Business Plan and Budget includes funding for a range of strategic priorities identified in the APLMS including: \$500,000 for lighting and footpaths renewals in Wellington Square / Kudnartu.*” That was replicated in Item 7.2 on 6 Aug 2024 dealing with the same topic: “*Implementation of the City of Adelaide strategic priorities identified within the draft APLMS are funded through the 2024/25 Annual Business Plan and Budget. Strategic priorities identified in the APLMS including: \$500,000 for lighting and footpaths renewals in Wellington Square / Kudnartu. ...*”.

²² TNAS has useful interactions with many Corporation staff. The community view that the Corporation will too often do what it wants, how it wants and when it wants is not suggested to apply generally to TNAS interactions with individuals within the Corporation.

Precinct Plans

43. Part C “implementation” includes “Precinct Plans”.²³ A precinct may have more than one park and address their interconnection. Each precinct plan includes a largely factual or informational “*snapshot*” and “*context*”; subjectively opines about “*drivers for change*”²⁴; and lists numbered “*considerations*”. Each has a diagrammatic representation that is less representative than the diagram at page 17 of the draft and much less informative than a real representation of the precinct and its parks. There is considerable diversity amongst the parks and precincts, similarly about what is contemplated for each precinct.²⁵
44. There is no indication about the current and desired future strategic parkland character of each park and precinct. There is no rationale for whatever change is proposed “*towards 2036*”, nor how the indicated numbered “*considerations*” relate to that intended character or relates to what was “heard” from the community forum during consultation.²⁶
45. **TNAS Submits** that:
- 45.1 In the context of a “*management strategy*”, each Precinct Plan ought:
- To be transparent and explicit about its past, current and future proposed desired future strategic parkland character of each park, of the precinct; and indicate the rationale for whatever change is proposed “*towards 2036*”.
 - Include formal and informal listing of, and conservation and informing about, cultural heritage and points of interest (including about flora and fauna) throughout the precincts and pathways is supported, subject to respectfulness and appropriateness in the context of parklands.
 - Not include proposals for increasing road access or on-park carparking, rather those should be progressively reduced and opportunities for ecological sustainability, ambulant connections, and permeable surfaces should be supported. Similarly, the management strategy should not include proposals for a “*medium/large hub*” or to “*upgrade and enhance community buildings*”, as opposed to instead including a preceding assessment or investigation process.
- 45.2 North Park Lands Precinct (Parks 2-8)
- Has suffered grievous loss of “significant and regulated” trees, loss of parklands to on-park carparking; and a decrease in freely accessible parklands, none of which was contemplated in previous management strategies.
 - Is not in need of an “increase [in] activation of the Precinct by ... creating new attractions”, as opined in the draft, which also speculates about a “potential ... light rail connection” in circumstances where this precinct is already well served by frequent public transport. It is already well used and well served. Public facilities will require appropriate maintenance and periodic improvement.

²³ “Individual parks within the Adelaide Park Lands have been grouped into precincts which are unique to the Adelaide Park Lands Management Strategy and allow for planning considerations to be provided at the Precinct level.” (p 62 draft APLMS)

²⁴ An ironic expression in the context of Park Lands.

²⁵ It is beyond the resources of TNAS to address each precinct.

²⁶ See at para 46.

- c) The future character should be for enhanced verdant parklands with large shady trees and understorey vegetation within open biodiverse woodlands; retaining wide open spaces and historical parkland uses and flora; enabling recreation and socialisation; and progressively reducing on-park carparking and improving ecological sustainability and ambulant connections.
- 45.3 Golf Links Precinct (Possum Park/Pirltawardli (Park 1))
- a) The assertion “fuel the demand for a broader range of recreational and sporting activities, particularly in the northern sections of the Precinct” is unsubstantiated and speculative.
- b) There is no basis for the proposed a 5m wide “*promenade between Montefiore Hill and Hill Street*”, which would require destruction and removal of trees and understory and result in a reduction of parkland within the park.
- c) It is not known what is contemplated by a “*proposed land bridge*” nor its physical impact on parklands. Opportunities for safe at-grade parklands conducive pathway (non-heat sink black bitumen) connections, traffic calming, and progressively reducing on-park carparking are supported.
- d) It is not known what is meant or intended by, or the basis for the draft indicating: “Support enhancement and increased usage of the North Adelaide Golf Links golf courses, clubhouse and supporting facilities to broaden opportunities for social activity and other sporting activities”; and “Investigate opportunities for alternative future uses of all, or part of the North Course”.
- e) The proposed: “*Assess known areas of remnant vegetation for potential enhanced management*” ought to be: “*undertake opportunities to revegetate and enhance vegetation and understorey*”.
- f) The future character should be for enhanced verdant parklands with large shady trees and understorey vegetation within open biodiverse woodlands; retaining wide open spaces and historical parkland uses; enabling recreation and socialisation; and progressively reducing on-park carparking and improving ecological sustainability and ambulant connections.
- 45.4 Bonython Park Precinct (Tulya Wardli (Park 27))
- a) That the draft postulates “*Support the development of the new Women’s and Children’s Hospital*” for a precinct on the Adelaide Park Lands is extraordinarily disingenuous and *contra* the legislative principles. In any event, it is unnecessary as the state government has legislatively sequestered the land and determined its land use.
- b) The future character should be to maintain a vibrant area that provides a diverse and accessible range of recreation opportunities, respect and inform about cultural and historical places, cater to a range of users within a structured landscape setting dominated by the River Torrens/Karrawirra Pari, and support the restoration and rehabilitation of the River Torrens/Karrawirra Pari and opportunities for revegetation and enhancing vegetation.
- 45.5 Riverbank Precinct (Parks 12, 26, 27 & Frome)
- a) A management strategy that does not evidence the history of sequestration of Park Lands by State Government or its legislative entities is doomed to enable repetition into the future towards 2036 and beyond.
- b) The future character of this State Government Precinct should include enhanced large shady trees and understorey vegetation within open biodiverse woodlands; open spaces conducive to socialisation, public art and community use; creative low/medium scale built form respectful of adjacency with Park Lands; requisite carparking being below ground; progressively improving ecological sustainability and ambulant connections; retain

significant and regulated trees; respectful of cultural, heritage and residential adjacency and existing uses; and improve water quality.

45.6 North-East Park Lands Precinct (Parks 9-12)

- a) The inclusion of unsubstantiated speculation is not a sound basis on which to include a proposal “*to create a medium hub*”.
- b) The draft proposes confining to “*license (sic) holders*” any “*work*” about a “*master plan ... to address future sport and recreation needs*”. This precinct and its parks are immediately adjacent to a densely populated residential (heritage) area and small businesses. Those communities have an interest no less relevant than that of licence holders.
- c) The future character should be regenerating and enhancing flora and biodiversity within the River Torrens/Karrawirra Pari corridor; enabling space for recreation, socialisation and playground; supporting historical plantings.

45.7 Wellington Square (Kudnartu)

- a) As indicated in the draft, the “spatial arrangement and plantings are substantially the same as when the city was laid out by Colonel William Light in 1836 [and] has altered little since it was established, with the same path pattern and style of Victorian tree plantings”, which ought to be historically listed as such and have pathways with non-heat sink black bitumen and structural lighting reflective of its history and location within an historic conservation zone.
- b) The assertion in the draft of “*expanding the activities on offer*” is without substantiation or basis. The Square affords opportunities for activities conducive to its use as a small parkland area within an urban setting and within walking distance of the larger Park Lands and O’Connell Street. It is the experience of TNAS that the area of the Square currently and foreseeably meets, and is responsive to, “*local community needs*”.
- c) The future character of this square ought to be to retain its historical layout of pathways and continue to provide a high quality formal garden landscape and function as a park responsive to its local historical context and as parkland within a surrounding urban environment in an historic conservation zone.
- d) Rather than “*seek[ing] opportunities to reduce bitumen around the Square*”, it would be preferable to reduce bitumen *within* the Square, and for that to be an immediate management strategy. That should generally be the case within the Park Lands.
- e) It is not known what is meant by: “*Strengthen the structure of the Square and ... implementing a central and east-west promenade*”. There is already an overly wide north south pathway of a width greatly more than what might foreseeably be required within the next generations. The east west path is also of ample width and without need of any “*promenade*”.²⁷ Rather, the western pedestrian crossing could be improved as it leads to the Helping Hand and is well used by those and other people.

45.8 Gardens Precinct (Parks 28, 29, Pennington)

- a) These are small gardens on a significant slope that are quietly enjoyed by users and those who walk between Adelaide Oval and O’Connell Street.

²⁷ Elsewhere within the draft a “*promenade*” is referred to as being 5m wide (140% wider than a standard Australian road lane of 3.5m). In this Square, that would reduce the vegetated area; inconsistent with this continuing as a high quality garden landscape.

There is no basis indicated for a “*hub with shelter*”²⁸, “*pop-up/plug in catering*”, or any built form, which would tend to dominate what is otherwise a beautiful garden setting.

- b) TNAS supports contextual and interesting public art (and creative landscaping) in appropriate locations in consultation with local communities but does not know what is meant or contemplated by “*significant piece of public art.*” The existing garden clock is a well-known and appreciated point of interest. The gardens are a credit to those who work on them and long may that continue.
- c) The future land use of the current Women’s and Children’s Hospital will significantly impact considerations of what the adjacent gardens might continue as or become “towards 2036”.
- d) The future character should continue to be attractive and well-designed oases in dense parts of the City, with high quality formal gardens, open vistas across playing fields, to the southern horizon, and towards the city centre, and with structured landscaping.

Other

46. “Return Areas”

- 46.1 “*Notable return to park land areas*” tables **should** include the date, and in relation to State Government, **should** also refer to the applicable government.

47. “Investment Framework”

- 47.1 **Who** are “*landowners in the Adelaide Park Lands*”, if different from an “occupier”?
- 47.2 **What** is contemplated by “*private investment*”, to what purpose, and to meet what management strategy? The inference is private interest / ownership. **Why** is that contemplated in the Management Strategy?
- 47.3 The Strategy **should** specify that unsolicited bids are not contemplated. Any exception would be pre-conditioned on full public disclosure and processes.

48. TNAS indicates its general support (unless inconsistent with this submission) with the content of each of the following summaries²⁹ within the “*Kadaltilla Adelaide Park Lands Management Strategy Review Phase One Engagement Progress Report: What We Heard*” (8.11.2022): “*Community Forum 2022*” (pp 32-34); “*Youth*” (p 38); and “*Australian Institute of Landscape Architects*” (p 42).³⁰

49. The draft APLMS is a substantial body of work of public, community and individual interest. That work and effort is acknowledged. Time and resources have not permitted a more detailed consideration, research, critique, or complete understanding of the intentions and possible impacts (positive, negative or neutral) of every aspect and nuance of its content, nor in respect of each Precinct.

²⁸ The draft at Item 10 currently has an unobtrusive gardener’s shed at or about that location, about which TNAS is not aware of there being any concerns and seems appropriate considering the gardens that it serves.

²⁹ With few minor exceptions.

³⁰ Page 26 of the draft APLMS refers to what was learnt and heard. However, the headings and dot points risk over-generalising and omitting key matters such as increasing vegetated and natural “open space”, reducing built form and car parking, and concerned cautiousness about “create new facilities”.

50. A future City of Adelaide is unimaginable without freely publicly accessible verdant Park Lands that “*correspond to the general intentions of Colonel William Light in establishing the first Plan of Adelaide in 1837*”.³¹ Their erosion and diminution is appalling, hence the importance of an effective APLMS that ought to give full effect to the intergenerational cultural, heritage, and environmental value (Kaurna, European, landscape) in a manner that elevates the Park Lands above and beyond the exigencies of governmental and council conveniences of the day.
51. TNAS remains concerned about the serious risk of fragmentation, dilution, dissipation and privatisation of the cultural, heritage, public accessibility, and environmental values of the Park Lands (as parklands) and diminution of custodianship by the City of Adelaide and its Administration, which TNAS considers occurred during a previous council.
52. It has been the long experience of TNAS that too often there is inconsistency between verbiage and conduct; and between policy statements and implementation or action. This is pertinent to the Adelaide Park Lands, the more so when it comes to retaining, regaining, and rejuvenating parklands vegetation, canopy and other open space in place of built form and non-conductive hard surfaces.
53. Towards 2036, it is not enough to postulate policy, produce glossy publications, or engage electronic wizardry. Nor is it an option to remain silent while a state government of any political persuasion sequesters Park Lands or relegates heritage or culture in the monetarised moment or with meaningless platitudes despite acknowledged cultural, heritage, or community value.
54. The intergenerational value of the Park Lands is in their practical conservation and enhancement as enduring verdant parklands for the environmental and humanistic benefit of the city, future communities, and the iconic identity of the City of Adelaide.
55. An aspect that is not referred to in this submission is not to be taken as acceptance or condonation.

Thank you for your consideration.

TNAS remains available to clarify or discuss any aspect.³²

Dear Alison

Re: Draft Adelaide Park Lands Management Strategy

I am writing on behalf of the Office for Design and Architecture SA (ODASA) to express support of the updated draft Adelaide Park Lands Management Strategy (the Strategy) proceeding to public consultation.

On 15 March 2024, ODASA provided detailed feedback regarding the draft Strategy as part of the City of Adelaide's stakeholder engagement process. Since then, I am pleased to confirm that staff from the City of Adelaide and ODASA have been collaborating closely to resolve this feedback and further enhance the Strategy. This collective effort has resulted in notable improvements to the overall user experience, including the content, legibility and visual identity.

I am confident that the updated draft Strategy will be further enhanced through public input and wish Kadaltilla and the City of Adelaide a successful consultation period.

We look forward to continuing this collaboration with the City of Adelaide.

Should you have any questions or wish to discuss this matter please contact me via email Brad.McCormack@sa.gov.au or phone 7133 3977.

