Quarter 4 Update**

CITY OF
ADELAIDE

Purpose of the Regional Subsidiary

Brown Hill Keswick Creek - Quarter 4 Update

The Cities of Adelaide, Burnside, Mitcham, Unley and West Torrens have worked collaboratively over several years to form a Section 43 Committee Under the Local Government Act 1999 to develop a Stormwater Management Plan (SMP) aimed at mitigating flood risk within the catchment.

The Subsidiary has a shared vision of becoming 'water sensitive cities' by

- minimising flooding
- harnessing the potential of stormwater to overcome water shortages,
- improve waterway health,
- enhance city landscapes
- be utilised as a valuable community resource.

The vision is underpinned by six key objectives for Adelaide stormwater management:

- Protection from flooding
- Quality of runoff and effect on receiving waters
- Beneficial reuse of stormwater runoff
- Protection of watercourses and riparian ecosystems
- Effective planning outcomes
- Management of stormwater infrastructure

Quarter 4 Updates

The key projects underway include:

- Reference Design for sub projects – commenced in May 2021
 - Lower Brown Hill Creek Upgrade
 - Keswick Creek Flow Diversions
 - Upper Brown Hill Creek Upgrade
 - Glen Osmond Creek Minor Upgrade