Yours sincerely,

Brad McCormack
Senior Planning and Design Officer

APLMS Consultation
Park Lands, Policy & Sustainability
City of Adelaide
GPO Box 2252
ADELAIDE SA 5000

Email: kadaltilla@cityofadelaide.com.au

Dear APLMS Consultation Team

Thank you for providing the Office for Recreation, Sport and Racing (ORSR) the opportunity to provide comment on the Draft Adelaide Park Lands Management Strategy (APLMS).

ORSR considers the Park Lands a significant contributor to the health and wellbeing of South Australians through the diverse range of recreation and sport offerings provided. ORSR has consistently provided support for planning and facility development across the Adelaide Park Lands in recognition of this key role.

Provision of physical activity opportunities is vital to increasing the health and wellbeing of our communities. It is important therefore to provide a variety of accessible locations to encourage people to be physically active including provision of sporting fields and supporting infrastructure such as fit-for-purpose clubrooms and changerooms required for optimising their use.

ORSR congratulates Kadaltilla on the development of the APLMS to date and acknowledges the significance of the strategy for the SA Government, Adelaide City Council and sporting groups that utilise facilities in the Park Lands and the greater South Australian community.

Attachment 1 provides ORSR's comments for Kadaltilla consideration. Thank you for the opportunity to provide comment on this important matter and if you wish to discuss this submission in more detail, please contact Mr David Nash, Manager Recreation and Sport Planning, ORSR by phone on 0401 120 360 or via email at david.nash@sa.gov.au

ORSR wishes Kadaltilla and Council every success in finalising and implementing the APLMS and looks forward to working collaboratively with Council and other key stakeholders to deliver this important strategy.

Yours sincerely

Pulteney Grammar School submission to the Adelaide Parklands Management Strategy – Towards 2036 consultation

As one of the largest land holders in the Adelaide CBD and custodian of Park 20 for over 100 years, Pulteney Grammar School (Pulteney) is deeply passionate about the future of the Adelaide Park Lands.

We believe that the preservation of the Park Lands to ensure they remain safe, accessible and user-friendly will be a key part of the evolution of our city.

Without intelligent management of the Park Lands, it is unlikely we will see the city reach its full potential. Significant effort must be put into making the city an appealing place to work, live and play. In looking through this context, there are a number of specific aims of the Adelaide Parklands Management Strategy – Towards 2036 (APLMS) which we believe are of the most importance in the Pulteney context:

3. *Increase the community's use of the Adelaide Park Lands*
4. *Ensure the Adelaide Park Lands are widely accessible to the public*

Through its long-term association with management of Park 20, Pulteney has strengthened community ties to the park, maintained and improved the facilities and have been able to enhance Park 20 for future generations. Given the knowledge that Pulteney have from years of experience, we believe that we are well placed to enter into conversation with the City of Adelaide (CoA) on the best way to improve Park 20 for continued progress and use into the future.

Background

As mentioned in our recent Expression of Interest (EOI) for Park 20, female participation in sport, especially cricket, football and soccer has risen in popularity in recent years with the success of the CommBank Matilda's soccer team at the 2023 FIFA Women's World Cup, the continued success of the women's Big Bash League and the AFLW league. With State Government initiatives such as the \$2.8 million funding for The Power of Her – Infrastructure and Participation Program which is dedicated to female sporting facilities, improvements, programs and projects that grow and enhance female participation, as well as the gender parity recently achieved at the 2024 Paris Olympics, it is evident that the need for greater investment in updated changerooms at Park 20 is of the utmost importance for the future of sport in SA. We note that this, in conjunction with the current inability to upgrade the facilities at Park 20, means that the continued success of women's sport at Park 20 is in jeopardy.

Safety

Currently, safety is of concern in several of the parks through the Adelaide CBD. Part of this issue can be attributed to the lack of appropriate facilities in the Park Lands, especially for female participants and participants with special needs. Upgrades to the overall accessibility of existing community buildings are necessary to allow for greater participation in community, local, state-based and international competition as well as to allow casual users of the park a basic level of amenity.

We see this ability to diversify and upgrade the existing buildings in Park 20 as a significant opportunity to promote higher female participation in sport in South Australia. Currently, as evidenced in our recent submission to the CoA as part of the EOI, the lack of accessible facilities available to female participants is detrimental to the continued growth of women's sports in SA. Several current users of Park 20 expressed their hesitancy to increase participation due to the lack of adequate and safe facilities. We see this as a risk in terms of being unable to provide the most basic amenity to users in terms of basic hygiene and cleanliness. An upgrade to the facilities would allow for the most equitable use of the space for all.

Inadequate changeroom facilities have long been a point of contention in Park 20, and as recently as last week it is almost certain that the Park's biggest sub-lessee, the SANFL will be forced to move their operations to the suburbs as per the lack of acceptable male and female changeroom facilities in Park 20.

Further to the above matters concerning lack of acceptable amenity, we believe that there is a unique opportunity to work towards upgrades for the overall safety for male and female participants. This is particularly relevant in order safety for all users of the park, especially young people including Pulteney students who are one of the main, consistent year-round users of the Park.

Adelaide Parklands Management Strategy – Towards 2036

As per Strategy 1.4 of the current APLMS;

Support activation of the Park Lands by upgrading and enhancing buildings and structures responsive to their park setting

It is evident that the existing buildings in Park 20 are nearing the end of their life cycle and need to be upgraded and enhanced. As explained in our recent EOI, facilities fit for purpose to encourage female participation in sport are sorely lacking. This, coupled with the age and degraded nature of the majority of buildings mean that they are not responsive to the setting being an accessible and inviting area.

We believe that in order to further improve the scope and standard of activation at Park 20, a number of issues would likely need to be addressed in terms of the facilities available and operations that are currently possible.

As an example, it would be near impossible at the moment to attract sporting events or competitions of a regional or state sporting level due to the limited nature of the changeroom facilities that are available. This is a shame given various other parts of the Park Lands have been able to use their higher quality set ups and operations to attract a wider range and higher standard of use, including Park 24 (Ellis Park) being used as a training facility in 2023 during the Women's Soccer World Cup. Without investment into Park 20, the economic and social benefits cannot be realised.

We believe that an improvement of facilities would have other flow on activation benefits. Most notably would be an improvement of disability access and disability toilets, as well as improved public toilet facilities, which would be a significant step in making the overall area more attractive for sporting and leisure groups and local city residents in making the most of the area and also allowing better overall inclusion for activities in the area. Upgrades such as the one that has occurred at Park 9 (Tidlangga) have been a good demonstration of this. This is a good parallel to Park 20 as the quality upgrade of both public and disabled toilets at Park 9 has also helped to compliment the adjacent playground and playground users.

In order to progress the APLMS, an upgrade of the community building currently at Park 20 is necessary and has long been an ambition of Pulteney. We believe that this would generate an increase in activation as set out above, but also in terms of drawing more people to the area to watch or be involved in supporting different sporting groups. The necessary investment that would encourage such activation is something Pulteney strives to provide in the longer-term. This could be further encouraged with greater security as part of a longer-term leasing arrangement, which would underpin Pulteney further deepening the roots of its connection with Park 20 and allowing a greater range of sporting groups, residents and community members to make the most of this amazing section of the Park Lands.

Conclusion

As long-standing custodians of the land at Park 20, Pulteney are committed to the evolving usage needs of the community. We look forward to the continued opportunity to play a role in the successful evolution of Park 20, as well as the broader Park Lands, to help us serve both the school and the broader community.

Women's sports are gaining popularity in leaps and bounds and with adequate investment and collaboration between Pulteney, Council and State Government there is a great opportunity to invest in the state and the future of sport in SA.

We are committed to the betterment of Park 20 and want to work collaboratively to enable the functionality to be improved to allow for more inclusive sporting and recreational opportunities. We are able to begin this additional work immediately and look forward to the opportunity to, in particular, promote and encourage women' and girls' participation in sport.

We look forward to further continuing this conversation at your earliest convenience.

Yours sincerely,

Deborah Dalwood
Interim Principal

Dear Lord Mayor,

Draft Adelaide Parklands Management Strategy

Thank you for the opportunity to provide feedback on the *Draft Adelaide Parklands Management Strategy*. As you are aware, Renewal SA has a significant interest in the parklands as it relates to projects at:

- Riverbank Precinct, including but not limited to Festival Plaza development and the Railway Station;
- Lot Fourteen;
- Tapangka;
- Bowden/Brompton; and,
- The former West End Brewery

As mentioned in my previous letter of 13 February 2024, over the life of the plan to 2036, there will be a significant increase in the resident and working population utilising the parklands from these projects (particularly from Bowden, the former Brompton Gasworks site and the former West End Brewery site).

I am pleased that in response the plan has recognised this and has proposed to prepare the Bonython Park Master Plan (Strategic Priority 6).

Renewal SA continues to enjoy our working relationship and partnership with the Adelaide City Council and look forward to further productive discussions and involvement relating to both this matter and our key projects in and around the City of Adelaide.

For further engagement on the strategy please contact Paul Bennett, Director Project Services on mobile 0417 944 185 or email Paul.Bennett@sa.gov.au.

In any case, if you or any of your team wish to discuss any specific matters relating to the above key projects, please contact me personally on 0407 689 763.

Yours sincerely,

Chris Menz
Chief Executive

Ms Alison Ackland
Kadaltilla / Adelaide Park Lands Authority Advisor
City of Adelaide
Level 02, 25 Pirie Street
ADELAIDE SA 5000

By email: A.Ackland@cityofadelaide.com.au

Dear Ms Ackland

Thank you for your correspondence received on 18 June 2024 regarding the draft Adelaide Park Lands Management Strategy (APLMS) - Towards 2036, which is currently on public consultation. I appreciate the opportunity to provide comment. I am also responding on behalf of Planning and Land Use Services (PLUS).

Firstly, I would like to thank the Lord Mayor, Dr Jane Lomax-Smith AM, and Iliia Houridis, Director City Shaping at the City of Adelaide, for their presentation to the State Planning Commission (the Commission) on the draft 'APLMS – Towards 2036', on 20 June 2024. The presentation highlighted the opportunities and challenges facing the ongoing management of the Adelaide Park Lands and our network of open spaces more generally.

The Adelaide Park Lands are an important State asset, forming an integral part of the current Metropolitan Open Space System for Greater Adelaide. They are recognised not only for their aesthetic value but also for the social, cultural, heritage, environmental and economic benefits they provide. They offer a range of experiences that attract local, national and international visitors, contributing to the State's economy; protect and enhance our natural systems and landscapes; and recognise places and objects of significant cultural and built heritage. Effective management and a clear vision for the Adelaide Park Lands are therefore critical to ensure their values are protected and enhanced.

Of relevance, Planning and Land Use Services within the Department for Housing and Urban Development, is currently preparing the draft Greater Adelaide Regional Plan (GARP) which is anticipated to be released for public consultation later this year. Aurecon has been engaged by PLUS to prepare an Open Space Strategy, which will inform the open space section of the draft GARP.

I have been advised that on 2 July 2024, a PLUS staff member and a representative from Aurecon met with the Adelaide City Council (ACC) staff to discuss the Open Space Strategy, how this will be incorporated into the GARP, and how this relates to the 'APLMS – Towards 2036'. The draft vision, goals and strategies of the 'APLMS – Towards 2036' are broadly consistent with those proposed in the draft Open Space Strategy and the draft GARP. All documents have a focus on achieving positive social, cultural, heritage, environmental and economic outcomes.

As stated in the draft 'APLMS – Towards 2036', as the Greater Adelaide Region's population grows, particularly in the surrounding inner suburbs that are experiencing densification, providing additional open space to meet growing demands is a challenge. This places additional pressures on the Adelaide Park Lands and other existing open spaces. In response to this, the draft 'APLMS – Towards 2036' outlines the need for shared investment in the Adelaide Park Lands and increased investment in open spaces throughout the Greater Adelaide Region. The draft Open Space Strategy also recognises the challenges of providing open space to meet the community's needs into the future and, as such, provides a number of targets and actions to help achieve this. It also emphasises the need to focus on quality open spaces rather than quantity.

I can advise that, following the presentation to the Commission on the 20 June 2024, the members resolved to include the following principles in the draft GARP:

1. **Connecting people with nature and places** – open spaces build stronger communities, promote health and wellbeing, and connect people with nature and key destinations.
2. **Creating quality spaces for everyone** – open spaces are equitable and accessible at a range of scales, sizes, tenures and experiences, and are connected to each other and with movement corridors.
3. **Building on Greater Adelaide's sense of place** – quality open spaces create better places by contributing to high amenity precincts, enhancing and reinforcing local character and natural systems, supporting housing density and diversity, and generating economic value.
4. **Increasing Greater Adelaide's climate resilience** – green open spaces increase biodiversity and habitat, create climate resilience, reduce heat island impacts. Increase tree canopy cover and integrate water sensitive urban design.

The Commission also resolved to include an action to: *Investigate options for a new governance and funding model for the Adelaide Parklands with potential application to other state significant open spaces.*"

These will be subject to change in response to comments received during the public consultation process.

The Commission and PLUS look forward to continued engagement with the Kadaltilla / Adelaide Park Lands Authority following the release of the draft Open Space Strategy and the draft GARP for public consultation.

I trust this information is of assistance.

Yours sincerely

APLMS Consultation, Park Lands, Policy & Sustainability

GPO Box 2252
Adelaide SA 5001

1 August 2024

Dear Lord Mayor Lomax-Smith,

City of Adelaide – Draft Adelaide Park Lands Management Strategy Towards 2036 (APLMS)

Thank you for the opportunity to provide feedback on the Draft Adelaide Park Lands Strategy Towards 2036 (APLMS).

As the peak body for cricket in South Australia, the South Australian Cricket Association (SACA) is responsible for managing, promoting, and developing the game of cricket in South Australia.

SACA would like to congratulate the City of Adelaide on its ambitious vision for the future enhancement of the Adelaide Park Lands.

SACA acknowledges that the Adelaide Park Lands play a very important role in providing for the open space needs of metropolitan Adelaide. This balanced role includes providing opportunities for organised sport such as cricket. School, social and community cricket is played throughout the Adelaide Park Lands during the week and particularly on weekends.

There are 52,557 registered cricket participants across South Australia, 20,000 of which are junior cricketers aged 5 to 12 playing competitively. This past season 6,720 females were registered participants, up 47% on the previous season.

SACA would like to make the following comments on the Draft Adelaide Park Lands Strategy Towards 2036:

Adelaide Park Lands Snapshot – Sporting Facilities (Page 17)

SACA is proud to be a lease and license holder in the Adelaide Park Lands. To better reflect the diverse range of sports played in this area, it would be ideal to list each sporting code individually rather than grouping them under ‘general sports fields.’ This approach would provide a clearer picture of the variety of sports represented in the Adelaide Park Lands.

Regarding sports fields, cricket and football have a long history of collaborating to share sports fields in the Adelaide Park Lands. Both codes aim to continue this partnership well into the future to ensure these fields are utilised to their maximum potential.

Adelaide Park Lands Directions & Priorities (Page 31)

SACA supports all three of the Adelaide Park Lands Directions and Priorities Goals, in particular Goal 1 – “Places of activity, creativity and tranquillity for everyone that support our changing lifestyles, health and wellbeing, offer diverse landscapes and natural beauty and provide a range of recreational, sensory and stimulating experiences”. However, we would encourage the insertion of the word ‘sport’ after ‘creativity’.

Goal 1 – Places and Spaces

Strategies (Page 34)

Strategy 1.1 – SACA supports this strategy, however with the insertion of the words ‘and sporting’ after ‘recreation’

Strategy 1.2 – SACA supports this strategy and believes cricket contributes to setting the Adelaide Park Lands apart, in particular Gladys Elphick Park / Narnungga located in Park 25

Strategy 1.3 – SACA supports this strategy and believes that cricket contributes to attracting visitors and tourists to the Adelaide Park Lands and CBD in general

Strategy 1.4 – SACA supports this strategy and encourages upgrades to buildings and structures that are no longer fit for purpose, in particular, those that are not gender inclusive, accessible or safe as per SACA’s South Australian Infrastructure Strategy 2019-2029

Strategy 1.5 – SACA supports this strategy

Strategy 1.6 – SACA supports this strategy

Strategy 1.7 – SACA supports this strategy, however with the insertion of the words ‘sport and’ prior to ‘recreation’

Strategy 1.8 – SACA supports this strategy and believes sport and recreation areas in the Adelaide Park Lands should be as accessible to the public as possible outside of playing and training times

PRINCIPAL PARTNER OF
CRICKET IN SOUTH AUSTRALIA

www.saca.com.au

Community Buildings (Page 35)

SACA is pleased to see that Adelaide City Council are placing into consideration buildings reaching the end of their useful life and no longer responding to community needs.

SACA's priorities associated with infrastructure and facility provision as per the SACA South Australian Infrastructure Strategy 2019-2029 are to:

- Improve the quantity, quality, innovation and consistency of cricket infrastructure across all levels of community cricket
- Support the development of community cricket facilities that contribute to the delivery of Cricket Australia's strategic priorities (e.g. supporting the attraction and retention of 5-12 year old participants)
- Support cricket facility development in areas of demand
- Create inclusive, safe and accessible environments for cricket participants and the broader community
- Collaborate with all levels of Government and funding partners to invest in strategic infrastructure priorities
- Provide more welcoming and gender inclusive facilities

Specifically, Region 1 priorities (in which Adelaide City Council is located) outlined in the SACA South Australian Infrastructure Strategy 2019-2029 include:

- To increase the provision of gender-neutral change rooms and supporting amenities
- To provide more welcoming and gender inclusive facilities
- To improve off-field infrastructure condition levels

SACA would therefore encourage Adelaide City Council to create welcoming, gender neutral spaces wherever community buildings are redeveloped or built.

Hubs – Sport & Recreation (Page 36)

SACA welcomes the acknowledgement of Adelaide Park lands being the home of metropolitan sport and appreciates comments around the Adelaide Park Lands continuing to provide for sport & recreation opportunities. SACA fully supports prioritising open accessible spaces for the public to enjoy outside of programmed sport and recreation times.

Strategic Priorities – Achieved (Page 59)

SACA is extremely proud of its part in the transformation of Gladys Elphick Park / Narnungga / Park 25. The space has been revitalized and reactivated and attracts year-round visitors to the Northwest sector of the City who bring economic benefits to the City of Adelaide. We are appreciative that the transformation of Gladys Elphick Park / Narnungga / Park 25 has been acknowledged in the APLMS.

PRINCIPAL PARTNER OF
CRICKET IN SOUTH AUSTRALIA

www.saca.com.au

West Park Lands Precinct – Precinct Considerations (page 66)

SACA supports the investigation of opportunities to construct a footbridge over Glover Terrace. A foot bridge would create a much needed safe, accessible option for pedestrians to cross Glover Terrace.

South-West Park Lands Precinct – Precinct Considerations (Page 70)

SACA supports the redevelopment of built forms and associated facilities to service both sporting and community needs that are contemporary and fit for purpose.

Following the recent growth in female participation in cricket, combined with healthy increases in multicultural, aboriginal and all abilities player categories, a key focus for SACA is to ensure redeveloped, new and upgraded/retrofitted cricket facilities are gender neutral, safe and inclusive and infrastructure promotes an accessible, safe and fit-for-purpose environment.

Return Areas – Return Area Schedule (Page 146-147)

SACA seeks clarification on areas of park land designated for non-park purposes. If this designation includes any sites or facilities currently used for cricket, SACA anticipates a thorough consultation process to be conducted.

Thank you again for the opportunity to provide input into the Draft Adelaide Park Lands Strategy Towards 2036.

Please do not hesitate to contact me if you would like further information.

Yours sincerely,

Jassmine Wood

 APLMS Consultation
 Park Lands, Policy & Sustainability
 GPO Box 2252
 ADELAIDE SA 5001
 Via email: kadaltilla@cityofadelaide.com.au

Dear Alison

Adelaide Park Lands Management Strategy – South Australian Motor Sport Board Response

I write on behalf of the South Australian Motor Sport Board (SAMSAB) to provide a submission to Kadaltilla as part of its consultation on the Adelaide Park Lands Management Strategy (APLMS) – Towards 2036.

The SAMSAB would like to commend the City of Adelaide (CoA) on the development of the APLMS as a significant body of work, setting a vision for how South Australia can protect and leverage what are unique and valuable assets for the state.

The SAMSAB are empowered to conduct major events on behalf of the State Government, enhancing the social and cultural life of South Australians, at the same time as delivering economic prosperity through visitation to the city and the state.

As a significant user of the Adelaide Park Lands, in particular Parks 14, 15 and 16, the SAMSAB support the CoA and Kadaltilla's desire to have a long-term vision, protection and management of our city's open spaces.

The usability of Park 16 is critical to the successful delivery of our flagship event, the VAILO Adelaide 500 (VA500). In 2023, the VA500 delivered a record \$61.6 million worth of benefits to the South Australian economy. This year's event is to be held from 14-17 November and promises to deliver even more to the vibrancy of the City of Adelaide and the local economy.

It is critical these parks, particularly Park 16, retain or improve upon the existing event spaces and physical infrastructure to enable the staging of these large and varied events.

It is also critical that these Parks continue to maximise opportunities for events, both large and small, alongside community recreation and other activities.

The APLMS highlights as a priority the implementation of the Victoria Park/ Pakapakanthi (Park 16) Master Plan in collaboration with the local community, stakeholders and land managers to improve accessibility and amenity throughout Victoria Park/Pakapakanthi (Park 16).

Earlier this year SAMSAB responded to the public consultation for the proposed CoA Park 16 Master Plan, setting out a number of critical concerns and did not receive a specific response from CoA to the items raised.

The following items, as set out in the now adopted Master Plan, are noted as having potential significant impact on the SAMSB operations within Park 16:

- Significant changes proposed for pathways and ground treatments;
- New and upgraded park entry nodes;
- Temporary pump track, activity zone, temporary structures and painted ground surface on the pit garages/paddock area;
- New playing fields – one south of the Premium Playing Field and another between the East-West paths and the remnant vegetation conservation zone;
- New play zone in the float park area;
- Lots of tree planting, some of which may be impractical for event areas and the race circuit; and
- Expansion of the remnant vegetation and butterfly conservation zone by approximately 14,000sqm.

As indicated in our previous response, SAMSB would be pleased to collaborate with CoA on the implementation of the Park 16 Master Plan and have therefore incorporated our feedback on the above items, where possible, into the APLMS strategic items as listed below.

We noted there is not a direct correlation between APLMS Strategies and the initiatives of the Park 16 Master Plan so have attempted to map these as best as practical within the broad Goals Statements.

GOAL 1 | PLACES AND SPACES

This section of the APLMS hosts most relevance for the SAMSB as a promoter of major events.

The Adelaide Park Lands are a place to meet and enjoy diverse experiences.

- Strategy 1.1 | Create a network of activity hubs (small, medium and large) attracting visitors and tourists and supporting the recreational needs of people of all ages, abilities and cultures.
- Strategy 1.2 | Create places and attractions that set the Adelaide Park Lands apart.
- Strategy 1.3 | Promote the Adelaide Park Lands as a visitor and tourist destination.
- Strategy 1.4 | Support activation of the Adelaide Park Lands by upgrading and enhancing buildings and structures responsive to their park setting.

Master Plan 2.4.4 | Reconnect the Grandstand

The Pakapakanthi/Victoria Park (Park 16) Activity Hub

The SAMSB support the possible co-development of activity hubs to suit both community use and enhance the patron experience during major events that may temporarily occupy these spaces.

04 | Develop a new urban adventure play space

The development of a new urban adventure play space in the float park area may create a new patron family zone area during events to complement the significant Family Zone for the Adelaide 500.

Master Plan 2.4.7 | A Park for Year-Round Activation

The proposed expansion of the diversity of offerings through developing site infrastructure that supports a range of events would be supported with good planning for appropriate power and water infrastructure to support more events, evening activations and active recreation.

02 | Outdoor gathering space

Temporary raised planters will provide opportunity for catenary lighting and shade sails, urban furniture, etc. The SAMSB would be interested in how this temporary infrastructure may have multi-event use, including for the Adelaide 500.

The Adelaide Park Lands will host diverse events, from small to large, in more places more often.

- Strategy 1.5 | Create spaces to accommodate cultural, sporting, artistic and recreational events of varying types and sizes.
- Strategy 1.6 | Provide both permanent and temporary infrastructure to attract and service world class events in the Park Lands.

Master Plan 2.4.7 | A Park for Year-Round Activation

The Master Plan builds on the reputation of Victoria Park/Pakapakanthi (Park 16) as a place for a broad range of activities through additional initiatives to activate the site.

Maximising Opportunities for Event Mode

01 | Relocate the amenities block

This is endorsed by SAMSB and we would like to accelerate the removal of the old toilet block.

02 | Outdoor Gathering Space

Other temporary activation furniture and planters may have some synergies if they can be relocated to other areas of the Adelaide 500 event and returned to this area post event.

03 | Investigate opportunities for temporary structures to support community events.

There is an opportunity for the SAMSB to collaborate with the CoA to develop appropriate permanent and temporary event infrastructure. The Park 16 Master Plan identifies a range of possible initiatives, some of which may create unnecessary recurrent costs for both the City and for the SAMSB.

The creation of temporary structures to support community events such as the Serpentine Pavilion in Hyde Park, London may be possible if CoA are able to cover the cost to remove and reinstall this structure each year.

Consideration could be given to leaving the lower frame of the pit building in situ to be used as a year-round activation structure with suitable creative modification for shade and lighting.

04 | Activity Zone

Increase the temporary activation opportunities on the hardstand area – this is referencing the Supercars paddock area and the hardstand for the erection of the temporary pit building.

We note these areas are currently also used for Horse Trials stables, and by community for kids learning to ride bikes, roller blading, RC cars etc. So it's important that design consideration be given to these uses.

With regards to the proposed temporary bike pump track, activity-based pavement line marking for ball courts - the proposed painted surface would be painted over every year for the pit garages, and for the horse trial stables, so may be impractical. This may be possible if CoA are able to cover the cost to remove and reinstall each year.

Similarly, the costs to remove and re-establish bike pump tracks and other temporary infrastructure would need to be borne by CoA rather than individual events.

The Adelaide Park Lands are Adelaide's hub for sport and recreation

- Strategy 1.7 | Strengthen the role of the Adelaide Park Lands as a regional destination for competitive sport and a variety of active and passive forms of recreation.
- Strategy 1.8 | Optimise the community use of sport and recreation areas outside formal game and training times.

Master Plan 2.4.7 | A Park for Year-Round Activation

Maximise Opportunities for Everyday Use

01 | Optimise the number of sporting fields within the northern precinct

The addition of two new community sporting fields in Park 16 appear to aid in the delivery of the above APLMS strategies. The SAMSB would like to collaborate on their implementation noting both these fields are located in key event areas and will need to be sufficiently robust to be able to handle traffic loads. Similarly, planning for irrigation will be necessary to allow for practical installation of event marquee structures without damage.

Maximising Opportunities for Event Mode

04 | Activity Zone

Increase the temporary activation opportunities on the hardstand area – the proposed painted surface would be painted over every year for the pit garages, and for the horse trial stables, so may be impractical.

Similarly, the costs to remove and re-establish bike pump tracks and other temporary infrastructure would need to be borne by CoA rather than events.

GOAL 2 | CONNECTIONS AND NETWORKS

The Adelaide Park Lands are a network of connected parks.

- Strategy 2.1 | Improve the Adelaide Park Lands Trail linking all parks and providing a pleasant and convenient cycling and walking route.

Master Plan 2.4.2 Strengthen Neighbourhood Connections

A Welcoming Address

01 | Relocate Wakefield Street pedestrian crossing

The re-alignment of the Adelaide Park Lands Trail at Wakefield Road may improve current vehicle and pedestrian/cyclist interface where the race circuit intersects Wakefield Road.

However, this will require the relocation of the pedestrian crossover safety zone to a section of the road that forms a critical part of the Adelaide 500 race circuit as an acceleration zone exiting the Chicane. Consideration will need to be given to road treatments to maintain uniformity of surface with minimal fixing that must remain sub-surface, and the furniture must be designed for ease of removal and re-installation.

The Adelaide Park Lands connect the city to the inner suburbs

- Strategy 2.2 | Connect the Adelaide Park Lands with the hills, coast and metropolitan open space network.
- Strategy 2.3 | Improve public and active transport connections with Adelaide Park Lands.
- Strategy 2.4 | Improve safety, universal design and connectivity within and to the Adelaide Park Lands.

Master Plan 2.4.1 | Consolidate, Complete and Strengthen the Path Hierarchy

Path Hierarchy

01 | Completing a continuous perimeter pedestrian and cycle path with uniform materiality and path width

Completing a continuous perimeter pedestrian and cycle path with uniform materiality and path width will be a positive for re-directing pedestrian and cycling traffic around construction activities for the Adelaide 500 and will be of benefit to the broader community in accessing the Park Lands.

The new entry node and proposed Fullarton Road pedestrian overpass could provide improved patron access to events, however consideration to entry points for temporary event car parking will need consideration.

Note also the further comments to Master Plan 2.4.1 under APLMS strategy [The Adelaide Park Lands invite exploration and are safe and easy to access and move around in, day and night.](#)

The Adelaide Park Lands are easily identifiable

- Strategy 2.5 | Develop an identifiable landscape character for Adelaide Park Lands edges (urban address).
- Strategy 2.6 | Create a strong, cohesive overall Adelaide Park Lands identity.

Master Plan 2.4.2 | Strengthen Neighbourhood Connections

A Welcoming Address

04 | Improving Entry Nodes

SAMSB supports the development of enhanced access nodes to Park 16 and will collaborate with the CoA on their design to allow ease of integration of Adelaide 500 entry points, to minimise impact and timeframes of occupation.

The Adelaide Park Lands invite exploration and are safe and easy to access and move around in, day and night

- Strategy 2.7 | Install wayfinding signage enhancing the legibility of paths and connections across the Adelaide Park Lands.
- Strategy 2.8 | Develop a network of bicycle parking and bicycle hire facilities across the Adelaide Park Lands.
- Strategy 2.9 | Establish shared walking and cycling paths throughout the Parks that include safe connections and crossing points.
- Strategy 2.10 | Create a path network within each park that complements the landscape character and desired use of the park.
- Strategy 2.11 | Provide car parking on and adjacent to the Adelaide Park Lands only where need has been demonstrated and no reasonable alternative exists.
- Strategy 2.12 | Incorporate smart technology in priority locations across the Adelaide Park Lands including technologies such as pedestrian counters.
- Strategy 2.13 | Strengthen the urban address of the Adelaide Park Lands through large tree species and native plantings.
- Strategy 2.14 | Enhance the Adelaide Park Lands Trail.
- Strategy 2.15 | Provide lighting to support safe movement throughout the Adelaide Park Lands balanced with preservation of environmental values and biodiversity.

Master Plan 2.4.1 | Consolidate, Complete and Strengthen the Path Hierarchy

Path Hierarchy

01 | Completing a continuous perimeter pedestrian and cycle path with uniform materiality and path width

This will be a positive for re-directing pedestrian and cycling traffic around temporary event bump-in activities.

02 | Investigating opportunities to implement a buffer between the criterium track and the Grandstand and terraces to reduce potential conflict. Options may include fencing or a natural/vegetated buffer.

This would require realignment of the criterium path and consideration to the resizing of the premium playing field that is used for multiple events. However, the principle of creating separation of the terraced patron viewing area and the criterium loop appears sound.

03 | Creating a new diagonal dual pathway between Fullarton Road to Wakefield Road that caters for separated pedestrians and cyclists

This runs directly behind the pit straight grandstand for the Adelaide 500 event. The additional gravel path will encroach into the relocated concert area and the main path will reduce in width from 5.2m to only 4m, thereby limiting event service vehicle access. This path is used extensively during the construction and dismantle of the grandstand.

The dual path route appears to cut through the Chicane Drivers Left corporate facility area for the Adelaide 500, which could be advantageous with correct planning of alignment.

07 | Removal of underutilised paths. This appears to include:

- The rubble path between the premium playing field and the race circuit which would affect patron movement for both the Adelaide 500, Adelaide Motorsport Festival and Horse Trials events. This should become a sealed hard surface path, not be removed altogether.
- Replacement of the asphalt path with a rubble path at Angas Street entrance (Gate 2) would not adequately support event vehicle access and is counter to the strategy to attract and grow events in diminishing access.

The SAMSB do not support this.

On the contrary, we believe this access point requires further improvements to provide better event bump-in and servicing access as a more discrete point rather than disrupting the access node at the end of Halifax Street.

- Return 'Highway 500' path to rubble as part of a revised sweat track running loop – this is a long-standing and critical patron path and event service vehicle access to the pit straight grandstand area for the Adelaide 500.

The SAMSB do not support this.

- Reduce the asphalt path that runs from Halifax Street (Gate 1) to OP#1 from 5.2m to only 3m, severely limiting event service vehicle access and endangering pedestrian traffic on this shared pathway. This is counter-intuitive to supporting attraction of events.

The SAMSB do not support this.

Master Plan 2.4.2 | Strengthen Neighbourhood Connections

A Welcoming Address

02 | Provide additional Fullarton Road pedestrian bridge crossing

The new entry node and proposed Fullarton Road pedestrian overpass could provide improved patron access to events, however consideration to entry points for temporary event car parking will need consideration.

The masterplan overall does not appear to consider temporary event car parking.

GOAL 3 | NATURAL SYSTEMS, CULTURAL LANDSCAPES AND CLIMATE RESILIENCE

The Adelaide Park Lands are a place of natural beauty and Kurna cultural significance

- Strategy 3.1 | Recognise, promote and protect sites of Kurna cultural heritage and significance and work with Kurna people to provide education to the community about these sites.
- Strategy 3.2 | Provide a positive visitor experience of sites of cultural significance.
- Strategy 3.3 | Establish a range of natural, ornamental and cultural landscapes celebrating the diversity of the Adelaide Park Lands.

No comments.

The Adelaide Park Lands celebrate biodiversity

- Strategy 3.4 | Through Biodiversity Sensitive Urban Design enhance biodiversity in the Adelaide Park Lands and provide food resources and habitat for targets species.
- Strategy 3.5 | Continue to protect and seek to expand Key Biodiversity Areas.
- Strategy 3.6 | Seek opportunities to improve the condition of remnant vegetation.
- Strategy 3.7 | Participate and lead in global urban biodiversity initiatives and research.

Master Plan 2.4.5 | Celebrate The Park Lands Character

The SAMSB will continue to respect the conservation areas as important works to increase the biodiversity in the Park Lands.

We suggest that consideration be given to other fauna species beyond the focus to date on the Chequered Copper (*Lucia Limbaria*) which currently does not have a conservation status. Despite being found over much of the south-east of the continent they are never reliably found anywhere for long – as they also have a short lifecycle and short-lived time on-the-wing. This results in them being considered rare, however that relates more to the difficulty of observation.

The Chequered Copper is a highly foodplant-specific butterfly given its caterpillars only eat Oxalis, which is a very common plant species to the point of being considered a weed. The aim to restore the conservation areas to a Grey Box Grassy Woodland would seem more of a priority to attract other native fauna than to expand the butterfly zone with propagated Oxalis, which would present more attractive areas for year-round activation as noted as Strategy 7 in the Master Plan.

The Adelaide Park Lands are water sensitive, with healthy watercourses

- Strategy 3.8 | Enhance the ecological health of Adelaide Park Lands watercourses, including water quality improvement.
- Strategy 3.9 | Ensure sustainable water use across the Adelaide Park Lands.

Master Plan 2.4.6 | Reveal and Reconnect the Water

Creekline and Wetland

The proposed creek experience zones will need to be given further consideration to the hazard they may create for major event patrons.

The Adelaide Park Lands are climate resilient

- Strategy 3.10 | Strengthen the Adelaide Park Lands' role in developing a climate resilient city.
- Strategy 3.11 | Design and manage the Adelaide Park Lands to be resilient to increased use due to population growth.
- Strategy 3.12 | Retain and strengthen distinctive mature tree species through succession planting.
- Strategy 3.13 | Seek opportunities to increase greening and tree canopy, including through community participation.
- Strategy 3.14 | Understand the risks for tree species and biodiversity from pests, diseases and climate change and develop adaptation responses.

Master Plan 2.4.5 | Celebrate the Park Lands' Character

Enhanced Park Lands Greening

The above strategies all relate to significant greening of Park 16. Having reviewed the proposed it appears the suggested planting includes the run-off area for the race circuit, which must be clear of trees and allow for the viewing grandstands. It also suggests dense plantings around the criterium loop which would be a safety hazard for all users of this space.

With regards to the chicane, plantings would need to consider the corporate viewing areas leading into this space for the Adelaide 500.

Planting would also need to allow for the access point from East Terrace for temporary event parking.

The proposed temporary greening opportunities in event activation spaces as well as the relocated concert area for the Adelaide 500 in Park 16 need to be reviewed to determine if they could possibly be relocated within the Adelaide 500 event in an effort to minimise costs of relocation.

The Adelaide Park Lands are valued as a National Heritage site worthy of World Heritage Listing

- Strategy 3.15 | Ensure the values of the National Heritage Listing are protected and promoted.
- Strategy 3.16 | Progress World Heritage Listing of the Adelaide Park Lands and City Layout.
- Strategy 3.17 | Demonstrate best practice in managing heritage Assets.
- Strategy 3.18 | Retain existing spatial layouts and pathway alignments which are part of the National Heritage Values of the Adelaide Park Lands.
- Strategy 3.19 | Maintain and enhance views and vistas to the skyline and Adelaide Hills through carefully planned tree planting and spatial arrangements to reinforce the open and expansive character of the Adelaide Park Lands.

No comments.

The Adelaide Park Lands are a place of shared appreciation and knowledge

- Strategy 3.20 | Share knowledge, provide education and promote Adelaide Park Lands values to ensure the Adelaide Park Lands are appreciated and recognised as a unique asset for South Australia.

Master Plan 2.4.3 | Reveal the Narrative of Pre and Post-Colonial History

Storytelling Through Interpretation

The intent is to enhance public awareness of the rich natural and cultural history with three main themes of:

- Environmental Change from Woodland to Adelaide Park Lands;
- Aboriginal and Torres Strait Islander stories; and
- City celebration from horse racing to motor sports and major events.

It is proposed to relocate and enhance the Ayrton Senna monument with narrative highlighting Adelaide's controversial motor racing history. We would not consider it to be 'controversial'. The current location reflects the naming of the Senna Chicane after this racing legend and required significant negotiation with the Senna Foundation, so any relocation proposal will need to consider this.

The SAMSB believe there is far greater opportunity to celebrate the motorsport event history of Victoria Park over the past 40 years covering both the Australian Formula 1 Grand Prix and the Adelaide 500. We would like to collaboratively work with the CoA on proposals to contribute to this goal.

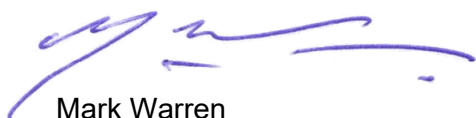

Master Plan Targets 2.2

The SAMSB note that all currently listed targets relate only to two of the eight strategies listed in the Park 16 Master Plan, focusing only on greening the Park Lands and increasing biodiversity. The Park 16 Master Plan is therefore incomplete without any meaningful targets against the other strategies.

We further note there is misalignment of the tree canopy percentage coverage between the Park 16 Master Plan and the APLMS.

Thank you again for the opportunity to contribute to this consultation process. We look forward to discussing further with you and delivering on an outcome that best delivers for South Australians.

Yours sincerely

Mark Warren

APLMS Consultation, Park Lands, Policy & Sustainability
GPO Box 2252
ADELAIDE SA 5001

Dear Lord Mayor,

Thank you for the opportunity to provide feedback on the Draft Adelaide Park Lands Management Strategy Towards 2036 (APLMS).

SANFL is passionate about creating fun, safe and inclusive environments that connect communities and allow all participants to thrive through the enjoyment of footy. We demonstrate this commitment through our programs that are delivered to support people in community football across South Australia.

Participation in female football in South Australia has tripled since prior to the start of AFLW and SANFLW in 2017, with 10,950 female registered club and Auskick players and for every female team in 2010, there are 19 in 2024. This growth has incredible impact on the way our clubs connect with their local community, the diversification of members and an offering to a whole new target market of people interested in football. As well as female football, overall participation remains strong with over 65,000 South Australian playing the game.

As well as football, cricket and other sports share sports fields in the Adelaide Park Lands and the collaboration continues to thrive between SANFL and SACA, specially for the support of ovals that are home to clubs of both codes.

Local councils are integral to the success of our football clubs across the State, and we are committed to partnering with City of Adelaide to achieve the best outcomes for the City and all football participants.

SANFL supports the use of the Adelaide Park Lands for organized sport, in particular Australian Rules football. Currently, football activity occurs in numerous Adelaide Park Land areas. It is vital that to sustain and grow participation and active lifestyles, facilities that support football activity must be fit for purpose, safe and inclusive. The current Adelaide Park Lands facility infrastructure does not meet these objectives.

The football clubs that call the Park Lands home (including Adelaide University – Park 10 and 12, CBC Old Collegians – Park 15, Blackfriars Old Scholars – Park 2, Pulteney – Park 20, Prince Alfred Old Collegians – Park 9 and Adelaide Lutheran – Park 21 football clubs) continue to demonstrate strong

MAJOR PARTNERS

participation and demand for access to programs and facilities. Many of the existing building facilities are non-compliant, have reached the end of their lives and in some instances, are unsafe. The SANFL Infrastructure Strategy 2022-2032 documents the objectives for facilities improvement and refers to the recommended minimum requirements as documented in the AFL Preferred Community Facilities Guidelines (available at <https://sanfl.com.au/communityfootball/grants-fundraising-facilities/facilities/>). It is vital that any co-funding requirements meet these Guidelines to provide for best outcomes for participants. In some cases, there will be a need to slightly increase the footprint of an existing facility, even with a modest design, to meet these requirements. We believe that the resulting outcome of these projects will be a better visual outcome than the existing dilapidated buildings.

These football facilities objectives align strongly with the APLMS which supports the use of and access to the Park Lands through participation in community sport and recreation and acts as a guide to the replacement / refurbishment of existing community sports infrastructure.

SANFL, in partnership with the AFL and State Government are pleased to administer the SA Football Facilities Fund to support the investment and delivery of facilities improvements. With \$6M in funding available over the remaining 2 years, it is an opportune time to deliver projects to improve football facilities in the Park Lands. The APLMS documents an investment framework for co-investment for facility upgrades. Identified football infrastructure projects are eligible to apply to the SA Football Facilities Fund for upgrades to change rooms, oval surfaces, lighting and other supporting infrastructure.

SANFL has responded to the City of Adelaide - Adelaide Park Lands Management Strategy Towards 2036 survey and provide further supporting information to our response below.

Draft Adelaide Park Lands Management Strategy (APLMS) Towards 2036 Vision

“Located on Kurna Yerta, the Adelaide Park Lands support our environment, provide connections to nature and offer places for people to participate in events, cultural experiences and recreational activities. We will work together to enhance and protect the Adelaide Park Lands for future generations.”

Many people visiting the Adelaide Park Lands also do so to participate in sport and this should be included as well as events, cultural experiences and recreational activities. Participation in football aligns with the pillar of Management and Protection as a holistic and future focused approach for continued access and enjoyment of the Park Lands.

Football in the Park Lands contributes significantly to the goals outlined in the Strategy of Places and Spaces, and Connections and Networks.

Goal 1: Places and Spaces

Participation in football both on and off the field supports health and wellbeing outcomes. To further acknowledge this, ‘sport’ alongside ‘recreation’ should be added to the wording for Goal 1: Places and Spaces.

Football in the Park Lands contributes to the following strategies;

- Strategy 1.1 - should also include sport alongside recreational needs
- Strategy 1.3 - Football brings in visitors and tourists to the Park Lands
- Strategy 1.4 and 1.5 - Quality and fit for purpose facilities that support activation through football participation
- Strategy 1.7 - Football facility guidelines guide the requirements for regional level destination for football
- Strategy 1.8 - Through lease provisions, clubs are able to provide access to facilities for community and commercial events, hiring etc.

Goal 2: Connections and Networks

Goal 2: Connections and Networks documents the linking of the city of the suburbs, hills and coast. It is from all these places that people visit the Adelaide Park Lands, including for football, to participate in and enjoy the surroundings.

Football in the Park Lands contributes to the following strategies;

- Strategy 2.2 - Connection with the hills, coast and metropolitan open space networks ensures the connectivity and access to football facilities
- Strategy 2.4 - Football facilities that are safe, connected and well designed contributes to the overall visitation, usage and pride of the Park Lands
- Strategy 2.15 - Oval lighting can contribute to public realm lighting through use of technology for appropriate LUX levels and additional fittings.

Land that is classed as having a ‘Non-Park Lands Purpose’ being returned to a ‘Park Lands Purpose’?

It is somewhat ambiguous if the return to park lands objective is only for hardstand areas of un-utilised park lands. The potential for return of any identified ‘non-park lands purpose’ areas of land that is currently utilised directly or indirectly by football clubs needs to be clearly communicated and consulted on with those clubs to determine any impact and avoided or alternative access arrangements be granted and budgeted within that process.

We look forward to continuing to partner with the City of Adelaide in the current future delivery of football facilities in the Park Lands and welcome further detailed discussion.

Yours sincerely,

Darren Chandler
Chief Executive Officer

Submission

Draft Adelaide Park Lands Management Strategy: “Towards 2036”

<https://www.cityofadelaide.com.au/community/get-involved/consultation-aplms-tow>

The South East City Residents Association (SECRA) welcomes the opportunity to comment on the City of Adelaide’s draft paper *Adelaide Park Lands Management Strategy: “Towards 2036”*. SECRA is an incorporated voluntary body with a membership of approximately 100 residents. It was formed in 2005 to promote the interests of the residents of the South-East Precinct of the City of Adelaide and preserve and enhance the inherent character and heritage of the neighbourhood, including the adjacent areas of parklands, particularly Victoria Park. Our submission is focusses on five main issues, as follows:

1. The City of Adelaide Council and Kadaltilla/ Adelaide Park Lands Authority acknowledges that a lack of tree canopy in Pakapakanthi/ Victoria Park is a significant problem. Providing a remedy though is proving difficult.

SECRA welcomes that one of the priorities identified in the section Access & Connectivity of *Towards 2036* is to “....review opportunities for new avenue planting to provide shade for users” and that Strategy 3.13 in the section Biodiversity & Greening is to **“Seek opportunities to increase greening and tree canopy, including through community participation.”** .

In 2023, SECRA (which began in 2005 to oppose the building of a very large permanent structure in Victoria Park/Pakapakanthi to support motor sport) established, in collaboration with the City of Adelaide, the volunteer Green Pakapakanthi group (over 100 registered) to increase greening, biodiversity and tree canopy in Pakapakanthi/ Victoria Park. However, SECRA has been frustrated in this by the perceived unwillingness of the SA Motor Sport Board to allow much-needed tree planting for shade along walking and cycling paths in the park. Green Pakapakanthi’s tree planting, and enhancement of biodiversity through Miyawaki-style pocket forests- totalling over 250 trees and 1000 shrubs - has been largely confined to areas adjacent to the wetlands.

That the Adelaide 500 and Adelaide Motorsport Festival lasting four and two days respectively can determine the amount of tree canopy in a much-used local park (thousands of residents and many running and sports groups use the park each week) seems grossly unfair. More so given that the SA Motor Sport Board is increasing both the area, and length of time, of occupation, and the amount of bitumen in the park, so creating more reflected heat. The Board's occupation of the Park now extends over the summer holidays (Repco Adelaide Motorsport Festival takes place in March), when families, many without gardens, are denied access to much of the park. The Board makes no attempt to consult with residents and park users.

Time is of an essence – Adelaide's summers are becoming hotter and longer – and trees need to be planted **now** to provide shade for future Park users. SECRA supports the recent initiatives made by Council to engage constructively with the SAMSB to resolve this impasse, and SECRA volunteers stand ready to assist by planting the much-needed trees along paths.

SECRA also notes that there is no longer any ambition in this document to reduce car parking on the Adelaide Park Lands. During the car races in Victoria Park/Pakapakanthi hundreds of cars are parked on sports fields and near walking paths, which is, perhaps, why the SA Motor Sport Board will not allow tree planting in the southern as well as northern sections of the park.

2. Concern re the possibility of more and bigger buildings on the Park Lands

SECRA notes in *Towards 2036* that there appears to be no intention to limit the number or size of new buildings in the Park Lands, or to remove or reduce any of the many existing ones.

Rather, there will be:

- "Medium hubs" which may include Clubroom/multi-use facility; and
- "Large hubs" which may include: "Pavilions or other multi-use built form to service sporting clubrooms, community groups and commercial operations (cafes)"

How many of these proposed hubs will be accessible to the general public? Will these 'pavilions' (and what is considered a 'pavilion'?) open the floodgates to large permanent structures, such as what is likely to be proposed by the SA Motor Sport Board?

3. It is time to re-think Park Lands paths and how we share them.

Strategy 2.9 in the section Access & Connectivity of *Towards 2036* is to "establish shared walking and cycling paths throughout the Parks... '.

SECRA suggests that it is time to develop clear new policy about shared walking and cycling paths through the Adelaide Park Lands.

Our suggestion is based on the following.

Some paths are predominantly used by people who are in the parks primarily to relax and exercise moderately in a quiet green environment.

These people include joggers, walkers, family and friendship groups who are chatting and often 'mucking about', parents with strollers, parents with little toddlers, kids on balance bikes, people with disabilities aided by carers, tourists out for a walk, people contemplating nature but unsure of which direction to take. In short, these are people who use the park for a diverse range of reasons. They are relatively relaxed and slow users. Typically, they move between 0 and 4 kph and can be erratic.

Some paths are predominantly used by people, especially at peak times to move quickly and purposefully to a destination. We think of commuters for example.

These are people using a range of technologies to get to work to classes or to other important appointments. These devices are increasingly electrically assisted and thus faster than before. These path users use bicycles, e bikes, e scooters, e boards, etc. They can travel legally up to 25kph and most want to travel directly and quickly to a destination. Typically, these people move between 12 and 25kph.

While generally there is caution and good will among park path users, there can be annoyance, conflict and at times crash injuries. These factors are potential deterrents to all path users. The people who enjoy being relaxed and slow can feel afraid and less calm knowing fast moving people are on the path. The fast and direct group can be impeded and frustrated about getting to their destination directly. Discomfort and conflicts increase as path use by both groups increase.

Many paths are most of the time and quite reasonably used by the relaxed and slow. There are some paths, and a growing number of them, for example perimeter paths, which appeal to the fast and purposeful. Examples include newly build perimeter path along South Terrace, the east west path across Pakapakanthi from Grant Avenue to Halifax Street, the path across Pityarilla from Porter Street to South Terrace and from Porter Street towards Frome Street.

SECRA encourages consideration of the following, after a process of comparative policy scrutiny and City data gathering which could possibly guide

- Defining some paths as fast commuter paths, at least between certain hours.
- Establishing a culture of care and caution for both categories of users, based on City of Sydney best practices.
- Scrutiny of guidance about path widths, and volumes of ‘pedestrians’ and ‘cyclists’ per hour with a view that when a threshold is reached ‘cyclists’ and ‘pedestrians’ no longer share paths, but are provided with separate paths.

SECRA encourages Kadaltilla and the City of Adelaide Council to advocate where possible, for the fast and direct commuters to be allocated separated space on roads using physical barriers between them and motor vehicles and not the use of painted lines, rather than providing more hot hard paths across the Adelaide Parklands. We encourage Kadaltilla and the Council, whenever possible to resist building commuting routes in Parklands. SECRA accepts that in rare cases commuting routes across the Parklands are justifiable.

4. Is Kadaltilla/ Adelaide Park Lands Authority fit for purpose?

The Adelaide Park Lands Act 2005 was established to provide a legislative framework that promotes the special status, attributes and character of the Adelaide Park Lands; to provide for the protection of those park lands and for their management as a world-class asset to be preserved as an urban park for the benefit of present and future generations; and for other purposes.

SECRA is concerned that Kadaltilla/ Adelaide Park Lands Authority may no longer be able to do this effectively. Perhaps it could be assisted by becoming a statutory authority such as Adelaide Economic Development Agency, reporting directly to the Lord Mayor and Premier through the Capital City Committee rather than being solely advisory in nature.

5. Could the Park Lands be better served if the paradigm was changed?

Many Indigenous peoples have long emphasised the intrinsic value of nature. In 1972, the late University of Southern California law professor [Christopher Stone](#) proposed what then seemed like a whimsical idea: to vest legal rights in natural objects to allow a shift from an anthropocentric to an intrinsic worldview. This view has been taken up in Australia, particularly in the Yarra Valley.

By getting the foundation right, the above important matters brought forward by the SECRA committee members could be addressed with greater confidence.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'R Doug McEvoy', enclosed in a thin black rectangular border.

R Doug McEvoy AM

Chair, SECRA

Subject: Content Manager (CM) - FW: Call for Feedback - Adelaide Park Lands Management Strategy

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Hi Alison,

Thanks for taking my call yesterday.

I have attached comments I have provided over the past 12 months in relation to: -

- City of Adelaide review of the Community Land Management Plan for the Adelaide Park Lands; and
- Adelaide Park Lands and City Layout – Heritage Management Plan Consultation

I have also attached our Park 10 and 12 Sports Master Plan that is referenced in the Heritage Management Plan Consultation email.

Can you could confirm the feedback provided here is incorporated in the updated Adelaide Park Lands Management Strategy? I have not checked to see if either of these plans have been finalised.

I have had a quick look at the link you have provided to the current “Adelaide Park Lands Management Strategy 2015 – 2025”. Can you confirm that the Greater Riverbank Precincts including the “Health and Wellbeing” and the “Education and Culture Precinct” as presented on page 70 of this strategy will carry over into the update and be recognised in the updated strategy but the with the “Strategy” not directly applied?

This obviously covers the University’s main campus as well as our Helen Mayo North and South Buildings, the Adelaide Health and Medical School Building adjacent SAHMRI and the National Wine Centre. For the University, if the Greater Riverbank Precincts continue to be treated as they are in the current 2016-2025 Strategy I do not think we have further feedback to provide at this time beyond that included in the attached comments sent through in 2023 in response to previous City of Adelaide consultation pieces.

We will review the updated strategy when it is released but without that document are not in a position to provide further comment at this time.

CAUTION: External email. Only click on links or open attachments from trusted senders.

Hi Jeremy

Thank you for providing your feedback directly. I have a meeting with Council next week to go through the land owner submissions. We haven't seen some of the strategy documents you've referred to in your email, and will follow this up with Council.

I have anyway looked through the Park 10/12 masterplan and there does not appear to be any conflicts with the intent of the Heritage Management Plan. The National Values include the long standing use of the Park Lands for sporting recreation. Activities and development which sustain and promote the continued use for sport are supported by the Management Plan. Reference is made for new development to comply with the Council's Park Lands Building Design Guidelines which I'm sure you are already aware of.

There is also unlikely to be activities at the interface between the University and Park Lands of the scale that would impact on the Park Land values. Solid fencing is mentioned as undesirable so as to retain visual connections through the Park Lands and a 'park setting' for buildings in the area. The University has progressively moved to reconnect the campus with the Park Lands by fence removal over the past decades so I don't foresee a conflict there either.

The 'Adelaide BioMed City' zone is outside of the boundaries of the National Heritage Listing, and therefore excluded from the Plan. Of course, better access to the Park Lands from those areas is encouraged!

Kind regards,

Stephen Schrapel PhD MICOMOS

Subject: FW: Adelaide Park Lands and City Layout - Heritage Management Plan Consultation

Hi Stephen,

Andrew indicated you are working on this one.

I have attached a response I have provided to ACC as part of their Heritage Management Plan Consultation.

I did talk to Amanda a couple of weeks ago about this, there appears to be a number of streams of work occurring both internally and externally on this at Council and I was advised the University and its interfaces with the city were not a part of the work being undertaken.

As a result I have focused on the parklands as that is where we do have a long term lease as well as a masterplan that was presented to APLA in 2020.

I have no idea how all the previous consultation elements will be brought into the work you are doing if there is further direct consultation you are looking for in relation to this exercise please feel free to reach to me if there are elements that may affect or impact the University.

Regards,

Jeremy Kwan

Subject: FW: Adelaide Park Lands and City Layout - Heritage Management Plan Consultation

Hi Amanda,

As discussed when you called a couple of weeks ago please find attached our Park 10 and 12 Masterplan as presented to APLA on 4 June 2020. This masterplan was developed to inform the University as tenant, ACC as landlord and APLA of our vision for the sports fields we hold a lease / licence for at Parks 10 and 12. My understanding from that meeting was this was generally supported and from a University perspective this is consistent with the way we see sport being facilitated and supported through the provision of appropriate amenities across all sports fields across the parklands.

The primary objective of the University in relation to Parks 10 and 12 is the provision of sporting facilities for use by Adelaide University Sport and the Community. The big issues for us currently include:-

- The ability to provide appropriate compliant all gender facilities that meet the requirements of the various sporting clubs that use the parklands – Unfortunately this is a challenge if we are not able to extend or redevelop existing

building's with an increased footprint.

- Sports field Lighting, this is area we are looking to improve and upgrade to increase utilisation while hoping to reduce light spill as we work to transition over from metal halide lights to LED

As noted below the University has been involved in a number of consultation processes relating to the city and the parklands and has contributed with time, resources and funding to develop the Common Development Framework (developed in collaboration with SAHMRI, UniSA and the State Government) to identify common technical and aspirational outcomes for development in the South Australian Health and Biomedical Precinct. As well as participation in number of working groups looking at the way the University connects to the Riverbank Precinct, our links to Lot Fourteen, as well as links and access to and around the Biomedical Precinct. A number of years ago we also contributed to the planning of the North Terrace frontage of the Heritage precinct between Kintore Ave and From Road and we are long term users and tenants at Park 10 and 12 and of the National Wine Centre.

I would appreciate being updated as to how these various planning and consultation pieces feed into the work you are currently undertaking? I feel they all share a common purpose in looking to unlock potential through understand longstanding challenges faced by many users of the city and parklands and do hope that the outcomes from these earlier exercises is not lost going forward.

Happy to discuss further at any time.

Regards,

Jeremy Kwan

Subject: Adelaide Park Lands and City Layout - Heritage Management Plan Consultation

Hi Amanda,

Thank you for the invitation to provide a submission as part of the consultation process you have commenced for the Heritage Management Plan.

Given the scale of the University as a landowner in the city and as a long term tenant / user of the parklands I am wondering if it may be easier for us to meet with you and your consultants to provide feedback / documentation for consideration / incorporation?

We do have various planning documents that we have developed such as our public realm framework which includes our thinking around linkages to, through and around our campus. The Park 10 and 12 masterplan that we presented to APLA around 3 years ago. Conservation Management Plans of Heritage buildings and structures on our campus including a number on campus boundaries (a number of which are on campus boundaries) and the Common Development Framework that we developed in collaboration with SAHMRI, UniSA and the State Government to identify common technical and aspirational outcomes for development in the South Australian Health and Biomedical Precinct.

Additionally as I am sure you are aware there have been a number of working groups convened that we have contributed to looking at the way the University connects to the Riverbank Precinct, our links to Lot Fourteen, as well as links and access to and around the Biomedical Precinct. A number of years ago we also contributed to the planning of the North Terrace frontage of the Heritage precinct between Kintore Ave and From Road and we are long term users and tenants at Park 10 and 12 and of the National Wine Centre.

Happy to have a discussion about this especially if I am overcomplicating the planning process you are undertaking.

Regards,

Jeremy Kwan

01 | EXECUTIVE SUMMARY

Bullrush Park/Warnpangga (Park 10) and Red Gum/Karrawirra (Park 12) located in the Adelaide Park Lands are key sporting sites for the University of Adelaide. Multiple sports are played on these grounds all year round and attracts approximately 300,000 people to the precinct annually. Both Park 10 and 12 are leased from the Adelaide City Council and managed by AU Sport on behalf of the University of Adelaide.

The findings from site inspections and consultants with the site users indicated the following:

1. Consolidation of all football oval to Park 12 and all soccer pitches to Park 10 is needed to provide a more synchronized precinct.
2. Facilities and amenities are in need of an upgrade and are currently not meeting current sports compliance standards especially in the provision of female friendly spaces. All sports across the site have female participants but facilities especially in Park 12 do not support this. The Master Plan will also need to allow for future growth in all sports across the precinct.

A Master Plan has been developed following consultation with the University, current site users and the City of Adelaide.

The proposed Master Plan for Park 10 and 12 includes the following key elements:

- Reconfigure Park 12 to allow for 3 AFL/Cricket ovals
- Reconfigure Park 10 to allow for multiple sports including additional soccer pitches
- 4 x new hard surface tennis courts
- Upgrade of existing amenities in Park 10 & 12 grandstands
- New lighting to support changes in field configurations
- New change room facilities on Park 12 to support female players and continued growth of the clubs

A staged approach is recommended in this report to assist with the implementation of the Master Plan over the next 5+ years. It is important to note that this Master Plan does not commit the University or Council or any other organisation to undertake works. The Master Plan is also subject to the necessary planning and Council approvals.

The Master Plan is provided to guide improvements and attract funding when resources become available and in accordance with other University priorities.

02 | INTRODUCTION

This Master Plan aims to develop a plan that will provide a coordinated and strategic planning approach to the provision and development of community, educational, sport and recreation infrastructure. This Master Plan cover both Bullrush Park/Warnpangga (Park 10) and Red Gum/Karrawirra (Park 12) located in the Adelaide Park Lands (see adjacent map).

The Master Plan also undertook a review of the existing infrastructure and planned and designed new facilities and amenities that have a focus on female friendly facilities to support the current and future increase in participation which the current facilities can not support. The facilities will be designed in line with the Female Friendly guidelines.

Both Park 10 and 12 are leased from the Adelaide City Council and managed by AU Sport on behalf of the University of Adelaide. The fields are available for use by groups within the University or by community clubs and organisations, for which a charge may be made depending on use.

03 | SITE USERS

Multiple sports are played on these grounds which sees over 300,000 people using the site each year.

The following sports are played at the site:

- Adelaide University Football Club
- Adelaide University Cricket Club
- Adelaide University Soccer Club
- Adelaide University Ultimate Club
- Adelaide University Touch Football Club
- Adelaide University Lacrosse Club
- Adelaide University Lawn Tennis Club

A snapshot of each club is provided on the following pages including member numbers, usage, site issues and opportunities. This information was used in the development of the Master Plan for Park 10 and 12.

Adelaide University Football Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
180	100	0	0	280

- **Change to active membership over the next 5 years:**
Increasing by more than 20%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Grandstand and 2 change rooms Park 10, Grandstand and 2 change rooms Park 12 during winter 6 months
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Good size ovals but they divide the club by being separated by distance
 2. Central location in Adelaide
 3. Grandstand park 12
- **What are the top 3 current issues or constraints associated with the park?**
 1. Require extra oval at park 12 (3 oval proposal)
 2. Require extra change facilities at park 12 to meet unisex standards for the women
 3. Require social space at park 12

Schedule of use

	Morning (6am to 12pm)	Afternoon (12pm to 4pm)	Early Evening (4pm to 7pm)	Late Evening (7pm to 11pm)
Monday			Park 12 Football training 6-8	
Tuesday			Park 10 and 12 Football training 6-8	
Wednesday			Park 12 Football training 6-8	
Thursday			Park 10 and 12 Football training 6-8	
Friday			Park 12 some Female matches	Park 12 some Female matches
Saturday	Park 10 and 12 some male matches	Park 10 and 12 Male matches	Park 12 some Female matches	
Sunday		Park 12 Female matches	Park 12 some Female matches	289

Adelaide University Cricket Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
150	30	0	0	180

- **Change to active membership over the next 5 years:**
Increasing by up to 20%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Change facilities (10 & 12), Turf/Hard practice nets, removeable sightscreens, scoreboards, Grandstand Long Room/Bar.
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Park 10 – Quality of ovals
 2. Park 10 – Quality of training facilities
 3. Park 10 - Location
- **What are the top 3 current issues or constraints associated with the park?**
 1. Parking
 2. Very poor changing facilities
 3. Lack of up to date facilities in Lon Room bar area

Other comments:

- The ovals redevelopment is not a priority of AUCC but we fully supportive of the plan being led by AUFC.
- Upgrade of facilities, and addition of female changing facilities is a priority.
- AUCC need to ensure the quantity & quality of our turf nets if there is any relocation. These are of very high standard and are a major asset and recruitment/retention tool. They received a significant upgrade & investment approx. 4-5 years ago. Any relocation would need to factor in a 'bedding in' period.

Schedule of use

	Morning (6am to 12pm)	Afternoon (12pm to 4pm)	Early Evening (4pm to 7pm)	Late Evening (7pm to 11pm)
Monday				
Tuesday			50 - 5.30pm – Turf nets, Oval 1 & hard wickets at southern end	
Wednesday			20 Turf nets	
Thursday			70 - 5.30pm – Turf nets, Oval 1 & hard wickets at southern end	
Friday			25 Turf nets	
Saturday	Park 10 – 1 st grade (11am)	Park 10 – 3 rd Grade (1pm)	Ovals 1 & 2 – 1 st & 3 rd Grade	
Sunday		Park 10 – Women's Oval 1 & 2		290

Adelaide University Soccer Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
240	105	140	110	595

- **Change to active membership over the next 5 years:**
Increasing by up to 20%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Graduate clubhouse, women's changerooms, park 10 grandstand and off oval training areas.
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Centralised Location
 2. Proximity to Club House
 3. Good Parking
- **What are the top 3 current issues or constraints associated with the park?**
 1. Light Safety and travel safety
 2. Non- Authorised Users
 3. The condition of the pitches

Other comments:

The scheduling of off-season, pre-season and during season is extremely complex. The fact that AUSC has circa 600 playing members and more than 30 teams playing at all levels (including Juniors), means that that the times and location can change given the condition of the pitches and weather circumstances.

Schedule of use

	Morning (6am to 12pm)	Afternoon (12pm to 4pm)	Early Evening (4pm to 7pm)	Late Evening (7pm to 11pm)
Monday	Dependent on Scheduled sessions	Dependent on Scheduled sessions	Dependent on Scheduled sessions	All Park 10 & 12
Tuesday	Dependent on Scheduled sessions	Dependent on Scheduled sessions	Dependent on Scheduled sessions	All Park 10 & 12
Wednesday	Dependent on Scheduled sessions	Dependent on Scheduled sessions	Dependent on Scheduled sessions	All Park 10 & 12
Thursday	Dependent on Scheduled sessions	Dependent on Scheduled sessions	Dependent on Scheduled sessions	All Park 10 & 12
Friday	Dependent on Scheduled sessions	Dependent on Scheduled sessions	Dependent on Scheduled sessions	All Park 10 & 12
Saturday	All Park 10 & 12	All Park 10 & 12	All Park 10 & 12	
Sunday	All Park 10 & 12	All Park 10 & 12	All Park 10 & 12	

Adelaide University Ultimate Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
30	10	0	0	40

- **Change to active membership over the next 5 years:**
Increasing by more than 20%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Graduates Clubhouse about once a year for social events/presentations
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Park 10 is optimally located and accessible to people driving/walking/riding
 2. Fields have lights
 3. Toilets within reasonable distance
- **What are the top 3 current issues or constraints associated with the park?**
 1. Drinking fountains too far away from neck fields
 2. Neck space is sometimes too small to accommodate the number of players. The fields are uneven at one end of the neck limiting space, there are also metal plates that impact the fields too.
 3. Recently trees have started blocking lights causing dark spaces around the fields.

Other comments: none provided

Schedule of use

	Morning (6am to 12pm)	Afternoon (12pm to 4pm)	Early Evening (4pm to 7pm)	Late Evening (7pm to 11pm)
Monday				
Tuesday			6-8pm each week at the "Neck" fields	
Wednesday				
Thursday				
Friday				
Saturday				
Sunday			3-5pm occasionally run pick up games at the "Neck"	

Adelaide University Touch Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
35	25	0	0	60

- **Change to active membership over the next 5 years:**
Increasing by up to 20%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Graduates clubrooms for meeting and events as well as storage of club materials. Occasionally use the park 10 grandstand for changerooms and toilets but they are too far away and often locked.
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Convenient location to the Uni
 2. Able to hold club functions within the clubrooms with a liquor license (although ends at 10pm which is limiting)
 3. Football/Cricket facilities are good.
- **What are the top 3 current issues or constraints associated with the park?**
 1. Field/Ground Quality – The grass is patchy and uneven leaving us prone to injuries, the fields are poorly lit around the edges also leaving us prone to injuries in shadows, and we are never able to get a pitch marked out leading to discrepancies with other clubs over who gets to use which area.
 2. Proximity to facilities – We primarily use ‘the neck’ meaning it’s a long trip to the toilets and in particular there are no nearby water taps or similar, and this is partially made worse by other clubs claiming more and more area pushing us further from the clubrooms.
 3. There is no ‘booking schedule’ visible to clubs. Bookings are made through the AU Sport office however we don’t know if there are other clubs in the area before, after, or at the same time as us, or which area they’re supposed to be using. This also applies to the graduates clubhouse facilities.

Other comments: none provided

Schedule of use

	Morning (6am to 12pm)	Afternoon (12pm to 4pm)	Early Evening (4pm to 7pm)	Late Evening (7pm to 11pm)
Monday				
Tuesday			The Neck Approx 20	The Neck Approx 20
Wednesday			The Neck Approx 30	The Neck Approx 30
Thursday

Saturday				
Sunday				

Adelaide University Lacrosse Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
26	24	0	2	52

- **Change to active membership over the next 5 years:**
Increasing by up to 10%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Graduates Clubhouse and storage shed out the back, changerooms occasionally and basement storage for equipment/club gear.
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Central location
 2. Modern facilities
 3. Parking and public transport readily available
- **What are the top 3 current issues or constraints associated with the park?**
 1. Lighting – impacts training as not adequate enough for night games
 2. Sharing fields with soccer – makes organising fixtures hard (both sports played on Saturdays)
 3. Poor drainage on the fields leave the club unable to train after heavy rain – surface maintained for games.

Other comments: none provided

Schedule of use

	Morning (6am to 12pm)	Afternoon (12pm to 4pm)	Early Evening (4pm to 7pm)	Late Evening (7pm to 11pm)
Monday				
Tuesday			Training 6-8pm. Men's (10-15) and women's (10-15). East and west ends of graduates oval, just off the field to maintain surface.	
Wednesday				
Thursday			Training 6-8pm. Men only (10-15). Alternating East and West ends of graduates oval.	
Friday				
Saturday	Games – Field 1 (in front of the clubrooms) and field 2 (along the neck) can be from 11.30am – 4.30pm depending on fixtures.			
Sunday				

Adelaide University Lawn Tennis Club

Club Numbers:

Senior Male	Senior Female	Junior Male	Junior Female	Total Members
28	16	0	0	44

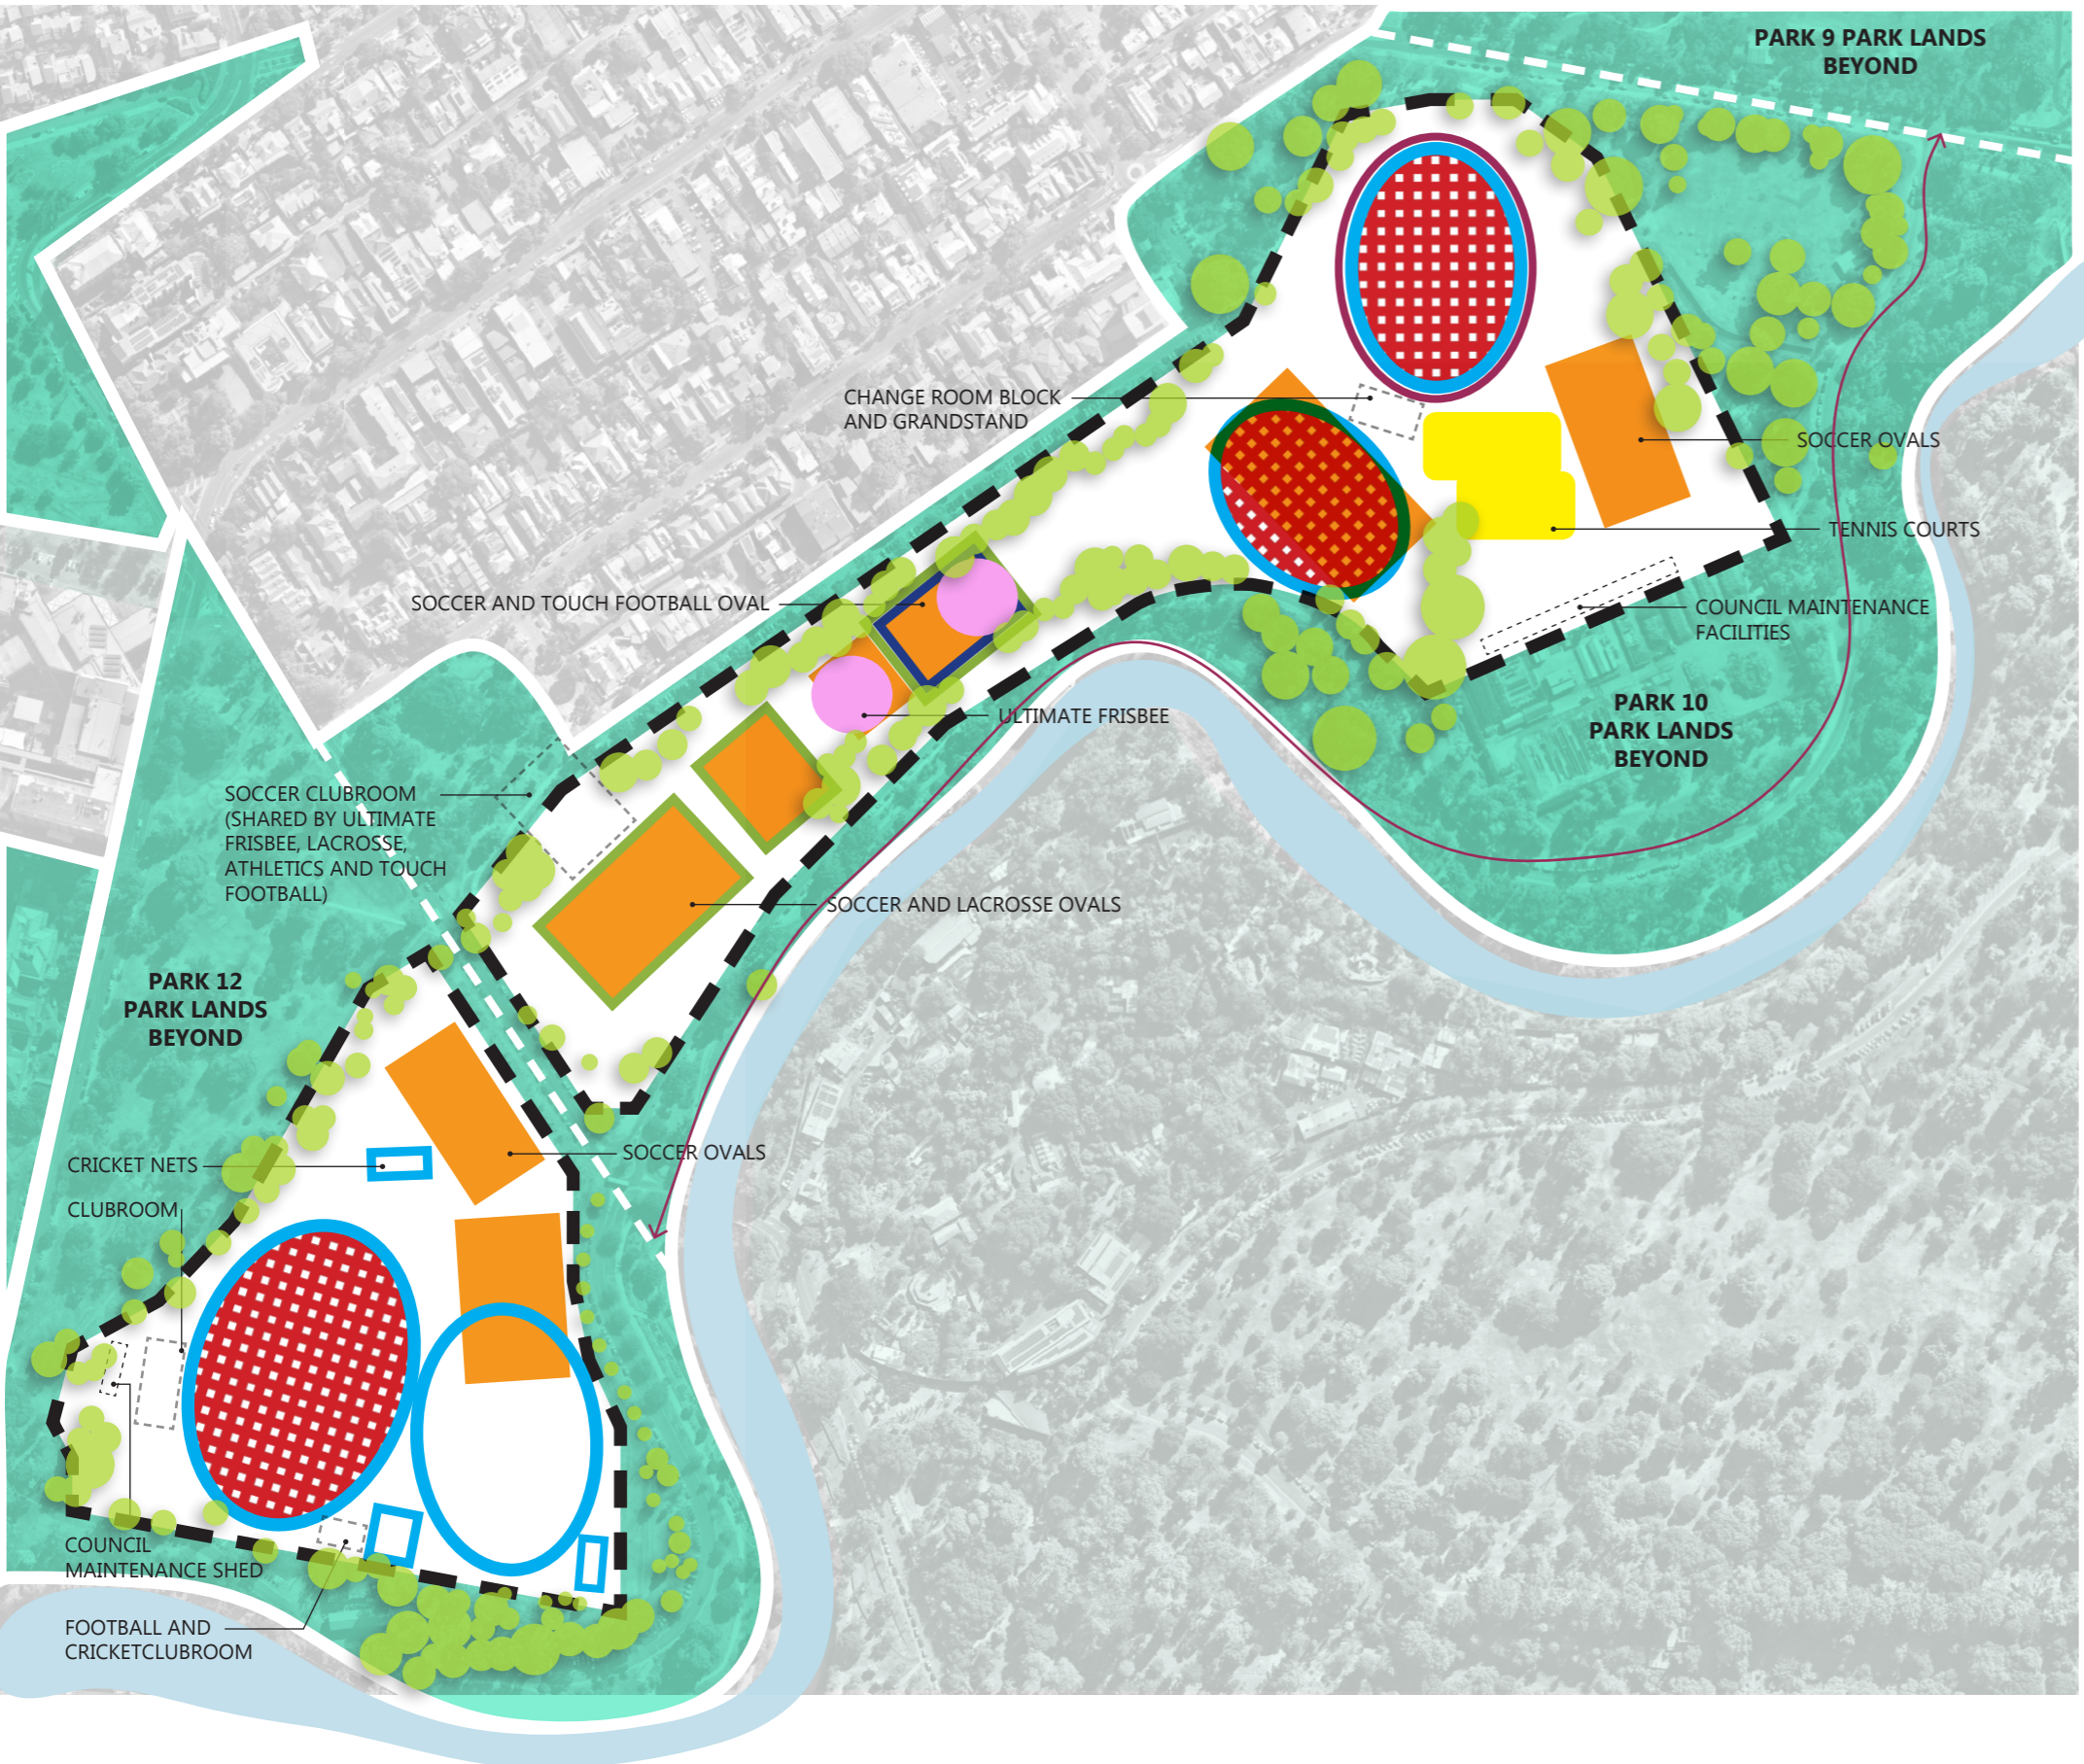

- **Change to active membership over the next 5 years:**
Increasing by up to 20%
- **Apart from the ovals, what other amenities/facilities does your club use on either Park 10 and/or 12?**
Park 10 grandstand - visitors room for toilet facilities
- **What do you think are the 3 key strengths of Park 10 & 12?**
 1. Central location
 2. Lights (for other sports apart from tennis)
 3. Well maintained fields and closeness to University.
- **What are the top 3 current issues or constraints associated with the park?**
 1. Parking on weekends
 2. A separate clubhouse for tennis
 3. Hard courts for winter play

Other comments: Lawn Tennis season (October to April), the times do vary in lines with groundmen's directions. The time listed in the table are the minimum times, however if the courts are available for practice, Friday, Saturday and Sunday afternoons are also used by members, depending in their availability. For the winter months, hardcourts re hired from Tennis SA, close to the University campus.

08 | FINAL MASTER PLAN

The final Master Plan has been developed following consultation with the University, current site users and the City of Adelaide. The Master Plan reflects a long-term vision for the site, responding to the needs of both the University and site users. The following plans outline key infrastructure improvements, new oval configuration and a staged approach to the development of Park 10 and 12.

In summary, the Master Plan proposes the following key improvements:

- Reconfigure Park 12 to allow for 3 AFL/Cricket ovals
- Reconfigure Park 10 to allow for multiple sports including additional soccer pitches
- 4 x new hard surface tennis courts
- Upgrade of existing amenities in Park 10 & 12 grandstands
- New lighting to support changes in field configurations
- New change room facilities on Park 12 to support female players and continued growth of the clubs

It should be noted that the turf wickets on Park 12 will stay in their current location as directed by the Adelaide University Cricket Club and University. The 2 synthetic wickets in this location will be removed and will be relocated. This will mean that the cricket netting infrastructure will need to be removed after each cricket season to allow for the football season. See Master Plan for more details.

- 2 EXISTING AU MAINTENANCE SHED
- 3 ADDITIONAL STORAGE SHEDS
- 4 NEW PUBLIC TOILETS
- 5 NEW RECONFIGURED ENTRY + CAR PARKING
- 6 RETAIN EXISTING TURF WICKETS
- 7 EXISTING SYNTHETIC WICKETS WITH 2 X NEW
- 8 OPTION TO DEMOLISH EXISTING BUILDING AND PROVIDE NEW UNISEX CHANGEROOMS AT NEW LOCATION (APPROX 150SQM)
- 9 PLANTED BUFFER
- APPROX EXISTING LIGHTING LOCATIONS
- LIGHTS TO BE RELOCATED

09 | IMPLEMENTATION - STAGING PLAN

RECOMMENDED STAGING PLAN:

- EXISTING STAGE 1 | 0 - 6 MONTHS:**
 - Construct and remove the required lighting poles as per the CME lighting plan.
 - Install AFL goal posts, soccer nets and other match day infrastructure as required to enable match day games on Park 10 & 12.
- STAGE 2 | 6-12 MONTHS:**
 - Remove the 2 current synthetic practice wickets on Park 12 and construct 2 new wickets either side of the current training facility located between ovals 1 & 2.
- STAGE 3 | 1-3 YEARS:**
 - Upgrade the current change rooms in the Park 12 Grandstand to comply with Unisex standards and relevant sports compliance guidelines.
 - Upgrade the change rooms and supporting amenities in the Park 10 Grandstand to support the site users to the relevant sports compliance guidelines.
- STAGE 4 | 3-5 YEARS:**
 - Either upgrade the current change rooms on Park 12 (between ovals 1 & 2) or construct a new change room facility on the western side of the site which includes unisex change rooms and storage facilities (new facility recommended)
 - Remove and construct new hard surface tennis courts on Park 10 in line with Tennis Facility compliance guidelines.
- STAGE 5 | 5+ YEARS:**
 - Upgrade and construct remaining facilities in Park 12 including new road access, car park, public toilets and additional storage sheds.

Kadaltilla / Adelaide Park Lands Authority

kadaltilla@cityofadelaide.com.au

12 August 2024

Dear Sir/Madam,

Adelaide Park Lands Management Strategy – Towards 2036

Walking SA welcomes the City's attention to this extremely important asset. We note that the Strategy is a high level, strategic document, identifying objectives that Council wishes to see achieved over the next ten years. As such, Walking SA finds much to commend. We will use the document to elaborate on some of the strategies, identifying more specific measures that we would like to see.

These measures can be categorised under the draft strategies 2.1, 2.2 (along with 2.14), 2.9 and 2.15. But as a body that encourages walking into the City we have a strong interest in overcoming the barriers from neighbouring suburbs to our Park Lands, a matter that is not addressed in Towards 2036. We address this issue at the end of our submission.

Strategy 2.1 Improve the Adelaide Park Lands Trail linking all parks and providing a pleasant and convenient cycling and walking route.

The Park Lands Trail is a wonderful feature of the Park Lands, lending itself to both recreational and transport-related use.

An obviously important element is providing safe and convenient crossings of the roads between the parks. Pedestrian priority crossings (wombat or zebra) or pedestrian actuated crossings (PAC) should be a key feature of the trail at all road crossings. Also, crossings should be made safer by a consistent 50km/h (or lower) speed limit on the roads that pass through the Park Lands and the removal of any remaining slip lanes on these roads.

We also propose several possible route changes for the Park Lands Trail:

- Cross the Torrens using the bridge near the Bonython Park kiosk and adopt the road above the northern/ eastern river bank in John E Brown Park. This would avoid fast commuter cyclists that use the existing Park Lands Trail alignment on the southern/western side, as well as provide a much wider pathway that would make any sharing by pedestrians and cyclists more comfortable.
- If possible, avoid the crossing of Port Road at Thebarton. This can entail a 4+ minute wait to cross the road, in two stages. Our preference would be to cross at Gaol Road, though the future of the Gaol Road route is not clear, given the construction of the new Womens and Children's Hospital at that location.

Supported by

Government of South Australia
Office for Recreation, Sport and Racing

- The serenity of the route would be enhanced if an east-west path were created south of Veale Gardens (Park 21), and through Golden Wattle Park (Park 21W) obviating the need to direct the path to South Terrace and then to Greenhill Road to cross Goodwood Road. Obviously, this would also need mid-block crossings of Sir Lewis Cohen Avenue and Goodwood Road.

Other ways that the Park Lands Trail can be enhanced (Strategy 2.14) is through the addition of rest points, a consistent width and quality of pavement and wayfinding signage and other treatments at intersections with other paths.

But the best value for money enhancement is simply to tell people about the Park Lands Trail. It is difficult to find out about the trail if you do not know of its existence and its name beforehand.

Strategy 2.2 Connect the Adelaide Park Lands with the hills, coast and metropolitan open space network.

Clearly, the River Torrens Linear Park, with its associated paths, is the key asset here. Along with Coast Park, it is the most popular park for walking in the metropolitan area.

No doubt Council is already aware of those routes that are very popular with both cyclists and pedestrians, with the result that there is sometimes conflict between the two types of users.

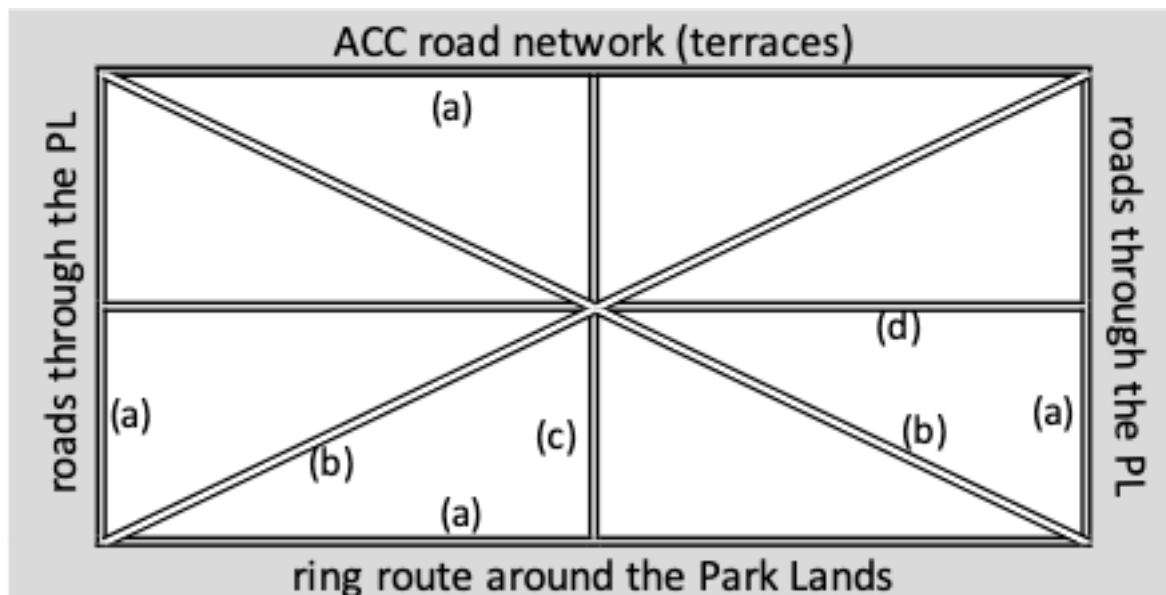

While we would appreciate a reluctance to further bituminize some of the most attractively-landscaped parts of the City, we think that some locations justify a duplication of paths, to separate the two modes.

The southern side of the Torrens between the weir and the underpass of the railway already exhibits this. We think the pattern should be extended further east, with a duplication of the path between the weir and the Pulteney Boat Club. There is already an informal second path that could be easily formalized.

And just to the east of the Pulteney Boat Club, the path both drops and narrows to pass under the Montefiore Road bridge. This creates a dangerous situation for both pedestrians and cyclists. While the terrain probably precludes duplication, more space is possible if the path were either cut into the bank or cantilevered over the water.

Strategy 2.9 Establish shared walking and cycling paths throughout the Parks that include safe connections and crossing points.

In the adoption of Strategy 2.9 we would like to see the City think of Park Lands access in terms of a "Union Jack" model.

“Union Jack” model of Park Land path network

- a) Paths along the edge of each park, alongside the roads that border and define the park.
- b) Diagonal paths, providing the most direct walking route to and from the far corners of the park
- c) A path linking the edges of the ACC road network (South Terrace, West Terrace, Barton Terrace, LeFevre Terrace, etc.) with neighbouring suburban road network through the centre of each park
- d) A path about halfway between the ACC terraces and the ring route, linking the parks (typically, the Parklands Trail)

We also suggest that any intersection of paths near the centre of a park would be a likely location for a small hub referred to in Events and Space theme of the draft strategy, or some other attractive feature that would help give the park a specific character.

We stress that this is a very basic, conceptual model only. It will obviously be modified by factors such as topography, existing park use (e.g. ovals) landscaping (edge of bushland), road network. We endorse Strategy 2.10: Create a path network within each park that complements the landscape character and desired use of the park. Not all of the paths would be appropriate for all parks. Looking at the existing path network, Rundle Park (Park 13) probably exhibits this model the best in that it has good boundary paths, diagonal paths, paths connecting Dequetteville Terrace and East Terrace, and paths connecting Rundle Road and Botanic Road. But even here one needs a good imagination to see the path network as a Union Jack!

Park path network (source, Google Maps)

We simply suggest that it would be fruitful, when planning pedestrian access through the Park Lands, to think in terms of boundary paths, diagonal paths, paths linking ACC streets with neighbouring suburban streets, and paths linking the parks.

The diagonal paths (b) and the path connecting streets in the inner suburbs with streets in the City (c) have an obvious utility in shortening journey length. The lateral path (typically, the Park Lands Trail) has also demonstrated its value and popularity in linking the Parks.

The boundary paths perhaps need more justification. The Park Lands offer serenity and beauty, but at night lack of lighting and isolation creates fear, rendering the Park Lands a barrier for active transport. We therefore need well-lit path alongside the roads, where people can feel comfortable walking between the City and the inner suburbs.

Of course many of these boundary paths already exist and we are pleased to see current work on Hutt Road to this end. But there are missing paths that we hope will be constructed in the future.

In particular, we also strongly support the concept of a boundary active transport route along the outer edge of the Park Lands. We are pleased to see this being brought to fruition on the eastern side. Indeed, the new paths alongside Dequetteville Terrace provide a model of what a good shared use path should look like.

A similar exercise should be easily possible on the western side, using the service road created for the electrification of the railways. This would provide a safe, pleasant connection between Wayville, Forestville and Keswick at the southern end, and the medical and educational precinct at North Terrace. In addition along the length of the Greenhill Road edge connecting Anzac Highway and Fullarton Road

for people walking and cycling east-west, as well as to improve connectivity from the neighbouring councils and the Park Lands by foot and bike.

Strategy 2.15 Provide lighting to support safe movement throughout the Adelaide Park Lands balanced with preservation of environmental values and biodiversity.

WalkingSA welcomes the lighting of Park Lands paths, particularly those that are used by people walking to and from the suburbs and their place of work or study in the city. The wording of the draft strategy 2.15 suggests competing objectives that will at times militate against the lighting of paths.

We make two suggestions in this regard. First, paths alongside the roadways (see (a) in our "Union Jack" model) above, will be lit. Ideally, additional pedestrian lights directed over the paths could share the existing lamp posts. Second, where lighting is not suitable, council could consider the installation of either solar-powered cat-eyes, or glow-in-the-dark paint to demarcate the edge of the paths, or even the path as a whole in some cases.

A final note

Finally, we think an important aspect of access that doesn't have a home among the strategies identified in the draft document is improving active transport access between the City and neighbouring suburbs. Here the Council should be working to enhance those aspects of the Park Lands that contribute to this access and to minimize those aspects that detract. We have already discussed lighting and boundary paths as an important element to overcome the barrier that the Park Lands may pose at night.

The railway is obviously a huge barrier to accessing the Park Lands from the west. There is no crossing at all for 1.3km, between Anzac Highway and Sir Donald Bradman Drive. And of course, there is the barrier between the North Adelaide Park Lands and Bonython Park, where the old pedestrian crossing has still not been re-instated.

Apart from the railway, the arterial roads that border the outer edge of the Park Lands form the biggest barrier to accessing the Park Lands from the neighbouring suburbs. Within the ACC, West Terrace is obviously a huge barrier.

It is a kilometre between the lights at the end of Grant Avenue and the lights at the intersection of Dequetteville Tce and Bartels Avenue. People trying to cross the ring road from Kent Town south of Bartels also have to deal with an unnecessary number traffic lanes, as the two lanes in each direction south of the roundabout become three lanes southbound and four lanes northbound.

Council should be working with its neighbouring councils to pressure the State government to encourage people to walk to this most precious asset.

Yours sincerely,

Sharon Kelsey
Executive Director
Walking SA
